SESSIONAL PAPERS.

ARRANGED NUMERICALLY AND IN PARTS.

CONTENTS OF PART No. 1.

- No. 1..... Public Accounts for nine months, ending 30th September, 1868.
- No. 2..... Annual Report of the Chief Superintendent of Education, for the year 1867.
- No. 3..... Annual Report of the Inspector of Asylums and Prisons, for the year 1867.
- No. 4..... Report of the Chancellor, Vice-Chancellor and Senate of the University of Toronto, for the year 1867, made under provision of the C. S. of U. C., Cap. 62. [*Not printed.*]
- No. 5..... Municipal Returns of Assets, Liabilities, Revenue and Expenditure, made in accordance with the provisions of the Municipal Act. [*Not Printed.*]
- No. 6..... Return shewing the number of Licenses granted since 1860, to cut timber on the wild lands of this Province, the persons to whom the same have been granted, the extent of territory embraced in each of the said licenses, the price agreed to be paid for the same, the amount at present due to the Government, the conditions of said licenses, and the names of all persons at present recognized by the Government as holding any timber licenses. Also, so far as practicable, what portions of the said lands are fit for agricultural purposes.

CONTENTS OF PART No. 2.

- No. 7..... Report of the Commissioner of Crown Lands, for the year 1867
- No. 8..... Correspondence between the Government of Ontario, and the Government of Canada, and between the Government of Ontario and the Government of Quebec, on the subject of Immigration, and the Public Debt, in so far as relates to the Public Debt.
- No. 9..... Correspondence between the Government and any of the Judges on the subject of the tariff of Sheriffs' Fees, and a copy of the said tariff.
- No. 10... Return prepared by the Clerk of the Crown in Chancery from the Records of the Elections to the House, showing the aggregate number of votes polled for each candidate in each Electoral Division, in which there has been a contest, and the total number polled in each such division, and the number of votes on the Voters' List of the same respectively, and the population of each constituency as shown by last census.
- No. 11... Special Report of the Chief Superintendent of Education, on Institutions for the Deaf, Dumb and Blind, in Europe and the United States of America, with appendices and suggestions for their establishment in this Province. [*Not Printed.*]
- No. 12... Report of the Commissioner of Crown Lands, for 1867. [*Part of Sessional Paper No. 30. Printed with No. 12.*]

- No. 13... Statement shewing in detail all the Surveyed Lands unsold and now owned by the Province of Ontario, giving the number of the Lots and Concessions, with the names of the Counties and Townships in which the said lands are situated.
- No. 14... Petition of Mary Baldwin and daughters praying for aid.
- No. 15... Copies of all Tenders and Contracts relating to the erection of Government House. [*Not printed.*]
- No. 16... Correspondence between the Government of Ontario, and individuals or companies interested, on the subject of the Mining Act, and of all Orders in Council, or Departmental Orders, under that Act.
- No. 17... Correspondence between the Government of Ontario and the Government of the Dominion of Canada, respecting the order of Official Precedence: (to which is appended correspondence with respect to the saluting of Lieutenant-Governors.)
- No. 18... Copy of the Petition presented to the late Parliament of Canada, by John T. Ross, M. P., from numerous Agriculturists residing in the different Townships of the County of Dundas, praying for aid to deepen the Nation River; Also, Report of the Committee upon said Petition, with all correspondence appertaining thereto.
- No. 19... Correspondence between the Governments of Ontario and Canada, touching the power of the Legislature of Ontario to enact laws punishing by imprisonment breaches of Provincial Laws, and generally touching the powers of the Legislature of Ontario.
- No. 20... Return shewing the number of persons who have located in the respective Townships, under the provisions of the Free Grant system, together with the additional number of acres, if any, purchased by such locatees.
- No. 21... Return of the Principal and Interest due on Crown, Clergy, Grammar and Common School Lands respectively; the Principal and Interest to be given in separate columns.
- No. 22... Copy of any Petition or Report made to the Government by the Trustees of the Toronto General Hospital, touching the affairs of the said institution.
- No. 23... Correspondence between the Government and the Judges, on the subject of the Law of Evidence.

CONTENTS OF PART No. 3.

- No. 24... Correspondence between the Government and the Judges touching the Division Court. [*Not printed.*]
- No. 25... Estimates for the year ending 31st December, 1869.
- No. 26... Return of the names of those Magistrates in each County who have duly qualified.
- No. 27... Report of the Commissioner of Public Works of the Province of Ontario, for 1868.

- | | |
|-----------|---|
| No. 28... | Return of all moneys collected (to date) from the several counties of this Province by the sale of the Statutes of Ontario to Magistrates; (with which is embodied a statement of the distribution of Statutes generally.) |
| No. 29... | Return from the Principal, the Registrar and the Boarding House Superintendent, respectively, of Upper Canada College. |
| No. 30... | Correspondence between the Commissioner of Agriculture of this Province and the Board of Agriculture and the Agricultural Associations, or with any other person, in relation to the accounts of the said Board of Agriculture and Agricultural Associations, together with the receipts and expenditure for the years 1866 to 1868 inclusive. [<i>Part of this Return printed with No. 12.</i>] |
| No. 31... | Return of the number of Tavern Licenses issued in each County, City, Town or Incorporated Village in detail: also, the name of the party to whom issued, and the name of the issuer for each County, with the amount received from such Licenses to date. |
| No. 32... | Correspondence between the Government and Mr. John Carroll, late Crown Land Agent of the Burleigh Road, since the 1st of January, 1867; and also, copies of all accounts, or memorandum of accounts, received from the said John Carroll during the same time. |
| No. 33... | Return shewing the amounts which have been received by the Crown in each year since the abolition of the Land Improvement Fund, for lands sold during the existence of that Fund: and also, the amounts which are still receivable by the Crown in respect of such sales; and also the sum which would, but for the abolition of the said Fund, be payable to each Municipality out of the said amounts for each year aforesaid, and for the future. |
| No. 34... | Copies of all agreements between the Canada Land and Emigration Company and the Government, respecting the purchase of ten Townships of Crown Lands; and all Orders in Council and correspondence respecting said agreement. |
| No. 35... | <p>Returns from the Education Department:—</p> <ol style="list-style-type: none"> 1. The memorandum referred to in the letter from the Chief Superintendent of Education, to the Provincial Secretary of Canada, dated April, 17th, 1861. 2. The accounts, including the extra payments made to Messrs. Hodgins, Marling and Taylor, in 1863, sent by the Chief Superintendent to the Government, or to the Audit Office, and the explanations accompanying those accounts. 3. The accounts, including the various extra payments made to the various employees of the Education Department, sent to the Government, or to the Audit Office, for each year since 1863, with any explanations which accompanied such accounts. 4. Any communication made to the Government, or to the Auditor by the Chief Superintendent, or to the Chief Superintendent by the Government, or the Auditor since the year 1862, on the subject of the expenditure of the Education Department. 5. The accounts sent to the Government, or the Audit Office, of the expenditure of the Normal and Model Schools, for each year, since 1863. 6. Copies of any of the above documents to be found in the Education Department. |

DEPARTMENT OF PUBLIC INSTRUCTION FOR ONTARIO.

No. 3,520, A 3.

EDUCATION OFFICE,

TORONTO, 16th September, 1868.

SIR,—I have the honour to transmit herewith, to be laid before His Excellency the Lieutenant-Governor, my Report of the Normal, Model, Grammar and Common Schools of Ontario, during the year 1867, including a Statistical Statement of other Educational Institutions, as far as I have been able to obtain information respecting them. To my Report I have added an Appendix, which contains copious extracts from local reports, and various documents and papers illustrative of the means which have been employed to promote the improvement and extension of the Grammar and Common Schools throughout Ontario.

I have the honour to be, Sir,

Your obedient servant,

(Signed,) E. RYERSON.

To the Honourable MATTHEW CROOKS CAMERON, M.P.P.,

Secretary of the Province,

Toronto.

PART I.

GENERAL REPORT.

1867.

ANNUAL REPORT

OF THE

Normal, Model, Grammar and Common Schools IN ONTARIO, FOR THE YEAR 1867.

PART I.—GENERAL REPORT.

To The Honourable WILLIAM PEARCE HOWLAND, C.B., Lieutenant-Governor of the Province of Ontario.

SIR,—I herewith present my Report on the condition of the Normal, Model, Grammar and Common Schools of the Province of Ontario, for the year 1867.

The state of the School System in 1867 is, in every respect in advance of that of 1866. This will be seen by a summary view of the Statistical Tables.

THE COMMON SCHOOLS.

I. TABLE A.—RECEIPTS AND EXPENDITURES OF COMMON SCHOOL MONEYS.

Receipts.

1. The amount apportioned from the Legislative Grant, for the salaries of teachers in 1867, was \$172,542—increase, \$3,051.

2. The amount apportioned and paid from the Legislative Grant for maps, apparatus, &c. (on the condition of an equal sum being provided from local sources), was \$14,611—increase, \$594.

3. The Legislative Grant is apportioned to each Municipality, according to population, (but distributed to each School Section according to the average attendance of pupils, and the length of time each School is kept open.) upon the condition that such Municipality provide, at least, an equal sum by local assessment; but each Municipality is empowered to assess, and collect as large an additional sum as it may think proper, for the education of youth within its jurisdiction. The amount of School Fund provided by Municipal assessment was \$351,873—increase, \$32,719; and by voluntary Act, in excess of the Legislative Grant, \$179,331. This, together with the item which follows, exhibits the strength and progress of the real feeling of the Country, in relation to the education of its youth.

4. *Trustees' Rates on Property.*—Each Township is divided by the Municipal Council, into School Sections, of from two to four square miles each. Three trustees are elected by the rate-payers, as School Corporations for each Section; the Trustees holding office three years, one Trustee going out of office annually, and his successor elected. The Trustees of each Section have the same discretionary power as each Township or County

Council, to provide by rate on property for their School purposes. The amount thus provided for School purposes by Trustees' rate on property, (in addition to the Municipal Council Assessment of \$351,873) was \$799,708—being an increase on Trustees' property rate of the preceding year of \$39,342.

While the aggregate amount of the Municipal School Assessment exhibits the state and progress of public feeling in regard to the general education of the country, the amount of Trustees' rates on property illustrates the feeling and efforts of the people in separate School localities for the education of their children. The whole amount of voluntary, local, self-imposed tax on property for Common School purposes, in addition to the Legislative School Grant, was, \$1,483,182—increase on the preceding year of \$58,717.

5. *Trustees' Rate-bills on Pupils.*—Whether a School shall be wholly supported by a rate on property, and therefore *free* to all residents from 5 to 21 years of age, without *fee* from any pupil, or whether the School shall be partly supported by fees or rate-bills (the law not allowing a rate-bill or fee for each pupil to exceed twenty-five cents per month), is determined by the rate-payers at each annual meeting, or at a special meeting called for that purpose. In cities, towns, and incorporated villages, the elected Boards of Trustees determine whether the Schools shall be free or not. A decrease in the amount of rate-bills or fees, indicates an increase of Free Schools. The amount of Trustees' rate-bills for 1867, was, \$51,197—decrease, \$2,284.

6. *The Clergy Reserve Fund* is placed by law at the discretionary disposal of the Municipalities, and many of them have nobly applied their share to School purposes. The amount of balances available for Common School purposes from this Fund and other sources not mentioned above, was, \$280,401—decrease, \$11,059.

7. Total amount of moneys provided for Common School purposes in 1867, was, \$1,670,335—increase, \$62,364: the largest increase except that of the previous year (which was \$62,970) which has taken place in any year since the establishment of the School System.

Expenditures.

1. For salaries of teachers, \$1,093,516—increase, \$26,636.
2. For maps, apparatus, prizes and libraries, \$31,354—increase, \$1,601.
3. For sites and building of school-houses, \$149,195—increase, \$37,823.
4. For rents and repairs of school-houses, \$50,634—increase, \$8,845.
5. For school books, stationery, fuel and other expenses, \$148,487—increase, \$11,648.
6. Total expenditure for all Common School purposes, \$1,473,188—increase, \$85,955.
7. Balances of school moneys not expended or paid at the end of the year, \$197,146—decrease, \$23,591.

Postscript to Table A.—I have caused a Postscript to be added to Table A, exhibiting the receipts and expenditures of the School moneys *separately* in counties, cities, towns and incorporated villages. Any reader, therefore, who wishes to examine the comparative progress of the *financial* part of the School System in counties, cities, towns and incorporated villages, is referred to the Postscript of Table A.

II. TABLE B.—SCHOOL POPULATION, PUPILS ATTENDING COMMON SCHOOLS, DIFFERENT BRANCHES OF INSTRUCTION.

An old statute requires the returns of school population to include children between the ages of 5 and 16 years, but the school law confers the equal right of attending the schools upon all persons between 5 and 21 years of age.

1. *School Population* (including only children between the ages of 5 and 16 years of age,) was 447,726—increase, 15,914.
2. *The number of Pupils between 5 and 16 years of age attending the Schools* was 380,511—increase, 10,743. Number of Pupils of other ages attending the Schools was 21,132—increase, 5.
3. The number of *Boys* attending the Schools, was 213,019—increase, 4,430. The number of *Girls* attending the Schools, was 188,624—increase, 6,318.
4. Number reported as *indigent*, was 4,429—increase, 497.

5. The table is referred to for the reported periods of attendance of pupils, and the number in each of the several subjects taught in the Schools, indicating a considerable increase in most of the higher branches.

6. The number of children reported as not attending any School, was 32,515—decrease 821. It is to be hoped that this ominous item will soon disappear through the united and persevering exertions of the Christian and patriotic friends of universal education.

There is an apparent discrepancy in some of these returns. For example, the aggregate increase of school population, is reported to be 15,914; the aggregate increase of pupils attending the Schools is reported to be 10,743; yet there is a reported decrease of 821 children not attending any School. The returns must be defective in regard to some of these items, or there must be a considerable increase of pupils attending Private Schools, and of whose attendance we have no returns. I am inclined to think the latter is the case.

Postscript to Table B.—As I have caused a postscript to be added to Table A, exhibiting *separately* the comparative receipts and expenditures of School Moneys in Counties, Cities, Towns, and incorporated Villages, I have caused a similar Postscript to be added to Table B, shewing *separately* the comparative School Population, and attendance of children at School in these several Municipalities.

III. TABLE C.—RELIGIOUS DENOMINATIONS, CERTIFICATES, ANNUAL SALARIES OF TEACHERS.

1. *Number of Teachers, Male and Female.*—In the 4,422 Schools reported, 4,890 Teachers have been employed,—increase, 101; of whom 2,849 were Male Teachers—decrease, 76; and 2,041 were Female Teachers— increase, 177.

2. *Religious Persuasions of Teachers.*—The Teachers are reported to be of the following religious persuasions:—Church of England, 795—decrease, 49; Roman Catholics, 552—increase, 23; Presbyterians, 1,542—increase, 56; Methodists, 1,415—increase, 76; Baptists, 266—decrease, 6; Congregationalists, 65—decrease, 22; Lutherans, 24—increase, 7; Quakers or Friends, 15—decrease, 3; Christians and Disciples, 43—decrease, 6; Reported as Protestants, 73—decrease, 8; Unitarian decrease, 1; other Persuasions, 29—decrease, 8; not reported, 71—increase, 42.

3. *Teachers' Certificates.*—Total number of certificated or licensed Teachers, was 4,739— increase, 77; Normal School Provincial Certificates, 1st class, 238; 2nd class, 363; County Board Certificates, 1st class, 1,661—increase 23; 2nd class, 2,091—increase, 104; 3rd class, 386—by far too many, but a decrease of 34; unclassified, 151—increase, 24; certificates annulled, 19—decrease, 3; number of students attending the Normal School without obtaining certificates, 65—decrease, 33.

4. Number of schools in which the teachers were changed during the year, 781— increase, 12—a sad evil.

5. Number of schools having more than one teacher, 279—increase, 71; a good sign.

6. *Annual Salaries of Teachers.*—The salaries of teachers in the United States are usually paid by the month, under the name of wages, and are paid only during the months that the schools are kept open whether, five, six, or seven months. The teachers there generally, both male and female (except in cities and towns) teach one part of the year, and engage in other employments the rest of the year. This is inconsistent with the adoption of teaching as a profession, or with the progress of the profession. For a young man or a young woman to teach three or four months of the year, and then the one to labour on a farm or in a shop, and the other as a sewing-girl, or housemaid, or cook, the rest of the year, cannot advance the profession of teaching, or even make it one, as is ably shewn in the reports of several of the State Superintendents of Public Instruction.

With us teachers are generally employed by the year, and seldom, if ever, engage in any other employment during the years of their teaching. The chief, if not only, exception to this practice is in the case of young persons who teach one part of the year, or a year or two, to procure means to enable them to go to the Normal School, in order to become better qualified and receive larger emolument in their profession, or to some Classical Institution or College, in order to prepare themselves for one of the learned pro-

fessions. The most serious impediment to the progress and efficiency of school instruction is the inadequate remuneration of teachers—tending as it does to prevent many talented young persons from adopting it, and to drive many of the most competent persons from it. Among the worst enemies to the efficiency and progress of Common School education, are those Trustees and Parents whose whole aim is to get what they call a cheap teacher, and who seek to haggle down the teacher's remuneration to as near starvation point as possible. It is, however, gratifying to observe that the number and influence of this class of persons are yearly diminishing in the country as a whole, although they still exert a blighting influence in some parts of it. I am thankful to be able to note an increase of \$26,686 in the aggregate salaries paid to teachers during the year 1867—the whole sum being \$1,633,515; upwards of \$290,000 of this sum being the proceeds of local rates. The largest salary paid to a teacher in a *county* was \$635; the lowest, \$96! But the average salary of male teachers, as reported, was only \$261; of female teachers, \$189. The highest salary paid to a teacher in a *city*, was \$1,350; the lowest, \$225. The average salaries of male teachers in cities were \$532; of female teachers, \$243. The highest salary paid to a teacher in a *town* was \$1,000; the average salaries of male teachers in towns were \$464; of female teachers, \$240. The highest salary paid a teacher in an *incorporated village* was \$560; the average salaries of male teachers in villages were \$409; of female teachers, \$215.

IV. TABLE D.—SCHOOL SECTIONS, SCHOOLS, SCHOOL-HOUSES AND TITLES, SCHOOL VISITS, SCHOOL LECTURES, SCHOOL EXAMINATIONS AND RECITATIONS, TIME OF KEEPING OPEN THE SCHOOLS.

1. The whole number of School *Sections* reported for 1867 was 4,496—increase, 39. The whole number of *schools* reported was 4,422—increase, 43. The number of schools closed or not reported was 74—decrease, 4.

2. The number of free schools reported—schools supported entirely by rate on property, and which may be attended by all residents from 5 to 21 years of age without payment of fees, was 3,838—increase, 97. The number of schools *partly free*, that is, with a rate-bill of 25 cents, or less, per month, was 584—decrease, 54.

It may be proper for me to repeat here, what I have remarked elsewhere, that whether the school shall be entirely free, or partly supported by fees (no fee or rate-bill being permitted by law to exceed 25 cents per month, and may be less), is left to the annual decision of the rate-payers at their annual or special meeting in each School Section. In cities, towns and incorporated villages, the decision is with the Board of Trustees, and with the rate-payers in the election of the members of such Boards. Thus, out of 4,422 schools reported, 3838 are entirely free—wholly supported by rate on property, with no rate-bills or fees required of pupils. This is the result, not of any Act of Parliament, but of discussions, trials, experience and voluntary action of the rate-payers in their several school divisions since 1850. Every person having children between the ages of 5 and 21 years has a right to send his children to school as long as their conduct accords with the regulations and discipline of the school; and every person is required to contribute to the support of the school according to the assessed value of his property, protected and improved in the country, whether he has children or sends children to the school or not. The education of the youth of the land being a public good, and ignorance being a public evil, the property of the country is made liable for the education of the youth of the country, and taxes for this purpose are much less than those required to defray the expenses incurred by prisons, &c., in order to punish crimes which result from ignorance and its attendant vices; apart from the losses inflicted upon a community by the multiplication, idleness, and vices of untaught and degraded persons.

3. *School-Houses*.—The whole number of School houses reported, was 4,447—increase, 48; of these 679 are Brick—increase, 37; 381 Stone—increase, 9; 1785 Frame—increase, 34; 1581 Log—decrease, 23; not reported, 21—decrease, 9.

4. The whole number of School-houses built during the year, was 140—39 more than had been built during the preceding year. Of these 140 Schools built during the year, 43 were Brick, 10 Stone, 62 Frame, and 25 Log.

5. *Titles of School Sites.*—Freehold, 3,923—increase, 71; Leased, 366—decrease, 8; Rented, 107—decrease, 4; not reported, 51—decrease, 11.

6. *School Visits.*—By Local Superintendents, 10,905—increase, 122; by Clergymen, 8,290—increase, 845; by Municipal Councillors, 1,735—decrease, 95; by Magistrates, 2,172—decrease, 178; by Judges and Members of Parliament, 549—increase, 109; by other persons, 35,315—increase, 1,775. Total number of School visits, 78,221—increase, 2,777.

7. *Public School Examinations.*—Whole number of Public School Examinations, 7,565—decrease, 163; not two for each School. The law requires that there should be a *quarterly* examination in each School, of which the Teacher should give notice to the Trustees, Parents and Pupils, and to the School Visitors, (Clergymen, Magistrates, &c.) resident in the School Section.

8. *School Recitations.*—The number of Schools in which public recitations of prose or poetry by the pupils are practised, was 1994—decrease, 53, which I very much regret, as it ought to be practised in every School, promoting, as it does, the habits of accurate learning by heart; improvement in reading and speaking, and is an agreeable and often an amusing diversion.

9. *School Lectures.*—The law requires that every Local Superintendent should deliver during the year, at least one lecture on education, in each of the School Sections, under his oversight. The number of School Lectures delivered by Local Superintendents reported, was 2,799—218 less than those of the preceding year, and 1,623 less than the number of Schools open. I had the pleasure of remarking in my last Annual Report, that the School Lectures delivered by Local Superintendents, were 130—increase on the number delivered by them the preceding year. In this respect, I regret deeply that while there is an increase of 43 Schools open, and of 10,748 pupils during the year, there is an actual decrease of 218 School Lectures delivered by Local Superintendents! The Statistical Table shews in what Counties this neglect of duty occurs. It is to be hoped that neglect of duty in this respect is not an index of neglect of duty in other respects. It seems singular, that, while the practice of lecturing on all subjects, is every year becoming more general, there would not be made some attractive lecture during the year in each School Section. The number of School Lectures delivered by other persons and therefore voluntary, was 368—increase, 28; in contra-distinction to a decrease of 218 in the number of lectures delivered by Local Superintendents. The whole number of School Lectures delivered during the year, was 3,167—decrease, 190.

10. *Time of Keeping the Schools Open.*—I repeat that the legal holidays and vacations include only about one month of the year—certainly too small a portion—less than what nearly every person in most pursuits of life takes for purposes of recreation, travelling and visiting. A longer vacation during hay and wheat harvest is often demanded, and would, I think, be a convenience to most parts of the country, and no detriment to the Schools, as the attendance at School during that period is generally small and irregular. The average time of keeping open the Schools, including the holidays and vacations, was *seven months and three days*—very nearly the entire year—about twice the average time the Common Schools are kept open in the States of Pennsylvania and Ohio, and about three months more than the average time they are kept open in the States of New York and Massachusetts.

11. *School Prizes and Merit Cards.*—The number of schools in which prizes are reported as having been given for the reward and encouragement of meritorious pupils, was 1,647—increase, 106 schools—shewing, as in the preceding year, a gratifying increase in the number of schools in which this stimulus to good conduct and diligence is employed by the intelligence and enterprise of Trustees and teachers.

It requires intelligence and care, as well as impartiality on the part of the teacher, sustained by the Trustees, to give full and beneficial effect to this system of encouraging diligence and good conduct among pupils, and multiplying entertaining and instructive books among the most promising youth of the land. Some teachers, wanting in one or both of these qualities, are not favourable to the distinctions which rewards involve between the pupils, but wish to preserve the dead uniformity of indifference between the diligent and the idle, the regular and the irregular, the obedient and the disorderly. The common reason assigned is, that "the distribution of prizes excites feelings of dissatisfac-

tion, envy and hatred in the minds of the pupils who get no prizes." The answer is, that if the distribution of prizes is decided fairly according to merit, there can be no just ground of dissatisfaction; and facilities are provided to determine the merit of *punctuality*, of *good conduct*, of *diligence*, of *proficiency*, on the part of each pupil during each term of the year—a fourfold motive to exertion and emulation in every thing that constitutes a good pupil and a good school. But the indifferent and flagging teacher does not wish such a pressure to be brought to bear upon his every day teaching and attention to everything essential to an efficient school; nor does he desire the *test* of a periodical examination of his pupils by an examining committee to be applied to his teaching and management of the school. The objection that the distribution of prizes to deserving pupils excites the envy and hatred of the undeserving, is a convenient pretext to protect and permit incompetence and indifference on the part of the teacher.

But the existence of such alleged dissatisfaction is no reason for refusing rewards to punctuality, to good conduct, to diligence, to proficiency on the part of pupils. There is often great dissatisfaction on the part of unsuccessful candidates and their friends in the results of Municipal and Parliamentary elections, and the distribution of prizes by Agricultural and Horticultural Associations; but this is no argument against the value of free and elective institutions; nor does it prevent the people generally from honouring with their suffrages those on whose merits they place most value, even though they may sometimes err in their judgment. Nor do the managers of Agricultural and Horticultural Societies withhold prizes from the most successful cultivators of grains and vegetables, and fruits and flowers, because of dissatisfaction among the envious of the less diligent and less skilful farmers and gardeners.

It is the very order of Providence, and a maxim of Revelation, that the hand of the diligent maketh rich, while idleness tendeth to poverty; that to him that hath (that is, improves what he hath), shall be given, and the neglecter shall be sent empty away. Providence does not reverse its order of administration, because some persons are discontented and envious at the success of the faithful diligence and skill of others. Nor does Providence appeal alone to the transcendental motives of duty, gratitude, immortality, but presents also the motives of the life that now is, as well as of that which is to come.

I prefer the order of Providence and the principles on which our civil institutions and all our associations for public and social improvements are conducted, to the dead-level notions of stationary teachers and the envious murmurings of negligent pupils and their misguided friends.

An explanation of this feature of our school system will be its best justification, and evince its great importance. I therefore present it again as follows:—

A comprehensive catalogue of carefully-selected and beautiful prize books has been prepared and furnished by the Department to Trustees and Municipalities applying for them; and, besides furnishing the books at cost price, the Department adds one hundred per cent. to whatever amounts may be provided by Trustees and Municipal Councils to procure these prize books for the encouragement of children in their schools. A series of merit-cards, with appropriate illustrations and mottoes, has been prepared by the Department, and is supplied to Trustees and Teachers at a very small charge—half the cost—and these merit cards are to be awarded daily, or more generally weekly, to pupils meriting them. One class of cards is for *punctuality*; another for *good conduct*; a third for *diligence*; a fourth for *perfect recitations*. There are generally three or four prizes under each of these heads; and the pupil or pupils who get the largest number of merit cards under each head, will, at the end of the quarter or half year, be entitled to the prize books awarded. Thus an influence is exerted upon every part of a pupil's conduct, and during every day of his school career. If he cannot learn as fast as another pupil, he can be as *punctual*, as *diligent*, and maintain as *good conduct*; and to acquire distinction, and an entertaining and beautiful book, for *punctuality*, *diligence*, *good conduct*, or *perfect recitations*, or exercises, must be a just ground of satisfaction, not only to the pupil, but also to his or her parents and friends. There are two peculiarities of this system of merit cards worthy of special notice. The one is, that it does not rest upon the comparative success of single examinations at the end of the term or half year, or year, but on the daily conduct and diligence of each pupil during the whole period, and that irrespective of what may be done or not done by any other pupil. The ill-feeling by rivalry at a single examination is

avoided, and each pupil is judged and rewarded according to his merits, as exhibited in his every day school life. The second peculiarity is, that the standard of merit is founded on the *Holy Scriptures*, as the mottoes on each card are all taken from the sacred volume, and the illustrations on each card consist of a portrait of a character illustrative of the principle of the motto, and as worthy of imitation. The prize-book system, and especially in connection with that of *merit-cards*, has a most salutary influence upon the school discipline, upon both teachers and pupils, besides diffusing a large amount of entertaining and useful reading.

V. TABLE E.—TEXT BOOKS, MAPS, APPARATUS, PRAYERS, READING OF THE SCRIPTURES IN SCHOOLS.

General Remarks.—Uniformity of text-books in the Public Schools of a country has long been insisted upon by the most experienced educationists on both sides of the Atlantic, as of the utmost importance to the efficiency of the schools and the progress of the pupils. The question may be considered as so entirely settled by common consent in this Province, that I need not again adduce the arguments and authorities of educationists in other countries, as I have done in previous Annual Reports, to evince the importance of but one series of text-books for our Public Schools, and to show the losses and evils arising from admitting a diversity of text-books in the schools. Having succeeded in this vital branch of our work beyond any country or state with which I am acquainted, it remained for us to render the text-books as perfect in matter and method, as good in quality and as moderate in price as possible.

A series of text-books for a whole country should not be adopted without much care and consideration; and they should not be changed without manifest necessity, and without giving ample notice to the publishers of such books, and to the Trustees and supporters of schools who have used them, that the change may be attended with the least possible loss and inconvenience to any party.

Such is the course which has been pursued by the Council of Public Instruction, under the sanction of the Government. After long and anxious deliberation, the series of text-books which had been prepared by the National Board of Education in Ireland were adopted for the Public Schools of Upper Canada, and provision was made for both their importation and republication in this country. To supply some deficiencies in this series, and to meet local exigencies, the use of certain other books was allowed in the schools. After the use of these excellent text-books for nearly twenty years, objections began to be made to them, that they were “behind the times,” and a very strong and general desire was evinced that an improved and strictly Canadian series of text-books for the schools should be prepared. It was felt that the demand could be no longer resisted, without injury to our school system; and during the last year the Council of Public Instruction had prepared by able and experienced instructors of youth, a series of Readers founded upon the same principles as the National Readers heretofore used, but greatly improved and Canadianized, and printed in the best style, and of the best materials. Though the copyright of these Readers has been vested in the Chief Superintendent of Education, subject to the direction of the Council, so as to prevent the printing of any imperfect and inferior editions of the books, the printing and sale of the books are the work of private enterprise. The same course has been adopted in preparing a Companion to the Readers, including exercises in spelling, also to secure a greatly improved edition of Bullion's English Grammar, including an introduction to it for young pupils. A revised and improved edition of Lovell's Canadian and General Geography, with entirely new maps, has been prepared, also an Elementary Geography. These unrivalled Canadian Geographies are now the sole Geographies authorized to be used in the schools.

I have much pleasure in adding that a Vocal Music Book for the Schools has been compiled and prepared by Mr Sefton, Teacher of Vocal Music in the Normal and Model Schools, which has been carefully examined by the Reverend Dr. McCaul, a practised musical composer, as well as profound classical scholar, and has been sanctioned by the Council of Public Instruction. I believe it will be found the best ever introduced into Schools, and in the spirit and words of the songs, as well as music, peculiarly adapted to our country.

In this gradual and most careful manner, are the series of School Text-Books being rendered as perfect as possible, and reduced in number.

By referring to the table, it will be seen that the authorized text books are used in all but a few of the Schools, so that their use may be considered general, and will soon be almost without exception universal. And all the text books, including the Maps, Globes, &c., are of Canadian production, with the exception of one or two in History and Geometry.

While a complete series of text books are thus provided for the Schools, private enterprise and Canadian Manufacture are developed and encouraged in branches of industry, heretofore, almost unknown in Canada. For example, 25,939 Maps (increase on the preceding year, 782,) and 1177 Globes have been furnished to the Schools, as well as other Articles of School apparatus, as shown by the Table, nearly all of Canadian Manufacture. Besides, 3925 of the Schools have been provided with Sangster's Canadian National Arithmetic, and 3,598 of them have been provided with Lovell-Hodgins' Canadian Geography; and the National Readers used in 4316 of the Schools, (nearly all) are of Canadian Manufacture. I think that in the course of another year, or of two years at most, all our text books for both the Grammar and Common Schools will be printed, as well as edited in Canada, and wholly adapted to Canadian Schools.

Schools opened and closed with Prayer, and in which the Bible is used:—

The Schools whose daily exercises were opened and closed with prayer, were 2993—increase, 41. The number of Schools in which the Bible or Testament was used, was 2996—increase, 4. No child can be compelled to be present at any religious reading, instruction or exercise, against the wish of his parents or guardians expressed in writing. The Religious Reading, Instruction and Exercise, are like religion itself, a voluntary matter with Trustees and Teachers. The Council of Public Instruction provides facilities, even forms of prayer, and makes recommendations on the subject, but does not assume the authority of *enforcing or compelling* compliance with these provisions or recommendations. In some of the Schools, the reading and prayers are according to the Roman Catholic Church; but those exercises are generally Protestant. The fact that religious exercises of some kind are practised in nearly three-fourths of the Public Schools, indicates the prevalent religious principles and feelings of the country.

VI. TABLE F.—ROMAN CATHOLIC SEPARATE SCHOOLS.

1. *General Remarks.*—It is proper for me to repeat the facts that the Public Schools of this Province are non-denominational. Equal protection is secured to the Roman Catholics with every other religious persuasion. No child is permitted to be compelled to receive religious instruction, or attend any religious exercise, or reading, against the written wish of his parents or guardians.

Three hundred and forty-two Roman Catholics are employed in the public or non-denominational schools, besides two hundred and ten in the Roman Catholic Separate Schools; three-fourths, or upwards of forty-five thousand of the sixty odd thousand of the Roman Catholic children, attend the public schools. I know of no instances of proselytism, or, during the year, of a single complaint of interference with religious rights, in any of the public schools. Yet notwithstanding these facts, the Legislature has made provision for the establishment, under certain conditions, of both Roman Catholic and Protestant Separate Schools for those who desire them; although there are only one or two Protestant Separate Schools in the Province. In 1863, the Legislature of United Canada passed a Separate School Act, which was accepted by the authorities of the Roman Catholic Church as a final settlement of the question, as far as it related to Upper Canada; and that Act has been made by the British Parliamentary Act of Confederation, the basis of settling the relations of Protestants and Roman Catholics in Lower Canada, now the Province of Quebec.

2. The number of Roman Catholic Separate Schools is 161—increase during the last year, 4.

3. *Receipts.*—The amount apportioned and paid from the Legislative Grant to Separate Schools, according to average attendance, as compared with that at the Public Schools in

the same Municipality, was \$9,529—decrease, \$289. The amount apportioned and paid for the purchase of maps, prize-books and libraries, upon the usual condition of an equal sum being provided from local sources, was \$463—increase, \$200. Amount of school-rates from the supporters of Separate Schools, was \$26,781—increase, \$1,672. Amount subscribed by supporters of Separate Schools, and from fees and other sources, was \$11,853—increase, \$2,005. Total amount received from all sources was \$48,628—increase, \$3,588. The preceding year, there was a decrease of \$1180.

4. *Expenditure*.—For the payment of teachers, \$31,830—increase, \$2,081. (There was a decrease under this head the preceding year of \$1,207.) For the purchase of maps, prize-books, apparatus and libraries, \$1,039—increase, \$252. For other purposes, \$12,757 increase, \$1,251.

5. *Pupils*.—The number of pupils reported as attending the Separate Schools was 18,924—increase, 349.

6. The average time of keeping open the Separate Schools, including legal vacations and holidays, was eleven months.

7. The whole number of teachers employed in the Separate Schools was 210—increase, 3. Of these, 82 were male teachers—increase, 12; and 128 were females—decrease, 9.

8. The same table shows the exercises and subjects taught in the Separate Schools, and the number of pupils in each.

GRAMMAR SCHOOLS.

VII. TABLE G.—RECEIPTS, EXPENDITURES, PUPILS.

1. *General Remarks*.—As 1866 was the first year of the operation of the Grammar School Improvement Act of 1865, I explained in my last Annual Report the provisions of that Act, and the modifications in the Grammar School System which that Act was intended to introduce, while it increased the Grammar School Fund one-third from local assessments, besides \$17,000 per annum, which I had got added to the Fund in 1863, and other additions to the Fund which I had been able to effect by investments in previous years. All these additions to the Grammar School Fund are required by law to be paid to Teachers of Grammar Schools, and to be expended for no other purpose whatever.

2. *Pupils*.—Number of pupils attending the Grammar Schools, 5,696—increase, 517. Number of pupils resident in the towns or villages where the Grammar Schools are established, 3,928—increase, 189. Number of pupils whose parents reside out of the town or village of the Grammar School, but within the county, 1,396—increase, 222. Number of pupils whose parents reside out of the County of the Grammar School, 372—increase, 106. Number of pupils admitted by the Inspector, 3,504—increase, 229. Number not yet examined by the Inspector, 1,198—decrease, 77. Number in subjects of the classical course, 5,095. Number reported in the non-classical or English course, under Section IV. of the Regulations, 145—decrease, 75; but a considerable number of the pupils thus reported are not up to the standard required by the regulation for non-classical pupils. Number of pupils admitted during 1867, 2,245—increase, 256. Number of pupils who were formerly Common School boys, admitted free by scholarships, 171—increase, 8. The table shows at whose expense these scholarships have been established, and what are the fees paid, and which of the Grammar Schools are free.

VIII. TABLE H.—NUMBER OF PUPILS IN THE VARIOUS BRANCHES OF INSTRUCTION.

This table shows both the subjects taught and number of pupils in each. I refer to the table for minute details in regard to each school. *Total in English*, 5,639—increase, 502; in English Grammar, 5,467—increase, 451; in Spelling and Dictation, 4,896—increase, 541; in Reading, 4,992—increase, 516; in Composition, 4,091—increase, 535. *Total in Latin*, 5,171—increase, 727; in Harkness' Latin Book, 1,715; in Arnold's Latin Book, 2,331; in Latin Grammar, 3,666—increase, 75; in Latin Exercises, Prose Compo-

sition, 2,553—increase, 456; in Prosody, 480—increase, 31; in Caesar, 748—increase, 99; in Virgil, 497—increase, 26; in Livy, 129—increase, 21; in Ovid, 91—increase, 29; in Cicero, 205—increase, 20; in Horace, 212—increase, 40; in Verse Composition, 121—decrease, 5; average attendance of boys for the whole year, 1,879—increase, 301½. *Total in Greek*, 802—increase, 65; in Harkness, 449—decrease, 7; in Greek Grammar, 579—decrease, 7; in written exercises, 434—increase, 41; in Lucian, 154—increase, 4; in Anabasis, 210—increase, 34; in the Iliad, 117—decrease, 1; in the Odyssey, 51—increase, 21. *Total in French*, 2,164—increase, 190; in French Grammar, 1,905—increase, 205; in Written Exercises and Composition, 1,748—increase, 352; in French dictation and conversation, 639—increase, 70; in Voltaire's Charles XII., 563—increase, 70; in Corneille's Horace, 130—increase, 36. *Total in Arithmetic*, 5,526—increase, 449; in *Algebra*, 2,841—increase, 338. *Total in Euclid*, 1,847—increase, 120; in first and several Books of Euclid, 1,144—increase, 131; in third and fourth Books of Euclid, 703—decrease, 11; *Plane Trigonometry*, 141—increase, 40; in *Logarithms*, 485—increase, 152; in *Mensuration and Surveying*, 463—increase, 40. *Total in Geography*, 5,264—increase, 425; in Ancient Geography, 1,265—increase, 152; in Modern Geography, 4,930—increase, 351; in Canadian Geography, 3,531—increase, 713. *Total in History*, 4,634—increase, 475; in Greek and Roman History and Antiquities, 1,345—increase, 253; in other Ancient Histories, 668—increase, 53; in British History, 3,820—increase, 414; in British American History, 1,767—increase, 373. *Total in Physical Science*, 1,876—decrease, 58; in the Elements of Natural History, 677—decrease, 24; in the Elements of Natural Philosophy and Geology, 1,545—increase, 12; in the Elements of Physiology and Chemistry, 840—increase, 227; in Christian Morals, 1,034—increase, 47. *Total in Writing*, 4,822—increase, 318; in *Drawing*, 676—decrease, 109; in *Vocal Music*, 387—decrease, 298; in *Telegraphy*, 37; in *Gymnastics*, 705—increase, 225; in *Military Drill*, 893—increase, 39; in *Elements of Civil Government*, 137—increase, 81. In *Book-keeping and Commercial Transactions*, 1285—increase, 59.

IX. TABLE L.—GRAMMAR SCHOOL MASTERS, MISCELLANEOUS INFORMATION.

This table contains the names, college degree or certificate, salary of Head Master, and date of his appointment; the number of teachers employed in each school, kind of school-house, title and value of school property; the number of schools in which the Bible is read, and the daily exercises of which are opened and closed with prayer; the number of schools united with Common Schools; number of months each school is kept open; number of schools furnished with maps, globes, blackboards, and complete sets of apparatus; estimated value of library-books, apparatus and furniture; number of schools in which gymnastics and military drill are practised; number of pupils who have obtained prizes at examinations during the year, or who have been matriculated into some University, and what University, and with what honours, or who have been admitted into the Law Society. I refer to the table for such information as any one may desire on all these subjects in regard to each Grammar School in the Province.

X., TABLE K.—METEOROLOGICAL OBSERVATIONS.

In my report for 1866, the system upon which the Meteorological stations have been established under the provisions of the Grammar School law was explained. During the year 1867 a very valuable addition has been made to the records of observations, already accumulated at the office. The ten stations authorized by the Council of Public Instruction, as provided by the Act, have been actively worked by the following observers: at Barrie, by the Rev. W. F. Checkley, B.A.; at Belleville, by A. Burdon, Esq.; at Cornwall, by W. Taylor Briggs, Esq., B.A.; at Goderich, by John Haldan, Jr., Esq.; at Hamilton, by A. Macallum, Esq., M.A.; at Pembroke, by A. McClatchie, Esq., B.A.; at Peterborough, by Ivan O'Beirne, Esq.; at Simcoe, by Rev. J. G. Mulholland, M.A.; at Stratford, by C. J. Macgregor, Esq., M.A.; at Windsor, by A. McSween, Esq., M.A. A transcript of the daily records of each station has been regularly sent once a month to the Education Office by the observer, and after undergoing a thorough examination in order that any anomalies may be rectified, the monthly results are published in the *Journal of Education*, every precaution being used to ensure the greatest accuracy, without which, of course, such a record would be valueless. The series thus published, is complete for each

station for every month in the year, with the exception of the January report for Cornwall; the observer not having commenced his duties till the 7th of January, which rendered it impossible to give that month's results from the station. The observers have performed their somewhat irksome duties with the greatest regularity, there being scarcely an instance of omission of one of the three daily observations at the hours of 7 a.m., and 1 and 9 p.m. The observers have frequently been able to enlist the services of some intelligent pupil to assist them in the work, while useful instruction has thus been imparted.

The monthly results having been already published in figures in tabular form in the *Journal of Education*, it has not been thought best to reprint them in the same form, as was done in Table K last year. A summary of the Annual Results is, however, subjoined, and in table K, instead of the monthly results, a record will be found of every observation of the Thermometer and Barometer during the year at five stations at suitable distances, viz.: Cornwall, Pembroke, Peterborough, Stratford and Windsor. These have not been selected, because the observations were more accurately taken than at the other stations, but, because the publication of the records of the entire ten in this form might have appeared too voluminous and expensive. In presenting these results, the method of synchronous curves has been adopted, exhibiting to the eye on the same sheet, the relative temperature and barometric pressure at each of the stations, at each hour of observation. The curves of *monthly mean* barometric pressure, temperature, tension of vapour, and humidity, are similarly shown. The maximum and minimum temperature of the day is shown in figures. A series of these records taken in connection with the monthly results published in the *Journal of Education*, will furnish very full *data* for the examination of the climatology of the Province, and be of the utmost value to those who are labouring in this branch of Natural Science in other parts of the world.

Our stations are still deficient in anemometers for ascertaining the velocity of the wind, and the observers are therefore obliged to estimate its force. With this exception, for which it is hoped a remedy will be found, our meteorological system is working admirably, and I doubt if anywhere so valuable a collection of facts is systematically made at so little public expense. It of course adds very considerably to the work of the office—this additional work being performed with great care and ability by Mr. A. Marling, Chief Clerk and Accountant in the Department.

observation does not, of course, secure an accurate record.

XI. TABLE L.—NORMAL AND MODEL SCHOOLS.

The Normal and Model Schools were not designed to educate young persons, but to *train teachers*, both theoretically and practically, for conducting schools throughout the Province, in cities and towns as well as townships. They are not constituted, as are most of the Normal Schools in both Europe and America, to impart the preliminary education requisite for teaching. That preparatory education is supposed to have been attained in the ordinary public or private schools. The entrance examination to the Normal School requires this. The object of the Normal and Model Schools is, therefore, to do for the teacher what an apprenticeship does for the mechanic, the artist, the physician, the lawyer—to teach him theoretically and practically, how to do the work of his profession. No inducements are held out to any one to apply for admission to the Normal School, except that of qualifying himself or herself for the profession of teaching; nor are any admitted except those, who in writing declare their intention to pursue the profession of teaching, and that their object in coming to the Normal School is to better qualify themselves for their profession—a declaration similar to that which is required for admission to Normal Schools in other countries. Nor is any candidate admitted without passing an entrance examination in writing, equal to what is required for an ordinary second-class certificate by a County Board. The majority of candidates are those who have been teachers and who possess County Board Certificates of qualification—many of them first-class certificates. The table shows that of 5,134 candidates admitted to the Normal School in twenty years, 2,596 of them had been teachers.

No argumentation is any longer required to justify the establishment and operations of Normal Schools. The experience and practice of all educating countries have established their necessity and importance. The wonder now is that while no one thinks of being a printer, or painter, or shoemaker, &c., without first learning the trade, persons have undertaken the most difficult and important of all trades or professions—that which develops mind and forms character—without any preparation for it. The demand for teachers trained in the Normal and Model Schools, and their success, is the best proof of the high appreciation of the value of their services by the country. Of course no amount of culture can supply the want of natural good sense and abilities; but training and culture double the power of natural endowments, and often give to them all their efficiency.

The Model Schools (one for boys and the other for girls, each limited to 150 pupils, each pupil paying one dollar a month, while the Common Schools of the city are free) are appendages to the Normal School, and are each under the immediate charge of three teachers who have been trained in the Normal School, and overseen and inspected by the Masters of the Normal School. The teachers-in-training in the Normal School, divided into classes, spend some time each week in the Model Schools, where they first observe how a *Model School* for teaching Common School subjects is organized and managed; how the pupils are classified, and how the several subjects are taught; and they at length teach themselves, as assistants, under the observation and instruction of the regularly trained teachers of the school, who also make notes and report from day to day the attention, aptitude, power of explaining, governing, commanding attention, &c. The Head Master of the Normal School includes in his instructions a series of lectures on school government, teaching, &c.; and the Deputy Superintendent of Education delivers a short course of lectures to the Normal School students on the School Law, and their duties and modes of proceeding respecting it.

Table L contains three abstracts, the first of which gives the gross number of applications, attendance of pupils, certificates, and other particulars respecting them, during the twenty years existence of the Normal School; the second abstract gives the Counties whence the students have come; and the third gives the religious persuasions of the students.

XII. TABLE M.—OTHER EDUCATIONAL INSTITUTIONS.

As the Common and Grammar Schools are only a part of our educational agencies, the Private Schools, Academies and Colleges must be considered in order to form a correct idea of the state and progress of education in the country. Table M. contains an abstract of the information collected respecting these institutions. As the information is obtained

and given voluntarily, it cannot be considered perfect, but only an approximation to accuracy, and of course below the real facts. According to the information obtained, there are sixteen Colleges (many of them University Colleges), containing 1,930 students, aided by the Legislature to the amount of \$159,000, and receiving fees to the amount of \$53,000. There are 298 Private Academies and Schools, containing 6,462 pupils, and receiving fees to the amount of \$78,482. Total number of Colleges, Private Academies and Schools, 314—increase, 14. Total number of students and pupils in them, 8,393—increase, 281.

XIII. TABLE N.—FREE PUBLIC LIBRARIES AND PRIZE BOOKS.

1. These libraries are managed by the local Municipal Councils and School Trustees, under regulations prepared according to law by the Council of Public Instruction. The books are procured by the Educational Department from publishers both in Europe and America, at as low prices as possible; and a carefully prepared classified catalogue of about four thousand works (which, after examination, have been approved by the Council of Public Instruction) is printed and sent to the Trustees of each school section, and the Council of each municipality. From this select and comprehensive catalogue the Local Municipal and School authorities, desirous of establishing or increasing a library, select such books as they think proper, or request the Department to select for them, and receive from the Department not only the books at cost prices, but an apportionment in books of one hundred per cent. upon the amount which they provide for the purchase of such books. None of these books are disposed of to any private parties, except Teachers and Local Superintendents for their professional use; and the rule is not to keep a large supply of any one work on hand, so as to prevent the accumulation of stock, and to add to the catalogue yearly, new and useful works which are constantly issuing from the press.

2. In my last Annual Report, I inserted a "Free Public School Library Map of Ontario," showing by red colouring and red dots the Municipalities and School Sections, in which libraries had been established, and supplied from the Ontario Educational Depository. The extension of this branch of the system is very gradual, and I do not think it best to urge the establishment of libraries, but let them in each case be the spontaneous expression of the felt wants of the people, and the books will be more highly valued and more extensively used. The amount expended for free libraries during the year 1867—the one half appropriated from the Legislative Grant, the other half provided from local sources—was \$3,404. The amount thus provided and expended for libraries in former years, was \$119,649. The whole amount expended for libraries, was \$123,053—increase during the year, 1867, \$3,404.

3. The number of volumes for *libraries* sent out during the year, was 5,426. The number sent out in former years, was 219,221. The whole number of volumes in the Free Public Libraries, is 224,647. These volumes are on the following subjects; History, 39,074; Zoology and Physiology, 14,631; Botany, 2,693; Phenomena, 5,858; Physical Science, 4,566; Geology, 1,963; Natural Philosophy and Manufactures, 12,603; Chemistry, 1,482; Agricultural Chemistry, 775; Practical Agriculture, 9,139; Literature, 21,852; Voyages, 18,311; Biography, 25,749; Tales and Sketches Practical Life, 63,163; Teachers' Library, 2,788. Total, 224,647, not including prize books, or 8,722 volumes sent out to Mechanics' Institutes.

4. *Prize Books*.—In this recent and important branch of instruction, designed to encourage emulation, reward meritorious pupils, and diffuse useful knowledge, 64,103 Prize Books were sent out during the year 1867, making a total of 333,422 Prize Books sent out to schools; Total number of Library and Prize Books sent out, 558,069. Every one of 333,422 Prize Books sent out, has been a direct reward and encouragement to pupils for good conduct and proficiency, as well as the best means of creating a taste for reading and diffusing useful knowledge. The contribution of upwards of half a million of selected volumes of reading, in connection with the operations of the schools cannot fail to advance the intelligence of the Country.

XIV. TABLE O.—MAPS, APPARATUS, AND PRIZE BOOKS SUPPLIED BY THE DEPARTMENT.

The amount expended in supplying maps, apparatus and prize books for the schools—one half provided from local sources—was \$28,270—increase, \$1156. Catalogues are

gratuitously furnished to the Municipal and School authorities ; but in every case the articles are furnished on the voluntary application of the local authorities, who provide and transmit one-half of the amount required for the purchase of the maps, globes, apparatus and prize books. The following maps, &c., were sent out to the schools during the year :—maps of the World, 172—increase, 25 ; of Europe, 250—increase, 43 ; of Asia, 197—increase, 15 ; of Africa, 198—increase, 27 ; of America, 199—increase, 13 ; of British North America and Canada, 240—increase, 11 ; of Great Britain and Ireland, 198—decrease, 19 ; of Single Hemispheres, 146—increase, 13 ; of Classical and Scriptural, 203—decrease, 11 ; other Charts and Maps, 199—decrease, 188 ; Globes, 119—increase, 10 ; Sets of Apparatus, 63—decrease, 5 ; other School Apparatus, 332—decrease, 164 ; Historical and other Lesson Sheets, 7022—decrease, 897 ; number of volume of prize books, 64,103—increase, 5,232.

I here repeat the explanations which I have heretofore given of this branch of the Department.

“ The maps, globes, and various articles of school apparatus sent out by the Department, apportioning one hundred per cent. upon whatever sum or sums are provided from local sources, are nearly all manufactured in Canada, and are better executed, and at lower prices, than imported articles of the same kind. The globes and maps manufactured (even in the material) in Canada, contain the latest discoveries of voyagers and travellers, and are executed in the best manner, as are tellurians, mechanical powers, numeral frames, geometrical forms, &c. All this has been done by employing competitive private skill and enterprise. The Department has furnished the manufacturers with the copies and models, purchasing certain quantities of the articles when manufactured, at stipulated prices, then permitting and encouraging them to manufacture and dispose of these articles themselves to any private parties desiring them, as the Department supplies them only to municipal and school authorities. In this way new domestic manufactures are introduced, and mechanical and artistical skill and enterprise are encouraged, and many aids to school and domestic instruction, heretofore unknown among us, or only attainable in particular cases with difficulty, and at great expense, are now easily and cheaply accessible to private families, as well as to municipal and school authorities all over the country. It is also worthy of remark, that this important branch of the Educational Department is self-supporting. All the expenses of it are reckoned in the cost of the articles and books procured, so that it does not cost either the public revenue or school fund a penny beyond what is apportioned to the Municipalities and School Sections providing a like sum or sums for the purchase of books, maps, globes, and various articles of school apparatus. I know of no other instance, in either the United States or in Europe, of a branch of a Public Department of this kind, conferring so great a benefit upon the Public, and without adding to public expense.”

The following is a summary tabular statement of what has been done in this branch of the Department during the thirteen years of its operation, to provide for the wants and promote the efficiency of the schools :—

SUMMARY OF THE OPERATIONS OF THE EDUCATIONAL DEPOSITORY, 1855-1867.*

* Exclusive of Library Books, and of articles sold without the Legislative Apportionment.

XV. TABLE P.—THE SUPERANNUATED OR WORN-OUT TEACHERS OF COMMON SCHOOLS.

1. This table shows the age and service of each pensioner, and the amount which he receives. The system, according to which aid is given to worn-out Common School teachers, is as follows:—In 1853, the Legislature appropriated \$2,000, which it afterwards increased to \$4,000 per annum, in aid of superannuated or worn-out Common School teachers. The allowance cannot exceed \$6 annually for each year the recipient has taught school in Ontario. Each recipient must pay a subscription to the Fund of \$4 for the current year, and \$5 for each year since 1854, if he has not paid his \$4 any year; nor can any teacher share in the fund unless he pays annually at that rate, commencing at the time of his beginning to teach, or with 1854 (when the system was established) if he began to teach before that time. When a teacher omits his annual subscription, he must pay at the rate of \$5 for that year, in order to be entitled to share in the fund when worn out. When the fund is not sufficient (as it never has been since the first year of its administration) to pay each pensioner the full amount permitted by law, it is then divided among the claimants according to the number of years each one has taught. To secure equality, each claimant is paid in full the first year, less the amount of his subscriptions required by law to be paid.

2. It appears from the table that 238 teachers have been admitted to receive aid, of whom 91 have died, were not heard from, and resumed teaching, or withdrew from the fund before and during 1867, the amount of their subscriptions having been returned to them.

3. The average age of each pensioner in 1867 was $69\frac{1}{2}$ years; the average length of time of service in Ontario was $21\frac{3}{4}$ years. No time is allowed applicants except that which has been spent in teaching a Common School in Ontario; though their having taught school many years in England, Ireland, Scotland, or other British Provinces, has induced the Council, in some instances, to admit applicants to the list of *worn-out* Common School teachers after teaching only a few years in this Province—which would not have been done had the candidate taught, altogether, only a few years of his life.

4. My reports in former years contained the names of the parties on whose testimony the application in regard to each case was granted, together with the county of each pensioner's residence. That part of the table has been omitted in my last and present report to save the expense of printing, though the record is preserved in the Department for reference, if occasion require.

XVI. TABLE Q.—DISTRIBUTION OF THE LEGISLATIVE SCHOOL GRANT, TOGETHER WITH THE SUMS PROVIDED FROM LOCAL SOURCES AS AN EQUIVALENT, AND OTHER MONEYS PROVIDED BY MUNICIPALITIES AND SCHOOL TRUSTEES.

The object of this table is twofold—first, to present a complete view of all the moneys which have been received and expended, and from what sources derived, in connection with the Normal, Model, Grammar and Common Schools of Ontario: and, secondly, to show that these moneys have not been expended in any favoured localities, but have been impartially distributed in all counties, cities, towns and villages throughout the Province according to population and local co-operation. The people provided and expended in 1867, for Grammar and Common School purposes, irrespective of colleges, academies, and private schools, \$1,833,011—increase, \$73,368.

XVII. TABLE R.—EDUCATIONAL SUMMARY FOR 1867.

This table exhibits in a single page the number of Educational Institutions of every kind, as far as I have been able to obtain returns, the number of students and pupils attending them, and the amount expended in their support. The whole number of these institutions in 1867 was 4,855—increase, 55. The whole number of students and pupils attending them, 416,812—increase, 11,545. The whole amount expended for educational purposes during the year was \$1,920,023. Unexpended balances, \$207,545. Total amount available for educational purposes during 1867 was \$2,127,568—increase, \$77,443.

XVIII. TABLE S.—GENERAL STATISTICAL ABSTRACT OF THE PROGRESS OF
EDUCATION IN ONTARIO, FROM 1842 TO 1867 INCLUSIVE.

It is only by comparing the number and character of Educational Institutions at different periods, the number of pupils attending them, and the sums provided and expended in their support, that we can form a correct idea of the educational progress of a country. The statistics for such comparisons should be constantly kept before the public mind to prevent erroneous and injurious impressions, and to animate to efforts for further and higher advancement.

There is no question that great improvements have been made in all our institutions of education, in regard to both the subjects and methods of teaching, as well as in accommodations and facilities of instruction. Equal, if not greater, progress has been made in the number of our Educational Institutions, in the attendance upon them, in the provision for their support. By reference to the brief but important Table S, the reader can ascertain the progress of education in any year or series of years since 1841, as far as returns could be obtained. Take, as illustrations, a few items for the last fifteen years. In 1853, the school population between the ages of 5 and 16 years was 268,957; in 1867, it was 447,726. In 1853, the number of Common Schools was 3,093; in 1867, their number was 4,261. In 1853, the number of pupils attending the Common Schools was 194,736; in 1867, their number was 382,719. In 1853, the amount provided for Common School purposes was \$617,836; the amount provided for these purposes in 1867 was \$1,473,188. In 1853, the number of *Free* Schools was 1,052; in 1867, their number was 3,838. The table furnishes materials for various other comparisons equally striking; and if twenty, instead of fifteen years, be taken as the period of comparison, the results will appear still more remarkable and encouraging to every friend of Canadian progress.

XIX.—THE EDUCATIONAL MUSEUM.

Nothing is more important than that an establishment designed especially to be the institution of the people at large—to provide for them teachers, apparatus, libraries, and every possible agency of instruction—should, in all its parts and appendages, be such as the people can contemplate with respect and satisfaction, and visit with pleasure and profit. While the schools have been established, and are so conducted as to leave nothing to be desired in regard to their character and efficiency, the accompanying agencies for the agreeable and substantial improvement of all classes of students and pupils, and for the useful entertainment of numerous visitors from various parts of the country, as well as many from abroad, have been rendered as attractive and complete as the limited means furnished would permit. Such are the objects of the Educational Museum.

The Educational Museum is founded after the example of what has been done by the Imperial Government as part of the system of popular education—regarding the indirect as scarcely secondary to the direct means of forming the taste and character of the people.

It consists of a collection of school apparatus for Common and Grammar Schools, of models of agricultural and other implements, of specimens of the natural history of the country, casts of antique and modern statues and busts, &c., selected from the principal museums in Europe, including the busts of some of the most celebrated characters in English and French History; also, copies of some of the works of the great masters of the Dutch, Flemish, Spanish, and especially of the Italian schools of painting. These objects of art are labelled for the information of those who are not familiar with the originals, but a descriptive historical catalogue of them is in course of preparation. In the evidence given before the Select Committee of the British House of Commons, it is justly stated that “the object of a National Gallery is to improve the public taste, and afford a more refined description of enjoyment to the mass of the people;” and the opinion is, at the same time, strongly expressed that as “people of taste going to Italy constantly bring home beautiful modern copies of beautiful originals,” it is desired, even in England, that those who have not the opportunity or means of travelling abroad, should be enabled to see, in the form of an accurate copy, some of the works of Raffaele and other great masters; an object no less desirable in Canada than in England. What has been thus far done in this branch of public instruction, is in part the result of a small annual sum which, by the

liberality of the Legislature, has been placed at the disposal of the Chief Superintendent of Education, out of the Ontario Educational grants, for the purpose of improving school architecture and appliances, and to promote art, science and literature by the means of models, objects and publications, collected in a Museum connected with the Department.

The more extensive Educational Museum at South Kensington, London, established at great expense by the Committee of Her Majesty's Privy Council of Education, appears, from successive reports, to be exerting a very salutary influence, while the School of Art connected with it is imparting instruction to hundreds, in drawing, painting, modelling &c.

A large portion of the contents of our museum has been procured with a view to the School of Art, which has not yet been established, though the preparations for it are completed. But the Museum has been found a valuable auxiliary to the schools; the number of visitors from all parts of the country, as well as from abroad, has greatly increased during the year, though considerable before; many have repeated their visits again and again; and, I believe, the influence of the Museum quite corresponds with what is said of that of the Educational Museum of London.

During the year, I felt that the arrangements for obtaining supplies of prize and library books should be revised and extended, and that further additions should be made to the Educational Museum. This could only be done by personal selections and communications with the parties concerned. For these purposes, I requested Mr. Hodgins, Deputy Superintendent, (who has had for years almost the entire charge of these branches of the Department) to proceed to England and to the Exhibition at Paris. A list of the interesting and instructive selections which he has made, will be found in the Appendix, but the report of his proceedings, I append as follows—illustrating as it does his vigilance and efficiency in whatever he undertakes, as well as the value of his labours on this occasion:—

REPORT TO THE CHIEF SUPERINTENDENT OF EDUCATION FOR ONTARIO ON THE ARRANGEMENTS MADE IN ENGLAND FOR THE SUPPLY OF BOOKS, AND SCHOOL REQUISITES; ALSO IN REFERENCE TO OBJECTS OF ART, &C., FOR THE EDUCATIONAL MUSEUM. BY THE DEPUTY SUPERINTENDENT.

REVEREND SIR,—A number of years having elapsed since arrangements were personally made with publishers in England, for a supply of our public schools with books, maps, charts and apparatus, it was deemed advisable to revise these arrangements in England (as we had frequently done in the United States) and to largely extend our facilities of supply from that quarter. This was the more necessary since the prices of American books had so greatly increased during the last four years. Agreeably, therefore, to your instructions, I left for England on the 1st of July. In addition to the particular object which I have mentioned, you also requested me to procure in Paris such objects of interest, (adapted to our Educational Museum) as you had seen at the Great Exhibition there, but which could not be removed until after the close of the Exhibition itself. You further authorized me to procure in London and elsewhere such additional objects as I might deem desirable for the Educational Museum and for our projected School of Art. I now proceed to report to you how far I was enabled to carry out your instructions.

I.—BOOKS AND SCHOOL REQUISITES.

Soon after my arrival in England, I prepared a circular to all the publishers, who had hitherto supplied us with books, &c., and to various others, who had recently gone into business in London, Edinburgh, &c. In this circular I explained the object of my visit, wished the publishers to state their lowest terms, and intimated my intention of calling upon them personally, to confer upon the subject of revised terms, the extent of our orders, &c. In reply to this circular I found that none of our old publishers were disposed to offer better terms than I had been enabled to make with them some years ago. The new publishers, too, were as little disposed as the old ones to offer more than the usual trade terms to exporters. As it took some little time to send out and receive replies to this circular, I devoted the intermediate time to enquiries in London and Paris for objects suitable for our Educational Museum, to which I shall hereafter refer.

With several of the publishers I had some little difficulty, when I first called, to

induce them to modify their terms. They alleged that they had already given us their best export terms for cash. After sundry conferences and explanations they were at length induced, with two or three exceptions, to agree to an additional discount for cash of $2\frac{1}{2}$, 5, $7\frac{1}{2}$ or 10 per cent. (as the case might be) over and above their former rates of discount to the Department. Five per cent. was the average additional discount which I was thus enabled to secure for the Department, together with the advantage, in most cases, as heretofore, of the odd books, viz.:—7 as $6\frac{1}{2}$, 13 as 12, or 25 as 24. This additional discount will be quite sufficient to pay the customs duty which has recently been imposed upon books coming into the Province, and thus enable the Department to supply the schools with a very greatly increased variety of books at the old rates, viz.:—on an average currency for sterling pieces (*i. e.* 20 cts. for the shilling sterling).

There were two principal classes of publishers with which I had to do (with many shades between them). The one class generally regarded their books as so much merchandise, out of which they were determined to make as much profit as possible, without much reference to the price or quality of their publications. The other class were book publishers, *con amore*, who were generally particular as to the character of the books issued by them, and in proportion to the excellence of their publications, they were anxious for their general diffusion, especially among Schools. With this latter class I had in most cases, on giving explanations, little or no difficulty in coming to terms, but with the former, the objects I had in view possessed little interest to them, and being chiefly wealthy firms, having a large sale for their publications in Britain, they were not inclined to give the export trade to Canada any very special encouragement or advantage.

Apart from these personal characteristics of individual publishers, the publishing trade of Britain seems to have divided itself into two great branches, 1st, the publishers of miscellaneous books of all kinds—the copyright of which has either expired, or has never existed in England; and 2nd, those who chiefly confine themselves to the publication of copyright books. There are several intermediate degrees between these two main divisions; but they can be generally classified under either head. With the former class, who had little or no copyright to pay, I was enabled, with one or two exceptions to make highly advantageous terms; with the latter, who had copyright to pay on nearly every one of their books, I did not of course expect to do as well. There were, however, some gratifying exceptions; while the freshness, originality and excellence of their publications quite made up for the difference in the cost of their books.

Without giving in this report the specific terms, which I was enabled, on behalf of the Department, to make with the various publishers, (most of them being special and confidential), I think it but justice to those who acted liberally to our Public Schools to classify them as follows:—

FIRST-CLASS.—THOSE GIVING THE BEST TERMS.*

- | | |
|-----------------------------------|---|
| 1. Messrs. Wm. Blackwood & Sons— | Chiefly Copyright Publishers. |
| 2. Religious Tract Society. | } Chiefly Copyright, but to some extent supported by voluntary contributions. |
| 3. Christian Knowledge Society. | |
| 4. The Book Society. | |
| 5. Mr. William P. Nimmo. | } Chiefly Miscellaneous Publishers. |
| 6. Messrs. Geo. Routledge & Sons. | |
| 7. “ Frederick Warne & Co. | |
| 8. “ Cassell, Petter & Galpin. | |
| 9. “ Alex. Hislop & Co. | |
| 10. “ Charles Griffin & Co. | } Map Publishers. |
| 11. “ William Oliphant & Co. | |
| 12. “ W. & A. K. Johnston. | |
| 13. “ Wm. Smith & Sons. | |
| 14. “ George Philip & Sons. | |

* This list, of course, comprises only the names of the English Publishers from whom the Department obtains a supply of Prize and Library Books, &c. The American list it is not necessary to give in this report.

SECOND-CLASS.—THOSE GIVING MORE OR LESS LIBERAL TRADE TERMS.

15. Messrs. Sampson Low, Son & Co.—	Miscellaneous and Copyright Publishers.
16. “ Johnston, Hunter & Co.	} Chiefly Miscellaneous Publishers.
17. “ J. Hogg & Sons.	
18. “ Gall & Inglis.	
19. “ Thos. Nelson & Sons.	
20. “ W. & R. Chambers.	} Miscellaneous and Copyright Publishers; Chiefly Miscellaneous Publishers.
21. “ Seeley, Jackson & Halliday,	
22. “ Bell & Daldy.	
23. “ Griffith & Farran.	
24. “ Groombridge & Sons.	
25. “ Houlston & Wright.	
26. “ Jackson, Walford & Hodder.	} Miscellaneous and Copyright Publishers.
27. “ Morgan & Chase.	
28. Mr. F. W. Partridge.	
29. Messrs. A. Strachan & Co.	
30. “ John Snow & Co.	} Chiefly Miscellaneous Publishers.
31. “ William Tegg & Co.	
32. “ Ward & Lock.	
33. Wesleyan Conference Office.	} Miscellaneous and Copyright Publishers.
34. Messrs. Jarrold & Sons.	
35. “ Jas. Blackwood & Co.	} Chiefly Miscellaneous Publishers.
36. “ Milner & Sowerby.	
37. “ Lockwood & Co.	} Miscellaneous and Copyright Publishers.
38. “ A. & C. Black.	
39. “ Burns, Oates & Lambert.—	

Roman Catholic Publishers—with whom I made arrangements for the English supply of Roman Catholic Separate School Prize and Library Books.

THIRD CLASS.—CHIEFLY GIVING TRADE TERMS.

40. Mr. W. W. Gardner.	} Chiefly Copyright Publishers.
41. “ William Mackintosh.	
42. Messrs. Oliver & Boyd.	
43. Mr. J. Walton.	
44. Messrs. Macmillan & Co.	
45. “ Marshall & Laurie.	
46. Mr. J. Murray.	
47. Messrs. Longman & Co.	

I was further enabled to conclude most satisfactory arrangements, chiefly through the intervention of our attentive and obliging London Agent and Shipper—(Mr. A. F. Potter, formerly of Toronto,) with the makers of philosophical and chemical apparatus, &c., as well as with the manufacturers of twine, writing and wrapping papers, envelopes, &c., of which we use large quantities in the year.

II.—OBJECTS OF ART, &c., FOR THE MUSEUM.

In order to obtain the various objects desired for our Educational Museum, I confined myself chiefly to three sources of supply, (1) the British Museum, (2) the South Kensington Museum of Science and Art, and (3) the French Exhibition at Paris. Several minor collections were also examined, and many useful and interesting objects procured from them, or from private parties.

As already intimated, I devoted several days to a careful examination of the various objects of art, models and apparatus in the Paris Exhibition. Those which I deemed

most suited to our purpose, and which I procured, may be grouped under the following heads.* A detail of them will be found in the appendix.

I. Models of School Furniture and School Requisites.

II. Scientific Models, Photographs, &c.

III. Specimens of Natural History.

Of these articles I procured all that were for sale, and left orders for several others, not then available. Many of the most interesting and striking of the objects selected could not, I regret to say, be procured on any terms—they being either single models made for the Exhibition or for private parties. I was thus unable to procure one-fourth of the articles which I had selected, which accounts for the meagreness of the list of articles procured from Paris.

In the British Museum and in the South Kensington Museum of Science and Art, I found many things of great interest and value for our collection. I had, however, to content myself with making a small, but I trust as interesting and varied a selection as the means at my disposal would allow. As some of these articles are of special interest, I will briefly refer to them as follows:—

I.—ASSYRIAN AND EGYPTIAN SCULPTURES.

Of the exceedingly valuable collection of sculptures with which Mr. Layard's explorations at Nineveh have enriched the British Museum, I was enabled to make choice of several of the most interesting casts authorized by the Museum. This selection includes, I. A colossal, human headed, winged bull; II. A four winged figure with mace; III. Slabs representing (1) Sardanapalus I., with winged human figure and offerings, (2) the eagle headed deity (Nisroch) with mystic offerings, beside the sacred tree, (3) an attendant (eunuch) with bow and arrows, &c., (4) Sardanapalus and army besieging a city, (5) a royal lion hunt, (6) Sardanapalus II., at an altar pouring a libation over dead lions, (7) Sardanapalus III. and his Queen feasting after the lion-hunt, (8) a very striking slab representing a wounded lioness, (9-11) horses, lions, and male and female figures; IV. Black obelisk from the great mound set up by Shalmaneser (King of Assyria) about 850 years B.C. I also procured, V. Two most interesting stones (recently added to the British Museum collection) containing records in cuneiform character, &c., of the sale of land, about 1120 B.C.; VI. Large statue of Memnon; VII. Lid of large sarcophagus; VIII. Side of an obelisk from Temple of Thoth (from Cairo), IX. Rosetta stone, with inscription in honour of Ptolemy.

2.—CASTS OF GEMS, MEDALS, &c.

From a private dealer I procured, (1) a beautiful set of (470) casts of the celebrated Poniatowski gems. (A similar collection I afterwards saw in the Ashmolean Museum, at Oxford). (2) a set (of 170) medals, illustrative of Roman History, the Emperors, &c.; (3) a collection of medals of the Popes; (4) a set of the great seals of England; (5) 38 medals of the Kings of England; (6) 80 of the Kings, &c., of France; (7) 24 of Russian Emperors, &c.; (8) 250 modern celebrated men; (9) besides numerous casts of medallions, Tazza, pieces of armour, &c., &c.; (10) a beautiful collection of casts of leaves, fruit, &c.; (11) about 60 busts, life size, of noted modern characters, &c.

3.—IVORY CARVINGS, CHROMO-LITHOGRAPHS, PHOTOGRAPHS.

From the collection of the Arundel Society, published in connexion with the South Kensington Museum, I procured, (1) a full set of 150 specimens ivory carvings, of various periods from the second to the sixteenth century, in fictile ivory; (2) 60 chromo-lithographs, beautifully coloured, illustrating Italian art; (3) 573 photographs of National portraits, illustrative of English history, including the Tudor period; (4) 400 miscellaneous photographs of objects of art, scenes, &c.; (5) 170 engravings of modern sculpture.

* See Appendix for List.

4.—ELECTROTYPES OF ART TREASURES.

Of the rich and beautiful collection of Elkington and Franchi's electrotypes of art treasures in the South Kensington collection, I was only enabled to make a small selection, owing to the expense of the copies for sale. The list of articles selected will be found in the Appendix.

5.—FOOD ANALYSIS.

Upon application and explanation of my object, I was enabled to procure from the authorities of the South Kensington Museum, a full set of the printed labels of the numerous samples of Food Analysis exhibited in the Museum. I also procured specimens of the Analysis boxes with glass covers, so as to enable us to form a similar collection, on a smaller scale, for our own Museum. This collection, when made, will form a most interesting and instructive study for the farmer and food consumer.

6.—INDIA RUBBER MANUFACTURES.

Through the kindness of Messrs. Mackintosh & Co., the eminent India Rubber Manufacturers of Manchester, I was enabled to select several interesting specimens of Rubber-work, illustrative of the various uses to which India Rubber is applied. Some of these specimens are highly artistic in design.

7.—NAVAL MODELS.

Having made arrangements while in London, I have since procured some beautiful models of ships and boats, including a line-of-battle ship and steam vessels.

8.—MISCELLANEOUS.

I also selected quite a number of Greek, Roman and English Coins, with a few curiosities and specimens of Natural History, &c.

I had wished to obtain some striking photographs of objects and places in India, from the India Office, in London, and models from the National Life-Boat Association, but the state of the funds at my disposal did not admit of their purchase.

To the officers of the British and South Kensington Museums, I was indebted for many kind attentions and valuable suggestions.

Among the many impressions which I received during my last visit to England, none struck me more forcibly than this,—that in the gratification and cultivation of the popular taste, England has made wonderful advances. One cannot but see that the memorable exhibition of 1851, has been the great forerunner and germ of all the progress which has of late years been made in this direction in the various cities and large towns of the United Kingdom. The British Museum, with its varied collections of everything of historical and practical interest, is still at the head of all the popular Museums of Britain, but in the directly Educational and Aesthetic character of its vast collections, even it is now quite eclipsed by its more popular rival at South Kensington—the result as well as representative of the great exhibitions promoted by the late lamented Prince Consort, in 1851 and 1861.

The South Kensington Museum, as you are aware, is unrivalled in the beauty and extent of its internal fittings and arrangements, no less than in the extent and value of its collections of objects of art, and of industrial and practical value, as well as of articles of *virtu* of great historical interest. It is itself the parent institution of many of the admirable collections and local Museums and Schools of Art throughout the three Kingdoms. The travelling collection of objects of art which it sends to the local exhibition of these Schools of Art is most varied and interesting. This, it may well be said, is "object teaching" on a grand scale, and in a most attractive form, for the adult masses of England, Ireland and Scotland, and so it emphatically is. This is clearly the policy of the educational authorities in England at present, as it has been for years to some extent on the Continent of Europe. I felt glad when I looked over these large and attractive popular Museums that we had thus far been enabled by your foresight, and the liberality of our

own Legislature, to keep pace in a humble degree with the great efforts which are now being systematically made in England to popularize science and art. These efforts are not only designed to promote this object, but at the same time they tend to interest and instruct the masses not only by cultivating the taste, but by gratifying and delighting the eye by means of well appointed Educational Museums and popular exhibitions.

I have, &c.,

(Signed)

J. GEORGE HODGINS,

Deputy Superintendent.

XX.—EXTRACTS FROM REPORTS OF LOCAL SUPERINTENDENTS OF COMMON SCHOOLS.

In most School Reports, both in Great Britain and the neighbouring States, a large space is devoted to extracts from Local Reports, as illustrating the practical working of the system, the inner and practical life of the people in their social relations and development—the intelligent and noble struggles of some new settlements to educate their children, and the shameful negligence of some old settlements in regard to the education of their children.

Character of these Reports.—In Appendix A to this Report, I have given extracts from the Reports of Local Superintendents of townships, cities, towns, and incorporated villages. These extracts of reports, impartially given, are few in comparison with the five hundred municipalities of this Province. Very many of the local statistical reports are unaccompanied by any remarks—indicating probably the absence of anything very gratifying to remark upon. But the extracts given will, among other things above noticed, establish the following facts:—

1. *Apathy and Selfishness a cause of Backwardness.*—That the inefficient and stationary condition of the Schools in many places does not arise from any complained of defects in the School law or system, but in most instances from the apathy and misguided selfishness of the parties concerned—in a few instances from the newness and poverty of the settlements.

2. *Spirit and Enterprise of Old and New townships contrasted.*—That, on the contrary, the gratifying advancement of the Schools in other places does not depend upon the age or wealth of the settlement, but upon the spirit of the people. Some of the oldest settlements of the Province in the River and Lake Townships of the County of Welland, and on the River St. Lawrence, are far behind the greater part of the newer townships.

3. *Eastern and Western parts of Ontario compared.*—That, as a general rule, the Eastern Section of Ontario, East of Kingston—the County of Lanark excepted—are far less advanced, and far less progressive, than the Western part of the Province, except some old townships on the Rivers Niagara and Detroit, and on Lake Erie. This will be strikingly seen on reference to the library map published in my report for last year.

4. *Best Teachers the Cheapest.*—That as the best made shoes, and waggons, and fences, and farm-tools are the most serviceable and cheapest in the long run, so the best teachers, and school-houses and furniture, are by far the cheapest, as well as the most profitable for all parties, and all the interests of education and knowledge.

5. *Evils of the "Cheap" Teachers.*—That the most serious obstacles to the proper education of children in many parts of the country are bad school-house accommodation, and the employment of incompetent and miscalled cheap teachers; the only remedy for which is requiring proper school-house accommodation, doing away with the lowest class teachers, and prescribing a minimum teacher's salary which will secure the employment and continuance in the profession of competent teachers. This is what the country, as a whole, owes to itself, as well as to the helpless and injured youthful members of it.

6. *Faithfulness of County Boards.*—That immense advantages have resulted from the faithfulness with which the County Boards of Public Instruction have generally discharged their duties in the examination and licensing of teachers; but it is manifest that there is great need of simplifying their constitution and duties, and of the greater efficiency of the office of Local Superintendent, as well as to prevent the well qualified teachers whom they license from being deprived of, or driven from employment by the meanness and folly of Trustees who employ incompetent teachers.

7.—*Free Schools Universally Popular*.—That opinions and practice have become so general in favour of *free schools*, that it is time now to settle the question by Legislative enactment, as well as to provide for the application of the free school principle in regard to the universal instruction of children. No child should be deprived of what the whole community is taxed to provide for it.

8.—*Competitive Examinations and Prizes*.—That competitive examinations of schools, and the distribution of prizes to reward and encourage *punctuality, good conduct, diligence and perfect recitations* of pupils, form a powerful element for improving the schools, and animating teachers and pupils to exertion. In all the local reports, there is but one dissentient voice on this subject, and that comes from the Local Superintendent of the townships of Angelsea and Kaladar, and the purport of that dissentient voice is, that the unsuccessful will be envious of the successful! A principle according to which punctual, well conducted, diligent and successful men in life ought not to be rewarded by any respect, or notice, or increase of wealth, over the negligent, and lazy and worthless, lest the latter should envy and hate the former. The Scripture of such doctrine would be to "to him that hath (improves what he has) shall *not* be given, and he shall *not* have abundance." It is pleasant to observe, that there is but one Local Superintendent in all Ontario that advocates such a doctrine.

9.—*Miscellaneous*.—These extracts from local reports suggest many other topics, and lessons worthy of the serious consideration of every friend of universal education and knowledge. To facilitate references, I have prefixed topical headings to most of the extracts.

XXI.—REMARKS ON THE GRAMMAR SCHOOL SYSTEM ; ATTENDANCE OF GIRLS WITH BOYS IN THE GRAMMAR SCHOOLS ; REPORTS OF THE INSPECTOR OF GRAMMAR SCHOOLS.

1. In a former part of this report, I have referred to the statistics of Grammar Schools, and made a few remarks on their condition. I think the time has arrived, and I am now furnished with materials to discuss the question more fully than I have hitherto done in any of my Annual Reports.

2. *Historical References : Defects in the Law*.—It is known that although the system of Grammar Schools was perhaps the best the circumstances of the country permitted when it was established, more than sixty years ago (in 1807,) nine years before any provision was made for Common Schools, it has never been efficient or satisfactory. In 1853, a step in advance was taken by the consolidation and amendment of previous Grammar School Acts, to improve the system and adapt it to our present system of Municipal Government. But the Act of 1853, lacked the essential element of providing for the support of Grammar Schools equally with the Common Schools, and upon the same principle. There was also wanting the further essential element of unity and sympathy in the management and interests of the Grammar and Common Schools. They were still under different Boards of management ; their interests often clashed ; they were rivals in the same work, instead of the one being regarded as, and being in reality, a supplement to the other.

3. *Improvements under the Law of 1853*.—To prevent this collision, to provide better for supporting the Grammar Schools, and to identify them more in management and system with the Common Schools, provision was made in the Law of 1853 for uniting the Boards of Trustees, providing at the same time for the fulfilment of the functions of each class of schools. As the Grammar Schools had been under no inspection, provision was made for that purpose, and a programme of studies was prescribed for the one class of schools as had been for the other.

4. *Inefficiency of the Grammar Schools Revealed—Their undue Multiplication*.—The inspection of the Grammar Schools soon brought to light their utter inefficiency, and the various contrivances devised and employed to get an undue share of the Fund to establish and keep in existence merely nominal, and, in some instances, really needless Grammar Schools. And when Parliament was induced to increase the Grammar School Fund nearly \$20,000 per annum, the County Councils were prevailed upon by local influences, to increase the number of Grammar Schools more in proportion than the increase of the Fund.

5. *Legislation—Act of 1865*.—At length Parliament passed the Grammar School Act of 1865, by the provisions of which the undue multiplication of Grammar Schools was prevented, the duties of Grammar Schools defined, and an amount of local support re-

quired, (irrespective of fees) for the salaries of teachers, equal at least, to half the amount of the apportionment from the Grammar School Fund. The apportionment of the Fund was to be made on the basis of the average attendance of pupils in the prescribed programme, the old distinction between Senior and Junior Schools being abolished.

6. *Improvements in the System in 1865.*—A more thorough and frequent inspection of the schools was provided for; the Council of Public Instruction, with the assistance of the able Inspector of Grammar Schools, prepared a programme of studies conformable to the new law—including not only a classical course, but a high English course of studies, and providing for the entrance examination of pupil candidates, both for the high English and classical course, by the Inspector. This programme was submitted to, and approved of by the Governor in Council. To meet an alleged exigency, provision was made in the programme to admit girls, on application, and after examination, to attend the Grammar Schools to learn French in connection with the prescribed English course of studies for classical pupils, but not to be returned as Grammar School pupils, whose average attendance should constitute the basis of the distribution of the Fund. This exceptional regulation in behalf of girls (it being alleged that in most cases they could not otherwise have an opportunity to learn French) assumed, of course, that they would not think of studying Greek or Latin, (the studying of the one or the other being the test of a Grammar School pupil in the classical course) though nothing was said on the subject in the programme. But in the course of the year, it appeared that scarcely any girls entered a Grammar School to learn French! but scores of them were found professedly studying Latin—being thereby claimed on the part of the Masters and Trustees of the schools admitting them as Grammar School pupils, and as such entitled to be counted in the distribution of the Grammar School Fund!

7. *Perversion of the Grammar Schools—Their Standard lowered.*—Such was the state of the Schools on my return from an eight months' tour in Europe, at the end of May, 1867. The programme of studies had provided to make the Grammar Schools High English Schools (including French), and Elementary Classical Schools to prepare for the professions and universities; but the local reports showed scarcely any admissions of either boys or girls from the Common Schools to the more advanced English course prescribed for the Grammar Schools, but an unprecedented influx of girls to learn Latin and Elementary English. The reports of the able Inspector of the Grammar Schools showed that the attempt to make them High English Schools, as well as classical, was an utter failure; that the Common Schools were regarded as better schools for any branch of English education than most of the Grammar Schools; that the prestige and standard of a majority of the Grammar Schools were being reduced by the efforts to fill them with girls as well as boys in the elementary subjects, in order to augment their income, without the shadow of a pretension or claim to teach the higher subjects of an English education to either boys or girls, or even to give a sound English education at all.

8. *Counteracting Efforts of the Department.*—In apportioning, early in 1867, the Grammar School Fund for the year, on the basis of average attendance in the prescribed course, the Department was perplexed by this new and startling aggregation of girls returned as classical pupils, and not willing to ignore their attendance, and yet feeling that it was a novel application of the Fund, intended wholly for classical and High English education for the professions and university, decided for that year, till further steps could be taken, to recognize the classical attendance of two girls as equal to that of one boy. Had this not been done, some of the most efficient Grammar Schools, in which no girls had been induced to learn Latin, would have been crippled in their funds. Among the early complaints made to me, on my return from Europe, was the non-recognition of girls as classical pupils equally with boys in the apportionment of the Grammar School Fund, and then, from others, the recognition of girls at all as unjust to those Grammar Schools which had always taught boys alone, and in the prescribed subjects, according to the intention of their institution. In the meantime, the official report of 1866 of the Inspector of Grammar Schools portrayed a state of things which I felt ought not to be perpetuated, and I determined to prepare a paper upon the whole question, and submit it to the first Law Officer of the Crown for his opinion and advice to guide me in my action for 1868. My letter, I believe, was the subject of much consultation, as well as of long deliberation. I insert it in this place, together with the reply, as follows:—

No. 3513, X 2.

EDUCATION OFFICE,
Toronto, 12th October, 1867.

SIR.—I have the honour to submit for your opinion and direction, as to whether the law is to be interpreted to include girls as well as boys as pupils of the Grammar Schools, on the basis of whose attendance the fund is distributed to the schools. The provision of the law on the subject, as expressed in the 7th section of the Grammar School Improvement Act, 29 Vic., ch. 23, is as follows:—

“The apportionment payable half yearly to the Grammar Schools, shall be made to each school conducted according to law, upon the basis of the daily average attendance at such Grammar School of pupils in the programme of studies prescribed according to law for Grammar Schools; such attendance shall be certified by the Head Master and Trustees, and verified by the Inspector of Grammar Schools.”

“The Council of Public Instruction, prepared two courses of study for the Grammar Schools—the one a classical course for those pupils who were preparing for one of the learned professions, or to matriculate in one of the Universities; the other for those pupils who might “desire to become surveyors, or to study for matriculation in the University of Toronto, as students of Civil Engineering, or to study the higher English Branches and French, without taking Greek or Latin.” These programmes of studies were submitted to and approved by the Governor General in Council, as was also the following regulation.

“To afford every possible facility for learning French, girls may, at the option of the Trustees, be admitted to any Grammar School, on passing the preliminary and final entrance examinations required for the admission of boys. Girls thus admitted, will take French (and not Latin or Greek,) and the English subjects of the classical course for boys; but they are not to be returned or recognized as pupils pursuing either of the prescribed programmes of studies for the Grammar Schools.”

But as in the two prescribed programmes of studies for pupils of the Grammar Schools (and according to whose average attendance the Fund is apportioned to each School) nothing is said about *sexes*, a large number of girls have been induced to study *Latin* in many of the Schools, in order to increase the apportionment of the Fund to such Schools. Where a girl intends to study the modern continental languages—French, Italian, Spanish, Portuguese, &c.—the previous knowledge of Latin is unquestionably a great advantage; but this cannot be supposed to be the case with numbers of girls in small towns and villages, while there is not an instance of the kind in the cities of Toronto, Hamilton, Kingston, &c. For example, in the little village of Norwood, there are 17 girls entered as studying Latin; in Oshawa, 28; in Perth, 36; in Whitby, 37, &c. The Inspector of Grammar Schools reports that the greater part of these girls professedly studying Latin, cannot master the Declensions, and are deplorably deficient in the elements of English education, in which indeed their studies appear to be greatly neglected; while on the other hand, in the best Grammar Schools, where the original objects of such schools in preparing boys for the universities, professions, &c., are duly observed, and girls are not admitted, the Masters and Trustees naturally complain that their apportionments from the Grammar School Fund are unjustly lessened by the recognition of bogus girl pupils in other Grammar Schools. It is also insisted that the mixture of large boys and girls is unfavourable to efficient discipline, and to the progress of either class of pupils, and not compatible, as a general rule, with the refined education of girls. I myself was so impressed with this view, that when, in 1841, I was requested to become Principal of Victoria College, I declined doing so until the *female* department of it was abolished; and since then, the religious body that established Victoria College for the education of boys has established a female college for the education of girls. It is also urged that this pressing of girls into the Grammar Schools interferes with the legitimate sphere of Female Seminaries and Schools, and prevents their establishment where there is ample legal authority to do so. But without reference to the correctness or incorrectness, the soundness or unsoundness of these opinions and reasons, I am induced by the facts above stated, by the complaints of injustice on the part of the authorities of some Grammar Schools, as well as from the fact that in England, and in Europe at large, a female pupil is unknown in any public Grammar School attended by boys, any more than a female student of a college attended by male

students—to request your official opinion as to the proper interpretation of the Grammar School Act on this subject—whether, by pupils in the Grammar Schools, boys alone are to be understood, and whether the Grammar School Fund was not intended for the classical, mathematical, and higher English education of boys?

I have, &c.,

(Signed)

E. RYERSON.

The Honourable J. Sandfield McDonald,
Attorney-General, Ottawa.

REPLY.

ATTORNEY-GENERAL'S OFFICE,
Toronto, May 7th, 1868.

SIR,—The pressure of Parliamentary and Departmental duties has, I regret to say, caused me to overlook your letter of the 12th of October last, in which you submit for my opinion and direction as to whether the law is to be interpreted to include girls as well as boys as pupils of the Grammar Schools, on the basis of whose attendance the Fund is distributed to the schools. The provisions of the law on the subject as expressed in the 7th Section of the Grammar School Improvement Act, 29 Vic., chap. 23, is as follows:—

“The apportionment payable half-yearly to the Grammar Schools shall be made to each school conducted according to law upon the basis of the daily average attendance at said Grammar School of pupils in the programme of studies prescribed according to law for Grammar Schools, such attendance shall be certified by the Head Master and Trustees, and verified by the Inspector of Grammar Schools.”

Your letter contains, besides an extract from the prescribed course of study for Grammar Schools, adopted by the Council of Public Instruction, comments of your own bearing upon the question which are so exactly in accordance with the views which I have always entertained as to the impropriety of permitting girls to be received in Grammar Schools, that I have only to add that my interpretation of the Grammar School Act in relation to the question submitted by you, is that boys alone should be admitted to those schools, and that consequently the Grammar School Fund was intended for the classical, mathematical and higher English education of boys.

I am, &c.,

(Signed)

J. S. MACDONALD.

Rev. Dr. Ryerson,
Superintendent of Education, &c.

9. *Conviction against Educating large Girls and Boys Together.*—It will be seen by the foregoing letters that my own convictions are against the education of boys and girls (especially large boys and girls) together in the same school. Whether I am right or wrong in my convictions, they are of long standing. In 1841, as above stated, when the Presidency of Victoria College was offered me, I declined any official connection with that Institution, unless the *female* department (which had been connected with it since its establishment in 1834) were discontinued. At that time the attendance of girls as well as boys at such institutions was common in the Northern States. But in 1842, the female department in connection with Victoria College was abolished, and I am persuaded, that no party connected with that Institution would consent to the re-admission of girls with the boys, even in the preparatory department, which existed until the last year or two. The experience and observations of the last twenty-five years have only strengthened the convictions which I so strongly expressed in 1841 and 1842.

10. *Exceptional case of the Normal School explained.*—It is true that in the Normal School, female teachers, as well as male, are trained. But this was not so at the beginning, and it only became so from the necessity of training female teachers, and the impossibility of establishing a second Normal School for that purpose. In the next place, the attendance at the Normal School is for a *professional* purpose, and is brief—sceldom exceeding two sessions, of five months each, during which time there is no intercourse whatever allowed between the sexes, not even a recognition in the streets, a rule, the infraction of which, is followed by removal from the Institution. Whenever a second Normal School

is established, then the one school will doubtless be for the training of male teachers, and the other for the training of female teachers—as is done in the State of Massachusetts, and in the cities of Boston and New York. But of the two Model Schools connected with our Normal School, the one is a *girls'* school, where the female students in the Normal School observe and practise teaching, and the other is a *boys'* Model School, where the male students in the Normal School observe and practise teaching.

11. *The Common Schools also Exceptional—Reasons.*—In the Common Schools throughout the country, there is scarcely any choice but to educate boys and girls together,—the schools being elementary, the population sparse, the pupils and their parents being *acquaintances* as well as neighbours; and there seldom being a second room or a second teacher in the girls' department. Nevertheless, the Common School law provides for the establishment of a "second or girls' school (in the rural sections) when desired. But in the cities and many of the towns, there is a girls' department as well as separate play-yard for the girls. I am persuaded that in every village where there are two Common Schools, it would be a great economy and improvement on all sides, if one of the schools was for girls and the other for boys. The law provides for this being done, and authorizes Boards of Trustees in cities, towns and villages to establish any kind or description of schools they please. Apart from other considerations, there are many things that girls should be taught and ought to learn that are not needful for boys (as is the case in our girls' Model School here); and on the other hand, there are things which boys should be taught and learn not needful for girls. In the two School model cities in the United States—Boston and New York,—the mixed schools for boys and girls are chiefly the *primary* schools, while the intermediate (mostly called there "Grammar Schools") and High Schools are with few exceptions, respectively boys' schools and girls' schools. In the last school report for the city of New York, there is the following enumeration of the schools:—

Boys and Girls Separate in New York Schools.—"There are under the jurisdiction of the Board of Education, in addition to the College (formerly called "Free Academy") of the city of New York, and the Saturday Normal School for teachers, 44 Grammar Schools for Boys, 44 for Girls, and 4 where both sexes are taught in the same Department—50 Primary Departments, 38 Primary Schools, 6 Grammar and 7 Primary Schools for colored children, and 15 Corporate Schools, participating in the public money. There were also, during the year ending with the 1st October, last, 48 Evening Schools—26 for *males* and 22 for *females*." (p. 6.)

Boys and Girls also Separate in the Boston Schools.—The School Report of the City of Boston for 1864—a large octavo volume of 413 pages—contains the following summary statement of the schools of that city:—

"The schools of all grades under the care and control of the city, at the present time, are one Latin School for *boys*; one High English School for *boys*; one High School and Normal School for *girls*; twenty Grammar Schools, seven being for *boys*, seven for *girls*, and six for *boys and girls*; and two hundred and fifty-four Primary Schools for *boys and girls*." (p. 6.)

Even in Boston, the most classical city in America, they have not got to the length of establishing a Latin School for *girls*, or for making them Latin pupils with the boys, as is argued by some Grammar School masters of our country towns and villages. The City of Toronto stands on common ground with the City of Boston in this respect.

12. *Reasons for Discussing the Question now.*—But though my convictions as to the separate education of boys and girls have been strong and of long standing, I have deemed it premature and unadvisable to discuss the question in the elementary state of the schools, the immaturity of the school system and infancy of the country. The facts, however, which the working of the Grammar Schools, during the last two years, has developed, and existing public discussions on the subject, have left me no discretion but to give the above formal explanation of my views, and to invite special attention to this aspect of our Public Schools. The Inspector of Grammar Schools devoted one part of his last year's report to the question of "Girls in the Grammar Schools." The eight years' experience of the Reverend Doctor Ormiston, as Grammar School Inspector, produced convictions in perfect accordance with those of his successor, the Reverend G. P. Young, that the mixture of boys and girls in the schools was injurious to them as Grammar Schools. The

reasons are not any inferiority of capacity on the part of girls; on the contrary, I believe the advantage is generally on their side in the acquisition of many kinds of knowledge in childhood and youth; but the reasons are such, with some exceptions, as are given by Mr. Young in his report above referred to. Not a few parents have objected to send their boys, as well as girls, to mixed schools.

13. *Inferior character of Many Grammar Schools.*—The difficulty on the part of Doctor Ormiston, Mr. Young and others, is the absence of other institutions for the better education of girls. But the painful fact is that a majority of the Grammar Schools do not impart that better education, as is clearly shown in the Inspectors' reports. No one can read the facts and observations embodied in Mr. Young's reports for 1866 and 1867, without being impressed with the conviction that the attendance of girls at those Grammar Schools, where they are admitted, has greatly impeded rather than promoted their better education; and it is on this ground that I think other provision should be made for the better education of girls. The union of Grammar and Common Schools has increased, instead of mitigating the evil. It is the conviction of every Inspector of Grammar Schools, without exception, that their union with Common Schools, while it has afforded some means of support not otherwise available, has been injurious both to the common and classical departments of such Union Schools.

14. *Legislation Now Required to Counteract Evils of the present System.*—I had intended to leave over for another year any further legislation on the subject of Grammar Schools; but recent discussions, my own convictions, and the facts developed in the last two reports of the Inspector, appear to me to require the early attention of the Legislature to this department of our Public School system. The Reverend G. P. Young is an experienced teacher and one of the ripest scholars in Canada, and a man of very great general ability. He has devoted his whole time during four years to an inspection of the Grammar Schools twice a year, and, at my request, to a most thorough investigation of their character and condition. His last two reports are more the reports of a School Commissioner on the state of the schools and suggestions for their improvement, than the ordinary reports of a School Inspector. Mr. Young's report for 1867 is a sequel to that for 1866, and is the last with which the public will be favoured from him, as he has, against my remonstrances and solicitations, resigned his office of Inspector, and resumed the more quiet duties of a Professor in a College.

15. *Analysis of Inspector Young's admirable Reports of 1866 and 1867.*—As Mr. Young's last two reports discuss the whole question of Grammar Schools, I append them both to these my own remarks. In the former of these reports Mr. Young, among others, discusses the following topics:—"Direction in which the Grammar Schools are Drifting;" "Degradation of the Common Schools;" "False show of Classical Studies in the Grammar Schools;" "Apportionment of the Grammar School Fund;" "Union Schools;" "Girls in Grammar Schools." In the latter of these reports Mr. Young discusses with much research and ability the following topics:—"A Classical course of Study unsuitable for the great majority of the pupils attending our Grammar Schools;" "Defective character of the English education furnished in our Public Schools;" "English High Schools needed," with suggestions as to the admission of pupils, the subjects and methods of teaching; "Way in which Morality might be taught in the English High Schools;" "Physical Science in the High Schools;" "Common Schools."

16. *Failure of most of the Grammar Schools as superior schools Demonstrated.* It would be too much to say that I agree with all the opinions and suggestions which Mr. Young has so forcibly advanced in his reports, but I think he has conclusively shown, *first*, that a majority of the Grammar Schools in no respect do the work of English High Schools, though a High English course is prescribed in their programme of studies; *secondly*, that many of them are not even worthy of the name of Common Schools, in regard to their elementary English teaching; *thirdly*, that as classical schools they are, with some honorable exceptions, inefficient and useless—a waste of time and opportunity on the part of hundreds of girls and of very many boys; *fourthly*, that the union of Grammar and Common Schools is mutually injurious to each other—the Common School Department being emasculated of every pupil, both boy and girl, that can be squeezed into the Grammar School department, in order to augment the apportionment. So strong and rampant has the feeling become, that in a Grammar School Teachers' Association held in Toronto this

summer, the leading topic among those who were present and took an active part in the proceedings, (and repeated by the same individuals in the Common School Teachers' Association) was, not how the various defects, pointed out by Mr. Young, in the Grammar Schools might be remedied, and they be made more efficient; but the admission and recognition of girls as a means of obtaining more money from the School Fund. Of course the majority of the Grammar School Masters took no part in these proceedings, and were not even present at them; and many of the Grammar Schools are pursuing their appropriate work to the utmost of their means and power. But that the great majority of them are making no progress whatever, and "drifting" in the direction of comparative inefficiency, is not only shown by Mr. Young's reports, but by the reports of previous inspectors especially those of the Reverend Doctor Ormiston, and particularly with regard to the working and effects of union Grammar and Common Schools.

17. *Large Apportionment for Grammar, as Compared with Common School Education.*—Such then, is the very unsatisfactory state of the Grammar Schools, and that too in connection with the fact that the apportionment of public money for their support is *twenty times* as large per pupil taught as that in aid of the Common Schools—the apportionment for 401,643 pupils in the Common Schools being \$170,000, (or about forty-five cents per pupil,) and that for 5,696 pupils in the Grammar Schools being \$53,000 or upwards of \$9 per pupil. Mr. Young has shown that the present system and relations of the Grammar Schools tend to "degrade" the Common Schools, as well as to render the Grammar Schools utterly inefficient, either as High English or thorough Classical Schools. Even in Toronto, it has been objected to *grade* the Common Schools, by having one or more English High Schools, because it was alleged the Grammar School was properly the High School of the City. And this is the common objection against any attempt to establish Higher Common Schools in any of the municipalities where there are Grammar Schools, for you find, as shown in Mr. Young's reports, that even elementary English is not decently taught in many of the Grammar Schools, much less the elements of Natural History, Chemistry and Natural Philosophy, as well as the English Language and Literature, which should be embraced in the teaching of every superior English School. Provision has been made by the department by procuring apparatus, specimens, models, and even little cabinets for teaching and illustrating all these subjects; and attention called to the subject in the *Journal of Education*, but they are uncalled for in connection with the Grammar Schools, and used in only a few Common Schools.*

18. *Important Changes in the System deemed Essential.*—This state of things ought not to continue. All possible attention and efforts, aided by the experience and example of the most enlightened countries, have been directed in past years to organize and mature our Public School system, and to provide facilities for enabling the country to educate its youth. It is now time to look into the interior of the schools, to make them what they ought to be, and what the noble efforts of the people give them a right to expect and claim. When Grammar School legislation was proposed, more than fifteen years ago, I urged the identifying the Grammar with the Common School system in principle and

* I would direct attention to numerous articles on the subject in successive volumes of the *Journal of Education*. From one in the *Journal* for January, 1860, I select the following from the pen of Professor Agassiz, of Harvard University, showing the value to Science of local collections and Museums of Natural History in Schools. He says:—

"It is a great mistake to suppose that large Museums are necessary for the study of natural history, and that show-specimens from distant countries add much to the interest of a scientific collection. I deliberately assert, that there is not a school house in the country in the immediate vicinity of which it would not be easy to make, in a few years, a collection of native specimens sufficient to illustrate the fundamental principles of any branch of natural history. Nay, it is not too much to add, that such collections would contribute greatly to the advancement of science, if simple catalogues of their contents were published from time to time. I am satisfied, from my own experience, that every such collection could, in less than ten years, be made worthy of a careful examination by even the most critical professional naturalists, and would afford to the teachers and pupils a source of ever-new interests in their walks, and of ever-increasing extension of their knowledge and ability to observe. In Massachusetts, a very good beginning has already been made in several schools."—*Agassiz on the study of Natural History*.

Of the specimens kept in the Depository the following are examples:—Varty's collection of one hundred specimens of various objects in a case. Oliver and Boyd's set of twenty cards, with real objects attached, in a box. Cabinets of from twenty to one hundred and fifty specimens of minerals, metals, shells, fossils, rocks, etc.; chemical cabinets; silkworm case, with eggs caterpillar, cocoon with mulberry leaf, &c.; case of bees with grub, cells, etc.; also numerous prints of animals and vegetables useful to man; sources of food, of manufactures, etc.; apparatus and charts, illustrating Natural Philosophy, etc., etc.

management, as the proper means of providing accommodations and support for the Grammar Schools, and blending them with the sympathies as well as interests of the people. But this was thought to be too great a change, and that it was best to commence by organizing them into a system, with a certain amount of municipal control, hoping thereby to secure Municipal support. The attempt has been faithfully made, and the result is seen. The Grammar Schools have still little or no hold upon the sympathies of the country. It is with great difficulty that municipalities can be induced to grant anything, much less ample means for their support; and in many instances, there is unwillingness even to provide school-house accommodation for them. This is not so in regard to the Common Schools, means are readily forthcoming to erect and furnish houses, which are often shown as the pride and glory of the cities and towns in which they are situated. It is not so with the Grammar Schools, with a few solitary exceptions.

19. *Former Class Legislation—Its baneful effects still felt.*—Why this difference of public feeling in regard to the Common and Grammar Schools? The reverse is the case in the neighbouring States. In cities and towns and villages there, English High Schools and Classical Schools are provided with more imposing accommodations, and shown, with even more pride, in some instances, than their Elementary Common Schools. Why is it otherwise in Ontario? It is certainly not that there is less appreciation here than there for sound and even superior education. More is done here than there in proportion to population for Common Schools, and the warmest ambition is shown for higher education. Why, then, are our Grammar Schools not appreciated in this relation? The cause, in my opinion, is twofold—the one arising from their history, the other from their inefficiency, chiefly resulting from their history. The history of our Grammar Schools is one phase of the history of class legislation and irresponsible government. Some aid was granted for Common Schools, for managing which the people were allowed to elect Trustees; but the Grammar Schools were not established for the people at large, but for the select and aristocratic few—chiefly officials. Their Trustees were not elected, but appointed by the irresponsible government of the day, being Elementary English, as well as Classical Schools, but for the alleged respectable few, and not for the people generally, who have never felt themselves under any obligation to support the Grammar Schools—viewing them as the badges and instruments of their own inferiority and debasement, rather than agencies of their culture and advancement.* This traditional indifference to, and in many cases prejudice against, the Grammar Schools, still largely affects the public mind, though class legislation and irresponsible government have ceased to exist among us. The appointment of Grammar School Trustees has been abandoned by the Executive Government, and transferred to the Municipal Councils, with a view to the popular support of the Grammar Schools, which have been deprived of the greater part of their former means of support by the improved efficiency and character of the Common Schools, and by their not being allowed, as formerly, to be Common Schools for certain classes of society; but though the Municipal Councils have accepted the office of appointing Grammar School Trustees, they are not willing to assume the burden of supporting the Schools.

20. *Necessity for proposed changes in the system considered.*—The question now is, what shall be done? Mr. Young, in his report for 1866, does not propose any change in the programme of Grammar School studies, but he proposed the distribution of the Fund to the schools, not according to average attendance of pupils, but according to average *work* done, or according to *results*, as ascertained by the examination of pupils individually—the system adopted by the Committee of Council of Education in the distribution of the Parliamentary Grant in England. This system, the most equitable and thorough in perfectly classified subjects and schools—would require three inspectors instead of one, increasing the expense of inspection three-fold, and therefore seemed impracticable on that ground, apart from other considerations arising out of the character, and circumstances of the schools. In Mr. Young's report for 1867, he proposes to abolish the study of Latin, as a condition on the part of any pupils attending the Grammar School. This is equivalent to abolishing them as Classical Schools; it is going back to the former state of things; it would make them Common English Schools, in more complete rivalry with

* Provision was first made for the Grammar Schools in 1806; but nothing was done for the Common Schools until 1816—*nine years afterwards*—and only then as an experiment.

the Common Schools, as no means in addition to those now existing, are available to prevent the Grammar Schools from drawing away the ordinary pupils from the Common Schools, or for rendering the English teaching in the Grammar Schools better than it is—which Mr. Young shows to be generally most defective and inefficient. Agreeing, as I do, with Mr. Young, that girls learning Latin, as advocated by some masters of Grammar Schools, is an absurdity, and that the time devoted to the study of Latin and Greek by the greater part of boys in the Grammar Schools, is a complete loss of labour and opportunity for the study of other subjects; and, moreover, agreeing as I do, with the learned president of Toronto University College, that it is pure loss of time for any boy to study Latin or Greek, unless he does so thoroughly, I think the Grammar Schools should occupy a different relation from that which they have hitherto done, and perform a much more useful work. The Inspector's reports show that in all past years some of the Grammar Schools, having confined themselves to, and performed their legitimate work with great efficiency, deserve strong and grateful commendation; it is equally evident from the same reports, that a large majority of the Grammar Schools are little better than useless, as Classical Schools, as High English Schools, even as Elementary English Schools, much less as Schools of the elements of Natural Science. And this melancholy fact arises from no indifference or want of effort on the part of either the Boards of Trustees, or the Masters of the schools, but from their exceptional and unnatural position, having no sufficient or certain resources in the Municipalities for their support, or sufficient legitimate work to perform to sustain them; and being regarded to a great extent as antagonistic to the Common Schools, instead of being considered, and in fact, as their coadjutors and supplements.

21. *Summary of the Proposed Changes in the Grammar School Law.*—I propose, then first, that the Grammar and Common Schools shall be under the management of the same Boards of Trustees in the Municipalities where they are situated, elected by the rate-payers, as are the Common School Trustees now. Secondly, that the Grammar School Fund, like the Common School Legislative Grant, shall be apportioned, with proper limitations, and under suitable regulations, to the Municipalities according to population, and upon the same conditions as the Common School Grant, for the purposes of High Schools, in which the elements of Natural Science shall be taught as well as the higher subjects of English, according to a prescribed curriculum, and in which the classics shall be taught or not, as the Local Boards of Trustees may desire. Then the Classical Schools, or classical departments, and the High English Schools, as well as the Common Schools, will be the creation, as well as glory and blessing of the Municipalities themselves; the classification of the schools, as well as the pupils in them, will become natural and easy in all the cities, towns and villages, and there will be no collision or difference of management or interest in the schools from the lowest Primary School up to the highest English or Latin School.

22. *Two Examples of the Benefits of the proposed Changes.*—Formerly, there were two classes of schools, and two Boards of School management in the city of New York—the one Society Schools, and the other called Ward Schools. Between these two Boards and two classes of Schools, there were perpetual rivalries and hostilities, until the Legislature reduced them to one system of schools under one Board of Trustees; since which time there has been unity of action and interest, and the establishment of a system of Primary, Intermediate or Grammar Schools, High English Schools, and a Scientific or Classical Academy or College, the pride of the city, and the admiration of philanthropists and strangers. Down to within a recent period, there were three Boards of School Management in the city of Boston—a Primary School Board, and an Intermediate or Grammar School Board, and a High School Board. Between these Boards and the schools under their management, there were constant rivalries and jealousies, and sometimes hostilities of a most injurious character. Upwards of ten years ago, the Legislature passed an Act to amalgamate the three Boards into one, having the care of all the schools in the city of Boston, to the great advantage of the Latin and High Schools, as well as of the Intermediate and Primary Schools. I propose the adoption of a similar system for the consolidation, economical management and improvement of our Grammar and Common Schools.

23. *What Benefits the proposed Changes will confer upon the Young.*—I think the tendency of the youthful mind of our country is too much in the direction of what are called

the learned professions, and too little in the direction of what are termed industrial pursuits. There is certainly no need to stimulate any class of youth to classical studies with a view to the study of medicine, law, &c. ; but it appears to me very important, now that the principles and general machinery of our school system are settled, that the subjects and teaching of the schools should be adopted to develop the resources and skilful industry of the country. And should *options* in any case be necessary, from lack of time or means, the merely useful and ornamental should be made to yield to the essential and the practical. It may not be essential for every child to know all the natural and political divisions of all the continents of the Globe, or what heroes fought, or what kings ruled, or what peoples flourished and did at every period and in every part of the earth ; but I think it is essential that every child should know how to read and speak his own language correctly, to count readily, and write well, to know the names and characteristics of the flowers and vegetables and trees with which he daily meets, the insects, birds and animals of his country, the nature of the soils on which he walks, and the chemical and mechanical principles which enter into the construction and working of the implements of husbandry, the machinery of mills, manufactures, railroads, and mines, the production and preparation of the clothes he wears, the food he eats, the beverages he drinks, and the air he inhales, together with the organs of his body, the faculties of his mind, and the rules of his conduct. The mastery of these subjects for ordinary practical purposes is as much within the capacities of childhood and youth as any of the hundred things that children learn in the streets and by the fire-side, and to know them would contribute vastly more to the pleasures of social life, and skilled and various industry, than the superficial tinsel of a Greek and Latin smattering, with homœopathic mixtures of imperfect English, and guesses in Geography and History.

I have the honour to be,

Sir,

Your most obedient, humble servant,

E. RYERSON.

DEPARTMENT OF PUBLIC INSTRUCTION
FOR ONTARIO,
Toronto, 16th September, 1868.

REPORTS AND SUGGESTIONS WITH RESPECT TO THE COUNTY GRAMMAR SCHOOLS
OF ONTARIO FOR THE YEARS 1866 AND 1867, BY THE REVEREND GEORGE PAXTON
YOUNG, M.A., INSPECTOR.

1. REPORT FOR 1866.

Toronto, 21st February, 1867.

SIR.—During the year 1866, all the Grammar Schools in Upper Canada, with a very few exceptions, were twice visited by me, in the discharge of my duties as Inspector. Detailed reports, showing the state in which I found the several schools, have already been placed in your hands ; and I have now the honour to submit a few remarks on some of the general features of the Grammar School System, suggested by what has fallen under my observation since I addressed you last year.

A.—*The Grammar School Law and Regulations of the Council of Public Instruction.*

As I shall have occasion, in this report, to trace the operation of the existing Grammar School Law, and of the regulations of the Council of Public Instruction, it may be well, at the outset, to state succinctly those provisions of the law, and those regulations of the Council, to which I am to refer.

1. By a regulation of the Council, boys in the Grammar Schools, with an exception so slight that it need not be considered, are required to study Latin or Greek ; but girls may be admitted to the Grammar Schools, to study French and the English branches, without taking classics.

2. The 7th section of the amended Grammar School Act provides as follows:—"The apportionment of the Grammar School Fund, payable half-yearly to the Grammar Schools, shall be made to each school conducted according to law, upon the basis of the daily average attendance at such Grammar School of pupils in the programme of studies prescribed according to law for Grammar Schools; such attendance shall be certified by the Head Master and Trustees, and verified by the Inspector of Grammar Schools." Girls, pursuing the prescribed course of classical study, are taken into account in the apportionment of the Grammar School Fund; though, as appears from the *Journal of Education* for May 1866, only fifty per cent. of the average attendance of girls for 1866 is to be reckoned in making the apportionment for 1867, while the full attendance of boys is reckoned. The attendance of those girls who study merely French and English, is not counted in the apportionment of the public money.

3. An important clause, which I may term *the one-half clause* in the amended Act, makes it a condition of the apportionment being paid to any school, that a sum equal, at least, to half of the apportionment, shall be provided from local sources, exclusive of fees, for the salaries of teachers.

4. By the Grammar School Law, still unrepealed, the Board of Common School Trustees may unite with the Grammar School Board; and the joint board has the power of raising money, by rate, for Grammar School as well as Common School purposes; though the Grammar School Board alone has no power to levy a rate.

B.—*Direction in which the Grammar Schools are drifting.*

Let me now respectfully call your attention to the way in which these provisions of the law and regulations of the Council of Public Instruction are working, in conjunction with other causes, to impress a very peculiar character on our Grammar Schools. I say a "very peculiar character." There is nothing like it, as far as I am aware, in the Educational Institutions of any other country; and my impression is that, if the tide which has set in continue to flow as it has been doing for some time past, the interests of sound education in the Province of Ontario will be seriously affected. Three great tendencies, distinct from one another, yet closely connected, are developing themselves.

1. *First Tendency.*—The first is a tendency in favour of Union Schools. This is a natural consequence of the one-half clause, which requires that a sum equal, at least, to half the Grammar School apportionment, shall be provided from local sources, for the salaries of teachers. I presume that the object of this clause was not only to augment the salaries of good teachers, but also to secure that Grammar Schools should not be recklessly established, or, if established, should not continue to be maintained, in localities where they are not needed, and where therefore the rate-payers are not likely to be eager to tax themselves for such institutions. But if the latter of these objects was contemplated by the framer of the Act, he appears to have overlooked an escape from check (to speak in the language of the game of chess) which was open to schools of the class against which his attack was directed. Not a few schools, to which the one-half clause would have inevitably given the finishing stroke, have been enabled to avoid checkmate, by their union with the Common Schools; for, as has been stated above, while a Grammar School Board cannot impose a rate for Grammar School purposes, a united Common and Grammar School Board has power to do so. As the union of the Common with the Grammar School is thus the means, in many cases, of enabling the latter to obtain the local contributions, without which it could not exist, and which, if it stood alone, it would ask in vain, it is not surprising that the tendency should be for the Union Schools to increase rather than to diminish in number.

2. *Second Tendency.*—The second tendency which is developing itself in our Grammar Schools is a result of the first, taken in connection with the statute which requires that the semi-annual apportionment of the Grammar School Fund shall be made on the basis of the average attendance of pupils in the programme of studies prescribed according to law. It may be described as a tendency in Union Schools, for all the pupils, except those in the most rudimentary stages of English, to be drawn into the Grammar School department. Pupils seeking admission to a Grammar School which has not the Common School united to it, will ordinarily be those whose parents really desire them to pursue a Grammar School course of study. But, where the schools are united, the case is frequently

very different. In not a few such schools, all the pupils in the Common School department, boys and girls alike, are, as soon as they have got the merest smattering of English Grammar, driven like sheep into the Grammar School, and put into Latin in order to swell the roll of Grammar School pupils, and to entitle the school to a larger share of the Grammar School Fund. I may be told that the Grammar School Masters and Trustees have no power to compel children to leave the Common School and enter the Grammar School. This is true. But it is also true that, as a matter of fact, there are many schools in which things take place exactly as I have described. Every child in the Common School department, boy or girl, who is supposed to have any chance of wriggling through the meshes of the Inspector's examining net, is transferred to the Grammar School, and enrolled as a classical pupil. I take it for granted that the parents do not object. The children themselves, of course, obey orders.

This feature of the Union School system—the tendency, namely, for all the pupils, male or female, except those who are in the merest elements of English, to be sucked into the vortex of the Grammar School department—is of so grave a character, that I think it right to give an example, for the purpose of enabling you more thoroughly to realize the form which our educational institutions are assuming. I visited the Grammar School at St. Mary's, about the end of September, 1866. After I had examined for entrance those pupils whose names were on the Grammar School Roll, but who had not been previously passed by the Inspector, I was informed that an additional class, containing the most advanced pupils in the Common School, to the number of above 20, was prepared for entering the Grammar School. I proceeded to examine them as the law requires. They were asked to parse the sentence: "I always do my work well." The following are specimens of their answers:—*First boy*: "I" third person singular, nominative to "always." "Always" a noun. On second trial: "always" an adjective. And so on. *Second boy*: "I" third person singular, nominative to "always." "Always" a regular transitive verb. And so on. These two young gentlemen were not a whit worse than their companions; and the result was, that I was obliged to reject the entire class. Now, I find no fault with the teaching in the Common School department of the St. Mary's Union School. If I am not mistaken, the teacher who was at the head of that department at the time of my visit, holds a first-class certificate from the Normal School; and, as far as I can judge from the slight intercourse which I had with him, I think it likely that he is really a superior teacher. He had not been long in St. Mary's, when my visit was paid to the school. I am blaming nobody. I am only anxious to assist you to realize the fact, that, under the influence of the causes which have been described above, the Common School department, in a large number of the Union schools, is reduced to a low condition, all the pupils who are far enough advanced to be able to parse an easy English sentence, being systematically drained out into the Grammar School. I give St. Mary's, as it was in September, 1866, as an illustration of this.

3.—*Third Tendency*.—The third great tendency which is developing itself in our Grammar Schools has been partly indicated already, and is seen in the influx of girls into the Grammar Schools, connected with the circumstance that a large and increasing proportion of such pupils take the classical course of study. It is in the Union Schools chiefly that girls abound; the drafting process so extensively practised in these schools being, for the most part, applied without distinction of sex. While I do not for a moment question the sincerity of those masters—some of them men of high character and generally sound judgment—who contend that a classical course of study is desirable for girls as well as for boys, it would be mere affectation for any one to profess to doubt, that the new-born rage for Latin, among the female pupils of our Grammar Schools, is intimately associated with the regulation of the Council of Public Instruction, which provides that those girls who study French and the English subjects in the Grammar School programme for boys, without Latin, shall not be taken into account in the apportionment of the Grammar School Fund. The following table, compiled in the Education office, from the semi-annual returns made by the Grammar School Masters and Trustees, shows the daily average attendance, for 1866, of boys and girls respectively, in classics, for twenty schools, in all of which, except four, it will be observed that the average attendance of girls studying Latin is in excess of that of boys. The only schools in the list which are not Union Schools are Kemptville and Stirling:—

	Boys.	Girls.		Boys.	Girls.
Bath.....	1½	10½	Norwood.....	13	17
Beamsville.....	6½	8	Oshawa.....	26½	28
Cayuga.....	4½	6	Perth.....	19	36
Farmersville.....	7½	9	Port Rowan.....	5	8
Iroquois.....	18	16½	Scotland.....	5	5½
Gananoque.....	9	21	Stirling.....	8	8
Metcalfe.....	7	8½	Strathroy.....	8½	6
Morrisburgh.....	8½	11½	Uxbridge.....	7½	11
Mount Pleasant.....	8	10	Whitby.....	23	37½
Newcastle.....	8	7½	Kemptville.....	5½	7

4.—*Summary.*—In the sketch given above, of the tendencies which are moulding the form of our Grammar Schools, I have avoided, as far as possible, expressing an opinion on particular points. It seems to me important to keep facts, which are indisputable, apart from inferences which may be disputed. My aim, therefore, has been, in what has been said thus far, to lay before you a simply historical statement, which may serve as a basis for discussion. I shall be expected now to bring forward the principal reasons which lead me to regard the tendencies that have been shown to exist as very unfortunate. This I shall do; only first let me give a brief summary of the facts which have to be considered. The number of the Union Schools is increasing, and is likely to increase. In many of the schools of this class, all the Common School pupils, boys and girls alike, who have obtained a smattering of English Grammar, are systematically drafted into the Grammar School. The consequence is that, in localities where such a system is followed, there is no mere Common School education (observe, I say *mere* Common School education) given to any pupils, boys or girls, which is not of the most elementary description; and, not only have the Grammar Schools thus become, to a great extent, girls' schools as well as boys' schools, but—what is especially note-worthy—the girls admitted to these schools are, in a majority of instances, put into Latin as a matter of course; in other words, the study of Latin is made practically a condition of their admission into the Grammar School.

C.—*Degradation of the Common Schools:*—*The possibility of obtaining a good English education made virtually conditional on the study of Latin.*

1. Will any man say that this state of things is satisfactory—a state of things in which the Common Schools are degraded, by being suspended from the exercise of all their higher functions? Unless I misunderstand the object of the Common School law, the Common Schools are designed to furnish a good English and general education to those desiring it. But how can this end be accomplished, where the Common Schools are subject to arrangements, under which the highest stage of advancement ever reached by the pupils is to be able to parse an easy English sentence? I have pointed out that in many of the Union Schools, the machinery of the union is managed in such a way as systematically to empty the Common Schools of all moderately advanced pupils, male and female, and therefore to leave only very elementary work to be done by the Common Schools. If, in an important and flourishing place like St. Mary's, the highest class of boys in the Common School department of the Union School, were, in September last, utterly unable to parse the sentence, "I always do my work well," it may be imagined what the state of things is in ruder localities. Is this an example of the good English and general education which the Legislature desired, through means of the Common School System, to place within reach of all the children of the Province?

2. It may perhaps be said that though, in cases like that referred to, nothing but the most meagre English education is furnished in the Common School department of our Union Schools, the defect is remedied by the instruction given in the Grammar School department, into which the pupils are drafted from the Common School. Mark, if you please, what this involves. All the boys entering the Grammar School, with an exception so slight as not to be worthy of consideration, must study Latin. As a matter of fact, in the majority of the Union Schools, the study of Latin in the Grammar School department, though not legally, is yet virtually, made imperative on girls also. If not literally compelled to take Latin, they are put into it, and they accept the arrangement. Only "moral suasion," as an excellent teacher explained to me—not, I think, without some veiled

humour—is employed to induce them to take Latin, “*that being sufficient.*” The plea, therefore, that the degradation of the Common School department, in many of the Union Schools, is counterbalanced or relieved by the facilities afforded in the Grammar School department, amounts to this, that the possibility of a decent English education being obtained by our Canadian children may properly be made conditional on their studying or professing to study Latin. Such an idea, when nakedly put, must be felt to be monstrous.

3. There are two aspects in which the Common Schools may be regarded. They may be considered either as having a complete and independent work of their own to perform, namely, to impart a good English education to those desiring it, or as stepping-stones to something further—institutions designed to prepare pupils for the Grammar Schools.

It will not be denied, I suppose, that the former of these offices is incomparably the more important of the two. Yet, in Union Schools of the kind which I am criticising, this, the chief and proper business of the Common School, has wholly ceased to be performed, in so far as the upper parts of what may be called a fair Common School programme are concerned. I look upon this as an excessive evil. I have such a sense of the importance of maintaining a high standard of education in the Common Schools, that, rather than see them degraded—rather than see the goal, beyond which their most advanced pupils are not to pass, fixed at the point where an easy English sentence can be parsed,—I would be willing that all the Grammar Schools in the country should perish. I protest against making the Common Schools, in all above the most primary classes, mere hotbeds to force forward seedlings for the classical field.

D.—*False show of Classical Study in the Grammar Schools.*

If the current, under which the Grammar Schools are at present drifting, operates, in so many cases, to the degradation of the Common Schools, how is its influence on the Grammar Schools themselves to be characterized? I am obliged to state, that it leads, in a painful degree, to a show of classical study, where the reality is wanting. Of course, I make no charge of wilful deception. All that I wish to indicate, is, the existence of a state of things which is not truly what it holds itself forth as being. There is a good deal of such false show in some Grammar Schools which have not Common Schools united to them; and I do not know that the evil could be wholly prevented on any system; but, by the Union system, it is directly generated and fostered. In illustration of this, I lay before you some examples, selected from the history of the past two years.

1. In the latter part of October, 1865, I visited the Grammar School department of the Union School at Consecon. There were on the roll, for the current term, 18 pupils in Latin. Here, then, was what professed to be a classical school; but (as my volume of Reports for 1865 will show) the whole thing was a farce. There were two divisions in Latin; the senior, consisting of three boys, all of them in Sallust, and two of them reading Virgil also; and the junior, of thirteen pupils, mere beginners. The representatives of the junior division, who were present, were children, whom it would have been judicious and kind to have left in the Common School. They had learned the Latin Grammar in a loose sort of way, as far as the verbs; but none of the girls in the class could tell me any of the terminations of the second declension; and the decidedly best boy did not succeed in going through *servus* without mistake. Of the three boys in the senior division, all of whom were present, one was examined in Sallust. The memorandum regarding him in my note-book is “very bad; nothing could be worse.” The two other boys were examined in Virgil. Their translation was inaccurate; their parsing bad; and the whole of their work unintelligently performed. The truth is, that there appears to be no field for a Grammar School at Consecon; and but for the Union of the Common and Grammar School Boards, I do not suppose that the establishment of anything else than a Common School would ever have been thought of.*

2. I visited the Grammar School department of the Union School at Cayuga, on the 30th May, 1865. There were 50 pupils on the roll for the current term; but 16 of these had left; so that, at the date of my visit, only 34 were actually in connection with the school. Of the thirty-four, twelve were professedly studying Latin. A sort of semi-classical character was supposed to be imparted to several of the others, by the circum-

* The Grammar School at Consecon is now extinct.

stance that they were learning the Latin roots of English words. Of the twelve fully fledged Latinists, six were little children, who were struggling with the difficulties of the first declension. Of the six senior pupils, only two were present; a boy who was reading *Cæsar*, and a boy in *Arnold's* first-book. Permit me to transcribe some remarks which I made regarding these pupils in my Reports for 1865. The boy in *Arnold* "had read nothing. He was as far on in the Grammar as Adjectives of the 3rd Declension. He could decline neither adjectives nor nouns." The boy in *Cæsar* "could make nothing whatever of the lesson for the day. The master opened up another lesson, and the boy got through the translation of it with difficulty and imperfection. His *Accidence* and *Syntax* were utterly bad." It is plain from these details, that, in May, 1865, the Cayuga Grammar School, was merely an upper division of the Common School, with such a sprinkling of nominal Latin as was technically sufficient to enable it to draw a share of the Grammar School Fund.

3. Prior to the year 1866, the number of classical pupils in the Grammar School department of the Union School at Lindsay was small. I visited the school in January, 1866, and again in June of the same year. On the former occasion, there were twelve pupils in Latin (9 boys and 3 girls) on the roll; on the latter, fifteen (11 boys and 4 girls). These numbers are probably a fair exhibition of the *bonâ fide* demand for classical learning in Lindsay. You may judge, therefore, of my astonishment, when, on returning to the school in April, 1867, I found that the number of pupils on the roll—all of them studying classics—had sprung up to 58: 31 boys and 27 girls. What was the process by which this remarkable "Revival of Letters" had been brought about? A new master was appointed in the beginning of the year 1867. That gentleman, who possesses not a few of the qualities of a good teacher, and who, in particular, is distinguished by zeal and energy, not relishing the sight of empty benches, paid a visit to the Common School, and transferred a promiscuous crowd of children from the Common School to the Grammar School. In this way, his house was filled—if nothing else was accomplished. Of those on the roll, I was obliged to reject a considerable proportion as unqualified to pass the entrance examination. In Latin, none of the pupils on the roll were further advanced than *Harkness' Arnold*, except two boys. As the mass of the pupils had been only a short time in the Grammar School, their Latinity was, as might be expected, of a very infantile description. But it is really a serious question: what proportion of a mixed multitude, gathered into a Grammar School in the manner described, will ever become classical scholars, in any proper sense of that expression? I do not profess to look with much horror on the operation performed by the Grammar School master at Lindsay, though certainly it is not one of which I approve. Even Grammar School masters are but men; and if you make it a person's interest, or the interest of the institution with which he is connected, to pursue a certain course, which may not be the best, and then ask me to sit on the jury that is to try him for taking that course, I say: Not guilty.

4. When Dr. Crowle, a more than usually accomplished teacher, to whose general merits I bear willing testimony, ascended the throne, as Grammar School master and Principal of the Union School at Bowmanville, the Grammar School was in a languishing state. Plato, in one of those occasional myths which contribute to the charm of his dialogues, tells us that Plenty was the son of Poverty and Planning. Poverty, once upon a time, went, cold, hungry, and in rags, to a feast of the Gods, to see what she could pick up. There, while lingering on the outside of the banqueting hall, she fell in with Planning, who made her his wife, and of their union Plenty was the fruit. Dr. Crowle, perhaps remembering Plato, and looking wistfully to the Grammar School Fund—that feast of the Gods, in the estimation of starveling Grammar Schools—appears to have followed out, though not in the same wholesale manner, something of the "plan" which I have mentioned as having been adopted in the Lindsay School. In October, 1864, the number of classical pupils on the roll, for the current term, was only 12. In June, 1865, after Dr. Crowle's appointment, it had risen to 29; and, when I visited the school in March, 1866, at which time the statute providing for the apportionment of the Grammar School Fund on the basis of attendance had come into operation, it had sprung up, by one great bound, to 60. Of those on the roll at the last-mentioned date, I was obliged to reject a considerable proportion as unqualified to pass the entrance examination; and the following quota-

tion from my volume of Reports for 1866 will show the light in which the policy that had been pursued, appeared to me at the time:—"The number of classical pupils is very great. I told Dr. Crowle that I was strongly of opinion that a large number of those studying Latin, both boys and girls, ought not to have been put into Latin. I am convinced that the pecuniary interests of the school have been consulted at the expense of the real profit of the pupils." If I am not mistaken, Dr. Crowle himself would now admit that the view taken in my Report was correct.

These may serve as illustrations of the manner in which, through the union of the Common and Grammar School Boards, pupils are unnaturally forced into the Grammar Schools and induced to learn Latin, without any consideration of their fitness for the study, or of the suitableness of the study for them: a state of things under which it is inevitable that a large amount of the classical work held forth as going on in the Grammar Schools must be a miserable false show.

E.—Apportionment of the Grammar School Fund.

The evils which have manifested themselves in the Grammar Schools, while resulting in part from the statute authorizing the formation of United Common and Grammar School Boards, are due, also, in some measure, to the clause in the amended Act which determines the principle on which the Grammar School Fund is to be apportioned, and to the regulations of the Council of Public Instruction on the same subject.

1. The law provides, generally, that the Fund shall be apportioned on the basis of daily average attendance. In making up the daily average for the several schools, account has hitherto been taken, under a special regulation of the Council, of the attendance of girls studying Latin, but not of those studying French and the English branches merely. This has the twofold disadvantage of being inequitable, and of affording encouragement to a course of study which is not the most suitable for girls. In illustration of the manner in which the regulation works, let me compare the Oshawa and Whitby schools with that at Port Hope. In the Oshawa school, when I visited it on the 16th of May last, I found on the roll 78 classical pupils, of whom 38 were boys, and 40 girls. In Whitby, on the 15th of May, there were 80 classical pupils on the roll. I did not note down the number of girls among these; but the proportion of girls to boys was, at least, as great as in Oshawa. In Port Hope, which I visited on the 1st March, there were on the roll 42 classical pupils, of whom 38 (exactly the same number as in Oshawa) were boys. If therefore, the attendance of boys alone were reckoned, the three schools mentioned would be entitled, for 1868, to about equal grants from the Grammar School Fund. But if the attendance of girls studying classics be taken into account, the grant to Port Hope will fall greatly below the grants to the other two schools. This is not equitable. It may, perhaps, be said, ought not the Whitby and Oshawa schools to be remunerated for the education of girls as well as for that of boys? I answer, certainly; but girls are educated in the Port Hope school, too. All of the schools are Union Schools; and in each of them there is a large number of girls qualified, as far as age and ability to pass the preliminary examination are concerned, to enter the Grammar School Division. The difference is simply this: that, in Whitby and Oshawa, the influences to which the girls are subjected induce them to pursue a course of classical study; while in Port Hope, the influences to which they are subjected induce them to take a non-classical course. The question, therefore, is not whether Grammar Schools should be remunerated for the education of girls; but whether they should be remunerated for the instruction of girls in Latin, and not remunerated for instructing them in French and English. In my opinion, a non-classical course is the most suitable for the generality of girls; and, therefore, I look upon the Port Hope school as suffering, in a pecuniary point of view, for doing what is right.

2. Another objection to the present plan of making the apportionment, is that in many instances, it puts serious obstacles in the way of the efficiency of the Grammar Schools. I have shown, by the examples of the schools at Consecun, Cayuga, Lindsay and Bowmanville, how the natural desire of Grammar School masters and Trustees to secure an ample share of the Grammar School Fund has the effect, particularly where the Common and Grammar School Boards are united, of forcing into Grammar Schools multitudes of boys and girls, who rank as classical pupils, but from whom nothing more than a nominal study of Latin can be expected. Where the movements of a school are clogged by the presence

of such materials, its efficiency must necessarily be greatly impaired. They not only get little good themselves, but, like weeds in the field, they hinder others from getting good.

3. It seems plain, therefore, that, in the distribution of the Fund, the attendance of girls studying Latin ought not to be more highly estimated than the attendance of those who study French and the English branches merely. The recognition of this principle would remove the objection, on the score of equity, which attaches to the present system, and would also deliver girls from the undue pressure—or, let us say, “moral suasion”—which is at present so generally exercised to induce them to take Latin. While they would be at liberty to take Latin if they chose, neither Trustees nor masters would have any end to serve, by driving them into a line of study for which they have no inclination, and on which it is commonly a mere waste of time for them to enter.

4. Here of course, it will be urged that equity knows no distinction of sex; and that, if the attendance of girls who do not study Latin, is entitled to rank on a par with that of girls who do, the attendance of girls, whether belonging to the one class or the other, should be reckoned as of equal value with that of boys; and, therefore, that the Fund should be distributed in strict proportion to daily average attendance, whether the pupils in attendance be male or female. This plan has the merit of being simple; and it carries such an appearance of justice, that persons unacquainted with the elements that constitute the real difficulty of the problem under consideration will be ready to look upon it with favour. But I believe that, if adopted, it would lead to grievous abuses. Under the regulation of the Council, which admits girls to the Grammar Schools for the study of French without Latin, floods of little girls would be poured into those Grammar Schools which are least worthy of support; Green's Ollendorf would be put into their hands; and they would be reported as pupils in French.

5. A return to the old method, of first distributing the Fund among the different counties in proportion to population, and then dividing the sum falling to the share of a particular county among the Grammar schools in the county, is not, in my opinion, to be thought of. Such a plan would leave wholly untouched the inducements which at present exist, for the introduction of unsuitable pupils into the Grammar Schools. Besides, it seems unreasonable, that if two counties, M and N, have the same population, but M has three Grammar Schools, and N only one, the single school in N should get thrice as great a revenue from public sources as any of the others, while perhaps it is far behind them, both in attendance and general character.

6. I have come to the conclusion, after having devoted much thought to the subject, that, until *educational results* are combined with *attendance* as the basis of apportionment, it will be impossible to devise any scheme of distribution, that shall not be open to grave objections. More than a year ago, you asked me to consider whether results might not in some way be reached with sufficient accuracy to be taken into account, to a certain extent, in deciding the grants to be made to the several schools. I stated to you my conviction that it could not be done, with the present provision for the inspection of Grammar Schools. But I feel no doubt that, if the Provincial Legislature were willing to make an additional annual grant of one thousand or eleven hundred pounds for Grammar School inspection, or if such a sum could properly be deducted from the Grammar School Fund, a system of inspection could be organized, that would make the blood flow in a new style through every limb of the Grammar School body, from Windsor to L'Orignal, and from Owen Sound to Port Rowan, and which, at the same time, while leaving several perplexing questions to be settled on their own merits, would render a just and right apportionment of the Grammar School Fund possible.

E.—*Proposed new System of Inspection.*

1. In round numbers, there are one hundred Grammar Schools in the Province of Ontario. These might be divided into three groups, having London, Toronto, and Ottawa, respectively, as their centres, and each group put under the charge of an Inspector. The services of three District Inspectors would thus be required.

2. Each of the District Inspectors would visit all the schools in his group thrice or (if that should be found impossible) twice a year; and, at each visit, he would make a thorough individual examination of the pupils present; the examination being conducted (where the nature of the subject and other considerations permitted) in writing. The

Inspector would prepare a statement, according to a prescribed form, of the values of the answers received by him ; and would, upon a conjunct view of the whole, determine the position of the school in what may be called the scale of educational merit.

3. A certain point should be fixed upon, as the zero point in the scale of educational merit ; and no school, failing to obtain a position above the zero point, should be entitled to any allowance from the Grammar School Fund. This regulation would probably lead to the shutting up of several of the schools which have been established in localities where no real demand for Grammar School education exists ; and a considerable saving of the public money might thus be effected.

4. The Fund at the disposal of the Chief Superintendent should be distributed among the schools which had a position assigned to them above the zero point ; the apportionment proceeding, according to special regulations, on the two-fold basis, of the daily average attendance at the several schools, and of the place they had obtained in the educational scale.

5. An examination conducted by a single Inspector, however high his character and qualifications might be, would be very liable to question or suspicion ; especially where the principal part of the income of a school, perhaps the very existence of the school, depended on the Inspector's report. To prevent, therefore, perpetual jarrings, it seems indispensable that there should be some provisions for guarding against the possibility of error or partiality on the Inspector's part, and satisfying reasonable public anxiety as to the correctness of his decisions. In University examinations, it is common for two Examiners to be associated together. This gives confidence in the verdicts rendered. An arrangement exactly in this form would not be possible, and, in some respects not desirable, in the case of our Grammar Schools. What I propose, therefore, is, that, besides the three District Inspectors, there should be a General or Principal Inspector, with whom the others should communicate, and to whom they should in a certain sense, be subordinate ; he himself, of course, being responsible to the authority appointing him.

6. It would be the duty of the Principal Inspector to take a general management of the work of Grammar School Inspection, so as to secure that it should possess, as far as possible, a character of unity throughout the Province. He would advise with the District Inspectors in regard to all details of their work, in which his council or co-operation could be of service. He would receive from the District Inspectors their Reports, showing the places assigned to the various schools in the educational scale, together with the written papers on which these Reports were founded. He would examine, at his discretion, and as extensively as circumstances allowed, the written papers so received, and compare his own estimate of them with that of the District Inspectors ; and in the event of any material difference between himself and a District Inspector, he would correspond with the District Inspector on the subject. In this way, a powerful and honorable stimulus would be furnished to the District Inspectors to a careful discharge of their duties, and perfect and universal confidence would be produced in the correctness of their classifications.

Such, in barest outline, is the plan that I would suggest for the Inspection of the Grammar Schools. It will be time enough to deal with minute details when there is a prospect of the proposal being favourably regarded by the Legislature, and of the necessary funds being obtained. The scheme may very probably be judged to be of too large a character for the Province of Ontario, in present circumstances ; but our choice lies, I believe, between some such scheme on the one hand, and incurable disorder and chronic difficulties in the Grammar Schools on the other. On general grounds, a plan of the nature of that which I have proposed, would be desirable, altogether apart from special sources of trouble ; for, as you do not need to be informed, no educational principle is either more evident in itself, or more thoroughly established by experience, than this,—that the efficiency of a system of schools cannot permanently be maintained—whatever other conditions of success be present—without regular and searching inspection ; inspection, whose results are made public, and which is attended with financial consequences.

G.—*Union Schools.*

If the method of Inspection at present in force is to remain unchanged, and the apportionment of the Grammar School Fund is to continue to be made on the basis of attendance simply, it seems plain that an alteration in the law which authorizes the formation of Union Boards must be contemplated.

Where the Fund is apportioned on the basis of attendance simply, the temptation to manage the Union School machinery, so as unduly to swell the nominal attendance in the Grammar Schools, is so great that no class of men should be left exposed to it. The interests, therefore, of genuine Grammar School Education, and the interests—still more important—of advanced Common School education, agree in demanding that the law which provides that Common Schools may be united to Grammar Schools should undergo revision. In too many instances, a Common and a Grammar School, united to one another, are like Siamese twins, whose connection is inconsistent with the play of free, healthy, natural life in either. Of course, I do not mean that any change in the law regarding Union Schools should be made hastily, or without regard to existing arrangements. I would not separate the twins with a butcher's cleaver. Union Schools have established themselves so extensively throughout the Province, that a rude interference with them would convulse the whole Grammar School system. But, through wise legislation, the formation of Union Schools in future might be prevented, and influences might, perhaps, be brought into play which, in a gradual and easy manner, would lead to a dissolution of Unions at present existing.

With more complete arrangements for the inspection of the Grammar Schools—arrangements that would reach results, with sufficient accuracy to enable results to be used, in connection with attendance, as the basis of the apportionment of the Grammar School Fund, and that would render mere numerical strength, without attainments, of little account—the temptation to draft unsuitable pupils from the Common School into the Grammar School would be very much taken away. And thus also, the other great evil which has been shown to grow so frequently out of the Union of the Common to the Grammar School, namely, the degradation of the Common School, would be lessened; for, in proportion as the Grammar Schools restrained themselves from plundering the Common Schools, the instruction given in the Common Schools would become of a higher type.

H.—*Girls in the Grammar Schools.*

In the sketch which I gave of the direction in which the Grammar Schools are drifting, I referred to the great influx of Girls into the Grammar Schools. Out of 102 schools which were in operation during 1866, 85 were mixed schools, that is, schools open to both boys and girls; and in the mixed schools, taken as a whole, though girls have the option of studying French without Latin, the daily average attendance of girls studying Latin, was to that of boys in the proportion of about 3 to 5. This phenomenon will be admitted to be worthy of attention.

In my Report for 1865, referring to the co-education of the sexes in the Grammar Schools, I stated, that, in schools conducted by teachers possessing weight of character, I had no reason to believe that the general moral tone of the pupils was injuriously affected by boys and girls being taught together. This is my opinion still. But, out of the hundred Grammar School Masters in the Province, some of them young and inexperienced, it is certain that individuals will here and there be found, who are destitute of the weight of character requisite for conducting a school in which girls of 15, 16 or 17 years of age, may be associated with boys of the same ages. For this, among other reasons, I cannot look upon the great influx of girls, that has recently taken place, into the Grammar Schools, as affording no ground for concern. I desire to treat this subject now, as I did last year, in the most temperate manner. I have not taken up the trumpet of the alarmist. An outcry, based on anything that I have witnessed, would be unwarrantable. In none of our mixed Grammar Schools did a single breach of decorum fall under my observation during the past year; and in many of them the appearance of the girls was very pleasing. But I must avow, nevertheless, that my feeling is in favour of the education of grown-up girls apart from grown-up boys, wherever that is practicable. The risk of moral injury resulting in carelessly conducted schools, from the co-education of the sexes, though it may be easily exaggerated, is an element that cannot be neglected. Schools, it may be said, ought not to be carelessly conducted. True. But *what ought to be* and *what is*, are different things. We live in a world, where, if we expect always to find things as they ought to be, we are likely to be disappointed. It is not so much, however, any gross and palpable departure from the ordinary moralities, that is to be feared in mixed schools, as the loss of the higher moral refinements. I can hardly describe what I wish to indicate;

but every one will understand it, who has been accustomed to associate with cultivated women :—an ever present delicacy, married to an intelligence which at once strengthens it and liberates it from constraint. That the atmosphere of the generality of our mixed Grammar Schools is favourable to the growth of this, the flower of all female accomplishments, I do not believe.

As it is principally in the United States that the experiment of co-education has been tried, I was anxious before giving in this Report, to examine all the more important testimonies that have been published, in regard to the working of the co-educational system there. I have not been able, however, up to this time, to obtain a sufficient amount of exact information, to warrant me in thinking that a summary of the documents which I have consulted would be of any material value. I shall therefore merely refer to three distinguished witnesses. A weighty authority on the side of the mixed schools of the United States, is De Tocqueville, member of the French Institute, and author of the well known work on "Democracy in America." On the other side we have the Rev. James Fraser, who was deputed by Her Majesty's Commissioners of Education, to inquire into the Common School system of the United States and of the Provinces of Upper and Lower Canada, and whose Report to the Commissioners has recently been published. Mr. Fraser says : "There is one point, however, directly connected with the American School System and their general theory of education, of the effects of which I entertain great doubts. I refer to the effects on the formation of individual character, and the general social influences of mixed schools, and particularly of the theory and practice adopted in America on the subject of the education of girls." Probably the most eminent name in the United States, which has been brought forward on the side of the co-education of the sexes, is that of the late Horace Mann. From an examination of some of his works, I am not disposed to attach much importance to his opinion. He is no doubt an eloquent writer. I am aware that he is very generally regarded as an authority on educational subjects. His views on education, are, in many instances, both admirable and well-expressed, but what I have read of his writings has not impressed me with the conviction, that he had the disciplined, unprejudiced, sober mind, necessary for dealing with a question like that of the co-education of the sexes. On the whole, with [my present light, I put faith in Mr. Fraser.

Considerable alarm has been created in various quarters by official documents, from which it has been inferred that the Grammar Schools may possibly be shut against girls ; and I have been urged to bring under your notice certain reasons why such a course should not be adopted. It is alleged that the Common Schools are, in many parts of the country, over-crowded ; that the teachers in such schools, being frequently engaged (or "hired," as the elegant expression is) from considerations of economy rather than of fitness, are incompetent to give their pupils a good English education ; that, even if they were competent, they would be unable, from the large number of young children whom they have to teach, to pay proper attention to the more advanced pupils ; and therefore, that, if girls were denied admission to the Grammar Schools, parents, particularly in the rural districts, who were anxious to give a good education to their daughters as well as to their sons, would have no means of gratifying this natural and laudable desire. These considerations seem to merit attention. I doubt whether in existing circumstances, girls could obtain, anywhere else than in the Grammar Schools, the education which the highest interests of society render it important that they should receive. While my own feeling is, that it would be better for them to pasture, if they had the opportunity, in separate Academic fields, I would not, while they are without such opportunity, debar them from sharing the pastures of the boys. Only—the yoke imposed by circumstances should be accepted as something to be thrown off at the earliest opportunity. In all things, it is beneficial to keep a good ideal in view. Though we may not be able to realize it at once, the time may come, and perhaps come soon, when we shall be able to do so. The thought and expectation in the minds of enlightened men, of an improvement at present out of reach, hastens its advent.

I have the strongest possible impression, that the study of Latin by the great majority of the girls, who are at present taking the classical course in our Grammar Schools, is a waste of time. I have the same impression in regard to a large number of Grammar School boys. I am not prepared, however, to suggest any alteration in the programme

of Grammar Schools studies. It would be useless for me to attempt anything in that direction, until I had some idea whether there was a likelihood of a new system of inspection being adopted. The introduction of a scheme of inspection such as I have sketched above, would almost necessarily be accompanied with a revision of the programme of study. Could we learn anything from the High Schools for English and the High Schools for Latin in the United States?

My apology for the unusual length, to which this report has extended, must be found in the importance of the matters which it discusses, and in the extraordinary features which the Grammar Schools are at present exhibiting.

I have, &c.,

(Signed) GEORGE PAXTON YOUNG.

2. REPORT FOR 1867.

Toronto, 24th July, 1868.

SIR,—In January last you gave me authority to inspect, in addition to the Grammar Schools in the Province of Ontario, such Common Schools as it might be in my power to visit. I have thus been enabled to get some insight into the condition of the Common Schools, as well as of the Grammar Schools; and in these circumstances, it seems to me, that as I have now ceased to hold the office of Grammar School Inspector, I ought not to confine myself in my present report, which is properly the report for 1867, to the information which I obtained in the course of that year, but should make use also of the facts which fell under my observation during the first half of the year 1868, and should devote the Report, as the last official communication which I shall have the honour of submitting to you, to an exposition of my views on our school system as a whole.

I. A CLASSICAL COURSE OF STUDY UNSUITABLE FOR THE GREAT MAJORITY OF THE PUPILS ATTENDING THE GRAMMAR SCHOOLS.

I have in former reports expressed the opinion that, for a large number of the pupils, male and female, attending our Grammar Schools, a classical course of study is utterly unsuitable. My convictions on this point remain unchanged; and, as I believe that the prevalence of a nominal study of Latin, is a main hindrance to the establishment of a good system of advanced school education, I feel it to be my duty once more to put on record my protest against the practice of obliging multitudes of boys and girls to learn Latin, who, as far as any special benefit, which they are to derive from that language, is concerned, might almost as well be set to learn Chinese. I do not undervalue classical study, nor have I any wish to banish it from our school system. On the contrary, I agree with those who consider the languages and literature of ancient Greece and Rome to be the most perfect of all educational instruments; and it would, therefore, in my opinion, be most unfortunate, were the means of obtaining a classical education not provided from public sources, for those whose views and opportunities and tastes incline and enable them to become classical scholars. But in our Grammar Schools there are multitudes of children who have no object in prosecuting a classical course of study, and whose circumstances and views in life render it perfectly certain that they will never become classical scholars in any proper sense of the expression. These children ought not to be compelled or induced to enter on the study of Latin. There are persons who have such a reverence for the ancient languages, that they consider even a little Latin to be a most useful thing—so useful as to warrant the expenditure of a great deal of time on the acquisition of it. But with such a view I have not the slightest sympathy; and I am confirmed in my rejection of it by observing that, in the discussions at present going on in Great Britain, regarding a liberal education, the arguments employed by the most intelligent and unprejudiced advocates of a classical course of study, possess weight only in reference to pupils who do not confine themselves to the mere rudiments of Latin or Greek, but attain to some familiarity with Latin or Greek literature. It may be useful to advert, in illustration of this,

to the arguments in favour of Latin and Greek, as part of a liberal education, which were employed by Mr. J. S. Mill in his inaugural address delivered to the University of St. Andrews.

The study of the classical languages, by introducing us to a form of life, very noteworthy in itself, and at the same time widely different from our own, is fitted to prevent the intellectual narrowness which men are apt to contract from dwelling in too limited a sphere of thought and manners. Again, in these languages, we read history in its original sources; and it is important, that in some instances at least, we should go for our knowledge of history to the fountain head. Still further, the writings which form the body of classical literature—writings like those of Thucydides, Plato, Aristotle, Demosthenes, Horace, Tacitus, Quintilian—possess, for the purposes of education, a marked and decisive superiority over any modern works. These are three of the arguments on which Mr. Mill mainly relies, in support of his conclusion that classical study should be allowed to retain the place it has long held in a liberal education; and I have grouped them together, in order at once to dismiss them, as manifestly inapplicable to the class of pupils whom I wish to deliver from the yoke of a pretended study of Latin and Greek. It would be simply mockery to speak of such pupils having their minds redeemed from narrowness through familiarity with the life and thought of ancient Greece and Rome, or ascending to the fountains of history, or receiving a large culture through their appreciative study of Thucydides and Horace. The literal truth is, that many of them waste months, and even years, on such sentences as “the fox will frighten the boy,” or “on the tops of the mountains the cold is so great that the snow never melts,” or on sentences of not much higher import, and then leave school to think of Latin no more for ever.

Only two other arguments, in addition to those which have been stated, are employed by Mr. Mill in his defence of classical study. The first is, that translation from one language into another, especially from a language like Latin into one like English, is a valuable exercise, both by the command of verbal expression which it gives; and also, and still more, by its being fitted to correct the natural tendency to mistake words for things. The second is, that the regular and complicated structure of the Latin and Greek languages makes the study of them, considered simply as languages, and apart altogether from what may be termed the content of their literature, a peculiarly admirable logical discipline. The force of these considerations I have no wish to underrate. I must remark, however, that, in the case of pupils who never make such progress in Latin as to be called to grapple with sentences of any difficulty, the advantages referred to are experienced in only a very slight degree. Translation from Livy into good idiomatic English is a splendid exercise; but it is not a splendid exercise, to translate the sentences in Harkness' Reader. In like manner, the logical value of a thorough and intelligent analysis of the more complicated paragraphs of Cæsar is undoubtedly very great; but only a small proportion of the pupils in our Grammar Schools ever arrive at any thing like a capability of thoroughly and intelligently analysing the more complicated paragraphs of Cæsar. I admit that even those pupils, whose classical studies are limited to Harkness' Books, have their logical faculties in some measure awakened and improved through the analysis of the sentences with which they are called to deal. But the benefit, which in this respect they derive from the study of Latin, is not remarkably great. It is not greater than they might derive from the study of English, were English properly taught.

I trust that I have not left you in any doubt as to my reason for thus referring to the arguments of Mr. Mill. These arguments, which involve, in substance, every thing that can be said in favor of a classical education, except, perhaps, that Latin is one of the main roots from which our English language has grown, I have no desire to refute. I entirely agree with them. But I wish you to consider how the practice of dragging every boy and girl, who can possibly be got hold of, into the Grammar Schools, and virtually compelling them to learn Latin, appears in the light of the reasonings of one of the most accomplished living advocates of classical study. The inevitable result of that practice is to fill the Grammar Schools with children, a large number of whom are certain never even to profess to learn more than the rudiments of Latin. Well, you read Mr. Mill's arguments, and you apply them to the boys and girls of whose classical studies Harkness' Books (we shall say) form the superior limit, and—you feel that the whole thing is ridiculous.

I regret that I cannot, in illustration of the character of the pupils with whom many of our Grammar Schools are filled, unroof before you a large number of the schools, and let you see with your own eyes what I have seen. But I must endeavour to give you some imperfect glimpses, which may help you to imagine what sort of classical learning is flourishing in not a few of our public institutions:—

1. I visited the Grammar School at Ancaster on the 7th May, and on the 18th November, 1867; and again on the 18th March, 1868. On the first of these occasions, there were 21 pupils on the roll, all in Latin. The highest class consisted of three boys, who were reading such sentences as, "he will praise true greatness of mind." At my second visit, there were in connection with the school, thirteen pupils, all in Latin. They were in one class, and it is enough to say, that the lesson for the day was a revisal of the opening lesson of Harkness' Arnold. Some of the pupils had gone as far as the 19th lesson. At the date of the third visit, eighteen pupils, all in Latin, were on the roll. Two of these were a little more advanced than the others: and the best of the two—the Captain of the school—was reading, and reading badly, such sentences as, "*naturae convenienter vivimus.*" In fact, his translation of this sentence was, "we live conveniently to nature." By this simple statement, especially when I add that I believe the master to be a competent and faithful teacher, most people will be satisfied that a classical school at Ancaster might be dispensed with;—though I suppose that there are persons in that village, who think that it would be a dreadful thing, were the Chief Superintendent to rob their children of the opportunity of becoming acquainted with the literature and mode of life of the ancient Romans, and of qualifying themselves for ascending to the sources of history.

2. I inspected the Grammar School at Gananoque, in the spring and in the autumn of 1867, and again in the spring of 1868. The following table will give a general view of the state of the school at these seasons, respectively:

Date of visit.	Classical Pupils on the Roll for the term.	Classical Pupils sufficiently advanced to begin Cæsar.
29th March, 1867.....	14 boys and 28 girls.....	None.
17th September, 1867.....	19 boys and 18 girls.....	None.
5th March, 1868.....	23 boys and 24 girls.....	Four.

It will be observed, that neither in the spring nor in the autumn of 1867 were any of the classical pupils far enough advanced to begin Cæsar. This, however, conveys a very imperfect idea of the rudimentary character of their Latinity. I must, therefore, be a little more definite. In March, 1867, the most advanced class consisted of 12 girls and 3 boys. They had gone as far as the 24th exercise of Arnold's 2nd book, but, having found the idioms difficult, had been put back, and were reading such sentences as, "the mother was praising her daughter." Six months later, in September, 1867, the most advanced Latin class consisted of four girls and a boy. Observe here, first of all, that the class of fifteen pupils, who were struggling with the elements of Latin in March, had almost entirely melted out of existence before September. Ten pupils, out of fifteen, after frittering away much precious time in going through a form of classical study, had left school, sufficiently accomplished in the Latin language to be able to translate, and imperfectly construe, sentences a little more difficult, perhaps, than that of which the translation is given above. But what was the proficiency of the five pupils, who remained to form the advanced class in September? The master told me that they were about to begin Cæsar; but, from examination of them, I was satisfied, as my volume of reports for 1867 will shew, that they were not prepared to take up such an author. One of the five could not go through the future indicative of the verb *condere*; another could not go over the present indicative of the very *facere*; and none in the class knew the future indicative of the verb *ire*. The master satisfactorily accounted for their deficiencies by the irregularity with which they had attended school. On my return to Gananoque, in March, 1868, I found a class of four girls in Cæsar. The boy, who was in the advanced class in September, 1867, had disappeared from the scene. The girls acquitted themselves, on examination, in a creditable manner. The other Latin pupils were at a most elementary stage of their studies. Now, is it possible for any man of intelligence to look at this state of

things, and doubt that it is forced, unnatural and absurd? Let it be distinctly understood, that I impute no fault to the teacher. He is a gentleman of ability, fully qualified for his duties, and faithful in the discharge of them. But there is no genuine demand for classical education in Gananoque. The boys in the village for the most part leave school at a very early age, to work in manufacturing establishments. Such materials, though they may be thrown into the Latin mill, for the purpose of increasing the revenue of the school, cannot be ground into classical scholars. The girls, generally, have it in their power to remain at school for a longer time. But, with the mass of the girls, as with the mass of the boys, the study of Latin is a merely nominal thing; and as respects even the best of the girls, I hold that the time which they are made to squander on sapless Latin technicalities, might be employed to infinitely greater advantage in studies that possess a vital interest, and that, instead of being swiftly and gladly consigned to oblivion, as soon as school is left, would prove the commencement of a new direction to the life.

Of course, I do not mean that all the Grammar Schools in the Province are in as low a state as the school at Ancaster, or surrounded by circumstances so unfavourable to classical learning as the school at Gananoque. For the purposes of illustration, it is sometimes necessary to refer to extreme cases—cases that admit of no cavil or evasion. But I take the responsibility of saying, that there are many of our Grammar Schools in which, from one cause or another, a large number of the pupils, who are enrolled as studying Latin, are as far removed from all reasonable likelihood of doing any thing more than dipping the soles of their feet in the waters of classical learning, as the boys and girls in Ancaster and Gananoque. I have the conviction, not based (I admit) on an exact examination of minute statistical details, but forming part of the general impression which my visits to the Grammar Schools have left on my mind, that a classical course of study is unsuitable for at least seventy-five per cent. of the pupils studying Latin in our Grammar Schools. It seems to me that such a curriculum ought not to be undertaken by any who are not likely to proceed far enough to read an author like Virgil with some measure of appreciation. This principle, if admitted, would certainly sweep out of our Grammar Schools more than the proportion which I have mentioned, of the classical pupils now attending these institutions. For girls, especially, I consider a classical curriculum to be, in ordinary cases, most undesirable. They are no doubt as capable as boys of learning Latin. But a so-called classical education, consisting of little more than a few grammatical technicalities, while it is a miserable education for either boys or girls, is especially miserable for the latter; because, in the first place, it can by no chance become of practical benefit to them in life; and, in the second place, it swallows up the principal opportunity of intellectual cultivation which they are likely ever to possess. Boys who obtain no culture at school may, perhaps, if their minds are of a vigorous order, gather a considerable measure of it afterwards in their intercourse with the world. But the sphere of women is more retired than that of men. Hence, if girls leave school without the beginnings of culture, there is the greatest danger of their remaining uncultivated all their lives. What a pity, then, that so many of our Grammar School girls should be sacrificed on the altars of the classical Divinities! How miserable, that, instead of being fed with what would nourish and beautify their minds, they are compelled to gnaw at the bare bones of elementary Latin forms! What a benefit it would be, to girls even more than to boys, if the pretence of Latin, in the case of those with whom it is really nothing more than a pretence, were swept away as rubbish, and the ground cleared for the introduction of something worthy of the name of education!

II. DEFECTIVE CHARACTER OF THE ENGLISH EDUCATION FURNISHED IN OUR PUBLIC SCHOOLS.

Before proceeding to sketch a curriculum which I would substitute for Latin and Greek, in the case of those pupils for whom I consider the study of classics unsuitable, I must refer to the low character of the English education at present furnished in our Public Schools. And let me say at once, passing over all minor points, that in a very large number of our Common and Grammar Schools, even of those in which superior educational results might be looked for, many of the most advanced pupils, at an age when they ought to be able to go forth and reap the whole harvest of English literature, are unable to read

a page of an ordinary English author with intelligence. It will, I presume, be admitted, that, whether our higher school pupils learn Latin or not, they ought at any rate to learn English. A girl, sixteen or seventeen years of age, has not, in my opinion, been decently educated, even though she may have been dragged through the whole, or a portion, of Harkness' Latin Books, if she cannot sit down and read a few pages of Cowper's Task, or a few pages of Thomson's Seasons, with a clear apprehension (making allowance for exceptional difficulties) of their meaning. But this is what many grown girls, who are wasting their affections on Harkness in our Grammar Schools, cannot do. Again and again, during the last six months, when I have met with classes of young ladies unable to attach any ideas to common English sentences, and ignorant even of the signification of common English words, I have felt grieved indescribably. If girls leave school unable to read an English author intelligently, the result will be that, in their own homes, they will not spend any portion of their time in useful reading. They will occupy their leisure evening hours in mere frivolity, or, if driven occasionally to have recourse to books, they will take up, for the sake of vulgar sensation, some silly novel, which makes no demand on the thinking faculty, presents no true picture of life, and, instead of adding to the riches of the mind, exercises a deteriorating influence. Such a result as this, in the case of girls of average ability and character, would, I am persuaded, under a proper educational system, be the exception and not the rule. I am afraid that at present it is as often the rule as the exception.

As an illustration of the evil which I am endeavouring to describe, I will take a school, which is not by any means of the poorest class, and which is conducted by a master of much more than ordinary ability and zeal. On the 11th of June 1868, there were on the roll of the Grammar School at Picton, 26 boys and 32 girls, all studying Latin. A considerable number of the girls were young ladies, whose school education must have been near its close—young ladies sixteen, seventeen, or eighteen years of age; some of them perhaps even older. The boys, with one exception, were a good deal younger. Once a week, the Grammar School pupils and the two upper divisions of the Common School, which is united with the Grammar School, under the Principalship of the Grammar School Master, are brought together for the purpose of reading passages in English, which have been previously selected and studied. I mention this to show that the study of English is not neglected in Picton; the truth being that more attention is paid to English in that village than in most other localities which I have visited. The weekly English recitations to which I have referred are fitted to be very beneficial. I had an opportunity of witnessing one of them, and was amused with the spirit which some junior boys, in particular, threw into a simple dialogue which they rendered in character. The manifest interest which the little fellows took in the exercise was a proof, if I had needed any proof, of the charm with which lessons in English may be invested under a master who understands his business. But the point to which I wish to come is, that, in spite of the measure of attention paid to English in Picton, and notwithstanding the ability of the Principal of the school, the incapacity of the pupils to interpret any English sentences presenting a shadow of difficulty was strikingly exhibited. For instance, one of the pieces recited in my hearing was the poem of Mrs. Hemans, entitled "The Graves of a Household." The whole thought and sentiment of the poem lie in the last two lines:—

"Alas for love, if *thou* wert all,
And nought beyond, O earth!"

The idea that human affection would be a poor thing if man's existence and love were limited to the present life is not so profound, nor is it expressed by Mrs. Hemans in so abstruse a manner as that properly educated girls—sixteen, seventeen, or eighteen years of age—should have any difficulty in comprehending it; and yet it was comprehended by not one girl in the Picton School. Not one of the intelligent young ladies present—and when I say *intelligent*, I am speaking without the slightest irony—could tell to what the pronoun "*thou*" refers. The master called up in succession about half-a-dozen of those whom he considered most likely to be able to solve the problem, but they all failed. Several of them expressed the opinion that "*thou*" refers to "*love*." I asked them—Did Mrs. Hemans mean to say,

Alas for love, if *love* were all?

They saw that this was nonsense; but even then they were unable to point out the refer-

ence of the pronoun, or to give any indication of the meaning of the lines. Another piece recited was Eliza Cook's poem on "An Old Arm Chair," in which the line occurs,

"Say it is folly, and deem me weak."

Not a boy in the school, except one, who (I believe) had been a Common School teacher, knew the meaning of the word *deem*. This may seem to you incredible. It would have seemed incredible to me a short time ago. But I have discovered that a deep and widespread ignorance of the signification of English words prevails among even the advanced pupils in many of our Grammar Schools. I have met with grown girls who, after reading Mrs. Sigourney's stanzas on the "Coral Insects,"

"Who build in the tossing and treacherous main,"

could not tell me what the *main* is. It was by no means uncommon to find grown girls who had only partially correct conceptions of the force of the epithet *treacherous* applied to the main. Comparatively few Grammar School pupils have been able to explain to me the term *circumscribed* in Gray's Elegy—

"Nor circumscribed alone

Their growing virtues, but their crimes confined;"

and still fewer to attach any idea to the phrase *loose revolving* in Thomson's description of a snow-storm—

"In his own loose revolving fields the swain
Disastered stands."

I was informed by one Grammar School pupil that a *swain* is a species of bird; and a considerable number of the young ladies whom I had the privilege of examining considered the term to be synonymous with lover, though they were rather in the dark as to what the lover could be about, when he was standing disastered in his own loose revolving fields.

The ignorance of their own language, manifested by the pupils of our Provincial Schools, enables me to understand what earnest writers on education are beginning to discover and to proclaim regarding the state of things in other countries. The following passage from a lecture on English in Schools, by Professor Seeley, while it may serve as a confirmation of what I have been saying, will show how very serious, in the estimation of that distinguished scholar, is the defect I have endeavoured to describe. Professor Seeley's incidental allusion to Latin and Greek is worthy of notice in passing, particularly by those who are accustomed to assume that the best way of becoming acquainted with the English language is wholly to neglect the study of it for the sake of the ancient classical tongues. "I think that an exact knowledge of the meanings of English words is not very common even among highly educated people, which is natural enough, since their attention has been so much diverted to Latin and Greek ones. But the ignorance in this department of the class I have most in view, those who leave school at fourteen or sixteen, is deplorable. It is far more than a mere want of precision in the notions attached to words. It is far more also than a mere ignorance of uncommon and philosophical words. There is a large class of words in the language, originally perhaps philosophical but which have passed so completely into the common parlance of well-educated people, that they cannot now be called philosophical, but which remain to the class I speak of perfectly obscure. The consequence is that such people, in reading not merely abstruse books, but books in the smallest degree speculative or generalizing, constantly mistake the meaning of what they read. It is not that they understand their author imperfectly; they totally misunderstand him, and suppose him to say something which he does not say. It is no wonder that such persons have no turn for reading; in fact, it is scarcely to be wished that they should. But all this is plainly owing to the fact that they have never been taught English."

III. ENGLISH HIGH SCHOOLS NEEDED.

It has been shown, that, for the great majority of the pupils who crowd our Grammar Schools, the study of Latin is unsuitable; and also, that as a rule, the advanced pupils, male and female, in our public schools, fail to receive a decent English education:—for I will call no English education *decent*, which dismisses grown boys and girls from school unable to read ordinary English authors intelligently. It follows, that to bring our educational system into a right condition, it is not enough that an end be put to the unnecessary study of Latin; a thorough reformation must at the same time be made in the

teaching of English. In fact, the evils which have grown to a head in our Grammar Schools, appear to indicate that the time has arrived for the organization of a different sort of schools from either the Grammar Schools or the existing Common Schools.

Children under thirteen years of age, who do not mean to take a classical course of study, have no educational wants which the Common Schools, properly conducted, are not fitted to supply. For children of thirteen and upwards, who have already obtained such an education as may be got in good Common Schools, it would, I think, be well to establish English High Schools:—a designation which I borrow from the United States, though unfortunately I have only a very vague idea of what the High Schools in the United States are.

I consider it essential, that in the admission of pupils to the High Schools, both age and attainments should be taken into account, in order, on the one hand, that these schools should not be flooded with small boys and girls, for whom the Common Schools are perfectly adapted, and on the other, that large boys and girls who have been inattentive or ill-behaved in the Common Schools should not become a burden on the High Schools, in whose business they are unfit to take part. Children, to be eligible to the High Schools, should be able to read with fluency, and to parse and analyse all sentences of an ordinary kind. It is surely not too much to expect such work as this from the Common Schools, and to require that children not meaning to study Latin, should remain in the Common Schools till they can do it. Those pupils for whom no higher education is desired, or whose circumstances in life compel them to leave school before they can attain to any thing higher, need never pass beyond the Common Schools.

1. *Study of the select works of good English Authors.*—It being assumed that such exercises as parsing and the analysis of sentences have been properly and fully attended to in the Common Schools, the pupil, on entering the High School, should proceed to the study of select works of good English authors; the object contemplated being not technical grammatical practice, but a mastery of the meaning of the writer, and, as far as possible, an entering into his spirit.

Of course, boys or girls of thirteen, even though they may have been well trained in the Common Schools, will be unable to read intelligently the more profound English authors. It will therefore be necessary, in the High Schools, to commence with easy and interesting books, of an objective character; and to pass gradually to what is more difficult. Here again I may quote from Professor Seeley. "The selection of the series of writers to be read in the classes is an important question. I should like to see it differing in different schools, but constant in some main features. You would naturally begin with what is most attractive to young boys, such as Macaulay's "Lays," Kingsley's "Heroes," Scott's "Poems and Tales of a Grandfather." You would put at the end of the course the older poets and the philosophical writers, but I should like to see introduced every where, about the middle of the course, Plutarch's Lives, in the translation, Pope's Iliad, and Worsley's Odyssey. I will undertake to say that the reading of these three books would more than counterbalance all that the boys might lose in the knowledge of antiquity by giving up the classics."

2. *Structure of sentences; Allusions; Figurative Representations; Signification of Words.*—As the pupil is now mainly concerned about what may be termed the literary content of the works with which he is engaged, nothing should be overlooked that can contribute to his perfect apprehension of the meaning of what he reads. Where peculiarities of construction present themselves, they should be cleared up, though it ought not to be necessary in ordinary cases to waste time on mere matters of syntax. Historical, biographical and mythological allusions should be mastered. In reading, for instance, the well-known address to an Egyptian Mummy, a pupil should not be allowed to swallow the Memnonium, making no bones, any more than, in the High School of Edinburgh, or in one of our good Grammar Schools, a boy whose lesson was the Ode of Horace, "*Te maris et terrae, &c.*," would be permitted to escape without knowing anything about Panthoides. Care should be taken that facts and principles are laid hold of. Similes should be explained; metaphors unfolded. Above all, a rigid account should be required of the meanings of words. This part of the exercises of the literary classes might easily, in the hands of a teacher, who was ambitious to excel, and who did not grudge the labour without which excellence is unattainable, be invested with great variety and interest. Books like Trench's "English past

and present," and Trench's "Study of words," furnish a mine of materials, which a teacher might with advantage use, to make his examinations on words delightful and instructive.

3. *Trains of Argument; Education of the Discursive Faculties; Elements of Formal Logic.*—It would of course be a part of the business of the pupils in the High Schools to master the trains of reasoning occurring in the works which they studied. Recently, a lady who, after spending some years at what was considered a good private school in Canada, had gone to a school in the United States, gave me a suggestive account of one of her first experiences in this latter school. The class in which she was placed was studying one of Dr. Paley's works—either his "Natural Theology," or his "Evidences of Christianity." She had not become familiar with the manner of conducting the class, when she was startled by the teacher calling on her to state "the next step in the argument." It was as if a thunderbolt had fallen at her feet. She had never previously been made to understand that it was necessary to attend to the arguments contained in books. Now why should not the boys and girls in our Canadian schools, as well as those in the United States, be trained to comprehend an argument and to estimate its value?

I confess that I do not see why we might not, with a view to the full development of the discursive faculties of the advanced pupils in the High Schools, go even farther than I have yet indicated, and give a place in our curriculum to the elements of Formal Logic. The name of Formal Logic may perhaps appear terrible—*monstrum horrendum, informe*—but from considerable experience as a teacher, I can state positively that the fundamental principles of the science can easily be mastered, even by pupils who have had little previous mental discipline, and that they admit of being made very interesting. Suppose, then, a passage containing an argument on some important topic to occur in the ordinary course of reading. What I would suggest is, that the pupil, after stating in a free and natural manner the outline of the reasoning, might be required to throw the argument into syllogistic form. Such an exercise, occasionally (it need not be very frequently) performed, would give precision and vigour and facility to the movements of the understanding.

4. *The minds of the Pupils brought into contact with Truth and Beauty.*—The quickening contact with truth and beauty, into which the pupils in the High Schools would have their minds brought in studying the works of good English authors, is a circumstance of unspeakable importance. Suppose that an ingenuous girl were to read even a single poem like Milton's "L'Allegro," under the direction of a teacher competent to guide her to a thorough appreciation of such a work, and that the poet's general conception, and the wonderfully felicitous musical details in which it is developed, were to enter into her imagination, so that the whole should live there, and become in her experience "a joy for ever," can it be doubted that this would be worth all the Latin, ten times over, which most girls learn in our Grammar Schools? Why should children not have their intellectual natures nourished and enriched through familiarity with exquisite thoughts and images, instead of being starved on lessons about trifling or common place matters? When all human passions and affections, as delineated by writers who have remained faithful to nature—when the varieties of human life, actions and their tendencies, the immortal representations that literary genius has bequeathed to the world, the analogies that poets love to trace, can be set before the pupils in our schools, why should we answer all their conscious and unconscious aspirations after what Matthew Arnold calls light and sweetness, by informing them that Caius dwelt for two whole years at Rome, or, that the rule in Latin is to put the direct object of an active transitive verb in the accusative case?

5. *English Composition.*—With the reading and intelligent and (as far as possible) appreciative study of good English authors, the theory and practice of English composition would naturally be associated. This branch should receive a large measure of attention. At present it is greatly neglected, and it would be strange if the case were otherwise; for the children in our schools obtain, under existing circumstances, only a wretchedly scanty stock of ideas; they come into the possession of little real knowledge; and it is of no use trying to instruct children how to say a thing, when they have nothing to say.

IV. WAY IN WHICH MORALITY MIGHT BE TAUGHT IN THE ENGLISH HIGH SCHOOLS.

Let me now proceed to show how the principles of morality might be taught in the High Schools.

I mentioned, in my report for 1865, that a friend, who takes a deep and enlightened interest in education, had expressed to me the opinion that the want of any adequate provision for teaching morality is one of the main defects of our school system. The same thing is felt by earnest men in regard to the schools in England. The following passage, from a lecture by Professor Huxley on a liberal education, is to the point. He is criticising the education given in the primary schools of England:—"Let us consider what a child thus educated knows, and what it does not know. Begin with the most important topic of all—morality, as the guide of conduct. The child knows well enough that some acts meet with approbation, and some with disapprobation. But it has never heard that there lies in the nature of things a reason for every moral law, as cogent and as well defined as that which underlies every physical law, that stealing and lying are just as certain to be followed by evil consequences as putting your hand into the fire, or jumping out of a garret window. Again, though the scholar may have been made acquainted, in dogmatic fashion, with the broad laws of morality, he has had no training in the application of those laws to the difficult problems which result from the complex conditions of modern civilization. Would it not be very hard to expect any one to solve a problem in conic sections, who had merely been taught the axioms and definitions of mathematical science?"

No person can doubt that Professor Huxley is right in pronouncing morality to be the most important of all the branches of a liberal education. In this Province of Ontario, the Council of Public Instruction have made Christian morals a part of the programme of the Grammar Schools. But I suspect that the subject, while honoured with a place in the programme, receives scarcely any farther attention. Of course, good teachers do not neglect to discourage every manifestation of vice. They are anxious, in a general way, to preserve a good moral tone in their schools. But my impression is, that little, if any, systematic instruction in morals is given in our Public Schools beyond the inculcation, "in dogmatic fashion," of the most fundamental ethical precepts. The fact is, that to teach morality in schools in an efficient manner is extremely difficult. I do not think that classes, specially devoted to lectures or examinations on moral subjects, are desirable. It seems to me that the best means of making our schools fields of moral as well as of intellectual education, is for teachers to avail themselves of the opportunities of conveying moral lessons that may occur in the course of the ordinary English studies with which the pupils are engaged.

I may illustrate what I mean by referring to a visit which I lately paid to one of our Grammar Schools, in which a class of grown girls read in my hearing a passage from "The Merchant of Venice," containing Portia's famous speech:—

"The quality of mercy is not strained;
It droppeth as the gentle rain from heaven
Upon the place beneath. It is twice blessed;
It blesseth him that gives and him that takes;"

and so on. When a few lines had been read, I asked one of the girls to close her book for a moment. She did so. Now tell me (I said) what Shakespeare means when he says that the quality of mercy is twice blessed? Where is the double blessing of mercy? Though the sound of the poet's words had scarcely died out of her ears, she could not answer my question. So I said to her again: If you were waiting by the sick-bed of a friend, showing that friend a great deal of kind attention, giving up amusements and in other ways sacrificing your own pleasure for your friend's sake, your labour of love would be a blessing to your friend, would it not? "It would." Would it be a blessing to any body else? She answered, in a subdued voice, which told me how she felt the influence of one of the grandest of all moral principles coming like a revelation over her spirit, *To myself*. Now, here was a lesson in practical Christian Ethics, given incidentally, in no dry dogmatic fashion, but in connection with words of such singular sweetness that they can scarcely be read intelligently without entering into the soul, and becoming part of its convictions for ever. Why should such lessons not be a regular feature of the classes of English literature in our schools?

A teacher, anxious to form his pupils to a good moral character, would, if he pursued the system of which I am speaking, have ample opportunities not only of bringing the broad laws of morality under their notice, but also of exhibiting those laws in their bearing on many of the actual circumstances of life. The instance to which I have referred,

simple as it is, shows this. Nor would a good teacher have the slightest difficulty in making children feel most impressively, from passages that would incidentally be met with in the authors studied, that moral laws, according as they are observed or violated, have their consequences as unvaryingly and inevitably as physical laws. Whether this moral training could be carried far enough to enable the scholars to apprehend clearly the solution of any of what Huxley terms "the difficult problems which result from the complex conditions of modern civilization," would depend on circumstances. The example, which Huxley himself gives of the problems referred to, is that of a workman who has to bear hard labour and perhaps privation, while he sees others rolling in wealth, and feeding their dogs with what would keep his children from starvation. "Would it not be well," it is asked, "to have helped that man to calm the natural promptings of discontent, by showing him, in his youth, the necessary connection of the moral law which prohibits stealing with the stability of society—by proving to him, once for all, that it is better for his own people, better for himself, better for future generations, that he starve than steal?" I am persuaded that a good teacher, with pupils of average capacity and sufficient years, would find a problem like this by no means too hard for them, and that the occasional discussion of such problems is fitted to be extremely beneficial. But whether such questions be often taken up or not, the great point for which I am contending remains unaffected, that the ethical instruction given in a school, be it profound or otherwise, can best be given—given most naturally, most impressively, and with the greatest likelihood of abiding effect—in connection with the study, by the pupils, of the works of good English authors.

V. PHYSICAL SCIENCE IN THE HIGH SCHOOLS.

The course of instruction in the English language and literature which I have attempted to sketch, ought, as far as possible, to be associated in the High Schools with lessons in physical science. Each of the great parties into which the educational world is divided—those who demand that education should be literary, and those who demand that it should be scientific—appears to be right in what it contends for, and wrong only in loving and seeking to exalt its own favourite unduly. If boys and girls ought not to be dismissed from our most advanced schools ignorant of their own language and literature, it seems equally obvious that they ought not to be dismissed from our most advanced schools ignorant of the laws of the world in which their lives are to be spent—laws, an acquaintance with which may not only contribute materially to their physical welfare, and to that of their families, but may at the same time prove a lasting source of rational enjoyment.

I have said that this seems obvious. Yet some very distinguished authorities have taken a different view. Not only is it the case that science has till lately been almost entirely shut out from the great English schools, but men of the highest position are not wanting who think that its exclusion is wise and right. The following extracts from Dr. Moberly's evidence before the Commission on Public Schools in England, I copy from a lecture on Education by Mr. Joseph Payne:—"In a school like this (Winchester), I consider instruction in physical science, in the way in which we can give it, to be worthless. A scientific fact is a fact which produces nothing in a boy's mind. It leads to nothing. It does not germinate. It is a perfectly unfruitful fact. These things give no power whatever." May I ask your attention to the limitation under which instruction in physical science is here pronounced worthless—in the way in which we can give it? I am not only willing to admit, but I feel strongly, that instruction in science, to be of value, must be given in a certain way; and if it could not be given in a way widely different from that in which it is often given in schools, different from that in which alone Dr. Moberly appears to have thought that it could be given in Winchester, I should not be very anxious to vindicate for science a place in our programme of High School studies. To make pupils commit physical facts to memory from a book, or (more frightful still) to set them to solve questions mechanically from formulæ, the mode of investigating which they do not know, and whose meaning, perhaps, they have never grasped, may be looked upon by some persons as scientific teaching; but it is not merely useless in an educational point of view; it is positively hurtful. Even supposing the method pursued by a teacher to be not quite so irrational, yet were he merely to announce physical laws, and to perform an experiment or two illustrative of these, his instructions, though I should

not call them worthless, would not have very high educational value. I fancy that this is the sort of instruction which Dr. Moberly was contemplating, when he spoke of scientific facts as leading to nothing, not germinating, remaining unfruitful, giving no power. But why should science not be taught in a different fashion? I am persuaded that though anything like a large or extended course of instruction in science must for many years to come be beyond our reach, it is possible for us, even now, to inaugurate a system of scientific lessons that shall secure to the scholars—of course in comparative measure—the most essential advantages to be reaped from a full scientific curriculum.

Apart from the value of the facts which it communicates, what are the special benefits of scientific instruction, and the conditions necessary in order that these may be realized? In the first place, scientific lessons train to habits of observation; and the condition necessary to secure this advantage is that the phenomena under consideration be made matter of intelligent personal observation by the pupils. It is not enough to tell children that such and such phenomena exist; they must have the phenomena set before their eyes, and must be stimulated to take note for themselves of their character and relations. In the second place, scientific instruction gives practical familiarity with the universal method of discovering truth. Not merely physical truth, but all truth that is not immediately given to the consciousness, is discovered by induction. It is of immense importance, therefore, that children should be disciplined at as early a period as possible into familiarity with the inductive process; and the condition of such discipline being received in connection with lessons in physical science is that the lessons be actual exercises in induction. The teacher must not lift his pupils at once into a position where a particular law that he may wish to unfold to them—the law exhibiting what ancient philosophy used to call the One in the Many—is discovered. He must make the pupil climb to the law, through all the requisite steps, by the use of his own eyes and hands. In other words, he must render the pupil a discoverer, by causing him to go through the entire process, not of observation merely, but of thought likewise, through which the philosopher passed by whom the generalization under consideration was first made.

1. The method then to be followed, in order to secure the advantages of scientific instruction, seems plain. Our pupils are to philosophize. But they are philosophers at the starting point of investigation. Now, in the actual history of discovery, what does inquiry start from? From some fact that is noticed, and that strikes the mind as strange. Plato tells us that wonder is the affection of a philosopher. Iris (as he more poetically puts it) is the daughter of Thaumás. The first step, therefore, is to stimulate the feeling of wonder in the children. Let the teacher take a barometer, for example, and show them how the column of mercury is sustained, and also how the height at which it stands varies, within narrow limits, from day to day. They will be astonished, and the question will be—What is the cause of this? Or let him show them Roberval's balance in comparison with an ordinary lever, and ask them to note how, when equilibrium has been established, the place of application of the power can apparently be shifted, the weight remaining unmoved, without affecting the equilibrium, while in levers of the ordinary kind the equilibrium would be at once destroyed by moving the power. Such a phenomenon will be felt to be surprising, and again the question will be—What is its cause?

2. The sentiment of philosophic curiosity being awakened, what next? We have seen that it would be a grand mistake for the teacher to proceed to communicate to his pupils the information they have been led to crave. They must find out for themselves the truth of which they are in search. A single physical law which they discover is, in an educational point of view, worth a thousand of which they are told. But in what way can a child make discoveries? He must scrutinize with the utmost care the phenomenon of which the explanation is sought. He has already observed it in a loose and general way. He must examine it narrowly, overlooking no circumstance, in the whole multiplicity of facts present in the phenomenon, which can by any possibility form part of the cause. He must notice, for instance, in the case of the barometer, that the fluid used is mercury; that it is in a glass tube of a certain diameter; that one end of the tube is open and exposed to the air while the other is closed; that at the closed end of the tube, there is a space from which the air has been excluded, and so on.

3. But suppose the circumstances of a phenomenon to have been fully and accurately observed. Do all of these equally constitute part of the cause of which we are in search?

Take, for example, the diameter of the tube. The child can be made to see whether the effect varies when tubes of different diameters are employed, and can draw his own conclusion. Is the existence of a vacuum at the closed end of the tube a material circumstance? Let the child take note of what happens when mercury is poured into a bent tube from the closed end of which the air has not been excluded, and draw his own conclusion. Is the exposure of the surface of the mercury in the open end of the tube to the influence of the air necessary? Put the tube under the receiver of an air-pump and exhaust the receiver, and make the child draw his own conclusion from the gradual sinking of the mercury in the barometer as the successive strokes of the piston are made. I need not carry these details farther. My aim, of course, is not to exhibit proof for the fact that the barometric column is sustained by atmospheric pressure, but merely to furnish hints of the method which a teacher should pursue in seeking to bring his pupils to an acquaintance with such laws. In brief, let the pupils be told nothing, but let them be induced and guided to reason out the result for themselves. It is absurd to say that lessons in science, thus conducted, can be without power, or that they can fail—as Dr. Moberly thinks that the scientific facts which a boy learns in school are in danger of doing—to germinate. I quite understand that cart-loads of so-called useful knowledge may be shovelled into a boy's mind without germinating. For why? What has been shovelled into the boy is not scientifically known. He has been put in possession of generalizations, but he has not generalized. The facts which have been given to him prove unfruitful, because they have grown from no root. They are without power, because without relation to any mental habit. But let science be taught in the manner that I have described, and what better training for the observing faculties can be imagined? What better means can be pointed out, of imparting to children a practical familiarity with that inductive process, which they are to be employing in every future act in which they may attempt to get hold of any truth that lies out of the sphere of immediate consciousness?

To secure the essential benefits of scientific instruction, as these have been set forth, it is obviously not at all requisite that an extensive scientific curriculum be gone over. Practical teachers smile at the mention of the range of subjects in which learned men sometimes think that children can be fully indoctrinated in a year or two. Mr. Payne, in the lecture above referred to, gives a curriculum of study for boys and girls between the ages of seven and fourteen, drawn up by Jeremy Bentham, and including in the two lowest of its five stages the following among other subjects:—Mineralogy, Botany, Zoology, Mechanics, Hydrostatics, Hydraulics, Pneumatics, Acoustics, Optics, Chemistry, Meteorology, Magnetism, Electricity, Galvanism, Archæology, Statistics. Not only are such schemes visionary, but (what it is of more consequence to remark,) they are, for the fundamental purposes of education, unnecessary. The grand educational advantages of scientific instruction may in comparative measure be secured by a system of brief lessons on very limited portions of the field of science, provided that the pupils be made to go through a process of strict philosophising within the range to which their efforts are directed. My opinion is, that no attempt should be made to teach physical science on an extensive scale in our High Schools; that nothing like even a general sketch of any particular science should be aimed at; but that the attention of the pupils should be turned merely to prominent out-standing points in a few of the sciences, and that their ambition should be to achieve a strictly philosophical conquest of these. For instance, the whole course of instruction in Pneumatics might be, the doctrine of the Barometer, of the syphon, and of the force-pump; in hydrostatics, the principles necessary for the explanation of Bramah's Press, and the laws of floating bodies; and so on. Thus, in a brief space of time, the pupil might obtain, not a vague and uncertain glimpse, but a rigid knowledge, of limited portions of a variety of fields in the domain of science, and be prepared for prosecuting future researches in any of these fields to which the circumstances of his life or the bent of his genius might incline him.

VI. COMMON SCHOOLS.

It is not necessary for me to refer to other studies that would naturally be pursued in the High Schools—such as History, Mathematics, and French. I have limited myself to the English language and Literature, and to physical science, because these branches are at once the most essential and the most commonly neglected.

The establishment—either through a development of our Common School system, or through a modification of our Grammar School system, or partly in the one way and partly in the other—of High Schools in which the English language and literature and physical science should be taught on the plan described, and in which other branches should receive the attention to which they are entitled, would be one of the greatest services that could be rendered to the Province. It would be an immediate inestimable boon to thousands of families, and would be certain to lead ultimately to great social results. Teachers and School Trustees, to whom I have made known my views, have almost invariably approved of them very warmly; and only two difficulties have been suggested, namely, that the Common Schools are not generally conducted in such a manner as to prepare pupils for entering on the work of the High Schools, and that the instructions given in the Normal School are not such as to qualify the teachers sent forth from that institution for taking charge of High Schools.

The former of these objections is not without force. I am sure that you will not misunderstand me, nor fancy that I wish to carp at our Common School system. All competent judges agree that the system is admirable. But, as might be expected in a country like ours, its working is in many respects unsatisfactory. It appears to be my duty not to throw a veil over the defects of our Common Schools, but to present matters in a true light, in order that steps may be taken to remove as far as possible the evils that exist, and to lay a solid basis for the superstructure of advanced English education, which I think that we should now attempt to raise.

A. *Superior limit of the attainments reached in the best Common Schools.*—No Common School, among those which I have had an opportunity of carefully inspecting, has on the whole given me greater satisfaction than the one at Sarnia, of which Mr. Bremner is Principal. A description of the state of things there may serve the purpose, therefore, of marking the superior limit (to use a happy phrase borrowed from mathematicians by Mr. John S. Mill,) of the attainments reached in the best Common Schools.

One secret of the success of the Common Schools in Sarnia is the system of grading that prevails. There are two primary ward schools and a central school. When the pupils in the ward schools have reached a certain point, they are promoted on examination to the lowest room in the central school; and on the same principle promotion takes place from one room in the central school to the room above, till the pupils at length reach the room of the Head Master. On the Head Master's roll, at the date of my visit, there were 39 pupils, of whom 37 (23 boys and 14 girls) were present. The average number on his roll during the year is about 45. These pupils are in two divisions, which differ only in this, that the senior division receives lessons in British, Canadian and General History, which the junior does not. A considerable number of the pupils in Mr. Bremner's room appeared to be as much as fourteen years of age, some of them above that. Last year he had 18 pupils above sixteen years of age. There was probably not one of the pupils present on the occasion of my visit, who was not qualified to pass the entrance examination for the Grammar School; and, in the great majority of Union Schools, they would undoubtedly have been all herded into the Grammar School. In passing through the two divisions of Mr. Bremner's room, the pupils are expected to carry forward their studies in English Grammar, so as to be able to analyze and parse any sentence, whether simple or complex, that does not present exceptional difficulties. My impression is that this work is to a very considerable extent done truly and well. In the department of the English language and literature, no higher work than this is done in Sarnia; and I suspect that there are few Common Schools in the Province that go beyond this point.

B. *Low state of many of the Common Schools.*—I have indicated what may be regarded as the superior limit of Common School education in Ontario. Let me next shew you how far beneath this limit multitudes of schools, not in new and thinly peopled districts, but in large villages and towns, are sunk.

1. The school system in Guelph consists of three primary schools for young children; a fourth primary, in connection with a senior school, for girls; and a fifth primary, in connection with a senior school, for boys. When I was in Guelph on the 23rd of January, 1868, my time did not permit me to visit the senior school for girls; but I inspected the senior school for boys. The school room—which contains all the space furnished for

advanced Common School education for boys in Guelph, a town of 6,000 inhabitants—is about 29 feet by 24. It is provided with seats for 54 pupils, but the number of seats is too large for the size of the room. At the date of my visit, Mr. Hutton, the Master of the senior school, who appeared to be an excellent teacher, had 56 pupils on his roll. Of this state of things, what was the result? First, the room was so crowded that the air became in a few minutes impure. Next, no proper grading of the schools in the town can be carried out. The boys, who ought to be promoted from time to time from the primary schools to the senior school, in many cases can not be promoted, because there is not room for them in the senior school. Still farther, no large or even moderately sized class has due space for standing at the recitation of lessons. And finally, with respect to the attainments of the pupils, it is enough to say that scarcely any of the twenty-three boys, who formed the highest class, could parse with a fair measure of accuracy the sentence, “John is a very good boy.”

2. I paid a brief visit to two of the Common Schools in Cobourg in the early part of February 1868. The first was described to me as No. 2. On the roll were 52 pupils (47 boys and 5 girls), most of them very young. Not more than five of those present were thirteen years of age. There was no fifth class. The master had never had a fifth class. Only about ten children were in the fourth class. The two most advanced boys present when I entered the school were called up for examination in English Grammar. Both made an extremely poor appearance. One other boy, however, who came upon the scene before I left, and whom the master joyfully hailed as his crack scholar, passed a very satisfactory examination. The master, whom I do not blame in the least, appeared to understand distinctly the *origo mali*. It appears that the schools in the town are not graded. In each school, pupils of all ranks are taught. Moreover, it is alleged that pupils are constantly passing from school to school. The school-houses are not good. The other school which I visited was described to me as No. 6. On the roll, 70 girls. Average attendance about 62. The teacher, an intelligent young lady, never had a fifth class. Only one of the girls present could parse a very simple English sentence with any measure of accuracy. I was informed that these schools were not below the level of the other Common Schools in Cobourg.

3. On the 4th of February 1868, I visited the Union School at Bowmanville. The highest division of boys in the Common School comprised those reading the fourth and fifth books. The room in which they met was greatly overcrowded. It contained seats for 58 pupils. There were 67 on the roll, so that, in order that each boy might have a seat, it was necessary that nine should be absent every day. I asked the teacher, who had only recently been appointed to his office, and who, therefore, was not responsible for the state of the school, to call up about a dozen of his best boys for examination in English Grammar. He gave them the sentence to parse—“Gold and silver are precious metals.” Only one boy in the class understood distinctly why *are* is plural. This was the only boy who could parse with anything like accuracy the sentence—“John is a very good boy.” The average age of the pupils examined was probably between thirteen and fourteen.

4. About the middle of September 1867, I visited the Common School, No. 1, in Belleville, taught by Mr. Macown, a gentleman of high intelligence, and unusually accomplished (I believe) in Natural History. He is a superior teacher, and I think it likely that his school is at least up to the mark of the other Common Schools in the town. There is no general grading of the schools in Belleville. The school, No. 1, is attended by pupils of all sorts, and the whole task of instructing them devolves on Mr. Macown, with a female assistant, to whom the younger pupils are assigned. For the month of August, the average attendance in Mr. Macown's room was 81. The number of names on the roll for the month was 118. The oldest pupils present when I visited the school were about thirteen years of age. There were not many so old. Mr. Macown rarely has pupils above that age. In winter, he may occasionally have four or five as high as sixteen; and in order to be able to give such pupils the instructions they need, he has frequently been obliged, from the press of work lying on him, to ask them to wait on him for lessons after the regular hours of teaching. As regards educational results, I simply remark that not more than five or six of the pupils present when I inspected the school could parse easy sentences, such as, “John is an exceedingly good boy.”

C. Causes of the low Educational State of so many of the Common Schools.—The miserable state of so many of the Common Schools may be mainly traced to three causes, or (as they might be called) orders of causes.

1. The first is the folly or indifference of School Trustees, or of the inhabitants of particular school districts. Let no adequate school accommodations be provided; do not grade the schools; throw upon a single teacher the responsibility of conducting the education of very large classes of pupils in all stages of progress; and what consequences can be expected? Look to Cobourg, as compared with Sarnia, for an answer. In Sarnia the school buildings are excellent, while in Cobourg they are wretched. In Sarnia, the schools are well graded, while in Cobourg there is not a pretence of grading. In Sarnia, each teacher has under his care a sufficient number of pupils who are all nearly in the same stage of their studies, while in Cobourg each teacher teaches every thing. It would be nothing short of a miracle, if educational fruits, similar to those which are produced in the one place, were met with in the other. The details of the Common School system have been arranged in Sarnia by men of wisdom, who had the interests of their children and of society at heart. They appear to have been arranged in Cobourg by men who were either out of their senses, or who did not really want the Common Schools to prosper.

2. A second cause of the low state of many of the Common Schools is the defective method of teaching which in several respects prevails. I do not refer to what may be called accidental instances of incapacity on the part of individual teachers, for such instances would occur under any public system; but I have in view faulty general methods. I will mention two of these.

The first is, a neglect on the teacher's part to ascertain whether his scholars understand what they read. I have shown you in a previous part of my report what this ends in—the dismissal of grown boys and girls from the Grammar Schools, and from the most advanced classes in the Common Schools, unable to read intelligently an ordinary English author, and therefore, without the beginnings of a taste for the perusal of any works which are not fitted to gratify the appetite for vulgar sensation. Teachers often appear to fancy, that, because English is the language which their pupils speak, the children cannot fail to comprehend English words and sentences. When I was in Goderich, in the spring of the present year, I visited the Common School, and requested the second master to allow me to hear his pupils read some lesson which they had recently read with him. He selected a passage. I put to him the question: are the children supposed to understand what they read? He answered: certainly. Well, what was the fact? The passage read was about organic objects; and not one boy or girl in the school knew whether a tree is organic or not. Not one knew whether an ox is organic or not. So strong is the tendency of teachers to assume that their pupils do not require to have English words and sentences explained to them, that I have visited schools where more than ordinary precautions seem to be taken by the Head Masters to guard their subordinates against such a mistake, but where, nevertheless, the mistake is committed. For instance, in Oshawa, the Principal of the Union School informed me that it was an express and (I believe) written instruction to the teachers in the Common School to attend to the matter of which I am speaking: and yet, at my last visit to Oshawa, I found that the matter had not received any thing like sufficient attention.

The second general error, which I wish to notice, is the manner of teaching English Grammar. In a considerable number of Common Schools, the frightful system prevails of requiring children in the junior classes to learn from a book by rote answers to questions, such as, what is Grammar? What is Etymology? What is Syntax? And this is their initiation into the study of English Grammar! No wonder that children abhor the name of Grammar. No wonder that they find difficulty—as I have been told they do—in learning Grammar. The thing is monstrous. Persons guilty of such teaching ought to be indicted for cruelty to animals. Often, when I have seen sweet little boys and girls tortured after this fashion, from whose eyes, amidst all the perplexity and distress which their incomprehensible tasks occasioned, the light of natural intelligence beamed, I have asked myself how it was possible that the teacher could be insensible to the fact that he had rational-souled creatures to deal with, and not lesson-learning machines. No lessons in Grammar ought to be given to children, except what they can easily and thoroughly

understand; nor should rules and definitions be committed to memory, till the truth of which the rules and definitions form the expression, has been grasped.

3. The third cause of the low state of many of our Common Schools is the relation of the Common to the Grammar Schools. I have discussed this point so fully in my Report for 1866, that it is not necessary to do more than mention it now. Where Union Schools exist, the machinery of the Union is in a large number of cases so managed as to rob the Common Schools of all their higher pupils, and to leave nothing to be done in the Common Schools except the most elementary sort of work. Things are very much the same in some places where the Common and Grammar Schools are not united. In Belleville, for instance, though there is no Union of the Schools, influences are brought into play to drain the Common Schools of all advanced pupils, for the purpose of filling the Grammar School; and I have no doubt that this is one of the circumstances, by which the comparative degradation of the Common Schools in Belleville is to be explained.

VII.—THE NORMAL SCHOOL.

Taking into account, on the one hand, the low superior limit of the attainments reached in the best Common Schools, and, on the other, the miserable character of the instruction given in many of the Common Schools throughout the Province, two things seem plain:—first, that, without High Schools, to take children up at the point where the Common Schools leave them, our system of education must continue to be very incomplete; and secondly, that as a preparation for the establishment of High Schools, reforms require to be made in the Common Schools. It only remains for me to refer to the important question of the training of teachers.

Dr. Scazster, the able Principal of the Normal School, and Mr. Davies, the second Master, have kindly made me acquainted with the course of instruction through which their students pass. My time, however, has not permitted me to obtain more than a very general insight into the training which teachers receive in the Normal School. In these circumstances, I scarcely feel in a position to offer an opinion regarding the working of that institution, or to lay before you any very specific suggestions as to changes which it might be advisable to make. I suppose there can be no doubt that, if High Schools like those which I have described were established, it would be necessary to modify the work of the Normal School considerably. Teachers, who should have to perform different duties from what have hitherto been expected at their hands, would need a different training from what has hitherto been given. The instructions in English in the Normal School would require to be raised to a far higher level than is now aimed at. Much of the elementary drilling, which Normal School students at present receive, might be dispensed with. Our institution for the training of teachers ought not to be a school for teaching English Grammar. In the same way, I would lighten the share of such subjects as the bare facts of Geography and History: not rejecting, of course, prelections on the proper method of teaching Geography and History. The English Master in the Normal School might thus be enabled to devote a portion of his time to lessons in the English language and literature of a superior cast—lessons which he would have a pride in giving, and on which the students would feel it a privilege to wait. Such lessons would be immensely useful even to those young men and women who might only desire to qualify themselves for becoming Common School teachers. In the department of physical science, it is plain, that if the views which I have expressed in regard to the way in which science should be taught in the High Schools be just, the object of the prelections in the Normal School should not be to cram the students with a mass of facts, but to develop in them a philosophic habit of mind, and to make them practically understand how scientific classes in schools ought to be conducted.

VIII. CONCLUSION.

In closing my Report, I desire to take this opportunity of expressing to the Grammar School Masters throughout the Province, my deep sense of the courtesy with which they have invariably received my official visits. An inspector is apt to be looked upon by teachers as their natural enemy. He has often to do what they must find to be unpleasant, and may regard as harsh. Yet I have never in a single instance experienced

any thing but the most gentlemanly treatment from the teachers to whom, during the last four years, I have stood in such delicate relations. As a class, the Grammar School Masters of Ontario are men of high intelligence and of earnest purpose, whose opinions on all questions connected with education are entitled to great respect, and whose labours in a difficult and most important field of duty should (if I may descend to so sublunary a matter) be rewarded with more liberal salaries than Grammar School Masters commonly receive.

I wish also to be allowed to express my very warm gratitude for the uniform kindness and consideration which, during my connection with the Department of Education, I have met with from you as Chief Superintendent. Your generous appreciation of my services has encouraged me in my efforts to discharge my duty to your satisfaction.

I have, &c.,

(Signed),

GEORGE PAXTON YOUNG.

TABLE K.—METEOROLOGICAL OBSERVATIONS, 1867.

1. Curves of Barometric Pressure and Temperature of the Air, showing the results of three daily observations at 7 a.m., 1 p.m., and 9 p.m., together with the daily maximum and minimum temperatures, indicated by the self-registering Thermometers, at Five Grammar School Stations, daily, throughout the year.*
 2. Curves of Monthly Mean Barometric Pressure, Temperature, Tension of Vapour, and Humidity at Ten Stations.
 3. Table of Direction and Velocity of Wind; amount of Cloudiness; Rain; Snow; and Auroras at Ten Stations.
 4. Abstract of Observers' General Remarks.
-

* A limited number of these Curves have been printed, but they can be furnished to those who take an interest in the subject.

N. B.—The instruments with which the observations are taken, were supplied by Messrs. Negretti & Zambra, and Casella, London, and the index errors have been ascertained by comparisons at the Kew Observatory in England, and at the Toronto Observatory. They are obtained by the stations, together with Registers and forms for Abstracts, from the Educational Depository, Toronto.

TABLE K.—METEOROLOGICAL OBSERVATIONS, 1867.—*Continued.*

REMARKS.

JANUARY.

BARRIE. On Sunday, 4th, at 9 p.m., barometer reached 29.499 in. Snow on 2nd, 4th, 6th, 7th, 10th, 16th, 17th, 20th, 21st, 22nd, 24th. Storms of wind on 19th, 25th, 26th, 27th. Barometer remarkably unsteady, but no such wind as might have been expected from the sudden changes in barometer.

BELLEVILLE.—Rain on 31st. Snow on 5th, 9th, 10th, 11th, 13th, 14th, 16th, 17th, 20th, 21st, 22nd, 26th.

CORNWALL. The observer having omitted observations in the first days of the month, the results cannot be published. He remarks that the river rose to a very great height on the nights of 16th and 23rd Jan. On 16th, at midnight, the (max.) height was 31 ft 3 in; fell to 25.5 next day; the minimum height for the month was 15; on 23rd, at midnight, the (max.) height was 32; fell to 25 next day; the average height for month, 23 ft; the average height for December, 1866, was 12 ft; in 1867, the maximum height was, for Jan., 26.9; Feb., 27; March, 27; and the minimum for Jan., 10 ft 10; Feb., 18.6; March, 17.

GODERICH. On 10th, heavy NW. wind from 5 p.m. to 7 p.m. 17th, storm of wind from 2 a.m. to 8 a.m., NW., velocity 8. 22nd and 24th, at 7 a.m., wet bulb showed no difference from dry bulb after three trials. 25th, storm of wind from 3 p.m. to 4 p.m., E., velocity 5. 31st, about 8 p.m., three several flashes of lightning in the south. Snow on 9th, 10th, 12th, 16th, 17th, 21st, 22nd, 24th, 25th, 26th, 27th, 29th.

HAMILTON.—First two weeks pleasant, with mild temperature. 13th, very rough in morning, wind E., velocity 4. 20th, great snow storm began at 5 p.m., continuing till 10 p.m. 21st, depth about 20 inches. 24th and 25th, clouds in H. NE. had a bluish appearance; on 26th and 27th, stormy and blustering, wind 27th, at night, rising to velocity 8. 31st January, thaw began; a little rain in evening; SW wind blew a steady strong gale all night, and in morning snow had almost disappeared. Snow on 5th, 8th, 9th, 10th, 14th, 15th, 16th, 17th, 20th, 21st, 22nd, 25th, 26th, 27th, 28th. Storms of wind on 2nd, 11th, 12th, 14th, 17th, 21st, 26th, 27th, 28th, 29th, 31st.

PEMBROKE.—Hail on 31st, at 10 p.m. Snow on 2nd, 4th, 5th, 16th, 21st, 22nd, 25th, 26th. Storms of wind on 7th, 18th, 19th. A few ravens occasionally seen. Real deer killed in large numbers. Health generally good the first part of month, but much pulmonary disease during the latter part. Sleighing not good till middle of month. Storms of snow and wind not so heavy as in the Eastern Provinces and New England States. Weather generally pleasant, and comparatively few severe days. One man frozen to death on Black River.

PETERBOROUGH.—Snow on 4th, 5th, 10th, 13th, 16th, 17th, 18th, 20th, 21st, 25th, 26th.

SIMCOE.—20th, snow began at 6 p.m., velocity of wind 6 to 8. 25th, heavy snow storm continued all day. 26th, wind increased at night; heavy drift, also 27th. 31st, rain began at 7 p.m. and continued during night. Snow on 5th, 10th, 13th, 16th, 21st, 25th, 26th, 27th. Fog on 18th. Storms of wind 20th and 25th.

STRATFORD.—Heavy fall of snow with high wind began 6 p.m., 20th, and ended 11 a.m., 21st. Storm of wind and snow on 25th, 26th, 27th and 28th, the most severe experienced for several years; the streets in the town and roads in the country almost impassable for several days. Snow also on 6th, 9th, 11th, 13th, 16th, 17th, 20th, 21st, 22nd. Fog on 25th. Storms of wind also on 13th and 20th. On 29th, at 4.30 p.m., parhelia visible; on same evening, from 7 to 8 p.m., a light seen in W., rising 30° above H., supposed to be zodiacal light. On 31st, rain.

WINDSOR.—Rain on 25th and 31st. Snow on 5th, 8th, 11th, 12th, 14th, 16th, 20th, 21st, 25th, 30th. Fogs on 15th, 30th. Storms of wind, 17th, 26th.

FEBRUARY.

BARRIE.—Hail on 2nd. Storms of wind on 1st, 16th, 22nd. Rain on 8th. Snow on 5th, 9th, 18th, 19th, 21st; 22nd, 23rd.

BELLEVILLE.—Rain on 12th, 13th, 14th, 16th, 23rd, 24th. Snow on 2nd, 3rd, 9th, 10th, 18th, 21st, 23rd. Weather unusually mild. Very good sleighing the greater part of the month. Frequent snow, but generally in small quantities; greatest fall on 2nd and 3rd, depth, 8 inches.

CORNWALL.—On 2nd, violent storm of snow and hail from east. 6.15 p.m. to 10.15 p.m.; heavy showers of hail and rain during the night. Hail and rain also on 3rd and 16th. Storms of wind, 2nd and 16th. Fogs, 8th and 9th. Rain on 3rd, 8th, 9th, 11th, 13th, 14th, 15th, 17th, 18th. Snow on 2nd, 5th, 9th, 18th, 21st, 22nd.

GODERICH.—On 4th, a rainbow extending 25° E to W. Halo round the sun till about noon. On 20th, at 4.30 p.m., Michigan coast, upwards of sixty miles off, plainly seen. Storm of wind on 9th. Fog, 13th. Rain, 13th, 25th. Snow, 2nd, 3rd (Sunday), 9th, 10th (Sunday).

HAMILTON.—Weather mild, but very changeable and cloudy. On 2nd, snow and hail in afternoon. On 23rd, rain after 9 p.m. Storms of wind on 2nd, 9th, 11th, 12th, 13th, 15th, 16th, 19th, 20th, 21st, 23rd. Fog on 18th. Rain on 2nd, 3rd, 13th, 15th, 16th, 23rd, 24th, 28th. Snow on 2nd, 3rd, 4th, 8th, 9th, 13th, 15th, 16th, 20th, 21st.

TABLE K.—METEOROLOGICAL OBSERVATIONS.—*Continued*,REMARKS.—*Continued*.

PEMBROKE.—On 7th, hail. 16th, hail and sleet. Shooting star on 10th, SW, altitude 40°, its trail 16° towards SE, continued about three seconds. Storms of wind on 1st, 9th, 22nd, 23rd. Fog on 9th. Rain on 1st, 9th, 13th. Snow on 1st, 2nd, 3rd, 5th, 8th, 12th, 18th, 23rd, 26th. A few ravens have remained during winter, and are seen occasionally. Snow birds numerous. A variety of owls. Month remarkable for sudden changes of temperature. An unusual amount of sickness and an apparent prevalence of pulmonary disease; a number of deaths; three deaths in a lumberer's shanty, supposed to be caused by diseased pork. Good sleighing, and about 400 lumberers' teams every day on the road.

PETERBOROUGH.—On 3rd (Sunday), Barometer 28.457. 8th, slight fog, with smoke in distinctly defined strata close to the ground. Sudden rise of barometer from 9 p.m. Saturday to 9 p.m. Sunday, 10th, range 1.036, being greatest in the month. Sudden wind shift from due S to N in 50 minutes, on 9th, from 9.10 a.m. till 10 a.m. 10th (Sunday), a colder day than that noted in abstract, mean temp. being 17.73. Fogs, 8th and 9th. Rain on 1st, 2nd, 3rd, 12th, 13th, 16th, 23rd, 24th, 25th. Snow on 2nd, 3rd, 4th, 5th, 9th, 10th, 18th, 22nd, 23rd, 26th. Although the wind was easterly 21 times, the motion of clouds was in no instance from NE, E, or SE.

SIMCOE.—On 8th, sudden change of wind from SW to NW; thaw during day. 9th, snow storm and drifting. 23rd, rapid thaw during day; rain began at 7 p.m.; afterwards froze very hard during night. 25th, clouds, upper current from E, under current from W, east registered. 27th, Shooting stars, NW. Rain on 2nd, 8th, 13th, 14th, 16th, 23rd. Snow on 4th, 9th, 20th, 21st.

STRATFORD.—Storm of wind and snow began on morning of 9th, and ended 10th (Sunday) about 2 p.m.; wind varied from NW to N, depth of snow 3 inches. Storms of wind also on 2nd, 3rd, 11th, 16th, 23rd. Fogs, 4th and 14th. Rain on 8th, 13th, 14th, 15th, 16th, 23rd, 24th, 28th. Snow on 2nd, 4th, 5th, 9th, 10th, 22nd. The barometer on Sunday, 3rd, fell to 27.897.

WINDSOR.—On 16th, wind storm increasing to velocity 7, at noon. 17th, double lunar halo. 18th, lunar halo. Storms of wind on 2nd and 20th. Fog, 13th. Rain on 2nd, 4th, 13th, 16th, 23rd, 28th. Snow on 3rd, 9th, 13th.

MARCH.

BARRIE.—On 1st, blew very heavily at night—heavy rain—fall of barometer .588 from previous night. 7th, bright aurora. 17th (Sunday), an unusually severe snow storm in afternoon, nearly over by 7 p.m., depth of fall, 10 inches. Storms of wind on 2nd at night, and 13th in afternoon. Rain on 1st and 6th. Snow on 2nd, 7th, 12th, 13th, 14th, 16th, 17th, 21st, 22nd.

BELLEVILLE.—Storm of wind on 2nd. Rain on 1st, 10th, 11th, 24th, 25th. Snow on 7th, 9th, 12th, 13th, 16th, 17th, 27th.

CORNWALL.—Hail and rain on 1st. Storm of wind on 18th; very clearly defined lunar halo on same evening. Fogs, 6th, 16th, 20th. Snow, 3rd, 4th, 7th, 9th, 11th and 12th, 16th and 17th. Rain, 10th and 24th.

GODERICH.—On 1st, three or four peals of thunder south at 4 p.m. 6th, crows seen. 14th, pigeons flying. 15th, lunar halo 9.30 p.m. 17th and 18th, flocks of ducks. 28th, solar halo 1.30 p.m. Snow on 2nd, 3rd (Sunday), 21st, 22nd, 24th.

HAMILTON.—On 4th, *colopha coccinella* (lady bird) first seen this spring. 9th, spider first observed weaving and descending. 26th, *fringilla melodia* (song sparrow) first seen on the mountain, their usual time of arrival being 13th March. 31st, Crows first seen and heard. 7th, Aurora observed at 7.30 p.m., double arch, lesser about 20° in length, 10° high, larger 120° long, 20° high, bright streamers moving from NW towards E, and rising higher as they proceeded, highest being 50° in altitude at 10 p.m.; at that hour there was but one arch, and the streamers were more detached than previously; "when the aurora is low it indicates calm weather, when high, stormy, according to the excellent observers and interpreters of signs, the voyageurs in the north west." (Vide Professor Hind's Expeditions, Vol. II. p. 5). 16th, Snow at 3.15 p.m., flakes fine, wind E 4; at 4.20 p.m. flakes large; at 5.30 p.m. flakes fine again, while temperature (25°) and velocity of wind continued about the same. 21st, at 10.10 a.m., began the greatest snow storm of the season, continuing 28 hours till 2 p.m. 22nd; depth, 18 inches, dense, moist, and packed. In the storm which began 20th January, the depth was 20 inches, but it was light and did not pack so much; the March storm broke down a number of houses; on 22nd fences and trees on the E and NE covered with snow. 27th, hail. 28th, at 9.30 p.m., an ordinary meteor in S fell towards SW. Storms of wind 1st, 2nd, 6th, 13th, 14th, 18th, 20th, 21st, 22nd, 27th, 29th, 30th. Fogs 1st, 2nd, 3rd. Rain 1st, 2nd, 10th, 24th. Snow 2nd, 3rd, 4th, 6th, 7th, 9th, 12th, 13th, 16th, 17th, 21st, 22nd, 25th, 27th.

PEMBROKE.—On evening of 1st, and during 2nd, stormy, wind velocity 5; lightning with rain on 1st. Rain also on 10th. Storms of wind 2nd, 11th, 13th, 14th, 18th, 25th, 28th, 29th. Snow on 2nd, 4th, 5th, 7th, 9th, 10th, 12th, 13th, 17th, 24th, 25th. Crows have returned in large numbers; some ravens remained during winter; and some blue jays; a few white or spruce partridge seen. Snow began going on 20th, but wheels not used till 31st. An unusual amount of sickness and a large number of sudden deaths; typhoid fever has taken away many children and adults; there has also been much pulmonary disease.

TABLE K.—METEOROLOGICAL OBSERVATIONS, 1867.—*Continued.*REMARKS.—*Continued.*

PETERBOROUGH.—On 1st, dim halo round sun; several flashes of lightning with thunder and rain at 8.28 p.m. 2nd, wind suddenly veered from SW to W at 8 a.m. and rose to velocity 6, till sunset, when it gradually subsided. 5th, two falling stars observed—one at E, the other at S, the latter flashed before disappearing. Motion of both from W to E. 7th, very fine auroral display—at 9 p.m. sky overcast but clouds breaking and auroral light occasionally perceptible; at 10.40 sky clear; the whole North (to height of about 46°) filled with long thin streamers perpendicular to H moving as if blown by a gusty wind; patches of bright light appeared here and there and disappeared gradually; the whole had disappeared by 11.30 p.m. 8th, Fog to E and SE on lake and river; heavy hoar frost on trees and other exposed objects. 9th, Crows first observed. 15th, atmosphere hazy and smoky. 19th, fog to eastward; smoke lying in low strata, also on 20th. 23rd, halo round sun, imperfect, only half circumference towards NW. The observer says on 26th, "on this and some of the following days occurred a phenomenon which, though a frequent occurrence, is little observed, viz.: whenever, after foul weather with easterly wind, the wind goes round, by the North, to the West, the weather never settles till the wind gets to East again, and goes round by South to West. Though wind westerly 28th, 29th and 30th (after change by N from E) still the air continued raw—wind gusty—with occasional symptoms that weather was not settled." threatenings of rain on 31st (Sunday). Rain on 1st, 10th (Sunday), 24th (Sunday), 25th. Snow on 4th, 7th, 12th, 13th, 14th, 16th, 17th, 18th, 24th (Sunday), 27th. Snow and rain could not be separately measured on 24th—entered as rain.

SIMCOE.—On 7th, at 7 a.m., clouds in general moving SW, but dense volume of black clouds rapidly moving in the opposite direction; at 9 p.m. first aurora seen this year, class II. (arch and streamers), it was the segment of a circle and embraced about 60 degrees of the horizon, middle part perhaps six degrees in height, and under the middle star of Ursa Minor; afterwards rays and brushes shot upward, the most considerable one pointing up towards the broad part of Ursa Major; the whole was of a somewhat pale, milky colour; at 10 o'clock it was much broken up and much more faint and indistinct. 8th, the aurora a lacteal suffusion in the North. 13th, faint auroral twilight, scarcely recognizable. 19th, large halo round moon, and very remarkable strati, moulded no doubt by the upper current. 20th, large lunar halo exactly similar to that of preceding night. Rain on 10th and 23rd. Snow on 3rd, 4th, 7th, 12th, 16th, 17th, 21st, 22nd, 24th and 28th. 30th, a clear silvery auroral suffusion in the north of considerable extent, which lasted from 9 till 12 p.m.

STRATFORD.—On 1st., at 6.55 p.m., lightning seen; rain from 5 to 10 p.m. 2nd, storm of wind NW. 5th, crows first seen. 10th, rain, depth 159l. 13th, evening windy. 15th, lunar halo. 16th, at 1 p.m., large solar halo; at 5.30 p.m. storm of snow and wind began; 17th, snow ended at 8.30 p.m., depth, 4 inches, wind lulled about 9 p.m. 19th, at 9 p.m., imperfect lunar halo. 20th, lunar halo. 21st, storm of wind and snow—snow ended at 11.30 p.m. of 22nd. Fogs, 1st and 10th. Snow on 2nd, 3rd, 4th, 6th, 7th, 12th, 16th, 17th, 21st, 22nd, 24th, 27th. Spring birds first seen on 31st. The thermometrical means for the month are all lower than the corresponding means for February.

WINDSOR.—On 1st, fog. 7th, meteor from Z to W; the auroral display on this night was of great beauty—the arch rising about 30 degrees above the horizon, streamers shooting to the zenith, dark clouds underneath; motion vertical and horizontal, with distinct prismatic colouring. 8th, the rossignol (gray bird) seen and heard for the first time. 15th, bright and large lunar halo. 19th, lunar halo at 8.30 p.m., which disappeared at 9 p.m.; strong haze on horizon on morning of 19th. Storms of wind 20th and 21st. Rain on 1st, 10th and 24th. Snow on 3rd, 6th, 7th, 11th, 16th, 21st, 22nd, 26th, 27th.

APRIL.

BARRIE.—On 3rd, hail. 27th, thunder. Rain on 1st, 4th, 15th, 16th, 29th. Snow on 4th, 5th, 8th, 22nd.

BELLEVILLE.—On 20th, thunder at about 1.15 p.m., lasted half an hour, with occasional flashes of lightning and some rain. Fog on 16th. Rain on 1st, 2nd, 4th, 5th, 8th, 10th, 15th, 20th, 22nd, 27th, 29th, 30th. Snow on 5th, 24th. A great number of showers this month. High winds only on 1st and 2nd.

GODERICH.—On 2nd violets appeared. 4th, small birds, and crows seen. 8th, ploughing commenced. 15th, frogs. 20th, thunder and rain. Fogs on 4th, 8th, 30th. Rain on 1st, 15th, 16th, 20th, 26th, 27th.

HAMILTON.—On 1st, robin red-breast first seen and heard; gales of wind. 2nd, black-birds first seen; frogs first heard; 3rd and 4th, surface wind and clouds moved all of both days in opposite directions. 4th, at 9 p.m., atmosphere saturated. 8th, flags appeared above ground. 9th, wild ducks seen flying towards Dundas marsh. 10, rain and hail in forenoon, and in afternoon rain and snow flakes of immense size, melting at once. 11th, clover appeared. 12th, bay clear of ice, same date as last year. 13th, buds of red maple visibly enlarged; an ordinary meteor at 9.30 p.m., seen in SE, falling towards S. 15th, buds of balm of Gilead and lilac considerably enlarged. 22nd, snow, rain and hail on same day. 23rd, cloud in form of an arc from W to NE, 20° high, in highest part 20° wide, the sky clearer below the cloud than above it, its appearance was rather odd. 27th, observed a light at 9.30 p.m. considerably brighter than the rest of the heavens, it seemed to proceed from WNW towards the constellation Gemini, with a width of some 15°, it extended to a height of about 65°,—could assign no cause for it. 28th, spear thistle seen peeping above ground. Hail on 5th, 22nd, 23rd. Storms of wind on 1st, 6th, 11th, 15th, 17th, 20th, 23rd, 25th, 26th, 27th, 29th. Fog, 16th, 24th, 29th. Rain on 1st, 4th, 8th, 10th, 15th, 19th, 22nd, 26th, 30th. Snow on 1st, 5th, 22nd, 24th. The observer reports that no thunder or lightning was perceived by him, but several flashes were seen by another on evening of 20th; and at Mount Pleasant, 30 miles west of the station, repeated claps of thunder were heard on morning of 19th.

TABLE K.—METEOROLOGICAL OBSERVATIONS, 1867.—*Continued.*REMARKS.—*Continued.*

PEMBROKE.—On 3rd, the first ground squirrel seen. 5th, an unusual storm of snow, the heaviest of the year, from 2 a.m. to 11 p.m., depth 15 inches, and 3 inches the previous day. 15th, robins first seen. 19th, wild ducks. Most of the spring birds returned during the month; a few gulls on the Ottawa river; crows in abundance. On night of 26th, a very sudden change of temperature. Storms of wind on 3rd, 11th, 18th, 23rd, 26th, 27th. Fogs on 15th, 16th, 30th. Snow on 1st, 2nd, 4th, 5th, 8th, 22nd, 23rd, 27th. Rain on 2nd, 8th, 15th, 20th, 27th, 29th, 30th. The last crossing on the ice was on 29th, unusually late; the ice was firm for teams until 20th. No growth yet except the buds of the elder and willow. Spring uncommonly late; weather changeable; very much sickness. Many deaths among children; some cases of typhoid and of "spotted" fever, fatal in a very short time.

PETERBOROUGH.—On 3rd, atmosphere hazy. 4th, robins first observed. 8th, at 10 a.m., wind vane indicated NW, two strata of clouds then visible: upper, nimbi rapid motion NE; lower, nimbi very low, rapid motion SW, the stratum from NE prevailed, and at 11 a.m. the lower one was not observable. 10th, atmosphere very hazy, swallows first observed. 11th, auroral light with slender streamers observed. 15th, very hazy and smoky—smoke resting on surface at 7 a.m. 15th, first frogs heard; murky fog and smoke very low at 7 a.m. 20th, at 10.34 a.m., heavy rain with thunder and several flashes of forked lightning; perfect rainbow at SE, at 4.30 p.m. 22nd, "Little Lake," near town, clear of ice. 25th, trees loaded with snow, at 7 a.m.; ice in back lakes beginning to break up. 27th, the large lakes free of ice. 30th, most of the small back lakes not yet open. 18th, wide halo round moon. 29th, halo round sun, imperfect towards SE. Snow on 5th, 22nd, 24th. Rain on 1st, 4th, 5th, 8th, 15th, 16th, 20th, 30th. Weather during month generally cold and inclement; only one or two genial days; inflammatory colds and pulmonary attacks very prevalent.

SIMCOE.—On 18th, peculiarly beautiful and large halo round moon observed, from 11 till 12 p.m. 20th, wind stormy all afternoon, velocity 7. 22nd, rain, snow, sleet and hail. 24th, snow, sleet and rain. 29th, at 9 p.m., and after, an intense lurid auroral twilight embracing the whole northern half of the heavens, while all the sky was covered with dense black clouds; there was also a rude arch, which seemed to be formed by black clouds; lightning also in the south, but no thunder. Rain on 1st, 4th, 5th, 8th, 16th, 15th, 16th, 19th, 20th, 23d, 25th, 27th, 30th. Snow on 22nd, 24th.

STRATFORD.—On 4th, thunder and lightning at 10.50 a.m. 9th, large lunar halo at 9 p.m. 13th, mill pond free from ice, swallows first seen, frogs first heard. 19th, hail at intervals between 6.30 and 7.30 a.m. 30th, at 7 a.m., complete saturation observed. Storms of wind on 5th and 26th. Fogs on 4th, 13th, 30th. Rain on 4th, 6th, 8th, 10th, 15th, 16th, 20th, 25th, 26th, 30th.

WINDSOR.—On 3rd, first snow drops in bloom; frogs first heard. 8th, crocuses in bloom and first swallows seen. 16th, dense fog. 23rd, hyacinths and tulips in bloom. 29th, strawberry in bloom. Storms of wind on 1st, 4th, 9th, 25th, 26th. Rain on 1st, 4th, 10th, 15th, 21st, 22nd, 24th, 26th, 30th. Slight snow, melting as it fell on 5th. Month variable as to weather, and vegetation generally backward.

MAY.

BARRIE.—On 1st ice left Kempenfeldt Bay—latest day for several years. 6th, hail storm at 5 p.m. from W. 25th, very heavy blow from SE between 10 and 12 a.m. 27th, remarkable aurora, very similar to that seen 17th April, 1866, and then fully recorded*. Frost on 2nd and 3rd. Rain on 6th, 9th, 13th, 14th, 15th, 16th, 20th, 21st, 22nd, 23rd, 24th, 25th, 29th, 30th. Vegetation this month very backward.

BELLEVILLE.—On 2nd, about 9.30 a.m., hail began and continued a few minutes; high winds this day W and NW, and at night severe cold, next morning half an inch of ice. 17th, hail with rain for some minutes, commencing at 1.15 p.m. 27th, between 9 and 10 p.m., luminous appearance in north and auroral segment discerned, although northern horizon obscured by clouds; at same time a brilliant arch of light completely spanned the heavens from E to W, apparently reaching the zenith in the centre. On 31st, about same time, a similar but fainter arch. 30th, distant thunder began 7.30 p.m., and at 8.30 p.m. rain, which soon ceased. Frost, 2nd, 3rd and 4th. Rain on 1st, 4th, 5th, 6th, 8th, 9th, 13th, 14th, 15th, 17th, 20th, 21st, 22nd, 23rd, 25th, 28th, 29th, 30th, 31st. An exceedingly wet and gloomy month. The following is a statement of rain in May at this station for ten years:—

May, 1858, 17 rainy days	5.056 inches.
do 1859, 7	do	2.989 do
do 1860, 11	do	3.289 do
do 1861, 12	do	3.760 do
do 1862, 5	do	1.837 do
do 1863, 7	do	1.891 do
do 1864, 11	do	4.782 do
do 1865, 6	do	2.500 do
do 1866, 9	do	2.432 do
do 1867, 19	do	5.285 do

CORNWALL.—Violent wind NW during night of 1st. Light shower of snow during morning of 2nd; at 1 p.m. wind from NW (velocity 1); at 2.30 p.m. a sudden storm of wind (5) from S, and quick gathering of nimbi; slight snow and very heavy rain lasted about half an hour; at 3 p.m. gentle rain, wind NW (2).

*Chief Superintendent's Report on Education for 1866, p. 112c.

TABLE K.—METEOROLOGICAL OBSERVATIONS, 1867.—*Continued.*REMARKS—*Continued.*

14th, thunder during morning. 30th, lightning about 10 p.m. Frost on 13th. Fogs 1st and 9th. Rain on 1st, 4th, 6th, 7th, 8th, 9th, 10th, 13th, 14th, 15th, 16th, 17th, 18th, 19th, 22nd, 23rd, 24th, 25th, 28th, 29th, 30th, 31st.

GODERICH.—On 2nd at 10 a.m., and 7th at 11.30 a.m., flurry of snow, melting as it fell. 14th, lunar halo at 8 p.m. 16th, solar halo. 20th, Michigan side clearly visible, vessels and harbours seen. Frost 2nd, 3rd, 10th, 13th. Fogs 7th, 14th, 23rd. Rain 4th, 5th (Sunday), 6th, 13th, 14th, 15th, 21st, 22nd, 23rd, 24th, 26th (Sunday), 27th, 28th. Season unusually backward and cold; the crops, nevertheless, look well; and to all appearance there will be an abundance of fruit.

HAMILTON.—Barometer fell gradually from 7 a.m. on 3rd, 30.102 to 7 a.m. on 9th, 29.187. 13th, first thunder storm of season; flashes very bright, rain in torrents, passed over city from W to E. 9th, at 9.30 p.m., an ordinary meteor in S, 15° high, fell towards W. 27th, an extraordinary display of aurora, began about 10 p.m. and continued till long after midnight; the whole north illumined with fitful flashes, radiations sometimes extending across the zenith. The following dates of blossoming were noted: soft maple on 3rd, burdock on 5th, elm on 6th, dandelion on 16th, weeping ash on 18th, cherries on 24th, pyrus japonicus and flowering currant on 24th, hard maple on 25th, plum trees on 27th, strawberries on 28th. Frost on 2nd, 3rd, 4th, 20th, 22nd, 27th. Storms of wind on 1st, 2nd, 4th, 8th, 9th, 14th, 20th, 21st, 22nd, 23rd, 24th, 25th, 28th. Rain on 1st, 4th, 5th, 6th, 13th, 14th, 15th, 17th, 19th, 20th, 21st, 22nd, 23rd, 24th, 27th, 28th, 29th, 30th. In temperature the average of the averages of the five weeks beginning Monday, 30th April, and ending Saturday, 2nd June, this year, is 48°57, while in corresponding weeks last year it was 50°88; the winter of 1866-7 was the milder. The month very cold and wet, wind unusually raw and chilly; deaths, chiefly from pulmonary disease, very numerous, the aged and middle-aged chiefly affected.

PEMBROKE.—Ice on the Ottawa broken up on 1st; first boat crossed 2nd. Ice floated 4th, 5th, 6th and 7th; on 8th, river was free and the steamer began running. On 11th, first raft passed. Leaves started on 21st; small trees green on 28th. Some wild flowers, but spring unusually late. Lightning with rain on 30th. Frost on 2nd, 3rd, 4th, 13th. Storms of wind 2nd, 4th, 8th, 9th, 10th, 25th. Fog on 6th. Snow on 2nd. Rain on 1st, 4th, 5th, 6th, 7th, 8th, 9th, 11th, 14th, 16th, 18th, 20th, 21st, 22nd, 23rd, 25th, 28th, 29th, 30th. Unusual number of sudden deaths in the vicinity of station, generally with a few hours' illness; supposed cause "spotted fever," and chiefly confined to children. Temperature changeable and atmosphere damp. Ground constantly wet and little growth.

PETERBOROUGH.—On 1st, faint auroral light. 2nd, faint auroral light with a few streamers; ice broken up on the large back lakes. 3rd, hard frost; thick ice on the bays and narrows of the lakes. Rain from 12.37 p.m., 13th, till 10.40 p.m., 15th. On 16th, parhelion observed on the end of a stratus over NWH at 6 p.m., atmosphere murky in vicinity of cloud—very bright—continued for 35 minutes, when faded gradually as sun declined. On 17th, several times during the day a nimbus appeared at about NNW and passed over the sky in a southerly direction; wind ranged generally during the day between W and NW, but these nimbi always appeared to carry with them a current nearly due N; as soon as they began to approach Z, the vane pointed N, until the cloud had passed over, when the vane resumed its original direction. 22nd and 23rd, a humming bird observed on both days, though raining. 27th, strong auroral light appeared over NH—very luminous at NE; at 9.30 p.m. a slender arc appeared, spanning the heavens from E to W, passing about 6° south of *r* Ursæ Majoris and terminating at each end about 11° above H; it did not change its position, but continued to quiver and flicker gently, and disappeared gradually in about 25 minutes. Month remarkable for cloudiness and frequent rains; very unlike same month in ordinary years. Oldest settler in vicinity does not recollect a May in Canada like it. Also remarkable for prevalence of severe attacks of the lungs and bronchicæ, also of catarrh and influenza. The leaves were only half out on the early forest trees on 31st, and the buds only bursting on the oaks and other late trees. Frost on 2nd, 3rd, 4th, 7th, 11th, 19th, 21st, 27th, 28th. Snow on 2nd. Rain on 1st, 4th, 5th, 6th, 8th, 9th, 13th, 14th, 15th, 20th, 21st, 22nd, 23rd, 24th, 25th, 28th, 29th, 30th.

SIMCOE.—On 3rd, about 9 p.m. very luminous falling star in S. 4th, magnificent solar halo from before 12 till nearly 1 p.m., blue and brown-red circles about 40° in diameter; heavy rain followed at 4 p.m. 8th, 7 a.m. cloud motion NE, also rapid SW, while vane was N; at 1 p.m. under clouds SW, upper NE, vane N. 13th, thunder and lightning; ordinary lunar halo. 14th, thunder and lightning, 9.30 till 11 a.m., and again with rain same day. 20th, at 1 p.m., upper current NE, under W, surface wind E. 21st, lightning, thunder and heavy rain from 3 till 5 p.m. 24th, full foliage now bursting out; willows and other early trees green and the rest following; peach, plum and other fruit trees in bloom, having been budding for the last seven weeks; grass and wheat luxuriant; the spring though tardy and bleak is upon the whole propitious. 27th, aurora at least 10° in depth, and stretched round to E; it looked like a bank of dense white clouds, but stars were visible through it; two beams pointing up from horizon. 28th, lightning. A falling star at 9 p.m. from near Z on 27th and 28th at 9 p.m. On 30th, at 5 p.m., magnificent double rainbow in E. Frost on 2nd, 3rd, 4th, 13th. Rain on 1st, 4th, 13th, 14th, 17th, 20th, 21st, 22nd, 23rd, 25th, 28th, 30th.

STRATFORD.—9th, large lunar halo. 12th, arc of colored solar halo. 18th, at 10.30 p.m. large lunar halo. 24th, thunder, lightning, hail and rain from 1.25 till 2.30 p.m.; hail from 1.35 to 1.38 p.m. very heavy. 28th, currant bushes in leaf and flower. 29th, wild plum trees in bloom. Frost on 2nd, 3rd, 4th, 11th, 12th, 18th, 24th, 27th. Storms of wind, 2nd, 21st, 25th. Fogs 13th, 29th. Snow, 2nd, 17th. Rain on 1st, 4th, 5th, 6th, 13th, 14th, 15th, 17th, 19th, 21st, 22nd, 23rd, 24th, 25th, 28th.

WINDSOR.—On 15th, violets in bloom; rainbow in afternoon. Lightning, thunder and rain 12th and 13th. Heavy rain storm from midnight of 20th to 7 a.m. 23rd, raining continuously for over fifty hours. 31st, tulips and lilacs. Frost on 2nd, 3rd, 8th. Storms of wind 21st and 25th. Fog 16th. Rain on 4th, 9th, 13th, 14th, 15th, 16th, 20th, 21st, 22nd, 23rd, 25th, 27th, 28th. Month unusually rainy; season exceedingly backward in consequence, and farming operations much impeded.

TABLE K.—METEOROLOGICAL OBSERVATIONS, 1867.—*Continued.*REMARKS.—*Continued.*

ST. JOHN, NEW BRUNSWICK.*—The following is extracted from a report kindly sent by an observer at this point: For the month of May the corrected mean readings of *Barometer* were at 8 a.m. 29.885, at 2 p.m. 29.870, at 10 p.m. 29.885, mean 29.881. Highest, 30.484 on 4th; lowest, 29.531 on 13th; range .953. *Temperature*: mean at 6 a.m. 43°13, 10 a.m. 50°65, 2 p.m. 52°22, 6 p.m. 49°16, 10 p.m. 43°87. Highest, 68° on 28th, lowest, 31° on 4th. Greatest daily range 21°. Warmest day, 28th, mean 58°7; coldest, 4th, mean 37°3. *Tension of vapour*: mean at 8 a.m. .258, 2 p.m. .290, 10 p.m. .256, mean .268. *Humidity*: mean at 8 a.m. 78, 2 p.m. 74, 10 p.m. 84, mean 78.7. *Wind*: E to SW 23 days at 2 p.m. *Rain*: 14 days and 9 nights, total fall, .5760 inches.

JUNE.

BARRIE.—On 6th, squall from NW at 7 p.m. 8th, lightning at evening towards N, very frequent and bright. 11th, lightning with thunder and rain. 14th, at 1.15 p.m., wind SE; changed suddenly to NW; violent squall with thunder and lightning and heavy rain; very heavy rain from 4.30 to 6 p.m., with thunder storm—weather closely resembling tropical rainy season. 26th, heavy fall of rain, 6 to 6.30 p.m., lightning to the south, and thunder. Fogs on 20th, 21st. Rain on 12th, 14th, 15th, 20th, 26th, 27th. 30th, lightning; aurora IV faint, 9 p.m.

BELLEVILLE.—Storms of wind on 3rd, 6th, 8th, 15th, 18th, 19th, 25th, 26th. Rain on 2nd, 12th, 16th, 18th, 20th, 26th, very dry and warm. Fall wheat looking exceedingly well, but progress of spring crops very slow and unsatisfactory.

CORNWALL.—Lightning on 6th. Thunder on 15th and 18th. Lightning with rain on 29th. Fogs on 21st and 22nd. Rain on 2nd, 3rd, 4th, 7th, 9th, 12th, 20th, 26th, 27th, 28th, 29th.

GODERICH.—On 2nd at 7 p.m., two rainbows extending about 30° in south. 3rd, rainbow. Lightning on 6th and 14th. Lightning with thunder on 13th, 22nd (N and NE), 25th. Fog on 17th. Rain on 2nd, 11th, 12th, 17th.

HAMILTON.—On 3rd, horse-chestnut in bloom. 4th, apple-tree in bloom; an ordinary meteor in W, 25° high, fell toward N at 9.30 p.m. 5th, lilacs and snowballs (*riburnum*) in bloom; an ordinary meteor in W, 45° high, fell towards S, 10.30 p.m.; a meteor in SE, 60° high, fell towards SSW, left a trail 10° long, distinctly visible for a few seconds, rather remarkable. 6th, white clover in bloom; auroral light in N and NNW between 10 and 11 p.m. 9th, sorrel, criterion honeysuckle, red clover, in bloom. 13th, early peas in bloom. 22nd, auroral arch 10° high from NW to NE. Lightning on 6th, 7th, 14th, 22nd, 25th. Storms of wind on 3rd, 4th, 6th, 8th, 12th, 14th, 15th, 18th, 21st, 28th, 29th. Rain on 2nd, 4th, 11th, 12th, 15th, 16th, 17th, 18th, 26th. Very dry; cereals suffered greatly.

PEMBROKE.—Lightning with rain on 6th and 12th. Rainbow on 15th. Lightning, thunder and rain on 15th, 19th, 27th. Strawberries on 22nd. Storms of wind 4th, 18th, 25th. Fogs on 15th, 21st, dense. Rain on 2nd, 3rd, 6th, 7th, 12th, 14th, 15th, 18th, 19th very heavy storm with rain, 22nd, 27th. Vegetation at first very late, but showers abundant and vegetation afterward very rapid; crops good; grass unusually heavy. Health generally good, except among children.

PETERBOROUGH.—On 6th, a rocket-like meteor observed crossing southern part of zenith from SE to W, leaving a trail which lasted about five seconds. Lightning on 6th in W horizon from 9.27 p.m. till 11.15 p.m. 12th, lightning. 25th, lightning in SSW horizon from 9.47 p.m. till 10.50 p.m. 27th, lightning. Lightning (forked) with thunder at 7.12 p.m. on 14th. Lightning and thunder on 18th. On 22nd and 24th faint auroral light with a few slender streamers—the streamers each night disappearing in about 15 minutes. Rain on 2nd, 3rd, 12th, 14th, 15th, 18th, 20th, 26th.

STRATFORD.—Abstract of entries in regard to the storms of June 2nd:—1st storm—at 2.40 p.m. thunder, sky 0 with cu piled in masses and nim in N and S; at 3.15 p.m. rain; wind N, velocity 7; thunder loud and lightning vivid; from 3.20 p.m. to 3.42 p.m. hail very heavy and stones large; at 3.45 p.m. lightning vivid; wind SE, velocity 4; at 4 p.m. lightning and thunder ceased, wind S 2; at 4.40 p.m. rain ceased, depth .8911 in; thunder in NW, wind SW, velocity 3; 2nd storm—at 5.25 p.m. distant thunder in NW, sky clear; nimbi strati and cumuli form, wind NE, 3; at 6 p.m. thunder in continuous peals; this storm passed off to the eastward with a good deal of thunder and lightning; rain from 6.40 to 7.20 p.m. 6th, lightning in NH at 8.30 p.m. 7th, a very severe storm of thunder, lightning, hail, rain and wind from 2.40 to 4.40 p.m.; very brilliant and perfect primary and secondary rainbows at 7.25 p.m. 12th, lightning, thunder and rain. 13th, lightning at 8.30 p.m.; imperfect lunar halo at 9 p.m. 14th, thunder and lightning at 1.30, 5.30 and 9 p.m. with rain. 17th, thunder, lightning and rain from 7 to 10.30 p.m. Thunder and lightning 25th and 27th. Fogs 1st, 13th, 26th. Lightning, 30th. Rain on 2nd, 3rd, 7th, 11th, 12th, 17th, 26th, 27th.

WINDSOR.—On 6th, heavy hail storm, lasting an hour and a half and covering the ground with hail stones, some of which measured two inches in circumference; wind exceedingly variable during the storm, shifting from S to N, and from N to NE, to SE, to S and to SW; barometer fell slightly during the progress of the storm. Rainbows on 6th and 12th, though on the latter of these days no rain fell here. Lightning and thunder with rain, 17th. Lightning with thunder on 12th, 13th, 25th. Rain on 1st, 2nd, 6th, 11th, 17th, 24th. Barometer remarkably steady during the month, and no large ranges. Thermometer shows an unusually high temperature during the month.

None of the observers report frost during this June.

*Some reports from St. John are introduced, in order that there may be an opportunity of comparing the results at a station on the seaboard with those at our inland stations.

TABLE K.—METEOROLOGICAL OBSERVATIONS, 1867.—*Continued.*REMARKS.—*Continued.*

ST. JOHN, NEW BRUNSWICK.—For the month of June the corrected mean readings of *Barometer* were at 8 a.m. 30.036, at 2 p.m. 30.016, at 10 p.m. 30.013, means 30.022. Highest, 30.242 on 11th, lowest, 29.564 on 4th and 30th; range .678. *Temperature*: mean at 6 a.m. 50°.97, 10 a.m. 58°.61, 2 p.m. 62°.17, 6 p.m. 59°.37, 10 p.m. 55°.33. Highest, 72° on 17th and 27th, lowest 43° on 10th; range 29°. Greatest daily range 12°, on 9th and 27th. Least daily range 1°. Warmest day, 17th, mean 62°.3; coldest, 10th, mean 50°. *Tension of vapour*, mean at 8 a.m. .344, 2 p.m. .383, 10 p.m. .356; mean .356. *Humidity*, mean at 8 a.m. 85, 2 p.m. 78, 10 p.m. 88; mean 79. *Wind*, E to SW 26 days, and N to NE 4 days. *Rain*, 5 days and 7 nights, total fall 3.445.

JULY.

BARRIE.—On 4th, violent thunder with lightning storm from SW at 4.30 a.m., heavy rain and high wind. 5th, beautiful rose-colored aurora, very bright, intermittent, at 9 p.m. 10th, lightning. 11th, heavy rain, thunder and lightning storm between 5 and 6 a.m. 15th, heavy rain, lightning and thunder storm from SW at 5 p.m. Rain on 4th, 6th, 9th, 11th, 15th, 29th, 30th. Barometer very steady during the month.

BELLEVILLE.—On 4th, rained from 6.30 a.m. to 8.15 a.m., during which time a heavy thunder storm occurred with occasional very vivid lightning; storm proceeded from NW to SE; very little wind on surface, and scarcely any change observed in barometer or thermometer. 6th, thunder, lightning and rain of shorter duration. 7th, between 1 and 2 p.m., rain and lightning with distant thunder. 11th, rain, with intermissions, from 4 a.m. to about 2 p.m.: distant thunder between 6 and 7 a.m. and occasional lightning. 21st, occasional distant thunder from 1 to 2 p.m. and 8 to 9 p.m., with lightning on both occasions, but little rain. 22nd, occasional distant thunder with lightning to NW from 2 to 5 p.m., with a few drops of rain. Rain on 4th, 6th, 7th, 9th, 11th, 15th, 16th, 19th, 21st, 22nd. No severe storms except on 4th, weather steady and uniform.

CORNWALL.—On 3rd, lightning. 6th, thunder. 11th, lightning, thunder and rain. 24th, thunder. Rain on 1st, 4th, 6th very heavy, 8th, 11th, 16th, 20th, 25th, 27th, 28th, 29th. Besides three observations of third class auroras, the observer reports no less than eighteen of fourth class, viz: on 1st, 3rd, 4th, 8th, 11th, 12th, 15th, 16th, 17th, 18th, 19th, 20th, 22nd, 23rd, 24th, 26th, 30th, 31st.

GODERICH.—On 15th, lightning and thunder with rain, which began at 11.30 a.m. and ended at 1 p.m.; at 1 p.m. dried dry and wet bulb thermometers three times with same results, viz: dry 68°.5, wet 68°.2, and at 1 p.m. suddenly fell, dry from 68°.5 to 65°, wet from 68°.2 to 65°. 20th, wind northerly with an undercurrent from E. 23rd, thunder. 25th, wet bulb tried twice, with same result, viz: dry 68°, wet 68°. Fogs on 15th, 20th, 26th. Rain on 4th, 5th, 15th, 16th, 24th, 26th, 29th, 31st.

HAMILTON.—Tulip tree (*Liriodendron tulipifera*) in bloom. 5th, lightning and thunder. 12th, pumpkins in bloom. 15th, lightning, thunder and rain. 16th, Indian corn in tassel. 18th, fall wheat harvested. 22nd, thunder. 29th, auroral light 15° along horizon 7° or 8° high. Storms of wind on 3rd, 5th, 6th, 10th, 11th, 13th, 19th, 22nd, 24th, 25th, 27th, 29th, 31st. Rain on 5th, 8th, 9th, 11th, 15th, 25th, 28th. Month very dry, amount of rain 3.4089 inches less than in July, 1866, and duration of rain 38h. 7 min. less.

PEMBROKE.—Storms of wind on 4th, 5th, 6th, 8th, 12th, 16th, 17th, 18th, 27th, 29th, 30th. Rain on 4th, 11th, 23rd. Vegetation has suffered for want of rain, but crop fair. English grain light, and below average yield.

PETERBOROUGH.—On 4th and 11th, lightning, thunder and rain. 15th, thunder and rain. 21st (Sunday), a violent thunder storm in the evening with forked lightning, burst suddenly at 4.55 p.m., wind in heavy sweeping gusts from NNW, force 8; storm quite over at 5.50 p.m.; a great many barns and outbuildings in the country unroofed, and a few reported blown down. 29th, arch of auroral light across NH, bright, with a few faint streamers, at 10 p.m.; three falling stars observed. Rain on 4th, 6th, 7th, 9th, 11th, 15th, 21st, 22nd, 25th, 28th.

SIMCOE.—On 10th, halo round sun at 1.30 p.m. Lightning, thunder and rain on 1st, 5th, 11th, 15th, 22nd. Rain also on 4th, 8th, 25th.

STRATFORD.—On 3rd, lightning. 4th, thunder and rain. 8th, lightning and thunder. 11th, thunder at daylight. 13th, hoar-frost on sidewalks. 15th, thunder and rain. 28th, lightning, thunder and rain, and storm of wind. Fogs 5th and 23rd. Rain on 4th, 6th, 8th, 9th, 10th, 15th, 24th, 25th, 28th, 31st.

WINDSOR.—On 4th, heavy rain for one hour with lightning and thunder. 10th, lightning; storm of wind. 11th, thunder. 22nd, 24th, 25th, 31st, lightning, thunder and rain. Rain also on 15th (slight), and 23rd.

ST. JOHN, NEW BRUNSWICK.—N Lat., 45°.17. W Long., 66°.4. Height above sea, 135 feet. The following is extracted from a report sent by an observer at this point:—For the month of July, the corrected mean readings of *Barometer* were at 8 a.m. 29.930, at 2 p.m. 29.877, at 10 p.m. 29.922, means 29.910. Highest, 30.292 on 31st; lowest, 29.916. Range, .676. *Temperature*: mean at 6 a.m. 56.50, 10 a.m. 63.23, 2 p.m. 66.35, 6 p.m. 63.70, 10 p.m. 58.07. Highest, 78° on 1st; lowest, 54° on 14th. Range, 24. Greatest daily range, 22°. Warmest day, 1st, mean 66°.3; coldest, 20th, mean 56°. *Tension of vapour*, mean, at 8 a.m. .430, 2 p.m. .454, 10 p.m. .425, mean .436. *Humidity*, mean, at 8 a.m. 83, 2 p.m. 73, 10 p.m. 87, mean, 81. *Wind*, southerly 19 days, SW being prevalent. *Rain*, 9 days and 10 nights, total fall 3.105 inches.

TABLE K.—METEOROLOGICAL OBSERVATIONS, 1867.—*Continued.*REMARKS.—*Continued.*

AUGUST.

BARRIE.—On 5th, auroral cloud NW to SE. 21st, aurora, double arch. Thunder on 6th. Lightning with thunder on 8th, 9th, 17th, 19th. Lightning, thunder and rain on 24th. Fog on 14th. Rain on 1st, 9th, 12th, 23rd, 24th, 31st.

BELLEVILLE.—On 9th, heavy thunder storm, began about 11 p.m. and lasted, with intermissions, till 5 a.m., proceeded from N to S, thunder occasionally very loud, and lightning unusually frequent and vivid, rain most of the time of storm; barometer and thermometer but slightly affected. 18th, two thunder storms, viz., from 1 to 3 a.m. and from 7.30 to 12 p.m.; on both occasions the thunder was chiefly distant, but sometimes very loud; flashes incessant, the sky almost continuously illuminated; from 1 to 3 a.m. but a few drops of rain fell at the station, but from 10.30 p.m. to 12 rain pretty constant; barometer and thermometer but slightly affected; some hail with the rain at night, and a few miles to the NE, and in Tyendinaga, the hail stones were of great size, the ripe grain being threshed out in the field, houses unroofed and cattle killed; great quantities of hail also fell in Seymour, Rawdon, &c., and the storm is said to have been very severe at Napanee; the observer reports the storm to have proceeded from NW to SE, and to have taken a narrow range of from one to two miles in breadth; hundreds of dead birds, frogs, &c., found next day in some fields in Rawdon; the most destructive storm for many years in this neighborhood. 27th, distant thunder in morning. 28th, rain from 3.30 to 5 a.m., with much loud thunder and vivid lightning; again from 2 to 3 p.m. heavy rain with distant thunder. Rain also on 1st, 2nd, 13th, 29th, 31st. Spring crops inferior in consequence of want of rain in June, July and August.

CORNWALL.—On 9th, rainbow at 2.30 p.m. 10th, at 1 p.m., surface current NW, velocity 3, clouds moving to SE rapid, and to N slow. Lightning, thunder and rain about midnight of 18th. On 28th, lightning. 30th, hail. Storms of wind on 19th and 31st. Frost in surrounding country, but not in town, on 31st. Rain on 1st, 2nd, 3rd, 9th, 13th, 16th, 17th, 19th, 24th, 28th, 29th, 30th, 31st. Aurora very brilliant on 6th, 21st, 26th, 30th.

GODERICH.—On 8th, lightning. 9th, thunder. 13th and 21st, a dark segment from NE to NW, bordered with an arch of light, no streamers. 17th, about 8 p.m., sudden squall; wind WSW, velocity 7, with continuous sheet lightning in H, N, NW, NE. 18th, (Sunday) at 4 p.m., squall, wind 5, with heavy rain and thunder. 28th, at 1 p.m., counter currents of air, N and S. 29th, thunder. Storms of wind 23rd and 28th. Fog on 22nd. Rain on 6th, 9th, 13th, 18th, 23rd, 27th, 28th, 29th, 30th, 31st.

HAMILTON.—On 1st, 2nd and 3rd, lightning with thunder and rain. 6th, lightning with thunder. 17th and 26th, lightning. 27th, thunder. 29th, rainbow at 6.30 p.m., Storms of wind on 1st, 12th, 13th, 15th, 16th, 17th, 19th, 24th, 27th, 31st. Rain on 1st, 2nd, 5th, 6th, 8th, 23rd, 28th, 29th, 31st. Month very dry, not a quarter as much rain as in August, 1866. Grass and trees suffered much.

PEMBROKE.—On 18th and 28th, lightning, thunder, hail and rain. Rainbows on 18th and 30th. Shooting star on 30th, NE, altitude 30°. Storms of wind on 2nd, 10th, 18th, 24th, 30th. Fogs on 7th, 9th, 12th, 27th. Rain on 2nd, 9th, 12th, 13th, 18th, 23rd, 28th, 29th, 30th, 31st.

PETERBOROUGH.—On 1st, silent lightning at West horizon. 6th, lightning at SEH in evening. 7th, falling star observed to descend perpendicularly from SW part of Z, flashing three times. 8th, thunder. 9th, thunder, lightning and rain in evening. 10th, same at 3 a.m. 17th, heavy thunder cloud along WH at 9 p.m., with zigzag lightning occasionally flashing from it; cloud passed to northward. 18th, two thunder storms; one at 12.15 a.m., accompanied by a slight fall of hail in the town—the other at 8.5 p.m.; during the latter shower no hail fell near the town, but a very heavy fall of unusually large hailstones passed westerly, along a strip of country about two miles in width, the southern limit thereof being about three miles north of the town; a reliable farmer in Douro represented some of the hailstones as being 1½ inches in diameter; all the windows on the western aspect more or less shattered, and all outstanding crops within the influence of the fall demolished; turnips, squashes, apples, &c., were battered and broken. 21st, bright auroral light; fog. 30th, hoar frost in the country reported. 31st, first hoar frost observed; heavy fog. Falling stars observed 28th and 29th. Rain on 1st, 2nd, 5th, 9th, 10th, 13th, 18th, 23rd, 27th, 28th, 29th, 31st.

STRATFORD.—On 1st, lightning, thunder and rain. 6th, thunder. 7th, lightning with thunder. 8th, thunder with rain; rainbow at 4 p.m. 9th, lightning with thunder. 17th, thunder in NW—E from 8 to 10 p.m., with very vivid and frequent lightning. 18th, storm of wind. 23rd, storm of lightning, thunder, hail and rain from 6.30 to 7.30 p.m. Fogs on 3rd, 6th, 7th, 8th, 9th, 14th, 20th, 21st, 22nd, 23rd, 26th, 27th. Frost on 31st. Rain on 1st, 7th, 8th, 13th, 19th, 23rd, 27th, 28th, 29th, 31st.

ST. JOHN, NEW BRUNSWICK.—N. Lat. 45°.17. W. Long. 66°.4. Height above sea, 135 feet. The following is extracted from a report sent by an observer at this point:—For the month of August, the corrected mean readings of *Barometer*, were, at 8 a.m., 29.990, at 2 p.m., 29.981, at 10 p.m., 29.985, means 29.985. Highest, 30.342 on 26th; lowest, 29.695 on 18th. Range .647. *Temperature*: mean at 6 a.m. 58°.10, 10 a.m. 64°.10, 2 p.m. 65°.67, 6 p.m. 61°.80, 10 p.m. 60°.3. Highest, 75° on 21st; lowest, 50° on 1st. Range 25°. Greatest daily range, 20° on 1st. Warmest day, 16th, mean 67°; coldest, 31st, mean 56°. *Tension of Vapour*: mean, at 8 a.m. .482, 2 p.m. .505, 10 p.m. .472, mean .486. *Humidity*: mean at 8 a.m. 88, 2 p.m. 81, 10 p.m. 91, mean 87. *Wind*: E to S W 28 days, and W to NE 3 days; estimated force for 8 a.m. 1.0, 2 p.m. 1.4, 10 p.m. 0.8. *Rain*: 7 days and 8 nights, total fall 6.845. The month was warmer, wetter and fogger than any corresponding one for some years past. August had a very unusual number of foggy days and nights; but yet its mean clouding did not exceed the average, though slightly more than in 1866. At 2 p.m. 9 days were clear, and 15 wholly clouded, and at 10 p.m. 7 nights were clear and 19 wholly clouded. For the same hours 7 days and 12 nights were foggy; against 1 day and 3 nights last year and an average of 4.6 and 7.4. About midnight on the 2nd St. John was visited by a short but sudden and severe gale

TABLE K.—METEOROLOGICAL OBSERVATIONS, 1867.—*Continued.*REMARKS.—*Continued.*

from the S and SW, accompanied with very heavy rain. This storm appeared to come from the Atlantic, and was felt in 11 counties of this and the adjoining Provinces of Prince Edward Island and Nova Scotia, and did more or less damage in them all. In some places the loss of property was said to be unprecedentedly great, but in this neighbourhood it was confined to the blowing down of a few trees and fences only.

SEPTEMBER.

BARRIE.—Fogs on 27th and 28th. Slight frost on 30th. Rain on 13th, 20th, 21st. No electrical disturbance during the month.

BELLEVILLE.—On 6th, from 1.15 to 2 p.m., lightning, thunder and rain. Heavy dews with cloudless nights on 2nd, 4th, 5th, 6th, 7th. On 13th, sky cloudless, eclipse of the moon seen to advantage. 18th, a few peals of thunder with occasional lightning began about 4 p.m.; rain from 8.30 to 11 p.m. 20th, about 7.30 p.m., auroral segment and streamers; occasional very heavy dews this week. 25th, from 4.30 to 7 a.m. lightning, with thunder and rain; about 8 p.m., auroral segment. 26th, at 7.30 p.m. auroral segment. Dense fog on mornings of 27th and 28th. 29th, thunder and rain. Frost on 24th. Rain on 1st, 3rd, 4th, 6th, 9th, 10th, 13th, 18th, 20th, 25th, 29th. Month much drier than September, 1866; the rains of May, followed by long drought, occasioned a less than average crop, except in fall wheat and hay, in the townships nearest to Belleville. In the back townships, more rain, with better results.

CORNWALL.—On 3rd, thunder and rain. 9th, lightning, thunder and rain; 21st, a complete and perfectly defined auroral band from NW to SE, visible from about 9 to 12 p.m. Frost on 14th, 15th, 24th. Rain on 1st, 3rd, 4th, 6th, 9th, 12th, 13th, 18th, 20th, 22nd, 25th, 29th.

GODERICH.—On 3rd, thunder and rain. 5th, lightning. 13th, thunder and rain; eclipse of the moon—at 7 p.m., middle of eclipse; 8.39 last contact with shadow; 10.50, last contact with penumbra. 16th, at 5 a.m., two rainbows, NW—SE; very hot. 17th, lightning;—oppressively hot, dampness on the walls. 19th, fog. Rain on 3rd, 6th, 9th, 13th, 16th, 18th.

HAMILTON.—On 5th, lightning. 6th, thunder. 13th, eclipse of the moon. On same evening at 7.30, auroral arch about 40° long, stars visible below the arch, a few streamers, a peculiar cloud in NNE, 20° long, 5° wide, and 10° high, the streamers being behind it; at 7.40 p.m., streamers contracting; a hazy brightness in NW to height of 45°; auroral clouds WNW as high as 60°; streamers almost gone at 7.45. 14th, at 6.55 p.m., auroral arch from W to E horizon; highest point 2° or 3° N of Z, 29° in width, uniform throughout; at 7 p.m. the arch reached Z; an appearance of streamers in E at 40° elevation; part of a smaller arch appeared in E at same time; at 7.12 two other arches appeared in N, one 15° high, the other 35°, these seemed stationary, but at 7.25 the lower disappeared, and afterward the higher. 15th, first change of foliage of hard maple. 28th, leaves of the pollonia crisped with the frost. Frost 24th, 26th, 27th. Storms of wind on 2nd, 3rd, 9th, 12th, 13th, 14th, 18th, 20th, 23rd. Rain on 3rd, 5th, 9th, 11th, 16th, 18th, 20th.

PEMBROKE.—On 6th, heavy thunder, lightning and rain storm, wind 6. 13th, shooting star in N, altitude 30°; eclipse of moon; sky clear; beautiful aurora. 20th, two shooting stars. 21st, two shooting stars; auroral arch 1° in width at Z, from NW to SE. Frost on 2nd, 11th, 16th, 23rd, 30th. Storms of wind, 6th, 10th, 25th, 27th. Fogs, 2nd, 27th. Rain, 1st, 3rd, 6th, 9th, 13th, 16th, 18th, 20th, 25th, 29th.

PETERBOROUGH.—On 2nd and 3rd, silent lightning in the evening. 7th, a few light auroral streamers. 6th, lightning, thunder and rain. 7th, at 7 a.m. and 1 p.m., three separate currents of air simultaneously indicated by the clouds. 17th, lightning; thunder. 18th, lightning, thunder and rain between 1 and 3.30 p.m. 20th, thunder. 25th, lightning, thunder and rain. 29th, thunder and rain. Frost on 2nd, 11th, 14th, 15th, 24th, 27th, 28th. Fogs on 2nd, 11th, 17th, 24th, 28th. Rain on 1st, 3rd, 6th, 9th, 13th, 18th, 20th, 22nd, 25th, 29th. Cloudiness unusually small; weather favourable for farming operations.

SIMCOE.—On 3rd, lightning, thunder and rain. 6th, lightning and thunder. 13th, thunder; lunar eclipse. 14th, at 7.30 p.m., a singular appearance of long streamer-like clouds, radiated from a point near the moon in various directions, chiefly N and W. 16th, lightning and rain; nearly $\frac{1}{2}$ inches of rain in six hours. 21st, aurora very brilliant at times through the night with streamers extending 20° or 30° degrees from arc. 25th, very beautiful aurora, the most brilliant seen at this station for many months; two splendid arcs from E to NW, the crest of the upper arc some 25° or 30° above the horizon; space between the arcs dark purple, and segment of sky below the lower arc almost black occasionally; streamers darted up from the horizon to the concave of the lower arc, while smaller streamers were seen to radiate from the upper arc towards the pole; the light was a bright yellow. 27th, fog in morning at 6. Rain on 2nd, 13th, 16th, 23rd.

STRATFORD.—On 13th, eclipse of the moon visible; thunder from 6.30 to 7.30 a.m. 14th, ice on sidewalks. 30th, vegetables injured by frost. Frost on 2nd, 11th, 14th, 27th, 30th. Fogs on 3rd, 4th, 5th, 6th, 27th. Rain on 3rd, 9th, 13th, 16th, 18th, 20th.

WINDSOR.—On the 6th and 15th, lightning, thunder and rain. 16th, lightning and thunder. 22nd, three meteors from Z to NH. 29th, storm of wind. Fogs, on 4th, 24th, 27th, 28th. Rain on 3rd, 6th, 9th, 13th, 15th, 18th.

OCTOBER.

BARRIE.—On 17th, violent squall from NW from 5.30 to 6 p.m. 29th, aurora very bright. Fog on 4th, 23rd, 24th, 25th. Rain on 5th, 9th, 10th, 11th, 22nd, 23th.

TABLE K.—METEOROLOGICAL OBSERVATIONS, 1867.—*Continued.*REMARKS.—*Continued.*

BELLEVILLE.—On 2nd, thunder and lightning with rain from 11.30 a.m. to noon; from 7.30 to 9 p.m. brilliant aurora—first the arch appeared, then streamers shot up, occasionally dancing and waving with a tremulous motion. 5th, lightning and heavier thunder with rain from 3 to 5 a.m. 4th, at 9.30 p.m., heavy rain began and continued till about 3 p.m. on 5th, measuring 2,091 inches. During the week ending on 5th, considerable fluctuation of barometer observed. 10th, between 12 and 1 a.m. some loud thunder and vivid lightning with rain. 18th and 19th, dense fog in mornings. 20th, from 1 to 3 a.m. thunder and lightning; the lightning very vivid for a short time; on same day in evening, frequent flashes without thunder. 28th, dense fog in morning. 29th, brightness at north horizon resembling dawn, from 8 to 9 p.m. Rain on 2nd, 4th, 5th, 9th, 10th, 11th, 12th, 22nd. Frequent heavy dews during the month, days being warm and followed by cool and cloudless nights. Crops generally inferior to those of last year.

CORNWALL.—Rain on 2nd, 4th, 5th, 10th, 11th, 17th, 22nd, 23rd.

GODERICH.—On the 19th, lightning. Rain on the 1st, 4th, 9th, 10th, 11th, 14th, 21st, 22nd, 23rd and 29th.

HAMILTON.—On 6th, at 7.40 p.m. a bright meteor in SE fell towards SE, about 30° high. 8th, a very bright meteor at 5 a.m. passed towards the west, the light through observer's window quite distinct, the shadow of a ladder quite perceptible. 19th, lightning in evening in NW. 23rd, ordinary meteor in NNE, 30° high, fell towards NE. Fogs on 20th, 21st, 28th. Gales of wind on 1st, 2nd, 9th, 10th, 12th, 16th, 17th, 29th. Rain on 2nd, 4th, 5th, 9th, 10th, 12th, 21st, 28th. Month remarkable for calmness and freedom from storms of all kinds, the last three weeks especially fine, and reported as Indian summer.

PEMBROKE.—On 2nd, lightning, thunder and rain. 22nd, rainbow. 29th, three shooting stars observed. Storms of wind on 2nd, 5th, 22nd, 31st. Fogs on 1st, 7th, 8th, 18th, 28th, and very dense on 16th and 19th. Snow on 5th and 9th. Rain on 2nd, 5th, 9th, 10th, 11th, 12th, 14th, 17th. Nearly all summer birds have migrated; a few robins seen occasionally. Trees nearly stripped in the last of the month; deer and partridge not very plenty this fall. Month unusually fine. Considerable sickness; colds prevalent and throat disease, with some typhoid fever.

PETERBOROUGH.—On 2nd, strong auroral light over NH at 8 p.m. in large irregular patches—presently streamers appeared, the light being considerably intensified where they sprang from the auroral light near H—the streamers danced and flickered and apparently moved rapidly from side to side; they extended at one time to Z, and formed, together with faint streamers which then for the first time appeared to the southward, a slight corona, which, however faded away in about 12 minutes; before the hour for the next observation, the sky became overcast. 18th, 19th, 20th, 21st, Indian summer. Fogs on 1st, 4th, 8th, 14th, 16th, 18th, 24th, 25th, 26th. Rain on 2nd, 4th, 5th, 9th, 10th, 12th, 13th, 17th, 21st, 28th. Month remarkable for the steadiness and mildness of the weather, as well as the almost total absence of the rains usual in that part of the autumn. The "oldest inhabitant" does not recollect so fine an October in this part of Canada.

SIMCOE.—Fog on 13th. Rain on 1st, 2nd, 5th, 7th, 10th, 11th, 12th, 21st. The month presents nothing calling for remark here except the very delightful weather, and the wide range of barometer.

STRATFORD.—On 2nd, lightning, thunder and rain; at 9 p.m. large lunar halo. 19th, lightning. Indian summer from 16th to 21st, and 24th to 27th. Fogs on 1st, 14th, 16th, 19th, 20th, 24th, 26th. Rain on 2nd, 4th, 5th, 9th, 10th, 11th, 21st. Weather during the month very dry and pleasant.

WINDSOR.—On 1st, first frost of the season, injuring only the more delicate plants. 2nd, lightning, thunder and rain. 7th, meteors from Z to N. 14th, two meteors from Z to NW. 15th, three meteors from Z to SW. 23rd, meteor from N to E. 24th, first ice. Storms of wind on 9th, 16th, 21st, 25th. Fogs on 1st, 4th, 8th, 16th, 18th, 19th, 25th, 28th. Rain on 2nd, 4th, 9th, 11th, 12th, 21st, 30th. Month unusually fine, with considerable barometric variation and high mean temperature.

NOVEMBER.

BARRIE.—Blew very heavily from NW on 1st and 2nd at noon, changed during night to SE. Very violent and gusty all Sunday, 3rd, with much rain—quite a gale SE on Sunday night with hail and slight snow, first of the season. Hail on 4th. Heavy fog all 22nd, and very heavy on 23rd. Fog also on 24th, 25th. Snow on 6th, 16th, 18th, 19th, 29th, 30th. Rain on 5th.

BELLEVILLE.—Strong gales from noon on 1st to 3 o'clock p.m. on 2nd, particularly between 10 a.m. and 1 p.m. of 2nd; wind S on 1st, and SW and NW on 2nd. Strong gales on night of 3rd and during the greater part of 4th and 5th. From 5th to 8th, temperature below freezing point every night, succeeded by milder weather. A sudden change occurred on 29th, temperature falling from 42° 1 to 4° 3. From 9 p.m. 29th to 2 a.m. 30th wind SW and W very strong, preceded by fall of barometer. Snow 16th, 17th, 19th, 20th. Rain 3rd, 4th, 6th, 24th, 25th, 29th. Month colder and drier than November, 1866.

CORNWALL.—On 4th at 1 p.m. surface current N, 3; nimbi observed moving to SW rapidly, and higher cirro-cumuli, slowly to E. Fog on 25th. Snow on 15th 16th, 19th, 20th, 27th. Rain on 3rd, 5th, 12th, 14th, 22nd, 23rd, 24th, 25th, 26th, 29th.

GODERICH.—On 4th, storm of wind; rainbow NE. Indian summer haze on 20th, 21st, 22nd, 23rd. Snow on 11th, 12th, 29th. Rain on 3rd, 19th, 26th, 28th, 29th. Navigation still open at close of the month—weather unusually good.

TABLE K.—METEOROLOGICAL OBSERVATIONS, 1867.—*Continued.*REMARKS.—*Continued.*

HAMILTON.—On 3rd at night and following morning the wind in gales, the highest during the year, marked 8. Weather during month very fine, drought still continued. The real Indian summer began on 19th, and continued till evening of 29th, when the change was sudden and extreme; it froze hard that night, some snow fell and at once the rigors of winter set in. The mean temperature of the 29th was 38° 5, and of 30th 16° 5; at same time barometer rose from 29.208 to 29.604. 13th, watched for meteoric shower; till midnight the sky was overcast with cumuli, and a few of them flitted across after that hour; appearance of constellation of Leo carefully observed; at 1.55 a.m. (14th) two meteors fell towards N, at 2 a.m. one towards E; at 2.2 two fell SE; at 2.11 one E; at 2.15 one NE; at 2.18 one NE; at 2.22 one NE; at 2.25 one very bright, rocket-like, NE; at 2.36 one NE very near H; at 3.10 one NW, &c., &c.; at 4 a.m. eight fell at once, and at 4.15 eight more; the shower continued thus till 5 a.m. when the last observed fell. The observer remarks that while all the meteors seen at this station made their appearance beyond the limits usually assigned to the constellation Leo, all seemed to start from a common centre. Storms of wind 1st, 2nd, 5th, 8th, 12th, 16th, 25th, 29th, 30th. Fogs 8th and 25th. Snow 4th, 6th, 17th, 30th. Rain 3rd, 4th, 8th, 9th, 19th.

PEMBROKE.—On 2nd, heavy storm of wind. 5th, lightning in evening. 22nd, at night, vivid lightning with rain and heavy thunder. 29th, at night, fearful storm of wind. Wind storms also on 2nd, 4th, 5th, 13th, 18th, 26th, 30th. Fogs on 22nd, 23rd, 24th, 25th. Snow on 3rd, 5th, 15th, 16th, 17th, 20th, 26th, 29th, 30th. Rain on 1st, 2nd, 3rd, 4th, 9th, 21st, 22nd, 23rd, 24th, 27th. Steamboat's last trip on lake on 30th. Water unusually scarce through the country, being very low in streams and wells. Sleighing not very good, but passable during latter part of the month.

PETERBOROUGH.—On 5th, from 7.25 p.m. till 8.50 p.m., occasional flurries of snow with very high winds, force 8; at 7.20 and 8.45 p.m. bright flashes of silent lightning at SE from heavy clouds which had passed along to the southward. 13th and 14th, sky overcast both nights, so that no observation could be made as to predicted meteoric shower. 14th, blew heavily during afternoon, beginning at 1 p.m. 19th, many of the large lakes frozen over. 22nd and 23rd, Indian summer. Storms of wind 1st, 2nd, 4th, 5th, 14th, 29th. Fogs on 22nd, 23rd, 25th. Snow on 4th, 5th, 6th, 15th, 16th, 20th, 29th. Rain on 3rd, 4th, 9th, 23rd, 24th, 25th, 29th. Great scarcity of water all over the country; wells generally dry, owing to the failure of ordinary fall rains. First half of month unusually mild; the whole month unusually cloudy.

SIMCOE.—On 3rd, very high wind from SW at night, doing some damage to fences, &c; night of 13th and morning of 14th, the cloudiness of the sky rendered a good observation of meteors impossible, but from 2 a.m. till 2.30 twenty-six were seen, starting from a point in the constellation Leo, and taking a north-westerly direction, disappearing at a point about 30° from the NW horizon; they all had apparently the same point of departure, took the same direction, and disappeared at the same, or nearly the same spot; three or four were very brilliant, and one especially illuminated the ground under it, making a bright yellow path—this seemed much lower than the others; at 2.30 the sky became clouded, and no more were seen. Snow on 4th, 6th, 12th, 14th, 16th. Rain on 8th, 24th, 25th, 26th, 27th, 28th, 29th. Weather this month very beautiful, and Indian summer strongly marked. A number of autumn flowers in bloom in the gardens till nearly the end of the month; *leontodon* quite plentiful up to the 25th. Extremely dry; many farmers in some of the townships have to drive their stock three and four miles to water; the marshes dry at a season when they are ordinarily full.

STRATFORD.—3rd, lightning, thunder and rain. 4th, snow—first of season. 13th and 14th, meteoric shower not visible at this station on account of the cloudy state of the sky. 18th, mill pond frozen, first time this season; free from ice again on 24th. Indian summer 20th, 21st, 22nd, 23rd, 24th, 29th, storm of wind and snow began at 2.15 p.m. and continued till 6 p.m. of 30th. Storms of wind also on 1st, 2nd, 3rd, 8th, 10th, 15th, 16th. Fogs on 21st, 22nd, 23rd, 24th. Snow on 4th, 5th, 6th, 11th, 12th, 17th, 18th, 29th, 30th. Rain on 3rd, 9th, 22nd, 24th, 25th, 29th.

WINDSOR.—On 3rd, at night, severest wind storm of the month; wind reached a velocity of 8 or 9; it fell towards morning to 2, but blew in occasional gusts on 4th, and rose again on 5th to 6th and 7th. On 4th at 10 p.m. meteor fell from Z to N; and on 9th at 8 p.m. from Z to W. 6th, lunar halo about 8 p.m. 10th, larkspur, mignonette, verbenas, and a number of other flowers still in bloom in open ground. 13th, prismatic lunar halo. The observer watched for the meteoric shower, but the sky was very unfavourable and no meteors were seen till about 4 a.m. (14th), when about sixty were observed during one hour; at Ann Arbour, about 40 miles distant, some thousands were observed during the same space of time. Storms of wind on 1st, 5th, 8th, 9th, 14th, 15th, 16th, 25th. Fogs on 21st, 22nd, 23rd. Snow on 30th. Rain on 3rd, 8th, 24th, 25th, 27th, 29th. Month remarkably fine and dry; somewhat windy, but on the whole very pleasant.

DECEMBER.

BARRIE.—On 6th, very violent storm during night from N and NE, continuous snow from evening of 6th to evening of 8th. 18th, hail. 21st, hailstorm and violent wind at night. 27th, very heavy storm of wind for about 30 minutes at night. Snow on 3rd, 7th, 8th, 17th, 18th, 19th, 20th, 24th, 25th, 26th, 30th. Rain on 24th, 25th, 26th. Minimum temp. 12th, -16° 8, 13th, -27° 6, 14th, -7° 1, 19th, -7° 1, 31st, -10° 1.

BELLEVEILLE.—On 6th, very strong gale during night from West. Storm of wind on 7th. 18th, shock of an earthquake about 3 a.m.; those who felt it report the sound as if waggons were passing rapidly through the streets; no damage done, so far as ascertained. 21st, a higher daily range of barometer than is noted in table occurred between 9 p.m. of 21st and 1 p.m. of 22nd (Sunday), a fall of .844. 22nd, very strong

TABLE K.—METEOROLOGICAL OBSERVATIONS, 1867.—*Continued.*REMARKS.—*Continued.*

gales from about 8 p.m. to about 9 a.m. 23rd. Strong winds also prevailed on 25th and 27th. Snow on 2nd, 3rd, 5th, 6th, 7th, 9th, 10th, 11th, 20th, 21st, 22nd. Rain on 6th, 22nd, 25th, 26th, 27th. Minimum temp. 9th,—9°.1; 12th,—14°.4; 13th,—14°.5; 14th,—10°.2; 19th,—10°.6.

CORNWALL.—On 18th, comparatively severe shock of an earthquake here about 3 a.m. or a few minutes after; the quake seemed to proceed from NW to NE, and continued probably from 20 to 30 seconds; the noise resembled the rushing of a railway train in rapid motion, so much so that the G. T. R. employes hurried out, imagining that an unexpected train had run into some of the station buildings; the tremulous motion of the earth was terrific for a few moments, beds, tables, chairs and other movable furniture shook violently; as soon as possible after the shock, the observer read the barometer and thermometer, but no variation was remarked worth noticing. Fog on 13th, 14th. Snow on 5th, 24th, 25th, 28th, 29th. Rain on 6th, 22nd, 25th, 26th, 27th. Minimum temp. 9th,—12°.7; 11th,—12°.7; 12th,—17°.7; 13th,—17°.7; 14th,—16°.7; 16th,—9°.7; 18th,—9°.7; 19th,—13°.7; 20th,—14°.2.

ST. JOHN, N.B.—Lat. 45° 17'. W. Long. 66° 4'. Height above sea. 135 feet. Extracts from reports sent by an observer for the last four months of 1867:—

In *September*, the wind was E to W 22 days, and W to NE 8 days; heavy southerly gale on 25th, and very severe northerly one on 30th. In *October*, wind E to SW 13 days, and W to NE 18 days; very heavy southerly gale in night of 5th. In *November*, 14 days southerly and 16 days northerly; heavy gales 2nd, 3rd, 30th. *December*, heavy gales 6th, 26th, 27th. Wind W to NE 18 days, S 1 day, and SE 2 days. This was a month of unusual severity, its monthly mean temp. 10°.5 lower than 1866, and 6°.9 lower than average, and 35.5 lower than the lowest since 1850. The oscillations were as remarkable as the lowness of temperature.

GODERICH.—On 4th, navigation closed; steamer "Silver Spray's" last trip—came into harbour to-day. Storms of wind on 6th, 21st, 23rd. Fog on 27th. Snow on 3rd, 4th, 5th, 7th, 10th, 11th, 18th, 21st, 22nd, (Sunday), 24th, 27th, 28th, 31st. Rain on 20th, 21st, 22nd (Sunday), 23rd, 25th, 27th. Minimum temp. 12th,—5°.7; 13th,—11°.6; 14th,—1°.8.

TABLE K.—METEOROLOGICAL OBSERVATIONS, 1867.—*Continued.*REMARKS.—*Continued.*

HAMILTON.—On 6th, hail; violent gales at night, throwing down fences, verandahs, trees and chimneys. 12th and 13th, another violent storm of wind and snow from North, intensely cold and bleak, continuing, with two slight intermissions, nearly forty-eight hours; the barometer gave no indication of the approach of the storm, nor did it fall to any extent during its continuance. The third week much milder. 21st, storm of thunder, lightning and rain at night. 25th, fog. 27th, storm of lightning, thunder and rain at night. Storms of wind 2nd, 3rd, 5th, 6th, 7th, 12th, 13th, 20th, 21st, 23rd, 24th, 25th, 26th, 28th. The gales during this autumn have been most frequent in the night, between 8 p.m. and 6 a.m. Snow on each day from 1st to 3rd, 5th to 8th, 10th to 13th, 19th, 20th, 21st, 24th, 30th, 31st. Rain on 6th, 20th, 21st, 25th, 26th, 27th. Season since May very dry. Observer considers Indian summer to have continued from 14th October to 29th November. Minimum temp. 9th,—58.9; 12th,—98.9; 13th,—78.9; 19th,—78.9.

PEMBROKE.—On 6th, unusual storm of wind during night; changes in temperature very sudden, also in barometric pressure. 13th, shooting star. Wind storms 7th, 23rd, 26th. Snow on 1st, 2nd, 9th, 17th, 20th, 21st, 28th, 29th. Rain on 6th, 22nd, 25th, 27th. Lake frozen on 1st, good sleighing. Health tolerably good, but some pulmonary disease. Minimum temp. 2nd,—12°; 4th,—15°; 9th,—22°; 10th,—10°; 11th,—16°; 12th,—25°; 13th,—24.5; 14th,—27°; 16th,—21°; 18th,—10°; 19th,—27°; 20th,—7°; 30th,—21°; 31st,—22.5.

PETERBORO'.—On 6th, heavy shower of hail from 7.15 p.m. till 7.30 p.m., with very high wind, force 8. 7th, blew hard all night and early morning. 21st, very high wind occasionally from E. 26th, wind storm. Fog on 14th. Snow on 2nd, 5th, 6th, 8th, 9th, 10th, 15th, 17th, and each day from 20th to 25th, 28th to 30th. Rain on 6th, 17th, 22nd, 25th, 26th, 27th. Weather set in permanently on 1st, and generally steady during month, barometer fluctuating a good deal. The thermometric range the highest yet observed in any month at Peterboro'. Minimum temp. 9th,—13°; 12th,—15°; 13th,—15°; 14th,—16°; 19th,—23°; 30th,—7°; 31st,—13°.

SIMCOE.—On 6th and 7th, very violent winds, doing considerable damage to fences, &c. 5th, lunar halo, 30° in diameter. 11th, solar halo, diameter 40° in afternoon. 25th, lightning, thunder and rain at night, and again on 27th at 2 a.m.; lightning very vivid. Fogs on 17th, 20th, 21st. Snow on 2nd, 3rd, 5th, 6th, 7th, 9th, 12th, 14th, 16th, 19th, 30th, 31st. Rain on 22nd, 25th, 26th, 27th. Minimum temp. 12th,—5°; 13th,—7°; 19th,—11°.

STRATFORD.—On 1st, mill pond frozen—second time. 10th, large lunar halo at 9 p.m. Storms of wind, 6th, 7th, 8th, 12th, 21st, 22nd, 23rd, 25th; these storms presented no peculiarities different from those generally present in winter storms. Fogs on 17th, 20th, 27th. Snow on each day from 3rd to 10th, 20th, 21st, 23rd. Rain on 21st, 22nd, 25th, 27th. Minimum temp., 12th,—58.4; 13th,—10°; 19th,—58.7.

WINDSOR.—On 6th, hail—also on 21st. Storms of wind on 6th, 11th, 12th, 25th. Snow on 2nd, 5th, 7th, 11th, 16th, 19th, 21st, 31st. Rain on 21st, 24th, 25th, 27th. Month remarkable for sudden barometric changes. Sky exceedingly cloudy, with comparatively slight fall of rain and snow. In instances during the month the temperature changed very suddenly. Minimum temp. 12th, 5°; 13th,—10°; 19th,—6°.

Net amount of Pensions paid in 1867.....					4161 71	

NOTE.—In the above table, where the number is omitted, the pensioner is either dead, has resumed teaching, or has withdrawn.

*Pensioners receive, for the first year in which they are placed on the list, an amount at the rate of \$6 per year of service. After the first year they receive a smaller amount, as the fund does not admit of continuing the high rate.

* Balances due, but not collected, were included until 1858, but from that date Nos. 18, 19, 20, 21, 22 and 24 represent actual payments only. If we add to the Grand Total (24) the unexpended balances, we should have an available sum of \$2,127,568 for Educational purposes during 1867; and for 1866, \$2,650,125—the increase in 1867 being \$77,443.

NOTE.—The Returns in the foregoing Table, up to the year 1857, are not very complete, but since that period they have been sufficiently so to establish data by which to compare our yearly progress in Educational matters. The Returns are now pretty extensive, and embrace all Institutions of Learning, from the Common School up to the University; but hitherto the sources of information regarding this latter class of Institutions have been rather private than official, which should not be the case. The Annual Report of a Department of Public Instruction should present, in one comprehensive tabular view, the actual state and progress of all our Educational Institutions—Primary, Intermediate and Superior.

PART III.

A P P E N D I C E S.

1867.

APPENDICES TO THE ANNUAL REPORT
OF THE
NORMAL, MODEL, GRAMMAR,
AND
COMMON SCHOOLS
IN THE PROVINCE OF ONTARIO,
FOR THE YEAR 1867.

APPENDIX A.

EXTRACTS FROM THE REPORTS OF LOCAL SUPERINTENDENTS OF COMMON SCHOOLS AND BOARDS OF SCHOOL TRUSTEES IN ONTARIO, RELATIVE TO THE STATE AND PROGRESS OF EDUCATION IN THEIR RESPECTIVE TOWNSHIPS, CITIES, TOWNS AND VILLAGES, FOR THE YEAR 1867.

I. COUNTY OF GLENGARRY.

BENEFICIAL INFLUENCE OF THE GRAMMAR SCHOOLS—DEAD-WEIGHT TRUSTEES—HOPES OF ANOTHER GENERATION.

1. *The Reverend Adam F. McQueen, Kenyon.*—All our schools are in active operation except one, and all on the free system. We have nineteen schools within the limits of the township, and two Union Sections. In this township, we are furnished with excellent teachers.

Beneficial Influence of the Grammar Schools.—The Grammar Schools in our vicinity have a powerful influence for good upon our Common Schools, for almost all our teachers come to us from the Grammar Schools, and are well prepared for the duties devolving upon them as Common School Teachers. We have one Normal School Teacher, and twelve with first class certificates from the County Board, and the remainder of them have Second Class Certificates.

Dead-weight Trustees.—But I am sorry to say that many of our Trustees prove a dead weight upon our excellent system of education. More than one-half of our schools are without maps or black-boards, and I fear much that this evil will not be mended until our present scholars become Trustees. But the want of maps is greatly remedied by the excellent ones we have in our unequalled geographies (Lovell's).

Hopes of Another Generation.—But notwithstanding our drawbacks, our noble educational machinery progresses mightily, and by means thereof our young Dominion will be able to take her stand with any other kingdom under the sun in point of learning and intelligence.

II. COUNTY OF STORMONT.

FREE SCHOOLS—WANT OF MAPS—ABSENCE OF SCHOOL LIBRARIES—PRIZES—NON-ATTENDANCE—SOME GOOD TEACHERS—POVERTY-SOULED TRUSTEES.

2. *William Millar, Esquire, Osnabruck.*—*Free Schools.*—In this township the schools are all on the free system with the exception of three. We had in December a competitive examination which, although in some respects unsatisfactory to me, owing to the imperfect arrangements for carrying it out; yet, upon the whole, I think it had a very good effect upon both teachers and pupils, and will be the means of arousing and bringing into vigorous exercise the talents and powers of the teachers.

Want of Maps.—I have noticed on my visits a total absence, in nearly all the schools of this township, of maps and other school apparatus. I will during the present year, strongly urge upon the Trustees a greater spirit of liberality in providing the teachers with these great aids to their calling. It is not merely that the duties of the teacher would be made easier by the providing of these appliances, but the work itself to the pupils would be made easier and more attractive.

Absence of School Libraries.—You will observe a total absence of school libraries. This is certainly not as it should be, but I fear for a time, at least, the evil cannot be remedied. It is not possible that a small, well selected library in connection with each School Section could fail to have a good influence, not only upon the pupils, but upon the whole section.

Non-attendance.—With regard to the very considerable number not attending any school, the Trustees generally give the indifference of parents as a reason for non-attendance. In a few cases it may be that poverty of the parents renders them unable to clothe their children as they should be to attend school, and in a few others the same cause may render necessary the keeping children at home to aid in work; but I am satisfied that in the greater number of cases, the true cause is assigned, that the gross and inexcusable neglect of parents is the real cause. In this township the schools are, with three exceptions, free, so that the inability to pay a rate-bill, or the feeling which would prevent them sending their children as indigent, cannot be urged in excuse. The people, generally, are abundantly able to provide their children with necessaries to enable them to attend school. General regulations regarding religious instruction are not generally followed. Revised programme for County Board is followed and questions are printed.

Prizes.—Although several sections are marked as having distributed prizes, the number distributed has been small. The effect has apparently been good. Number not attending school still very large, being 252 out of a total school population of 1,816.

Some good Teachers.—I find the best schools in this township are those in charge of teachers who have been retained by the section for several years in succession, and we have a number of that kind of both sexes, who are a credit to the profession, and an honour to the Trustees who employ them. We have also some very comfortable and convenient school houses, with a large attendance of well trained and well taught pupils, as far as they have been advanced.

Poverty-Souled Trustees.—It is but too common a practice for Trustees to change teachers from year to year, and sometimes for shorter periods, owing perhaps to the fact that another teacher can be procured at a dollar or two per month less. The economy, if such it can be called, is a mistaken one, as more time is lost in eradicating the system of the preceding teacher, and replacing it by one possibly no better, and perhaps worse, than the few dollars saved amount to. The tendency too is rather to discourage pupils. Many of our Trustees, in engaging a teacher, pay too much attention to the dollars to be paid, and too little to the qualifications of the teacher. The fault, however, is mainly with Trustees, many of whom enquiring for male teachers, will offer less than the price they pay their farm labourers, and this too for a full grown man, as nothing less will suit. With female teachers the case is still worse. After paying board the majority of them have left less than they could command as servants. This can really be no inducement to the better class of students of both sexes to enter upon the profession. Into the hands of the teacher is committed not only the mere education, but to a certain extent the formation of the characters of the pupils; and it certainly seems strange that parents will hesitate

to pay more to one, into whose hands they commit so grave a charge, than they willingly pay him who has charge of their animals.

III. COUNTY OF DUNDAS.

NO PUBLIC LIBRARIES—POOR LOCAL SUPERINTENDENTS—POOR TEACHERS—POOR SCHOOL HOUSES—POOR SCHOOLS.

3. *J. R. Cousens, Esquire, M.D., Mountain.*—Non-attendance of children at school is caused by negligence of parents, necessity for children working some portion of the time, and extreme poverty in some few cases. As a general thing, I find the parents anxious to take advantage of the means of education wherever practicable. I do not think the general regulations regarding Religious instruction are strictly followed. Reading the Scriptures at closing school, and occasionally a prayer may be used, but the exception forms the rule.

No Public Libraries.—There are no public libraries in this township. The inhabitants of Mountain are not a reading people. My profession necessarily gives me acquaintance with many things of which I would otherwise be ignorant. It is a very rare thing to find a book in a farmer's house, save the Bible and school books. Many of the parents are unable to read or write, and their families are not yet sufficiently awake to the necessity for any more knowledge. There are, of course, exceptions. Those portions of this township peopled by Presbyterians present a different aspect. The Sunday School libraries are taken good care of and circulated among the families to which the scholars belong, and are beneficial in their province, but they do not supply the place of good township libraries. The distribution of prizes is anything but general—wherever practised, it produces emulation and praiseworthy strife among the scholars.

Poor Local Superintendents.—As this is the only time I may have an opportunity of addressing an official communication to the Department, it is my wish to say that the cause of education in this township is very backward. I have already adverted to the improper course pursued by the Reeves in general in the appointment of Superintendents, and find that for three years, some School Sections in this township have not been visited more than once by the Local Superintendent. It has been the fashion to accept the appointment, and get all that could be got out of it—sometimes doing the visitations by deputy, occasionally, neglecting them entirely.

Poor Teachers.—The School Trustees appear determined to exercise a false economy, not only by hiring the cheapest teacher that can be got, but by doing as little as possible for school purposes.

Poor School-houses.—Maps are very scarce—the majority of the school-houses are deficient in every thing necessary for private convenience.

Poor Schools.—Some of the buildings are not water-tight, it being compulsory on the teacher to adjourn the school, or take a thorough wetting. If there can be any thing done to remedy these evils, I am anxious to get it done.

SLOTHFUL TRUSTEES—THEIR BANEFUL INFLUENCE UPON PARENTS, TEACHERS, PUPILS—GOOD TRUSTEES AND TEACHERS—OBJECTIONS TO THE MODES OF TEACHING AND EXAMINING TEACHERS.

4. *William Johnston, Esquire, Matilda.*—*Slothful Trustees—Their Baneful Influence upon Parents, Teachers, Pupils.*—I regret to have to complain of the carelessness of those Trustees who do not furnish the information required by their annual report, thereby making it impossible to give a correct report of the state of their schools. It is discouraging to find that some of their reports show a thoughtlessness of the importance of those duties which, if not made imperative by law, would not be observed out of free will. Such instances of disregard to the duties of the office, point to the evil of electing Trustees who have no correct ideas of the responsibilities of the office, and therefore give no heed to the discharge of its duties. It matters not how faithful the servant may be, if the master be slothful, the work will not prosper. And so of our schools: if the parties to whose care and management they are committed neglect their duties, I see not why the teacher and

pupils may not feel the influence and take the example. Where Trustees and parents show an indifference to educational advantages, and the means which, in the economy of education, must be used in order to make schools effective, there I find the state of the school is defective; and the mode of operation such as to discourage, rather than invite, either the attention or attendance of children, and hence a cause of that non-attendance of which we complain.

Good Trustees and Teachers.—But not so where Trustees make it a matter of conscientious duty, as due to their children, their country and their God, to use every possible means to make the schools of their charge effective, in both a social and literary point of view. Such men, as a means to this end, are careful to select the most competent teachers, not allowing self-interest, religious bigotry, or selfish favouritism to divert them. This gives satisfaction, and invites the parties concerned to co-operation. And if the teacher be moved by that sincerity of desire for educational success which his duty should dictate, he will encourage school examinations, and suggest to parents the use of *prizes*, and devise such other means as may make those occasions profitable and entertaining. And when the parties unite in the effort to make the school-room the test of their educational ambition, the cause of practical education is made to bring with it its own *stimulus*, and in the presence of its refining influence, apathy loses its power, and impulses of a higher nature take its place. Of the sections worthy our acknowledgments in this respect, Nos. 9, 9 union, 13 and 16 stand foremost, and we hope No. 1 will not be inferior. In these sections, a desire to make schools efficient and respectable, predominates. Here, our visits are favoured with an encouraging attention. In these sections, the motive power seems to be created by incentives to competition, and to this end the teachers use their energies so happily that, to the pupils, study becomes an exercise so delightful that it is found difficult to restrain from it.

Objections to the Modes of Teaching and Examining Teachers.—It has been said that, in order to remedy the impediments, the “Standard of Education” should be raised by using more strictness in the examination of teachers. I see not how the critical technicalities of the examiner can be turned into a substitute for the innate, intellectual adaptations of the teacher to his business. The supposition that a change, or any difference made in the mode of examination, could affect, or raise the standard of education, is fallacious; and betrays ignorance of the position given to that standard in the economy of our wisely adapted school system. As before hinted, it is in the school room this can be done; it is by the exertions of Trustees and parents, united with those of energetic and earnest teachers, that this standard can be raised to the degree of perfection in which it is presented to us in the requirements of our excellent school system. Nor do our written modes of examining teachers appear to aid in these matters: true, it is an easy, quiet way of counterfeiting the form of a process, by which the opportunity of testing the intelligence, of searching the understanding, and defining the intellectual adaptations of the teachers, should be secured; but this opportunity the written mode does not seem to afford.

APATHY WITH FEW EXCEPTIONS.—OBJECTIONS TO WRITTEN EXAMINATION OF TEACHERS.

5. *John J. McLaughlin, Esquire, Williamsburgh.*—*Apathy with few exceptions.*—The popular tone of this township is in favour of education. But while we befool ourselves, invoking the aid of Hercules, *time for improvement is passing away*, youth attaining the years of maturity, the proper means for the attainment of knowledge neglected, school sectional and township libraries never thought of; and generally the most incompetent teachers employed, because they will accept any pittance for their incompetent services. But while I thus condemn the general apathy in educational matters, I am glad to state that there are some exceptions—exceptions both as to the qualifications of some of our teachers, and the progressive spirit of some of the people, in reference to intellectual improvement. There are twenty-two school houses in this township (union inclusive), and out of this number only two are worthy of the name; the others are wooden buildings, the greater number of which are not only too small and badly furnished, but in a worn out and ruined condition. There will be two new school houses erected next summer,

one of stone, the other of brick. This is a step in the right direction, and it is also to be observed that the number of non-attending children is on the decrease. This speaks well for the future. What is most wanting, and of which I most complain, is the want of proper means for the attainment of thorough knowledge—such as maps, apparatus, &c., &c. All our schools are wanting in this respect.

Objections to written examination of teachers.—I have observed that most of the Superintendents, in reporting their methods of conducting the examination of teachers, conclude their remarks by stating that the “questions are all printed.” Now, although there is such an amount of talent in favour of printed questions and written answers, eleven years experience at a Board of Public Instruction has convinced me that the *viva voce* method is decidedly the best in every point of view. It has one primary advantage, namely, that of giving different questions to every candidate, thus preventing copying and “wire pulling,” often very dexterously practised at such places. It is the best for finding the aptitude of the candidate for the work in which he is about to be engaged. It is the best in point of time, because double work can be done in a given period. These and similar considerations have given preference to the oral examinations at our Board. I may also remark here that the remuneration given to Superintendents is so nominal in comparison to the amount of labour they have to perform, and the tenure of office so uncertain, no matter how faithfully and efficiently he may discharge his duty, that the position is a very unenviable one. It is much to be lamented that so few of our schools are opened and closed with prayer. I have more than once condemned, in very strong language, this ungodly practice; and I have just reason still to marvel why any instructor of youth can be so dead and so insensible of the nature and character of the position he occupies, as to neglect the *very part of his duty* which gives dignity to his profession and secures the approbation of Heaven. In conclusion, if our Canadian youth are not properly educated, the sole blame rests with the people themselves; they have every facility, every advantage which one of the best systems of public instruction in the world can afford.

TWO GOOD SCHOOL HOUSES—OTHERS PIG STYE SCHOOL HOUSES—SUPERIORITY OF WRITTEN EXAMINATIONS OF TEACHERS—NEGLIGENT TRUSTEES—BEHIND THE TIMES.

6. *The Reverend Christopher R. Bell, M.B., Mountain.*—*Two Good School Houses—Others Pig sty School Houses.*—I am glad to say there are two new brick and stone school houses erected in the township, which are much more commodious than the former wretched log ones were; but with these exceptions, the school houses remain much the same as last year. They are nearly all log buildings, low, generally dirty, and many very dilapidated. *Some are only fit for pig styes.* In the case of one of the new school houses, I have persuaded the Trustees to put up *conveniences for the children*, and most likely the other new one will also have them. I also tell our Trustees that if they were to plant some *ornamental trees* around the school houses, it would add to the comfort of the children in their play hours, screen the building from the burning rays of the sun during summer, and act as a shelter from the piercingly cold wind of the winter.

SuperiORITY of Written Examinations of Teachers.—We have now introduced the *printed examination papers* at our Board of Public Instruction, and I find they work very well. We are much more able to correctly estimate the attainments of the candidate than we were before, when they were examined only *viva voce*. In fact, in my opinion, there is no comparison between the systems. At one of our sittings this year (1867), we had to reject no less than *seven candidates* out of thirty-three. *Not one of these seven was at all fit to undertake the office of teacher.* Under the old system most, if not all, would doubtless have passed muster and obtained some kind of certificate. Thus a *great injustice* would have been done to the children entrusted to their care, and the money of their parents thrown away. I shall be heartily glad when your proposed new scheme comes into full operation, for until then, or some such system is adopted, there is not much hope for the proper teaching of the poor children in these back townships.

Negligence of Trustees.—I have endeavoured to enlist the sympathies of the Trustees generally in providing maps and school apparatus for their schools, but, for another year,

to no purpose. The Trustees show no interest in the schools, as a rule; of course there are some honourable exceptions, but they are few and far between. They find themselves in office, and they try to get through their term with *as little trouble as possible*, being afraid lest if they stir in any matter, *their pockets will have to suffer*. The result of this is, one frequently finds the school house dirty, low and disgraceful; the teacher inferior (for they won't pay a good one); the scholars scanty in their attendance, very often dirty and neglected (much more so than the teacher ought to allow); one dirty book for half a dozen scholars, and half the subjects on the list not taught at all.

Behind the Times.—I think, as a rule, throughout the Township of Mountain, the people generally are at least *a quarter of a century behind the times in which we live*. It is to be sincerely desired that they will soon awake from such a lethargy, stir themselves up, show themselves to be men, in the best acceptation of the term, and lay themselves out a great deal more than they have hitherto done *for the benefit of the rising generation*.

IMPROVEMENT IN TEACHERS—EVILS OF POLITICAL APPOINTMENTS OF LOCAL SUPERINTENDENTS—SOME ENCOURAGING SIGNS.

7. *The Reverend William Ferguson, M.A., Winchester.*—*Improvement in Teachers.*—I have to report the gratifying fact that the semi-annual examinations of teachers for the east circuit of this county, in the past year, have exhibited a greater number of candidates possessed of high average qualifications than on former occasions. If, by more searching examinations, the number of first-class teachers has been reduced, yet no one has encountered our examination who has not, after trial, been found fully qualified to hold some one or other of the varied grades into which teachers have been divided. Our Municipal Council of the United Counties of Stormont, Dundas and Glengarry, early in last year, for educational purposes, divided this county into two circuits, having two distinct Boards of Education. A measure which I cannot help regarding as a step in a retrograde direction, while assuredly it has been already productive of difficulties.

Evils of Political Appointments of Local Superintendents.—There is another evil connected with our present system that must soon find a remedy, else the consequences cannot but be disastrous to the cause of education. I mean the making the office of Superintendent of Schools the reward of political truckling, or ecclesiastical sycophancy. A system is creeping in by which dismissal from office is the consequence neither of incapacity nor negligence, and promotion to the office is not the reward of well-approved adaptation to that situation. When clergymen, professional gentlemen, and retired teachers of high standing and long-matured experience are dismissed or compelled to retire, to make way for lads holding subordinate situations in country stores, or effete teachers who never held a higher than a third-class certificate, then the lofty cause of education becomes degraded, and suffers in all its members and in all its interests. The Local Superintendent of Schools ought to be one not owing his appointment to political partizanship, nor holding that appointment dependent on the ascendancy or caprice of local politicians. His duties are not light, when faithfully performed, and anything that might impede his usefulness or negative his independence must militate against the progress of education.

Some encouraging signs.—In reporting on the condition of the schools in this township, I am glad to be able to record the fact that a general spirit of improvement is manifested. If School Trustees would be only more liberal in the sum tendered as the teacher's salary—and I am happy to say that some are becoming more liberal—and if they were less anxious for changing their teachers, I am sure that instruction, education and school discipline would flourish more. It is gratifying to find that education is becoming more and more appreciated, as its beneficial results are becoming apparent. It is becoming more divested of mere dull and often irksome routine, and is fulfilling its purpose of teaching the association between ideas and words, the relation between figures and facts, and the power of analysis in discovering and guaranteeing truth. When the improvements contemplated in the educational system in this Province have been adopted in all their integrity, I am now fully persuaded that they will eventuate in elevating more highly the standard of education, and will confer inestimable benefits on the inhabitants of this land.

IV. COUNTY OF PRESCOTT.

NOTHING ENCOURAGING.

8. *Colin Dewar, Esquire, Hawkesbury East.*—*Nothing Encouraging.*—The average in several sections is small, owing to the prevalence of measles among the children. I find a very large proportion of children not attending any school whatever, the cause for the most part being poverty and indifference of parents. There is very little religious instruction given in any of the schools, some of the teachers do not use the Bible at all. I cannot say what the programme of the County Board is, as I was not notified of the July meeting, and did not attend the December meeting. So far as I can ascertain, no Sunday Schools are open in this township, and there are no Common School Libraries. I cannot, as this is my first year of office, inform you as to the progress of education in this township, but in my next, shall be able to report at greater length.

A LIBERAL TOWNSHIP COUNCIL—ENCOURAGING CIRCUMSTANCES.

9. *Alexander McLean, Esquire, Plantagenet South.*—All the schools in the township, with but one exception, are in need of a supply of maps and apparatus, and even that one wants more. I have suggested to the Trustees in all the School Sections under my superintendence the propriety of furnishing their schools with those requisites, and I believe they intend to act upon the suggestion.

A Liberal Township Council.—The apparatus furnished by the Municipal Council, and which I exhibited and explained in the schools I visited, has had a good effect, conveying to the minds of the pupils, by ocular demonstration, in one lesson what they could not comprehend otherwise in many weeks. By remarks I heard from some of the Trustees, they seemed anxious to have similar apparatus belonging to the school.

Encouraging Circumstances.—The Public Township Library is well circulated and eagerly read. Our Municipal Council deserves much praise for their liberality in educational matters. I anticipate a public examination of all the schools in the Township before the end of the year; I consider it to be one of the best means to arouse a spirit of emulation and ambition, not only among teachers as well as scholars, but also among the Trustees of the various sections concerned. There have been two new School Sections organized in the township this year—Nos. 8 and 9; one of which (No. 8) is in operation already, and the other will be before long.

V. COUNTY OF RUSSELL.

EVILS OF SMALL SCHOOL SECTIONS—PRIZES.

10. *James McCaul, Esquire, Clarence.*—There were eleven schools in operation in this township during the past year, and I am happy to say that the schools in general are doing well. The attendance is not what it should be, partly owing to indifference of parents, and, in some instances, to distance from school-house and bad roads.

Evils of Small School Sections.—The Municipal Council established another School Section during the past year, so that there will be twelve schools in this Township this year, but I am afraid that if the people will persist in dividing the School Sections and forming new ones, they will ruin the schools. Salaries of the teachers are miserably small in this township already, and by increasing the number of sections, the smaller salaries will be given. Some of the teachers are deserving of far higher salaries than they are now receiving, although one or two may be getting more than they deserve.

Prizes.—Prizes were distributed with good effect in a few of the schools. The books in the libraries are well taken care of, but an addition to them is much required. The schools, with few exceptions, are in want of maps.

INDICATIONS OF PROGRESS—ONLY ONE THIRD-CLASS TEACHER EMPLOYED.

11. *The Reverend James C. Smith, M.A., Cumberland.*—*Indications of Progress.*—It gives me pleasure to report visible progress in the condition of the Common Schools in

this township during the past year. I do not think that the number now existing (nine) meets the educational requirements, so that in one or two instances I have advised that application be made to the Municipal Council for additional sections. The progress that I remark refers not so much to any great improvement in the character of the school houses, or to an increase of attendance, as to the qualifications of the teachers. Formerly, those holding third-class certificates were almost in every case preferred by the Trustees, on the ground, I presume, that their services were available at the cheapest rate. A somewhat lengthened experience, however, has produced the conviction that money thus invested is a ruinous and short-sighted policy. By this I do not imply that there is any *immediate* danger of our Trustees overstepping the bounds of an enlightened liberality. This will be readily admitted, when I mention that the highest salary at present obtained by any teacher in the township is \$270, and the lowest \$100, without board.

Only one Third-class Teacher employed.—There is only one third-class teacher now employed, and this *worthy* is, of course, the recipient of the munificent (?) sum of \$100 per annum. The valuation put upon the services rendered is, in this instance at least, by far too high. The majority of our teachers begin to understand the character of their office, that their duty is to educate as well as to instruct; and in proportion to the degree of their intellectual and moral worth, I invariably find that they command respect and confidence, and that there is less occasion for that servile pandering to public caprice which prevails to a lamentable extent in many sections. The prescribed programme for examination is strictly observed by the Board of Public Instruction, so that this agency as a guardian of the educational interests of the County of Russell is rising into universal favour, except with those who are *plucked* at its annual sittings. So far I have been unable to secure a good attendance to listen to lectures on education. Nevertheless, I address the few who do not regard an hour thus occupied as misspent. The Bible, I am happy to say, is read in all our schools, with but a solitary exception. What more befitting than that a free Gospel should go hand in hand with a free system of secular education.

VI. COUNTY OF CARLETON.

SIGNS OF IMPROVEMENT—BUT THE BEST TEACHERS SOON LEAVE THE PROFESSION.

12. *The Reverend C. P. Emery, Fitzroy.*—*Signs of Improvement.*—Five sections in Fitzroy have built good and spacious school houses, and other sections contemplate following their good example. Education has progressed during the past year in accordance with the ability of teachers to impart instruction.

But the best Teachers soon leave the Profession.—I find that the most competent teachers leave the profession of teaching in a few years to follow some other more remunerative, if not more honourable. I often regret that the scholastic profession does not hold out more inducements for talented men to give themselves up to it for the whole period of their life. It is a great hindrance to the progress of education that there should be a constant change of badly qualified teachers for well qualified ones. Could not the Legislature of the country pass some law whereby the teachers' salary might be increased, and some better provision made for them in the event of being disabled by over-exertion or old age?

VII. COUNTY OF GRENVILLE.

ELEMENTS OF PROGRESS—GOOD EFFECTS OF DEVOTING THE CLERGY RESERVES TO EDUCATIONAL PURPOSES.

13. *Robert E. Brown, Esquire, Augusta.*—*Elements of Progress.*—All the Common Schools in this township have been in operation during the past year, and I have pleasure in stating that the teachers have, with few exceptions, given general satisfaction. In some School Sections the Trustees pay their teachers salaries which reflect credit upon their liberality, but in others the salaries offered are too small to secure the services of the best teachers. I am inclined to believe that the condition of schools would be materially improved, if five Trustees, elected by the people, and receiving the same pay for their services as the Municipal Council, should supersede the number now acting for the twenty-four schools.

Good effects of devoting the Clergy Reserves to Educational Purposes.—Other townships may now regret having applied their Clergy money to roads, bridges, and other purposes; but this township can boast of having invested it for school purposes, the interest of which for last year was \$955 51, which, added to the Legislative and County Grant, amounted to \$2,235 51. Some schools are supported altogether by their apportionment of the public moneys.

IMPROVEMENTS IN SCHOOLS AND TEACHERS—RESULTS OF WRITTEN EXAMINATIONS OF TEACHERS—GOOD EFFECT OF PRIZES.

14. *The Reverend J. B. Mullan, Edwardsburgh.*—*Improvements in Schools and Teachers.*—Our schools are evidently improving. Our teachers, with a few exceptions, are well qualified to teach all the branches of a Common School education.

Results of Written Examinations of Teachers.—This efficiency is the fruit of a careful written examination by the District Board. Many of them, however, labour under serious disadvantages in not having their schools properly furnished. It is most difficult to convince many of our Trustees that maps, globes, blackboards, &c., are necessary appendages. I am sorry to say that there are no libraries in connection with the schools of this township. We had a fine township library, but it was destroyed by fire a few years ago.

Good effect of Prizes.—In our schools where the merit-ticket system (of your Department) and the distribution of prizes have been adopted, the very best results have followed. We hope to see the day when this system shall be introduced into not only every school in Edwardsburgh, but into every school in Ontario.

DEFECTS OF THE SCHOOLS—POOR SALARIES OF TEACHERS—INCOMPETENT LOCAL SUPERINTENDENTS.

15. *William S. Ralph, Esquire, Wolford.*—*Defects of the Schools.*—As this is the first year I have held the office of Local Superintendent of schools, I cannot say much with regard to the general progress of the schools in this township. But considering the facilities now existing, under an admirable school system for the acquirement of a good Common School education, and the social position of the people of this municipality, I must confess that some of the schools are not equal to my expectations. When, however, it is known, that in three of the schools only, are blackboards and maps used, to the mind of any person at all conversant with the management of a school, it is not hard to arrive at the true cause of the difficulty. But to the credit of the Trustees with whom I have spoken on the importance of supplying their schools with suitable apparatus, they have admitted the truth and invariably attributed the want of due progress to be owing in a great degree to this cause.

Poor Salaries of Teachers.—The next difficulty that presents itself to the friends of education in this place, is the scanty remuneration the teachers in general receive for their services, the highest salary paid in this township not being equal to the wages of the humblest section-labourer on the Grand Trunk Railway. What effect this course will produce, it is not difficult to predict, already I think it is making itself felt, and if continued for any great length of time, must inevitably prove highly injurious to the cause of education in this township. There is another serious defect in this municipality, though, perhaps not so intimately connected with Common School education as those already mentioned; yet it is of too much importance to be passed over unnoticed—it is the absence of anything in the shape of a public or Common School library within the boundaries of the township. This is certainly a sad state of things to contemplate, particularly when we look back at the last twenty years' work, during which the great minds of our country have been labouring to lay the foundation of a system of education, which, if properly carried out, must prove a blessing to future generations. I endeavoured to bring before the minds of the people—both trustees and others, the benefits to be derived from the establishment of good school libraries in their different school sections, and I am happy to state that the suggestion was met in almost every case by the approbation of the people; and the result will be, I hope, the introduction of good libraries into some of our best school-houses before long. The irregular attendance of children at school during the spring, summer and autumn months, is owing in a great degree to the high price of labour in the rural sections

during those periods of the year. Distance from the school-house, storms and bad roads are the principal causes of irregular attendance in winter.

Incompetent Local Superintendents.—We frequently hear it remarked that the office of Local Superintendent though anxiously sought after by some, is in many cases by the same individuals very poorly filled, and this I fear myself, is perhaps is too often the case. The cause generally assigned for this, is the small emolument generally attached to the office; but looking at the exertions sometimes made to secure that office, one can hardly think that, in general, this is the case. My own experience leads me to think that the true cause of this very serious drawback in the working of our excellent school system is attributable in no small degree to a lack of knowledge on the part of many of our Local Superintendents, not only in the general management of a school, but even in the literary acquirements that our school law demands. A man may be a good practical farmer, or a successful merchant, but he may not make an efficient Local Superintendent of Schools without some practical knowledge in the art of teaching. In making the foregoing remarks, I have been guided more by my own experience in teaching during twelve years in this Province, than by anything I could have learned since I became Local Superintendent.

SCHOOL ATTENDANCE—RIGHTS OF CHILDREN SHOULD BE PROTECTED—PRIZES—SCHOOL HOUSES—NO THIRD-CLASS TEACHERS—EVILS OF CHANGING TEACHERS—REMEDY SUGGESTED—TEXT BOOKS—THINKS TOWNSHIP SUPERINTENDENTS BETTER THAN COUNTY SUPERINTENDENTS.

16. *The Reverend W. T. Cuning, Oxford.*—*School Attendance.*—The attendance of the pupils during the past year has been pretty satisfactory, yet improvement in this respect is necessary. There is a most laudable desire on the part of parents to avail themselves of the advantages of our excellent system of education.

Rights of Children should be Protected.—A few parents are indeed careless respecting the sending of their children to school, but their number is not large; and if a change were made in the school law as proposed, rendering attendance at school for at least four months in the year compulsory, it would, I believe, be an improvement, by thus *maintaining the rights of children* who are unable to defend them for themselves. No parents are so poor as to be unable to procure clothing to fit their children to attend school for at least this limited time.

Prizes.—The prizes given in a number of the schools have had a good effect—in some cases quite marked. The practice is to give something to each scholar. This is, I believe, the best plan, provided the prizes be *graded*, so as to be precise marks of the *relative merit* of the pupils. For there will be less ground to complain of invidious distinctions than when the premiums are given to a few, no matter how great the merit of these may be. My experience as a Superintendent of Sunday Schools has clearly taught me that this is the best method of distribution.

School Houses.—We have some good school houses. Five are of stone, and one of these (lately erected at Bishop's Mills) is a creditable structure. Three are frame buildings, and the rest are of logs, some of the latter being very poor, and quite unfit to accommodate a school comfortably. Scarcely any of the school houses have wood-sheds or water-closets for the children attached to them. I hope on future visits to induce Trustees to make some improvements in these respects.

No Third-class Teachers.—The revised programme for County Board examinations is carefully observed. The questions are written, but it is proposed soon to have them printed. The answering of candidates is improving. The last examination was declared to be more creditable to the teachers examined than any heretofore conducted. No *third-class* certificate was given, and those should indeed be wholly disallowed.

Evils of Changing Teachers.—The frequent change of teachers is an evil of which we, as well as others, have to complain. It tends to prevent young persons from elevating themselves in teaching, and lowers the profession.

Remedy Suggested.—This evil might perhaps be remedied by a slight change in the school law, making all agreements between Trustees and Teachers invalid, excepting for four or five years. No relaxation of the rules being allowed, except for reasons satisfactory to the

District Board of Education, which should judge in the case. A gradual amelioration would, I believe, thus take place. The changes arise as much from the fickleness of teachers, as from any other cause. The regulations for religious instruction are observed, but the Clergymen of the district take little interest in the matter. There is only one Common School Library in the township, and its volumes are, I believe, little read. The Trustees require more urging on this point. All the schools were *free* this year, except two, and the free system will soon wholly supersede rate bills.

Text Books.—The *Authorized Text Books* were used in the schools with very few exceptions. Most of the schools are furnished with maps, and some of those that had none, are obtaining them. At the risk of being thought to speak from questionable motives I would say, the present system of school superintendence should not be materially modified.

Thinks Township Superintendents better than County Superintendents.—County Superintendents will have little local knowledge of the schools—will not be able in cases calling for special visits, well to attend them, and the office will be one involving much additional expense. I believe the system of County Superintendence was to a large extent tried in this Province and abandoned. In Ireland, Inspectors of extensive Districts were appointed. From observation, I can say, that their visits were few, perfunctory, and attended with little good effect of any kind. The chief prosperity of the school, depended on the *patron* of it, under whose immediate supervision it was placed,—who knew its wants, and took the warmest interest in its welfare. I believe *forty*, or at most *fifty*, schools is the greatest number that should be under the supervision of one Local Superintendent. Of these, he is likely to have a good *local knowledge*, which is very necessary to his efficiency. As to substituting Township Boards of Trustees for the Section Boards, I believe the measure will meet with little favour, or rather be very unpopular, although it might help to remedy some evils, especially the too frequent change of teachers.

VIII. COUNTY OF LEEDS.

IMPROVEMENT IN TEACHERS FROM THE IMPROVED SYSTEM OF EXAMINATIONS.

17. *Walter Beatty, Esquire, Bastard and Burgess South.*—*Improvement in Teachers from the Improved system of Examinations.*—This being my first year as Superintendent, I am not in a position to say much with respect to the relative progress of schools in this and former years, except that there is now a better class of teachers than heretofore. We are just beginning to reap the benefits of having printed questions and requiring written answers in the examination of teachers. I think not less than one-half of those who formerly held 2nd class now have but 3rd, and most of those who heretofore held 3rd have been driven from the field altogether, and are thus prevented from imposing on ignorant Trustees, who, for sake of saving a few dollars, would hire them instead of a more competent person. Poor teachers had either to be *plucked*, or good ones could not get sufficient remuneration to induce them to continue to teach.

ATTENDANCE AT SCHOOL INFLUENCED BY THE CHARACTER AND SALARY OF THE TEACHER.

18. *The Reverend C. T. Denroche, Leeds and Lansdowns Rear.*—*Attendance at School Influenced by the Character and Salary of the Teacher.*—A variety of excuses for non-attendance are given, the chief of which are,—“indifference,” and “negligence of parents.” The true reason most likely is,—indifference and negligence of Trustees and Teacher; for where the Trustees know enough to pay a good salary to a competent Teacher, who is interested in the work, and faithful in the performance of the same,—non-attendance is a very small item. The “general regulations in regard to Religious Instruction” are not followed, because they are impracticable. In thirteen schools, the New Testament is used; twelve are opened and closed with prayer; in five, the Lord’s Prayer, and the Ten Commandments are taught. The “results” are good, as far as they go. “The revised programme for County Board Examinations” is observed. “The questions” are printed.

NO ENCOURAGING FACTS, AS "CHEAP" TEACHERS ARE PREFERRED.

19. *The Rev. James Gardiner, Yonge and Escott Rear.*—No encouraging facts, as "cheap" teachers are preferred.—1. The general desire is for cheap teachers, in this Township: Number 6 in Farmersville, is the exception. 2. The general population is imperfectly given—no better information available. 3. The cause of non-attendance is either too young, or neglect of parents; chiefly the latter. 4. At the meeting for this Circuit, in January, the questions were printed. 5. Had no knowledge of the Library, until the receipt of Annual Reports. It must have been neglected. 6. Most of the Sunday Schools are closed in winter—no means of furnishing particulars, as they are generally denominational. 7. Prizes distributed were so few, that no perceptible influence is seen. I intend to lecture in the several sections. I have been hindered by circumstances, and it is difficult to secure attendance. The national and authorized books are used exclusively in the schools. The supply is very defective, and it is difficult to get parents to purchase. The "general regulations in regard to religious instruction" are not adopted in any part of the Township. I decline to offer any remarks or suggestions, until I have more experience, and become more familiar with the working of the system.

NO PROGRESS WHERE "CHEAP" TEACHERS ARE THE ORDER OF THE DAY—BENEFICIAL INFLUENCE OF THE SEVEN GOOD TEACHERS.

20. *Robert W. Ferguson, Esquire, Kitley.*—No progress where "Cheap" Teachers are the Order of the Day.—I cannot boast of any improvement in our schools this year. There seems to be an unwillingness on the part of Trustees, to keep pace with the advancing salaries of teachers in other quarters; and a disposition rather to fall back on female teachers, of whom seven are employed this year, in this Township, thereby causing teachers of ability, to look for schools elsewhere, where they may obtain a better remuneration for their time. You will perceive by my report, that out of nineteen teachers engaged, only three of them hold first-class certificates. The Board of Examination makes use of printed questions, and are doing all in their power to raise the standard of qualification among the teachers, many candidates presenting themselves for examination at the last meeting of the Board, being unable to obtain even a third class certificate. With regard to the regulations laid down being followed up in the schools, as a general rule they are not, and a more serious evil exists in the want of good school houses, and having them well furnished, as some of the houses which you will see in the report as being built of stone, are not fit to keep a school at all in, being entirely out of repair. Others are very good, but all lacking the requisite apparatus for carrying out the well-working of the school law. With regard to the Libraries, there are none in the Township worth naming. Why the schools are not all opened and closed with prayer or the Bible and Testament read, I cannot say, as I see no reason for it not being done in each school in this Township except two.

Beneficial Influence of the Seven Good Teachers.—I must remark before I close, that in this Township, there are seven teachers who are doing all they can for the improvement of the pupils under their charge, and any person visiting their schools can see at a glance that their efforts have not been in vain; and out of that number two have attended the Normal School, which shows that a greater number from that institution would be of much service.

IX. COUNTY OF LANARK.

PROGRESS—EXCELLENT EXAMINATIONS OF TEACHERS—FEW NOT ATTENDING SCHOOLS—COMPULSORY LAW—HAPPY INFLUENCE OF PRIZES—SCHOOL HOUSES IMPROVING—"ROOT" SCHOOL HOUSE STILL REMAINING.

21. *The Reverend J. A. Preston, M. A., Beekwith and Drummond.*—Progress.—I am very happy to have it in my power to report a marked improvement in every one of the schools of the Township of Drummond, since I forwarded to you, my last annual report. I think, I can observe a growing interest on all sides taken in the good cause of educating the rising generation, which has its effect upon the several School Sections.

Excellent Examinations of Teachers.—The very respectable standard to which the Boards of Public Instruction, have raised the examinations of those who apply for certificates of

qualification, as Teachers of Common Schools, within the County of Lanark, has had the effect of producing a better class of teachers, and an improved style of imparting instruction. At all these boards, the candidates are subjected to as rigid a scrutiny as is possible under the revised programme; all the examinations are, I believe, conducted on paper, and at the two Boards of which I am a member, namely those which meet at Perth and Carleton Place, respectively, not only are a maximum and a minimum of marks adopted, but every subject has its due importance assigned to it, and those who excel are marked accordingly. To those, whose examination is passed with great credit, in the first-class, certificates are granted "with honours," and these certificates are granted till cancelled. The other candidates are granted first-class certificates for three years or for one year, according as their first-class certificate comes up to a certain grade. Of these grades, there are three, (A), the certificate granted with honours, and good until cancelled by the Board, (B) certificate granted for three years, and (C) for one year. With a view of inducing and encouraging the candidates to improve themselves, and to aim at acquiring a first-class certificate in due time, second-class certificates are only granted from year to year; and with a view of doing away as far in them lies, with the third-class certificate, the two Boards which I have before mentioned, will, for the future, grant this last certificate for six months only.

Few not attending Schools.—From the returns sent to me, I find that there are very few indeed of the children in school sections, under my superintendence, who do not come to school at all. Where this evil does exist the cause assigned is negligence of parents.

Compulsory Law.—I sincerely hope in any amendments to the school law which may be introduced hereafter, *Compulsory attendance* may be one of them, as it does seem but equitable that when people are taxed to give a system of education to all classes of the community, the law which binds the subject to pay the tax, should also bind him to take advantage of the privileges conferred by means of the money raised by such taxation. So far from this being in any wise arbitrary, it would, in my opinion, be much more arbitrary that the people should be taxed to give an education to every class, and that the class for which this was so much needed, should be permitted to despise the advantages offered, and allow their children to grow up ignorant, and as a natural consequence, vicious. The general rules for religious instruction, are no where observed in Beckwith and Drummond, and for the good and sufficient reason that it is almost impracticable to offer religious instruction after four o'clock in any of our rural sections. Children who have long distances to come to school and to return to their homes from school, are never very much disposed to remain after school hours, (already to much prolonged), to listen to the catechizing or advice of their respective ministers, and if they did remain, I fear that the instruction given would have but little weight. Of the very few libraries in the Township of Beckwith and Drummond, very little use is made, the books are in some instances, I believe, labelled and numbered, but in rare instances read, consequently they exert little or no influence in the neighbourhoods which possess them.

Happy Influence of Prizes.—In some few schools, prizes have been distributed, and I am quite sure with good effect. Of course a certain feeling of disappointment is felt on the part of the unsuccessful competitors, but on the whole, I say without hesitation that the distribution of prizes, has a healthy influence, and acts as a great stimulus to industry and exertion. In each of the townships, (Beckwith and Drummond) of which I am Local Superintendent, we had a competitive Township examination last summer, and although these were the first that had ever been held in the Townships aforesaid, and were but an experiment, they were very successful indeed. A fresh vigour appears to have been instilled into the different sections, and as far as I can judge, both teachers and pupils are looking forward eagerly to a similar competition this summer. Prizes were distributed after severe scrutiny into the attainments of the pupils, and the examinations were conducted by persons wholly unconnected with the Townships concerned, in order to insure the greatest impartiality, and all were highly gratified with the result. In some cases, the competition was of the keenest kind, and the issue was looked forward to with extraordinary anxiety.

School Houses improving.—There have been three new school houses erected, one in S. S. No. 15, Drummond, and another in S. S. No. 7, Beckwith, the former is a frame building of good size and proportions, well arranged and very commodious; the other is

a substantial log building, but a very great improvement upon the old one. There has also been erected in School section No. 4 Beckwith, a very substantial and well furnished school house of stone.

Root-house School Houses still remaining.—Still, I regret to have to say that in the very midst of prosperity and affluence, side by side with very superior dwellings, and fine buildings, and worse still, in some cases near large towns and villages, are still to be seen the primitive *root-house* shaped log school house of 30 or 40 years ago. Some of these dens are literally packed with children, and it is perfectly wonderful that the advancement which is expanding men's minds as to everything else, should not spur them up to replace such horrid blots upon progress with something more in keeping with the prosperity to be seen all around them; and if nothing else would induce the people of the sections where such ugly, dilapidated, cold and demoralizing structures exist, to exterminate them and erect suitable school houses, one would think that the fact that many instances of disease can be traced to the foul and fetid air of these cavernous places in summer, and the cold and dreary days spent by their children in them in winter, would induce them to reflect that more has been paid in many cases in doctors' bills, than all the taxes would come to, in providing healthy and convenient places where their young might be trained and educated. I am happy in conclusion to state that before another report is sent to you, I believe the reproach contained in these remarks will be wiped out in some of the sections of Beckwith and Drummond.

IMPROVEMENT IN TEACHERS AND SCHOOLS—NON-ATTENDANCE—PRIZES.

22. *The Reverend Alexander Mann, M.A., Pakenham.*—Educational affairs in this Township, were conducted during the last year, in a satisfactory manner.

Improvement in Teachers and Schools.—The qualifications of some of the teachers were of a superior order. This was abundantly evinced by the way in which they conducted the business of their schools, and by the progress made by their pupils. Their labours were also daily appreciated by those chiefly interested in the success of their efforts to benefit the youth under their charge. The attainments of the other teachers were respectable, and, all things being taken into consideration, their professional exertions merit commendation.

Non-attendance.—As respects the cause of the non-attendance of children of school age, I cannot assign a reason that would be of general application; I think, however, I am warranted in asserting that the cases are rare in which this proceeds from the indifference of parents or guardians. It appears to me, that there is an increasing desire that our schools may subserve intended purposes. In one instance, it is reported by Trustees, that their school was not opened and closed with prayer. In another, I am aware that the Holy Scriptures were not read. But when this was brought under the notice of those interested, it was ascertained that this was not the fault of either the Trustees, or the inhabitants of the locality. There is, therefore, reason to believe that this important part of school work, will not be omitted in future. The regulations in regard to religious instructions, have not otherwise been made available. The revised programme for County Board Examinations is observed, but the examination questions are not printed. It is evident from the reports of Trustees, that libraries are not answering the object for which they were intended. In order to promote their efficiency, it is necessary that trustees should take a greater interest in the matter, and that the number of volumes should be increased.

Prizes.—Very few prizes were distributed during the past year. But I am of opinion that the distribution of them would be productive of the best effects. On this account I have been recommending that this should be done in future in every school in this Township.

IMPROVED TEACHERS AND SCHOOL HOUSES—LIBRARIES—GOOD EFFECTS OF PRIZES—NON-ATTENDANCE.

23. *The Reverend William McKenzie, Ramsay.*—In presenting my *first* Annual Report, as Local Superintendent of Schools in this Township, I cannot speak authoritatively of the progress of education in this district, having had only a very partial acquaintance with the matter. Yet, there are visible marks of improvement.

Improved Teachers' and School Houses.—A higher class of teachers occupy the schools; better buildings are superseding the primitive log hut; and these are being furnished with a more sufficient apparatus. It will be a pleasure to note, in any future reports, still further progress in these respects. With regard to the special points on which I am required to report, I am not aware that in any of our schools, the regulations respecting religious instruction, are fully carried out. The revised programme is made the basis for the examination of teachers, and the questions are printed.

Librarians.—The school libraries are carefully kept; in some cases, the books are covered and in good condition; in others, very much the reverse. The Libraries are not as a rule, so much appreciated, nor so extensively used, as they might and ought to be; and their influence is thus greatly lessened.

Good effects of Prizes.—In a number of the schools prizes have been given, and I believe they have stimulated the pupils both to increased attention and a more regular attendance.

Non-attendance.—With regard to attendance, there is great room for improvement. A total on the various rolls of 1,343, and an attendance for the year of little over 500, is not a satisfactory state of things. The causes of this I can hardly descant upon; one main cause, I fear, is the indifference of parents, leading them to think lightly of irregular attendance on the part of their children, and preventing them from considering the damage they receive thereby. There are no other points on which I have any special remarks to make.

TEACHERS AND SCHOOLS IMPROVING—SCHOOLS FREE—NO DISPUTES.

24. *The Reverend Solomon Mylne, Montague.*—*Teachers and Schools Improving.*—The work of education goes on quietly and progressively, although slowly. I believe an increasing interest is felt by the parents to have their children instructed. There is also improvement on the part of the teachers both in acquiring knowledge and imparting it to the pupils. The answering of the teachers at the last examination is a proof of greater diligence in study, and my visits to the schools give me other proofs of the same. I find the Word of God read in nearly all the schools.

Schools Free.—The schools are all free in this township, with one exception.

No Disputes.—I may also add that I have never been required to act as umpire in a single case during six years. This speaks well for the harmony and good state of feeling among the people.

X. COUNTY OF RENFREW.

DIFFICULTIES ENCOUNTERED AND OVERCOME IN THE NEW COUNTRY—GOOD EFFECTS OF PRIZES.

25. *George Brown, Esq., Admaston.*—The Township Council has established one additional school section this year, making in all ten school sections in this township. The ninth school section formed in the preceding year, in consequence of the opposition of those ratepayers therein unfavourable to its establishment, did not get into operation, but now having got a school house erected, and school furniture provided, and a teacher engaged, it will be in operation on the first of April ensuing.

Difficulties Encountered and Overcome in this New Country.—I had considerable difficulty to encounter, and had to call several meetings of the rate-payers before I could convince the opponents to the establishment of the school of the suicidal policy they were pursuing in depriving their children of the benefits to be derived by a school house, so situated that their children could attend it, and obtain that which would fit them for taking a place in society, which they would otherwise never obtain. School Section No. 10, I trust will also be in operation in the month of April ensuing. I have much pleasure in reporting that in general, the schools in this township are doing well.

Good Effects of Prizes.—From the beneficial results arising from the distribution of the merit cards of the Department, and prizes in two of our schools during 1867, it is gratifying to state that other three of our schools have adopted this system of infusing energy and exciting emulation in their pupils; and I feel confident that they will find it a more

successful instrument than the rod. The cause of non-attendance of the children of school age, arises from two causes, viz :—the distance from the school house, and the carelessness of the parents. In several cases, it arises from the inability of the parents to provide proper clothing for their children, during the winter months.

CAUSES OF NON-ATTENDANCE—GOOD EFFECT OF RELIGIOUS EXERCISES, AND PRIZES.

26. *John McGregor, Esquire, Griffith.*—*Causes of non-attendance.*—The two children in section number one, that do not attend school, are too far from the school house of the section ; but the cause of the non-attendance (7 in No. 3.) is the indifference of parents.

Good Effect of Religious Exercises and Prizes.—The Testament is used morning and evening, and both the schools are opened and closed with prayer, and a great improvement is visible—not only in the children, but also in some of their parents. The revised programme is observed by the County Board, but the questions are not printed. There is no library in either of the schools. Prizes were not distributed during the year 1867, in any of the schools ; but the importance of merit cards of the Department and prize books, cannot be over estimated. The Local Superintendent's salary is only \$12 for both townships.

Matawatchesan.—The cause for 6 of the 14 that do not attend school in section No. 1, of this township, is that the children are too young to travel so far—the absence of the rest arises from the indifference of their parents. The Testament is used in this school, and the school opened and closed with prayer. The revised programme is observed by the County Board, but the examination questions are not printed. No library in the school. Prizes were not distributed in the school during the year.

SOME IMPROVEMENT—TEACHERS' ASSOCIATION—POOR TRUSTEES, TEACHERS, AND SALARIES.

27. *The Reverend John McEwen, Alice.*—*Some Improvement.*—Some progress has been made in the township of Alice, during the past year. The attendance in the schools has been larger than in former years, and I think the teaching more thorough. The faithfulness and energy of the County Board is doing much in elevating the teachers.

Teachers' Association.—An association for the teachers has maintained a struggling existence, but these associations will never be useful, practicable and effective in remote settlements, until the Department can say to County Boards, Teachers and Trustees, that so many days shall be given in the year to institute work, and no break in the time of the school be charged or recorded because of this work, making attendance imperative through the Board.

Poor Trustees, Teachers and Salaries.—Drones in the profession are too careless to attend, and Trustees too blindly selfish to allow a teacher the privilege, deducting the time from the miserable salary. The desire for a better class of teachers is growing ; but competent remuneration is far behind. A man that saws wood does, financially, better, than the instructor of youth. The people here, taken as a whole, are still in the struggles of a new settlement, and the past year has not been one of special encouragement. In some parts of the township where the German population form a part of the community, there is an unhappy restlessness among them ; they do not take kindly to our schools, and are putting forth strong efforts to establish a Lutheran Separate School. This is to be deprecated as it will weaken efforts on all sides

XI. COUNTY OF FRONTENAC.

CAUSES OF NON-ATTENDANCE—GOOD INFLUENCE OF PRIZES—DEFICIENCY OF LIBRARIES.

28. *Donald McRae, Esquire, Kingston Township.*—*Causes of Non-Attendance.*—In some Trustees' reports for non-attendance—"Poverty" is given as the cause. In others "Indifference of parents." These statements, in many instances, I have no doubt are correct ; but I have known very poor parents who were extremely anxious to educate their children, and who have even pinched themselves in the necessaries of life to do so. My own impression is, and I have had twenty-five years experience as a common school teacher, that ignorance in parents is one great cause. They have had no school instruc-

tion themselves; and in reasoning with them on the subject, the reply is: "We have got on in the world well enough without it, and our children will do well enough likewise." Another cause that has a sensible effect, is a penurious disposition on the part of parents. Many, to my knowledge, keep their children from school because they are useful at home, save hired work on the farm, &c.

Good Influence of Prizes.—My experience in reference to the distribution of prizes in common schools is decidedly favourable to the great benefits derived from that course. It not only has an influence in causing a larger attendance of pupils, but excites also a stimulus in regard to a better preparation of their lessons, their recitations and other studies pursued, that is highly pleasing to the teacher, and, I believe, causes the parents to take a greater interest in the school.

Deficiency of Libraries.—It is humiliating to record, that in such a wealthy township as Kingston, there are only two Common School libraries, and one—that in No. 2 Section—I am informed by the teacher, is, comparatively speaking, worthless, composed of old and worn out books, and exercising no perceptible influence. In my visitations I shall endeavour to impress upon the minds of the people the great advantages to be derived from a good library.

COUNCIL AIDING IN PROVIDING SCHOOL MAPS IN THE NEW TOWNSHIP—GOOD EFFECT OF PRIZES—HOPE OF THE FUTURE.

29. *David Osborne, Esquire, Kennebec.*—*Council aiding in Providing School Maps in the New Township.*—I am happy to say that our Municipal Councillors are beginning to take an interest in School affairs; they have already assisted Olden to purchase maps for Union Section No. 1, and have granted five dollars to Section No. 2, to which I intend to add two dollars more. You will soon receive an order from the Trustees for what they may need. We have not done much this year, but I feel confident we shall do a great deal better, I think we shall have four or five Schools in operation in the Spring. This is a new township, and most of the people are very poor, to which I attribute mainly the cause of non-attendance.

Good Effects of Prizes.—We had some small prizes awarded with beneficial results; they encourage the scholars and create good and kindly feelings towards the teacher, who, in all cases, should distribute the prizes.

Hope of the Future.—I am inclined to look with hope to the future, but we cannot expect to rival older townships; but as parties are now taking an interest in School matters, who before rather discouraged them, on account of the extra tax they had to pay, our Schools under the present School laws and regulations cannot fail to bring good results to our new Dominion. I hope you may be able to grasp the hands of some of our young men from Kennebec who are now boys, being trained under the present School System to fill posts of honour and own you, under Our Heavenly Father, as their benefactor.

TWO NEW SCHOOL HOUSES, BUT NOT MUCH ELSE DOING IN THIS NEW TOWNSHIP.

30. *William Armstrong, Esquire, Oso.*—*Two new School Houses, but not much else doing in this new Township.* You will see by the report that there were two new school houses built last year, but school has not yet been opened in them, but they will be opened in spring. The cause of non-attendance may be "indifference," as stated by all the Trustees, but I think there are other causes. The Bible is read in all the schools. As regards religious instruction, the Ten Commandments are taught, and in one or two schools, fully carried out. The revised programme for the County Board is observed, and the questions are printed. There are no libraries; I have used all the influence I can to get one. Newspapers, I think, supply the place of libraries. There are no prizes in any of the schools.

PROGRESS—NON-ATTENDANCE OF PUPILS.

31. *John Canning, Esquire, Olden.*—*Progress.*—The schools are in a progressive condition.

Non-attendance of Pupils.—With regard to the non-attendance of children of school age, I must certainly attribute the cause to carelessness of the parents.

CAUSES OF NON-PROGRESS—USEFUL INFLUENCE OF PRIZES—INDIFFERENCE OF PARENTS
—TEXT BOOKS AND MAPS.

32. *The Reverend Thomas S. Chambers, Storrington.*—In taking a retrospective view of the interests of education in this Township during the past year I cannot single out much worthy of special notice. Trustees and teachers have been pursuing the even tenor of their way, carrying out in general the letter of the law, but doing little more.

Causes of Non-Progress.—Trustees have generally no small amount of troubles, and have not always the cordial support of all the people. This tends very much to diminish the degree of their interest and zeal. Various reasons are assigned for the non-attendance of children, the chief one being the indifference of parents. Poverty has little to do in this Township with the detention of the young from school. Parents are frequently improvident and devoid of sufficient forethought, to have their children prepared for the seasons as they change. The services of the larger scholars are utilized during harvest, as is common in most (if not all) country districts. I have had occasion, in every report I have sent you, to state that the general regulations in regard to religious instruction are not carried out in this region. All that can be undertaken in this department devolves on parents and Sabbath School teachers. The County Board of Public Instruction follows the directions furnished for examinations, and makes use of printed questions. Some of its members are among the ablest scholars in this County, and are well acquainted with education in its practical aspects. The candidates are subjected to a searching examination, and find it no easy matter to pass through the ordeal creditably. In fact the strictness and faithfulness of the Board were lately made the matter of animadversion and complaint in one of the Kingston papers. I refer to this as proof that the work is not negligently performed. The calling in of some of the certificates has been deferred, pending the anticipated constitution of the proposed new Board of Examiners. The people in this region are very indifferent about both libraries and prizes.

Useful Influence of Prizes.—The distribution of prizes is an extremely rare occurrence, and thus one important stimulus is wanting to nerve the youth in their attempts to ascend the hill of knowledge. A little money appropriated in this way would be highly conducive to advancement on the part of pupils, and would make the teachers' work more pleasant and encouraging.

Indifference of Parents.—When teachers witness a great lack of interest on the part of parents they are in danger of imbibing the same spirit, and allowing matters to go on in an easy manner. Were parents, who are the natural guardians of their offspring, to manifest more lively concern for the progress of education, it would exert a happy influence on both Trustees and teachers.

Text Books and Maps.—I trust that the new series of school books which, with a few exceptions, are a decided improvement on the old, will tell for good on the rising generation. I think that the pictorial illustrations which are so largely employed will render the reading matter more interesting and attractive. I would fain hope that as we have entered on a new era in our national history, the cause of education in our province will make more rapid strides, and thus prove an eminent means of fitting the people for the performance of their duties in an intelligent and faithful manner. May our Dominion be characterized by righteousness and true knowledge.

IMPROVEMENT IN SCHOOL-HOUSES AND SCHOOLS.

33. *George Malone, Esq., Wolfe Island.*—I am gratified to be able to speak well of the working of the system during the past year. I have nothing in particular to complain of. The teachers employed, on the whole, appear suited to the stations they hold. Some, no doubt, are "pursuing knowledge under difficulties," but still, they are "making their mark," and deserve encouragement.

Improvement in School-Houses and Schools.—I am especially pleased to be able to tell of the downfall of another shanty, where from 80 to 100 children were sometimes huddled together for the purpose of learning (!) in a space of about 18 feet square. I allude to Separate School No. 1, where a very substantial and commodious frame building has been erected and furnished with the necessary accommodations for the proper training of

the youth of the neighbourhood. The Separate Schools here, two of which are in a very flourishing state, owe much of their present efficiency to the energetic and persevering efforts of the Rev. Mr. Stafford, who takes a very lively interest in the education of his people,—commending and encouraging the industrious and painstaking teacher, and making the situation of the careless and inert somewhat uncomfortable and short-lived. I have doubts as to the correctness of some of the answers given in the Trustees' report with regard to the population of their sections, and also with regard to the number of children not attending any school. This incorrectness arises, I presume, not from any intention to deceive, but from indifference and carelessness in making the necessary inquiries on the subject, as I am certain some of the numbers have been set down quite at random. The fifteen schools of this township have been in full operation during the whole of the past year.

SCHOOL HOUSES GOOD, BUT NOT FURNISHED—LIBERALITY OF THE TOWNSHIP COUNCIL—GOOD RESULTS OF PRIZES.

34. *William Deighton, Esq., Barrie.*—The aggregate attendance in our schools is a decided improvement upon last year. The cause of non-attendance in Sec. No. 4 and 5 is principally want of clothing, the sections are very poor and parents negligent, and the distances in some instances with bad roads are another drawback.

School Houses Good, but not Furnished.—I am happy to state that our school houses are all good and comfortable, being built of square timbers, but not one school in the municipality is furnished with maps, apparatus or library.

Liberality of the Township Council.—No. 1 Section has built a good school house this year, which has made a marked difference in the report, and our Municipal Corporation have been very liberal in granting money to each section, or our school must have been closed earlier this year. The general regulations in regard to religious instruction are not followed. The revised programme for County Board examinations is strictly observed and the questions printed.

Good Results of Prizes.—A limited number of prizes were distributed in Section No. 1, with satisfactory results.

XII. COUNTY OF ADDINGTON.

DOINGS IN THE NEW TOWNSHIPS.

35. *William Hames, Esquire., Denbigh, Abinger, and Ashby.*—*Doings in these new Townships.*—I am happy to say that the few Schools under my charge are in good working order. There are but two Schools organized as yet in this Municipality, but we hope to have No. 1 as a union with part of Miller, as the Section itself is not able to keep a School open, and to have it opened in May next. We have no Common School Library, but there is a Sunday School Library in Section No. 2, which the children and parents think quite a boon in this back country. The Trustees of Sections Nos. 2 and 5 have applied for maps, and wish it was in their power to send for a lot of books, the absence of which I think is the greatest cause of non-attendance, as there are but few sections which labour under so much difficulty, as we are some seventy miles from our market town; and you will see by the report that we have taken a high stand in employing teachers qualified to teach and to attend to their duties. The examination programme is duly observed, and the questions are printed. Religious instruction is adhered to in one school. As to prizes, we have not been able to get any for the Common School, but have distributed some with good effect in the Sunday School. We all hope that by a liberal grant from you, the Trustees will be able to pay the teachers promptly, and then, by the blessing of God, we will try and give to our children what many of our forefathers never got, namely, a good education.

ADVANCEMENT OF THE SCHOOLS—FEW NON-ATTENDANTS—SALUTARY INFLUENCE OF PRIZES—COUNTY BOARD.

36. *Samuel D. Clark, Esq., Ernestown.*—*Advancement of the Schools.*—With reference to the past year I may observe there is a steady and uniform advancement in those parti-

culars that indicate a growing interest in the necessity of securing for our children a sound and liberal education.

Few Non-Attendants.—Comparatively few children have not attended any School. Notwithstanding the shortness of the Crops last season, the average salary paid teachers has largely advanced, and there has been less changing of teachers than is often noted. Our schools have been kept open a greater average time than in any period of our past history, while the average attendance has also advanced.

Salutary Influence of Prizes.—More prizes than usual have been distributed and with very gratifying results. A greater number of our schools have been free—by far the greater part of them, comprising our largest and most populous sections. I have also the satisfaction, this year for the first time, of reporting a School Library received from the Department, which is a credit to the intelligence and liberality of No. 20. Through the prudence and good judgment of our Township Council, we have every dollar of our share of the Clergy Reserve money invested for educational purposes, the interest of which, now very nearly reaches the nice sum of one thousand dollars annually. This is apportioned to the Sections according to the time they keep open their schools, acting as a great stimulus to small Sections to keep open their schools, and is a set off to the larger Sections receiving the greater share of the other school grants. As to the internal working of our schools, there is not that numerical advancement in the more advanced classes that we could desire, nor is there that thorough and systematic classing that we think would be conducive to uniform advancement (at least in some of our schools). Yet we think our public examinations have indicated a more thorough acquaintance with the subjects taught than has sometimes been noticeable. Beyond the reading of the Scriptures and the offering of prayer, not much (so far as I can observe) attention is paid to religious instruction. Ministers of the Gospel of any denomination seldom visit our schools. The cause I cannot report. I hope they do not think them beneath their notice.

County Board.—As to our County Board, there is occasional fault finding on account of its doings and expensiveness. I feel bound to say there has been but one desire on the part of the Board, and that has been to do their work impartially and to the very best of their ability. The examination questions are printed.

STATE OF THE SCHOOLS—SOLITARY INSTANCE OF OBJECTING TO PRIZES.

37. *The Rev. John Corbett, Anglesea and Kaladar. State of the Schools.*—I am happy to say that in this isolated region of forest and rocks, we are making some little progress in education, as far as circumstances permit; but these are very unfavorable. The people here are very poor, and yet it is not poverty in general, that prevents the children in this municipality, making progress, for the schools are all free. Some of the children being very poorly clad, and living at considerable distance from the nearest school occasions a falling off in their attendance during the winter months. Others, again, are prevented from attending, either summer or winter, by the impracticability of crossing over creeks, where there are no bridges, or through swamps, or over marshes where there are no roads, whilst others are prevented from attending, where the distance is too great for the children to travel. I think the want of attendance is more attributable to the above reasons than to the indifference of parents. Where the opportunities of attending are favourable, the attendance is good. And taking into consideration that we can only get second and third class County Board teachers, I believe the progress in education here will compare very favourably with that obtained in some towns and villages. Where we have a faithful teacher, even of very moderate abilities, it is surprising, sometimes to find how much the children will be advanced, in six or nine months.

Solitary Instance of Objecting to Prizes.—I believe the distribution of prizes is not attended with as good results as some people think. The opinion among the people that partiality is sometimes exercised by those who distribute them, does in many instances, much harm, and it is almost impossible to prevent this opinion being entertained by some people. I am of the opinion myself that the money expended last year in procuring prize books, could have been more wisely appropriated in procuring school apparatus, of which the schools here are deficient, even of the simplest kind. With regard to the revised programme for County Board examinations, we found it to be necessary at our last meeting

to have a *visa voce* examination in addition to the printed questions. I am much pleased to state that we are making some little advancement with regard to religious instruction. For instance, last year we had only one school opened and closed with prayer, and this year we have two, and are about to have a third opened and closed in the same way. One of these two is where almost an equal number of Protestant and Roman Catholic children attend, and yet, apparently, no offence is taken. I am happy also to inform you that the Scriptures are now read in three of the schools in this Township. In connection with my school examinations and lectures, I always recommend and try to inculcate moral and religious principles, and I find it to be attended with good results.

XIII. COUNTY OF LENNOX

SCHOOLS ADVANCING—GOOD EFFECTS OF DISTRIBUTING PRIZES.

38. *Augustus Edgar, Esquire, Fredericksburgh North.—Schools Advancing.*—The schools under my charge are progressing finely. There has been an increase in regularity of attendance during the year, and the schools are in a more healthy state, owing in a great measure to the severe examination which teachers are now subjected to (in comparison with what they formerly had) by the Board of Public Instruction for this County, thus throwing out all who were incompetent, and the result is, we have a far better class of teachers than formerly. The questions are all printed. I have to report 39 children as not attending any school. The general reply to the enquiry is, neglect of parents. I might add of Trustees also, in not visiting those people and inducing them to send their children to school.

Good Effects of Distributing Prizes.—Prizes were given in but two schools, and in a great measure stimulated the scholars. I think if more attention was given to the distribution of prizes and rewards, it would be better for all parties concerned. The library branch is not properly reported. I believe that there is a Sabbath School in every section in the Township, and a library of some sort, but the Trustees do not like to take the trouble to ascertain their value, so as to report them properly.

WISE POLICY OF THE TOWNSHIP COUNCIL—IMPROVEMENTS IN THE SCHOOLS—PRIZES LIBERALLY AND MOST BENEFICIALLY DISTRIBUTED—FINE EXAMPLE OF PROVIDING THE MEANS.

39. *John O. Sezsmith, Esquire, Richmond.—Wise Policy of the Township Council.*—The Municipal Council of the Township invested their apportionment of Clergy Reserve money (amounting to about \$9,000) for educational purposes, the interest of which at present comes to between \$500 and \$600 per annum. This assists Trustees very materially in paying the salary of teachers, especially in the rear part of the township, where the people are mostly poor.

Improvements in the Schools.—I am sorry I have it not in my power to report a larger average paid to teachers; there is, however, an advance on the previous year to both male and female. I need not inform you that good and efficient teachers, either male or female, cannot be obtained at low wages. I have known Trustees for the sake of a few dollars on the month's salary to deprive the section of the benefit of a school nearly the whole winter. In my official visits and intercourse with the people, I have endeavoured to impress upon Trustees and parents the importance of co-operation on their part with teachers, in order to secure success in the education and instruction of their children. The examination questions are printed, and there appears to be a determination on the part of the County Board to raise the standard of education, doing away with third-class certificates altogether. This, I think, a move in the right direction. The books obtained from the Department were called in by the Council, and it is arranged to put them into circulation the present year.

Prizes Liberally and most Beneficially Distributed.—During the summer, prizes worth about \$118 were distributed to all the schools, on the merit system recommended by yourself, viz.:—Punctuality, Diligence, Good Conduct and Perfect Recitation, which appeared to encourage and delight the children very much. In order to accommodate the pupils and

secure a larger attendance of the parents and friends, I appointed three places—Mount Pleasant, Selby and Roblin—for the distribution of the prizes. As the days were very fine, it would have delighted you to have seen the children, teachers and many of the parents and friends of education flocking to those centres of attraction, where addresses were delivered, hymns sung by the children and the prizes awarded.

Fine Example of Providing the Means.—I ought, perhaps, to inform you how I obtained so large an amount for the above object. The Municipal Council appropriated \$20, the teachers \$17, and I gave \$12 which, with a donation of \$10 from R. J. Cartwright, Esq., M. P. P., and the one hundred per cent. added by the Department made a total of \$118. In concluding these remarks I would wish you every prosperity and success in that cause in which you have been so long engaged.

XIV. COUNTY OF HASTINGS.

MARKS OF PROGRESS—IMPROVEMENTS SUGGESTED.

40. *Frederick H. Rous, Esquire. South Riding.*—*Marks of Progress.*—The Readers just published, are welcomed with warm expressions of approval, by almost every teacher with whom I have conversed since their appearance; and in this prevalent opinion of their fitness for their intended purpose, I do most heartily coincide. We are looking out with keen interest, and perhaps some impatience for the appearance of the Companion to the Readers. I hope it will be so complete as to supersede the Spelling Book Superseeded, useful as it has been in its time. I very much hope that the new edition of Lovell's Geography, with its new maps, is nearly ready; for it is much needed. The New Mensuration too, is a great desideratum, and ardently longed for by many. As to the Grammars, I wish respectfully to submit, that it is desirable to omit one of the two from the list. Before you had sanctioned Bullion's, our County Board of Public Instruction wished for the small edition of Robertson's for beginners; but both of them do not seem to us to be needed. Perhaps, on the whole, Bullion's is the more likely one, on account of the many aids that it gives the teacher. Every move in the direction of lessening the variety of books in use in our schools, will, I think, be generally accepted as a boon. *Causes of Non-Attendance.*—One great cause, no doubt, is the indifference of parents arising from ignorance, or want of appreciation of the great importance of education. Connected with this, and perhaps growing out of it, is the strong tendency among too many, to close the hand upon any out-goings, except those invested in animal and personal enjoyments,—but in my opinion the main cause is to be found in the scarcity of teachers that are really well qualified for their work.

Improvements Suggested.—The remedy for this must be, I suppose, in gradually raising our standard for teachers, and by cutting off the unqualified, causing a *great though gradual increase in the remuneration* of those who are in their right vocation and understand their duties well. But there is one point in this connection, that appears to me an essential one to remember. The standard of governing powers and of teaching ability, requires raising far more than that of mere School and College acquirements; yet the last is the only one that can be represented under the present system, in the certificates from our County Boards:—and I think, that before long, one of two plans should be adopted. Either the County Boards should be required to give a whole week to the examination, and to make their arrangements for having classes for the candidates to experiment with, and in this case, one examination in the year might be found sufficient; or perhaps it would be better still, to allow none to teach who have not passed through the Normal School, where certificates should surely be withheld from those who shew a radical deficiency in the governing or teaching power. We continue to follow the revised programme for these examinations, to give out printed questions, and to require written answers. *Religious Instruction.*—Nothing new to report, unless it be that there is a growing conviction, that giving portions of Catechism, or even of Scripture, to commit to memory, is *not* Religious Instruction. *Libraries.*—These are in the same neglected state, little used, and less cared for. When I saw in the Annual Provincial Report, your new maps, shewing in what parts of the Country the libraries are supposed to be diffusing a beneficial light around them, as shewn by the cheerful rose-colored tint, given to certain townships, I could not help

feeling that it is delusive, so far as our County is concerned. Before closing, I wish to record my deliberate conviction—shared in by many who opposed your views, at the time of our Country conventions,—that there is urgent need of some such changes, as those you then proposed to embody in a new school law. I trust, that these and other improvements, will in due time overcome all opposition—for “Truth is mighty and *must* prevail” in the long run.

CAUSES OF DECLINE IN ATTENDANCE OF PUPILS—HON. MR. FLINT CONTINUES HIS GIFTS FOR PRIZES—THEIR SALUTARY INFLUENCES.

41. *T. S. Agar, Esquire, North Riding.*—*Causes of Decline in Attendance of Pupils.*—The schools of North Hastings, exhibit a decrease in the average attendance during the year 1867, which I attribute to the following causes: 1st. The Gold excitement in the rear townships of the Riding. 2nd. The suspension of Public township examinations during the year. 3rd. The want of teachers. *The Gold excitement* during the first half of the year 1867, was the cause of many pupils in the rear townships of the Riding being withdrawn from the schools, and continuing so, until the excitement in some measure subsided, and business resumed somewhat of its accustomed routine during the last autumn.

Hon. Mr. Flint Continues his Gifts for Prizes.—In consequence of the political changes caused by the establishment of the Dominion, we were deprived of the annual donation for prizes, by the Hon. B. Flint, and the public township examinations were therefore suspended. I am happy to state they will be resumed in 1868, Mr. Flint having notified me that I might inform his *young friends* in North Hastings, that he proposed again making his annual donation of ten dollars, to each township, on his former terms.

Their Salutary Influences.—This announcement will doubtless be attended with the same results as formerly, viz : an increased daily average throughout the Riding. *Want of teachers.*—The Boards of Public Instruction for North and South Hastings, having decided to give certificates for six months only, to teachers of a certain grade in 3rd class, and for that portion of the county in which they obtained their certificates, I found as the result, a want of teachers for some of the sections for a portion of the year, and consequently a falling off in the average attendance. I must add, however, that the Trustees and inhabitants generally, made every effort to obtain teachers by advertisement, &c. This was highly gratifying, as indicative of the desire of the people for the education of their children, and that the closed school was not an evidence of the indifference of parents to their education. The examinations for 1868 will be conducted upon the same plan as heretofore observed, viz :—A competitive examination in each township in the following branches : For pupils of 12 years of age and upwards, Geography, Sangster's first Arithmetic. For pupils under 12 years : Spelling, 3rd book with definitions, Mental Arithmetic. Three prizes will be competed for in each of the above branches. The balance of the prize books purchased from Mr. Flint's donation, and a corresponding grant from each township, will be apportioned to the schools, in proportion to their average attendance ; and the books thus apportioned will be competed for at examinations in each school section, one week prior to the township examination. The school section examinations will comprise all the branches taught in the school, except those to be competed for at the township examinations. I recommend in each section, that one, or more prize books shall be awarded, for good conduct and regularity of attendance. It affords me much pleasure to state that the old log school houses in North Hastings are gradually disappearing, and being replaced by superior stone, brick or frame buildings. Two new frame school houses were built in 1867, and arrangements are being made for the building of others in 1868.

XV. COUNTY OF NORTHUMBERLAND.

PROGRESS—CONSTITUTION OF COUNTY BOARDS—MODES OF EXAMINING AND LICENSING TEACHERS—MODES OF TEACHING ARITHMETIC AND THE READERS—SCHOOL HOUSES—JOURNAL OF EDUCATION.

42. *Edward Scarlett, Esq., County of Northumberland.*—*Progress.*—The progress of edu-

cation in this County has been as rapid during the past few years, as could reasonably have been expected under the present system of licensing teachers.

Constitution of County Boards.—I take the liberty of respectfully suggesting a change, regarding the boards appointed to carry out this most vital part of the school law. While there are a few members of our County Boards of Public Instruction, who would be an honour to any profession or position, yet the remuneration for their services as examiners, is entirely too small to allow them to devote time enough (from their more immediate calling), to a work so important, and responsible, as that of investing men and women with authority to go forth and form the characters of the youth of our country, and to a great extent shape the destiny of our Dominion. There are other members whose business talents are of a high order, but they find themselves in an awkward position, when brought to sit as judges on the fitness of candidates for an office of which they have very little knowledge by experience. My humble opinion is that the law respecting the Boards of Public Instruction should be altered, and men appointed for the very express purpose of examining and granting certificates of qualification to Common School Teachers. Many difficulties, doubtless, are in the way of such a change; but judging from the past, we have confidence that the men who have so far matured and conducted our educational system, have skill and ability to perfect what is lacking in it, when the proper time comes for reform.

Modes of Examining and Licensing Teachers.—Teachers.—The ability to command the esteem of parents and guardians, the moral power to win the respect of pupils, and the art of imparting instruction, are mental and moral qualities, indeed natural gifts which are, unfortunately, too often lost sight of in licensing individuals to perform the arduous duties of school teachers. Energy and enthusiasm under the direction of good judgment and sound discretion are qualifications no less important than those just mentioned. A man without these natural gifts may do something towards *keeping school*, but unless these qualities are implanted in his nature by the Divine Hand, no process of educational training will transform him into a successful instructor. For as surely as the organization through which the soul of a true genius manifests its high and holy aspirations is the choice gift of our beneficent Creator, so the true teacher must be the recipient of special talents for his high and responsible calling. Happy the School Sections where such individuals have the oversight of youth! Ardent whole-souled men and women, whose great life work is to enlighten, draw out and mature the innate powers of fallen humanity, and give our race deeper and loftier views regarding the relations to each other, and He, who is the supreme centre of love, justice, goodness and purity. Too much vigilance cannot be exercised in discovering who are the proper individuals for executing this great work. Men, from various motives and mistaken notions have abandoned a calling so glorious, but the man, who has the right views of life, and of the *higher life*, will endure the contumely and reproach of worldly men, who treat with disrespect the humble teacher who is higher in the scale of God's workmanship than themselves. In those schools where great pains have been taken with the small children for the last four years, I find the greatest improvement. A few of the most advanced Common Schools that I have ever seen have been taught in this way. In my experience with schools I find that if the ground-work of an education is not well laid in the first and second books of our school series, and if the other subjects of study laid down in the "Programme" for pupils in those books are not thoroughly mastered before going into the third book of lessons, a golden opportunity is lost which seldom can be regained in after school days. Indeed, it is surprising to see what can be done in the elementary branches of an English education, by the judicious training of children from seven to nine years of age.

Modes of Teaching Arithmetic and the Reader.—In a few of our schools, (country schools too), where pains have been taken with the pupils of those ages. when they arrive at the age of nine years, they have mastered the simple and compound rules of arithmetic and vulgar fractions; the relative positions of all the political divisions of the globe, with their mountain ranges, seas, lakes, rivers, gulfs, bays, &c., and are able to tell nearly all the parts of speech, that may occur in any of the reading lessons of the 2nd and 3rd Readers; to write down by dictation the more difficult words in any of the lessons read. I would here remark that in the schools referred to, the teachers cause the youngest children to print letters, form them into words, and write the common text hand on slates. They make the pupils in

the second Readers write all the lessons to be read. In this way very great progress is made both in reading and spelling. In the third and fourth books the pupils write part of each lesson, as well as get the meaning and roots of the most important words, and the master, at the close of each lesson, causes the scholars to re-write some of the words most liable to be misspelled. By such a system I find the best readers and spellers made. In the fifth book of lessons, a few of our teachers make their pupils write a brief sketch of what they have learned from this book during a week; by this mode I find great accuracy in recitations.

School Houses.—Several fine new school houses have been built during the past few years. Five substantial brick buildings and one good frame, in the township of Hamilton. One of brick in Cramahe. One of stone and one of brick in Brighton township. One of brick and one good frame in Seymour. Two fine frame buildings in South Monaghan. One splendid frame building in Alnwick. A very grave defect in all these buildings, however, is the lack of ventilation on scientific principles.

Journal of Education.—This valuable and highly edifying periodical is well received by the more intelligent portion of the community, and its articles and selections much prized, on account of the chaste, high-toned moral bearing that they exercise on the people. Such reading cannot be too widely circulated, in order to counteract the pernicious tendency of much of the light literature of the day.

XVI. COUNTY OF PETERBOROUGH.

NEW SETTLEMENT STRUGGLES—SCHOOL HOUSES AND THEIR FURNITURE—BENEFICIAL DISTRIBUTION OF PRIZES—INDIFFERENCE OF SOME UNEDUCATED PARENTS—CAUSES OF NON-ATTENDANCE.

43. *Edward Smythe Hall, Esquire, Burleigh.*—*New Settlement Struggles.*—I beg leave to report, that one new school has been opened in the township of Burleigh, during the past year, known as school section No. 2, Burleigh. It is a poor section, there only being about 25 rate-payers to maintain the school. I am afraid it will hardly be in existence another year, as several of the rate-payers who have no children to send, grumble very much at the high rate of school taxes. In fact, they would not be able to keep it open now, were it not for the aid they have got from the Municipal Council, who granted \$100 to each of the four schools. Application has been made to me, to procure for this section some aid from the poor School fund, which is much needed; for the parents, with few exceptions, are obliged to work out to support their families.

School Houses and their Furniture.—The School House in Union School Section, No. 1 Chandos, was burnt down last fall, and they have been using a private house since; but I am happy to say they are now about building a new one. All the school houses are log ones, and all as good as can be expected in the present circumstances of the sections to which they belong, and may serve a useful purpose for some years; but I am sorry I cannot say this of all of them, as there is one which is totally inadequate for school purposes, and insufficient for the accommodation, health and comfort of the children. This school is supplied with maps, but it is so small and low, that there is not room to exhibit them. School Section No. 1 Burleigh, is also supplied with maps, the other two are not, but I trust they soon will be as I have explained to Trustees the necessity of having them.

Beneficial Distribution of Prizes.—Prizes were distributed in all four schools, and I am happy to say had a very beneficial effect on both parents and children. I regret to say, that there are no libraries in any of the sections. Time, I find, must be given the people on this subject.

Indifference of some Uneducated Parents.—There seems a perfect indifference amongst the inhabitants of these townships to the pleasure derivable from a well selected library. The inhabitants are principally composed of a class of men who have received little or no education, though there are some who have received a good education; and I am sorry to say more to their shame, that the latter are still more indifferent than the uneducated.

Causes of Non-Attendance.—The causes of non-attendance are various. Many of the larger children have to be kept at home to work, and in some instances where the larger children do not attend, the smaller ones cannot; during some seasons, others have to stay in doors for want of shoes and clothes. Distance and the state of the roads, also operate

on the attendance. However, a good many in the different sections, have attended pretty regularly. All the schools are free. I hope next year to be able to give a more favourable report on these subjects. I have had a deal of trouble to get the annual reports from the Trustees, which accounts for mine being so late.

PROGRESS IN NEW SETTLEMENTS—MAPS, LIBRARIES, PRIZES, &c.

44. *The Reverend Frederick Burt, Dysart, Galway, Minden, Lutterworth, &c.*—*Progress in New Settlements.*—The cause of education has not retrograded in the northern parts of the counties of Peterboro' and Victoria, during the past year. But in my charge, the greater number of schools have been kept open a whole year, and quite a large aggregate attendance has been attained in many schools. In nearly all the sections, the trustees have done good work, they are zealous, and anxiously desirous of opportunities to improve their schools in every possible way.

Maps, Libraries, Prizes, &c.—I am therefore able to report that maps have been furnished to two schools, that three others are ready to apply for such an essential portion of school furniture; in one instance a neat fence has been put to the school premises, and other decent requisites added to the grounds; and at one annual meeting, a new school house was voted for to accommodate an overflowing attendance; and such is hoped for by next midsummer vacation; that at another section, two new libraries have been purchased, and neat cupboards provided for the same. And in another section, the case is made for a library, which has been, I believe, already asked for. Peace is the rule in nearly every locality, and in the fourteen sections under my charge, the non-attendance, which to your well-wishing mind, may seem large, is not large, and is caused by obstacles beyond our peoples' control; that is, poverty, distance and isolation by awkward situation prevent attendance. We live in hope that the free-grant system about to become law, will help us in this matter very materially. Prizes have been distributed in two instances only,—a cause of grief to many parents, teachers and pupils. The Hon. B. Flint, has been called to the senate of our new country, and hence we lose his beneficence in the shape of prize books to all the sections of the county. Religious instruction is not given as regularly by the several Ministers, as the Department would wish; it is left to the Sunday School, where there is some on the Lord's day. But our schools are opened with prayer, and reading of a portion of Holy Writ. A more systematic system of religious teaching may yet prevail, as these backwoods settle in. May 1868 add to our prosperity and so our county and country grow in knowledge and grace.

XVII. COUNTY OF VICTORIA.

CAUSES OF NON-PROGRESS.

45. *James Bartley, Esquire, J. P., Carden and Dalton.*—*Causes of Non-Progress*—Our schools in this township, are not making great progress, owing to various causes. *The changing of teachers.* By the time a teacher has acquired a knowledge of the pupils, he is generally changed for another who will perhaps require his time in making himself acquainted with the different characters and inclinations of the children. *The substitution of female for male teachers* in my opinion, greatly militates against the progress of our schools, for boys of from 14 to 15 years of age, will not pay much attention to a female, for in a general way the mothers do not keep them in any restraint, and consequently no strange woman can. *The distribution of prizes* would have a good effect. In a general way, our Trustees do not understand the necessity of distributing prizes; the want of means being, perhaps, a reason. Our township is new and pretty rough, and when such a place is settled by persons of poor circumstances, it is difficult for them to meet all the demands. All the schools in the township are poor, except Section No. 4. Religious instruction is not generally attended to, for the reason that the schools are mixed, and it would be next to impossible to give instruction to suit all. There is a practice of electing Trustees who have no children to send to school, and consequently are very indifferent respecting what kind of teacher they may employ.

XVIII. COUNTY OF ONTARIO.

CAUSE OF NON-ATTENDANCE—DISTRIBUTION OF PRIZES BENEFICIAL—SUNDAY SCHOOL LIBRARIES—BAD MANAGEMENT OF CHILDREN—POOR SCHOOL HOUSES—CHANGING AND BAD MODE OF APPOINTING LOCAL SUPERINTENDENTS.

46. *The Reverend R. Macarthur, Brock.*—*Causes of Non-Attendance.*—As to the causes of non-attendance, indifference is the prevailing cause, and in some cases personal pique at the teacher, on the part of the parents. The general regulations in regard to religious instruction, are not followed as far as I have been able to learn.

Distribution of Prizes Beneficial.—The distribution of prizes in every case where it has taken place, has exercised a healthful stimulus on the pupils, and I am decidedly of the opinion that a more general and more frequent bestowal of prizes would be attended with the most satisfactory results.

Sunday School Libraries.—I regret to report that Common School Libraries are nearly unknown, and in the two cases in which they are said to exist, I do not think much advantage is taken of them. Sunday School Libraries are more common, and I have reason to believe, are exerting a beneficial influence among old and young.

Bad Management of Children.—Yet, I regret to state, that the young in general, are not kept under a healthful, moral influence, arising from the absence of a sense of its importance on the part of parents and Trustees. Of course, as far as I could, I tried to point out this end to teachers, parents and Trustees, and have reason to think that my remarks on this subject were well received and their importance felt.

Poor School Houses.—The School Houses are generally small, log or frame, but are being superseded by brick or large frame. They are tolerably well furnished, and the various common branches of education tolerably effectively taught, though there are exceptions, where the teacher, devoid of enthusiasm, plods and drags along in a dreary, kill-the-time manner.

Changing and Bad Mode of Appointing Local Superintendents.—Local Superintendents in this township, are too often changed to effect any permanent good. Their appointment is nominally only in the hands of our County Council. The Reeve of the township makes the appointment to this office a fulcrum, for raising himself and his tools into their offices. It were much to be desired that the Educational Department had the appointment in its own hands. It would be, in my judgment, a change for the better.

EDUCATION ADVANCING—EVILS OF IGNORANCE—BLESSINGS OF KNOWLEDGE—TRAINING AND CHARACTER OF TEACHERS—ENCOURAGEMENT.

47. *James Baird, Esquire, Reach and Scugog.*—*Education Advancing.*—The cause of education is rapidly advancing in this neighbourhood, a more lively interest is being felt in the proper education of the rising generation, and the many excellencies of our noble Common School system are just beginning to be fully appreciated. Our Common Schools are deservedly rising in public favour. That day is fast passing away when Common School shall be considered synonymous with poor school. People are beginning to discover that such an education as can be obtained at a good Common School, is abundantly sufficient to enable one, who has taken the full advantage of it, to discharge, with efficiency, all the duties of any office, in which he may be placed in after life, from the most common occupation, up to a seat in the Legislature of our Country. As a proof of this, we find that the number of those returned as attending no school, is fast diminishing; indeed the number in Reach and Scugog, is but trifling, when compared to what it has been, and even compared to what it is now is in some sections.

Evils of Ignorance.—We have set our face against the injustice of depriving the child of its legitimate right—a good education—and we have done what we could to induce parents to avail themselves of the blessings so freely offered to all; and where we could not get at the parties concerned, we attacked them by proxy; or we have attempted to meet them through their neighbours. Why allow that most fatal of all diseases,—ignorance—to blight the future prospects of any child in the section, while a remedy has been so abundantly provided by our Common School; an institution than which no other in the

land has higher claims to public sympathy and support; and no other is calculated to repay the care and expense that may be devoted to it.

Blessings of knowledge.—No more powerful weapon for good, could possibly be put into the hands of an intelligent people, than a well appointed, thoroughly organized system of Common Schools. And in direct proportion to the goodness of the system, and the skill with which it is worked, will the future prosperity of a Country be advanced, and the stability of her institutions secured. While it cannot be denied that nearly all our schools are making satisfactory progress, still it must be admitted that the inestimable blessing of a good and free education is not valued sufficiently highly, nor improved as it ought to be, otherwise the large discrepancy between the number on our school rolls and the daily average attendance would not exist. When we consider that the average attendance at our schools in all parts of the country, is little more than one third of the number of children of school age, we are forced to ask why it is so? Of course, every one at all acquainted with the frequent necessity that exists for keeping boys, aye, and girls too, at home, will admit that this has something to do with it; yet, there is no reason why the average attendance should be so far below the number of children of school age, and it is high time that our Legislature were taking this matter in hand, and dealing with it as necessity demands. The rate-payers in the various school sections allow themselves to be taxed, in order to maintain a good school in their respective sections, and that the offspring of the poorest may have no barrier in their way in acquiring a good education. It is a source of satisfaction to see the entire youth of a section in the daily receipt of that education, which cannot be withheld with impunity. But taxes are levied, and teachers are hired to teach all the children of school age in the section; but if only one-third attend, two-thirds of the money raised, has missed its aim—it has been mis-applied. How very frequently does it happen that the most important school season (from 6 to 12 years), especially for poor children, is allowed to be drivelled away, and when the child comes to be about eleven years, he is forced to go to work, while as yet he has got no education. This evil, we believe could be cured without much difficulty. Let an Act be passed, making it imperative on parents or guardians, under a penalty, to send all children of school age under their control, to school for at least nine months every year, or until said children shall have acquired a sufficient amount of knowledge to pass an examination before a Board appointed for that purpose. The status need not be high; it might be such as any child of ordinary capacity in a good school, may acquire in four years. If such a law were enacted, we would see a universal "turnout" of these children, for whom our Common Schools are best adapted—(from 6 to 12 years). The anxiety of children to pass this examination, and of parents to have them do so, would prove a far greater inducement to parents to send their younger children to school regularly, to children to attend their studies, and to teachers to press forward their pupils than all the prizes that could be awarded. Those who required their children's services at home, would be anxious to have them pass the examinations as soon as possible, so that they (the parents) might take them from school whenever they wished to do so. They might acquire sufficient knowledge to pass the required examination, by the time they became of any use to their parents at home. It would matter not, whether the parent wished to take his child from school or not, there would be an anxiety in the minds of all pupils and of all parents, as well as of all teachers to have all that could pass the examination. This system (as well as all other systems deserving the name) is predicated on the assumption that all our schools have good teachers. What avails superior systems of education, good school houses, abundance of suitable furniture, with unlimited money grants, if we have not a zealous and a skilful class of teachers. The quality, as well as the quantity of instruction, communicated in a given time, depends very much upon the amount of skill employed in communicating that instruction.

Training and Character of Teachers.—It must be obvious to all, and to none more than to the teacher himself, that a chief aim of every educational system should be the elevation and thorough training of the teachers, and every means which points to these ends, should receive the countenance and support of the entire community. It is only nonsense to talk of teaching without method, and other things being equal, the better the method the greater the success. And what teacher, deserving the name, who considers for a moment the responsibility that rests upon him—the duties which he owes to himself, to society, to

his country, but especially to the children placed under his care, would hesitate for the instant to use every means in his power, the better to fit himself for the discharge of the important duties of a school teacher.

Encouragement.—One important feature in the progress of our schools—I refer to those in Reach and Seugog—is the desire manifested by Trustees, teachers and many others throughout the various sections, to understand the school law, especially concerning their various duties with regard to it. The consequence is, that I have supplied a number of Trustees' manuals to the various sections under my charge; and now that they are familiar with the law, there is no more jarring, no difficulty in working it. In fact, difficulties seldom arose from parties wishing to violate the law; it was because they did not know it. So far as we have had time to examine the new series of Readers, we consider them quite an improvement on the old, especially for the purpose for which they are chiefly intended—to make good readers. This is as it should be. Everything is being done to render our educational system as perfect as can well be, and from its salutary provisions, ere another generation passes, Canada will occupy a proud position in point of education among the nations of the earth, her sons comparing favourably in this respect with those of any other land. And the day is far distant when the memory of him who has been chiefly instrumental in making our school system what it is, shall have passed from the grateful recollection of a Canadian people.

XIX. COUNTY OF YORK.

REGRETS—CAUSES OF NON-ATTENDANCE—DISTRIBUTION OF PRIZES

48. *The Reverend James Brooks, Etobicoke.*—*Regrets.*—It is to be regretted that with the excellent educational arrangements in our favoured Canada—education being within the reach of all, there should be at least 84 children in this small township who are “not attending any school whatever.”

Causes of Non-Attendance.—As to the “cause of their non-attendance” the Annual School Reports state “indifference” and “negligence of parents.” I think it might be added also,—negligence of teachers, Trustees and Local Superintendent—each of the parties might do more, to secure for the neglected ones, that which would be of great account to them throughout life. I hope the next Report will tell favourably in this respect. As regards the question respecting “Religious Instruction,” it does not appear from the Reports that the “general regulations” are followed in all cases. I will give attention to these “regulations,” and seek to encourage and further the better observance of them. I cannot speak particularly as regards the state of the libraries, or as regards the “influence the libraries exert in the neighbourhood.” I fear that some of them are in a neglected state.

Distribution of Prizes.—Prizes were distributed last year in one half of the schools of this township. As regards the result, I expect it may be said, there have been evil as well as good results. This measure when adopted, requires skill and good judgment, and other important good qualities on the part of the teacher, to be managed profitably. It would be well for Superintendents to study well the influence of prizes and rewards, and to dwell upon this subject in their School Lectures, which I propose to do.

NON-ATTENDANCE—INJUSTICE OF IT TO TAX PAYERS—GOOD EFFECTS OF PRIZES—COMPULSORY EDUCATION—PERMANENT TEACHERS—OFFICE OF LOCAL SUPERINTENDENT.

49. *The Reverend J. Gordon, Georgina.*—This being the first year I have held the position of Local Superintendent of schools, and never having attended or taught a school, conducted as the schools of Ontario are conducted, I am yet but very imperfectly acquainted with the school system. I have seen enough of its workings, however, to lead me to believe that, were the privileges it offers taken advantage of, it would be a great blessing to the people of Ontario.

Non-Attendance—Injustice of it to Tax Payers.—The first question you ask is, “what are the causes of the non-attendance of children? Teachers and trustees in Georgina, have

got into the habit of answering by throwing all the responsibility upon the parents. Their indifference is assigned as the sole reason. And, indeed there is a very great indifference manifested by them. It shows itself in various ways. The slightest excuse is considered quite a sufficient justification of their absence. No shame is felt by the parent in doing so. There are exceptions to that here, but the reverse is quite exceptional. Besides, after the merest rudimentary knowledge is obtained, their education is considered quite finished." More time spent in school is almost regarded as time mis-spent. In this new country, where the physical is more looked to than the intellectual, many parents come far short of the ambition they should have for a healthy and elevating education for their children. Comparatively few make it a point to bring their children up to the full advantages offered them by the Common School. Most of the pupils are taken away from the schools just at that stage when the dryness of what is rudimental is passing into the interest of what is gratifying to an ingenuous mind. In consequence, no taste for reading is generally acquired, and animal pleasures are resorted to, instead of the purer delights to be found in perusing works that inform the judgment, or cultivate the higher principles of our nature. But though indifference of parents, thus manifesting itself, is the reason assigned by each Board of Trustees in the township for irregularity of attendance—there is another cause to which it ought partially at least be attributed. Justice to all parties concerned, requires that it be stated. Lying on the borders of Lake Simcoe, and being low and flat, there is a large proportion of the township marsh land. The consequence is, that the township is in many places but thinly settled, school sections cover too large an area and often it is all but impossible for children to attend. School Sections 4 and 5 are very much affected from this cause, and School Section 3 somewhat. A swamp intersecting the 4th section, seriously interferes with the regularity of the attendance.

Good Effects of Prizes.—To remedy this irregularity, to reduce it to the minimum, in School Section 1, the distribution of prizes has been resorted to, and I believe with very great success. I have been informed by some parents that, since rewards were given, their children seem very much more anxious to be present, not to miss a day, knowing that they were thereby missing a mark. In that section, the prizes are made a premium—not on talent, but—on diligence. And it would seem that a conviction is deepening that irregularity of attendance, can to some extent be counteracted in this manner, for at an examination in one of my schools at which I was present before the Christmas holidays, it was announced by one of the Trustees that they were going to try its efficiency this year.

Compulsory Education.—I believe, however, that though the distribution of prizes may do something to induce greater regularity of attendance, it will never be attained, until it is rendered compulsory. I look upon it, moreover, as a matter of simple justice, that such an Act should be passed, for if I am taxed for the support of a school from which I derive no direct advantage, I receive a very great indirect advantage, quite compensating me for the loss of the former, in the general diffusion of education, in society assuming a higher tone, in the greater security to my person and property which is afforded. Failing that, however, I received no compensation at all. If I am compelled to pay the taxes, levied to support a Free School, it should be compulsory upon parents to avail themselves of the privileges afforded them. In a new country like this, it is the physical which is first attended to, and necessarily so. But Canada has in my opinion reached that stage where more culture should be bestowed upon man, as an intellectual being. Cases there are in which it would operate harshly, but such an Act could be so hedged round with limitations and restrictions as to prevent that. Of this, I feel certain that no inducements held out by teachers or Trustees will secure regularity—that the disease will be cured only by a law which enforces attendance. With reference to religious instruction, I have to say that in mixed communities, such as we find in Ontario, the regulations concerning it, are a dead letter. Their execution is an impossibility. One school is opened and closed with prayer, others opened; in others any attempts to enforce these regulations would, I have no doubt, result in the establishment of separate schools.

Permanent Teachers.—The revised programme for County Board Examinations is followed, and with good results. There is a greater stringency, and the result is a better class of teachers—persons possessing more of the requisites to the right performance of their duties. There is yet room, however, for increased stringency. A great many present themselves for examination—far more than the country requires. Making the

position of a teacher one which would be accepted by a person capable of discharging its duties creditably, and permitting none but such to obtain certificates, the result would be very beneficial. There are five schools in the township. All have been open during the whole of the year, and all are free. One of the school houses is what it should be, two more are pretty comfortable, one of which has been considerably improved during the year; the remaining two are not just what they ought to be. They are thinly settled, scattered sections, rendered so by swamps intersecting them. In these, I hope there will be an improvement before long. There are no school libraries in the township. There is a township library, the books of which, however, are not often called for, though there are some valuable works among them. During the past year, school masters generally have progressed pretty well. There is a disposition here to make the office of teacher as nearly permanent as possible. That I very much like, for it will tend to secure a higher class of them.

Office of Local Superintendent.—In conclusion, I wish to say a few words about the office I at present hold. This is my first opportunity, and it will in all probability be my last. The way the duties belonging to this office are discharged, seems to me the weak point in the school system. Necessarily so, as long as the office is given to persons who have other duties to perform, to them more essential. My objection is not to the persons who are selected. It is, that they are persons who have other duties to discharge to which they wish to bring their chief energies, and who, in consequence, will pay little or no attention to the duties devolving upon them as Local Superintendents. You may say, they ought; but so situated, they will not, and further cannot be expected to do so for the few dollars it secures. And yet the due discharge of the duties of this office is one of the most essential to the good working of the school system. Let a person be appointed who will be able to devote his sole, or at least chief attention to the duties entailed by that office; let the district he superintends not be too large to be well inspected; let it be made in a pecuniary point of view, such that a capable person will undertake its duties; and then I have no doubt that, under his close inspection, teachers will be prevented from running in grooves, in which order men in every position are prone to run. Your school system, already doing much good, will confer the blessing of sound education upon the masses, and be a still greater boon to the people of Ontario.

HOW TO INCREASE THE ATTENDANCE AT SCHOOLS—BEST TEACHERS THE CHEAPEST —EVIL OF POOR TEACHERS—IMPROVEMENT IN SCHOOL HOUSES.

50. *John T. Stokes, Esquire, Gwillimbury East and Whitechurch.*—While I regret that the average attendance for the Township of East Gwillimbury as there shown, when compared with the previous year, is somewhat on the decrease, I am gratified in being able to report that a similar comparison shows a large increase (91), in the average attendance for the Township of Whitechurch.

How to Increase the Attendance at Schools.—The decrease in the Township of East Gwillimbury, I find to be more than accounted for in the decreased attendance at one school; and the increase in the Township of Whitechurch, is mainly attributable to a single section, which increased its average 75 in 1867, over that of 1866, two or three other schools making up the balance. The above results and the causes are, I consider, well deserving the careful consideration of both employers and Trustees in our rural sections. In these results, it can be seen by any person intimately acquainted with the causes, that the decrease in the township of East Gwillimbury is mainly to be looked for in a full rate bill having been imposed in the one school alluded to for the greater part of the year 1867, while the increase in Whitechurch can be attributed to no cause but the free school system, and the employment of superior teachers during that time.

Best Teachers the Cheapest.—These facts clearly illustrate the principle that it is not sound judgment for the majority in any section to impose a rate bill, when there is a respectable minority against it, nor for trustees to employ a poor Teacher when a good one can be got without trouble. The soundness of the argument invariably used by the supporters of the rate bill system, that they have no right to pay for the education of another person's children, is to my mind, very questionable, and would appear to be based upon a species of blind selfishness not at all congenial with the advancement of the present age; and it

is moreover productive of much injury to the working of our public school system. Those who argue thus, appear to forget the fact, that free schools encourage education, which, if of the right sort, encourages the growth of virtue; also that they, in their social position are as much interested in the virtuous conduct of other persons children, as they are in that of their own, since all form a part of the body social.

Evils of Poor Teachers.—The idea which seems to pervade the minds of many Trustees, that of employing an inferior teacher, merely because he is cheap, is, I think, of all evils in connection with our Common Schools, the worst; since cheap as they may appear to be, an equivalent for the outlay is seldom or never received. It has tended to introduce into many of our schools, a class of young inexperienced persons, mere boys and girls, who are far better fitted to be taught than to teach, and forms the principal degrading element in the teacher's profession. The employment of such persons is bad policy throughout, much of the time of our children, which in a new country like Canada, is precious, is wasted, and sometimes impressions and habits of a noxious character are, through such agencies, formed. I regret that some ready mode of preventing such young persons from entering the profession, could not be adopted, such as disqualifying all under a certain age, compelling them to undergo some probationary course, or some other partially prohibiting measure, which none but persons of years and talent could overcome; we should then have the profession filled quite sufficiently for all practical purposes, either to supply the demand or to prevent monopoly. While I am on this point, I think I should be wrong did I not express my long felt conviction that the section of the school act which allows Local Superintendents to give provisional certificates, is of no benefit to the public, while it is the porthole through which many improper persons enter the profession of teacher, generally through the operation of interested influence. While I have been compelled to report a slight diminution in the attendance of East Gwillimbury, I must not fail to call attention to the bright side of the picture.

Improvement in School Houses.—Union School Section No. 2, in that Township, has during the past year erected a new school house, (from plans prepared by myself) having a capacity for over 100 scholars, with a class-room sufficiently large to accommodate between 20 and 30 small children additional, as a junior department, the cost of which building including the fencing of the site, has exceeded \$1400. Similar efforts are now being made by Section No. 3, East Gwillimbury, the Trustees having just closed a contract for the erection of a smaller building in brick, with hollow walls (from plans also prepared by myself) having a capacity for about 60 pupils; this building will cost about \$1000. This at least shows energy in some quarters. But little has been done in the way of distributing prizes in any of my schools during the past year, two or three only having done so. I sincerely wish I could induce Trustees to be more liberal in this respect, for I have never known an instance, where it has been understood by the scholars throughout the year, that rewards of merit would be distributed at the Christmas vacation, that it has not been productive of beneficial results. But few of my schools are opened or closed with prayer, and in few is either the Bible or Testament read. Non-sectarian ideas appear to have taken such a firm hold of the public mind that the opposite extreme exhibits the greatest danger. In the foregoing remarks, I have considered some of the evils with which the schools in the two townships under my charge have to contend. I have thought this better than to laud all in connection with them that I have found to be good, merely for the sake of effect, leaving untouched those dangers or evils which the careful pilot always endeavours to shun. And I have not adopted this course, because no good could be found on which to treat, for I assure you that when the good is balanced against the evils, the former will greatly outweigh the latter.

XX. COUNTY OF SIMCOE.

PROGRESS—INFLUENCE OF GOOD TEACHERS—IRREGULAR ATTENDANCE—COMPULSORY EDUCATION.

51. *The Reverend R. Cleary, A. B. Mono.*—*Progress.*—I have much pleasure in being able to report satisfactorily of the schools under my charge. A great improvement has taken place during the past year, not only in the pupils, but in the class of teachers who have been engaged.

Influence of Good Teachers.—A good teacher always makes his influence felt in the neighbouring sections, and soon the people of those sections begin to desire the services of a thoroughly competent person, although they must pay him a better salary than they hitherto have been accustomed to give. One very fine stone school-house was built in the latter part of 1866, and opened in January 1867. It belongs to School Section No. 4, and it is really creditable to those who designed it.

Irregular Attendance.—The usual complaint made by teachers everywhere, is unfortunately too prevalent in this township, viz:—the irregular attendance of the children, and it is very hard to see how it can be remedied in a new country. During the summer months, it is almost impossible for the farmers to obtain farm hands, unless they will submit to the high wages required by those persons, and so their children are kept at home to work—Oh! when will parents learn to prize above the perishing things of earth, the advantages which they are neglecting so much? When will they learn to value the talents with which their children are endowed?

Compulsory Education.—I really think that when parents neglect their duty to their offspring, the law should interfere—schools are established, and why not provide children to attend them? What is the use of being able to say that we have so many thousand schools in Canada? And yet we cannot get those for whom they are intended to attend them. You have founded a system of schools which will cause your name to be honoured by generations yet unborn, do interfere and endeavour to bring the youth of our country in more direct contact with that which must benefit them so much, if taken advantage of.

LITTLE PROGRESS INDICATED—DISTRIBUTION OF PRIZES.

52. *The Reverend A. J. Fuller, B. A. Tecumseth.*—*Little Progress Indicated.*—I beg to state that in this township, there is but little religious instruction imparted in the schools; the system not presenting many advantages for Christian education. The influence excited by the small collection of books, called libraries, cannot amount to anything, judging from the Trustees annual reports, as it is there clearly stated that the number of volumes taken out during the year is utterly insignificant, not averaging ten per annum from each library reported.

Distribution of Prizes.—The distribution of prizes, judiciously managed, I am of the opinion has a good effect in arousing energy, and thus leading to results, which would never otherwise have been attained.

NEGLIGENCE IN REGARD TO TEACHERS' AND TRUSTEES' REPORTS—NON-ATTENDANCE —GOOD INFLUENCE OF THE DISTRIBUTION OF PRIZES.

53. *The Reverend Alexander Maclellan, Tossorontio.*—*Negligence in regard to Teachers' and Trustees' Reports.*—It would be a great benefit to our schools in particular, and to the country in general, as well as to Local Superintendents, if teachers were obliged to undergo a strict examination, as to their skill in filling up semi-annual and annual reports. If these are sometimes a specimen of the accuracy and faithfulness, with which the great work of the school-room is performed, confusion and not order, ignorance and not knowledge, must be the result of teaching.

Non-attendance.—The different given causes of non-attendance, may be thus summed up:—youth, distance and no cause. This is quite in keeping with some other characteristics of the Reports, which occasionally come to my hands, and betray much ignorance or shameful indifference. Unfortunately the common causes of non-attendance, are neither so limited in number, nor so honourable in character. There is no doubt, that in some localities, several are kept at home by youth and distance combined, and on account of the imperfect division of this township into School Sections, which had been made when the settlements were new and only partial. Such obstacles in these days of Free Schools, and of an increasing demand for education, are hardships, and it is to be hoped that they will soon be removed. If other hindrances, far more serious, such as worldliness, selfishness, drunkenness, indolence, indifference and self-inflicted poverty, &c., &c., could be as easily removed, it should be quickly done. The "general regulations in regard to religious instruction," are followed in some cases, and neglected in others; and as to the result, per-

haps there is not much difference. Of course, there may be unseen influences *when and where* not looked for, but who can trace them out and state what they really are? The revised programme for County Board Examinations is observed, and the examination questions are printed. Yet, there is room for improvement, and this Board, not only observes and prints, but it is also gradually and prudently filling up the room; and would fill it up more rapidly and effectually, if Trustees would come forward and help them with liberal salaries. We have no library, and thus we find it impossible strictly to observe the regulations. However, we feel very confident, that a library, when used, cannot fail to advance the noble cause of education.

Good Influence of the Distribution of Prizes.—This year again, prizes were distributed, and very liberally too, in each School Section; and there was a Township examination besides. The influence is generally very favourable. This annual and liberal distribution of books, is preparing the way for the usefulness of School Section Libraries, arousing parents and guardians, securing their interests, and a larger and more regular attendance of children, and is the means of rendering Trustees more active, and Teachers more watchful and diligent.

54. *George Mitchell, Esquire, Tiny and Tay.*—The reason that no school has been kept open in Section No. 2, Tiny, is, that they could not get a teacher to suit. The cause of non-attendance of children is indifference of parents. The regulation as to religious instruction, is not observed in these Townships. The programme for the County Board Examination is observed.

GOOD PROGRESS—GOOD TEACHERS—NUISANCE OF INFERIOR TEACHERS—GOOD INFLUENCE OF PRIZES—NON-ATTENDANCE—MILITARY DRILL AMONG TEACHERS.

55. *George Sneeth, Esquire, Vespra.*—*Good Progress.*—The schools under my supervision are progressing favourably. It is very gratifying to notice the improvement in school matters, which has been made here. A great deal of credit is due to the gentlemen who fill, and have filled the office of school Trustees, for the interest they have taken in the cause of education, and for the very liberal manner in which they have conducted the business of their several sections, particularly in providing such comfortable and well furnished school houses, and securing the services of competent teachers.

Good Teachers.—I am sorry to state, that there are too many incompetent teachers in the field, who offer their services for any amount which they can obtain, to the great injury of the really useful ones, who have to take quite inadequate remuneration for their services.

Nuisance of Inferior Teachers.—The passing into law of your proposed new school bill, would remedy this evil; one-third of our teachers would have to look for other employment to the benefit of those who would remain, and the still greater benefit of the community at large.

Good Influence of Prizes.—Prizes are now given out once or twice a year regularly, in most of our schools, with very satisfactory results.

Non-attendance.—Distance from the school-house, is the principal cause of non-attendance in this Township. This will be remedied in course of time, as the Township becomes more thickly settled. New School Sections will be formed, so as to place all within reach of a school. At present, there are families quite out of reach of school privileges, at the same time having to pay equal school rates with those who enjoy all the benefits of having the school within their reach. This is a great hardship, but cannot be remedied under the present order of things. We have a Township Library, containing 550 volumes, which has been in use for thirteen years. The books have been well read. Some of the most interesting ones are nearly worn out and unfit for circulation, others are out of date; we badly need a fresh supply. There is some prospect of the township council appropriating a sum sufficient to furnish each School Section with a library the present year. I sincerely hope such may be the case. The advantages to be derived by our youth, from a judiciously selected library, are great.

Military Drill among Teachers.—About forty of our teachers having formed themselves into a Drill Association, have been duly enrolled and accepted by the Minister of Militia. By permission of your Department, and under the sanction of the County Board of Public

Instruction, as an experiment, one week was allowed them to meet together for drill. They met in the town of Barrie, in the last week in July, and were drilled every day by experienced military gentlemen; before dismissal they were inspected by Major Denison, and complimented by him on their appearance, and the advancement they had made in their drill, in so short a time. They were also addressed in complimentary terms by Judge Gowan, Chairman of the County Board of Public Instruction, and by other gentlemen present. It was acknowledged by all, that the experiment had proved a decided success. The fruits are already beginning to appear—several of the teachers having introduced the Military Drill into their schools, with marked success. It will prove a benefit in more than one point of view to the students, and ultimately, it must prove a benefit to the State, to have the youth of the land trained up to a knowledge of Military tactics. We are sanguine, as the experiment has been tried and found to answer expectation, that some measure will be adopted to carry out so laudable a work as the training of our teachers in the Military Drill, with a view to its introduction into all the public schools of the Province.

GOOD SIGNS OF PROGRESS.

56. *The Reverend James Ferguson, Oro.*—*Good Signs of Progress.*—We have now no third-class teacher employed. Some additions have been made to the salaries of teachers. The attendance is larger than in any previous year, and parents are getting more interested in the education of their children. Prizes were distributed in four schools; in three, there were recitations; and in two we had Drill, which the boys enjoyed more than any of the other exercises. I have much pleasure in testifying to a marked improvement in all the schools, especially as regards thoroughness in teaching. I shall probably have another school in operation to report in my next.

ENCOURAGING MARKS OF PROGRESS—COMPULSORY LAW REQUIRED.

57. *R. T. Banting, Esquire, Essa.*—*Encouraging Marks of Progress.*—During the year 1867, there were 11 Free Schools, and one partly free in successful operation. There were also two excellent new frame school-houses erected during the year. One of them (No. 9) for comfort and accomodation, is equal to any in the county; and although its erection cost a large sum, yet the rate-payers of the section paid it cheerfully. Our teachers are efficient, and nearly all of them in possession of first-class certificates, and as a general consequence their pupils are steadily progressing; indeed the inhabitants of this Township exhibit an increasing interest in the education of their children, and seem to appreciate more than ever the advantages of good practical teachers. The old "third-class," men of some years back could not obtain a school here now at any salary. The revised programme for County Board Examinations is observed, and the examination papers are printed.

Compulsory Law required.—The cause of "non-attendance" of some children, is stated by Trustees and Teachers to be indifference and carelessness of parents and guardians; indeed there is much need of some Legislative enactment, to compel such parents to send their children to school; for not being educated themselves, they cannot appreciate such a blessing for their children—a blessing that your excellent and unrivalled school system leaves within the reach of all.

SCHOOL EXAMINATIONS NOT ATTENDED BY PARENTS—SCHOOLS ADVANCING—CAUSES OF NON-ATTENDANCE.

58. *The Reverend Jacob Poole, Innisfil.*—From observation during the past six years that I have acted as Local Superintendent over the Common Schools of Innisfil, it appears to me that one generation will have to pass away before the school system will come to perfection in its working.

School Examinations not attended by Parents.—To instance one thing in particular, the law makes it the duty of all teachers to hold quarterly examinations in their schools. With this duty, the teachers would gladly comply; but after giving notice to all concerned in the matter, it often happens that on the day of examination, not one of the parents or

guardians of the pupils, and but one or two of the Trustees are present. On this account, they are not prepared to say whether the pupils are making any improvement by comparing the past with the present: such comparison, they cannot judge by, because they were not there, and such neglect on the part of the parents, robs the teachers of much of the credit due to them, and is a source of discouragement to teachers. But when the present generation, who are educated in our Common Schools, will be placed in the position of parents having children to send to school, they will take an interest in their education, such as their fathers generally never did, because they never saw the necessity of it—having had very little education themselves. How true are the poetic words of Pope, "Tis education forms the common mind."

Schools Advancing.—As far as I am competent to judge, I consider the schools of Innisfil taken collectively, are in a state of advanced improvement under the superintendence of a class of active men, who, with a few exceptions, are well qualified to do their duty to the pupils under their charge.

Causes of Non-Attendance.—As to the cause of the non-attendance of many children in the different sections in the Township, who are of school age, I am not of the opinion expressed by some Local Superintendents, that it is indifference on the part of the parents—I would rather say, it is owing to the distance at which they live from the school-house,—in connection with bad roads, and some of them but little travelled, and in the winter season blocked up with drifts of snow. At present, many School Sections are too large to accommodate all the children that would otherwise attend.

XXI. COUNTY OF HALTON.

GRATIFYING EVIDENCE OF IMPROVEMENT.

59. *The Reverend Robert Ewing, Esq.*—*Gratifying Evidence of Improvement.*—When I accepted the office of Superintendent last year, I found most of the schools in a very efficient condition, and they still continue so. The advantage of a good education, is generally well understood in the district, and laudable and liberal efforts are being made by Trustees and others interested to render the schools still more efficient. The school houses, with four exceptions, are all of the most substantial and commodious kind, and two of the remaining old erections will, in the course of the ensuing summer, give place to brick structures of the more approved kind. The teachers in the Township, are for the most part well qualified, some of them having remained long in the same situation, and by diligent effort, acquired the pre-eminence of superiority in their profession. Our Board of Instruction has constantly endeavoured to raise the literary standard of those who seek to be admitted as teachers, and has by careful and frequent examinations, done not a little to attain that end. The majority of the schools are now free, so that the attendance is large, but irregularity on the part of many pupils is complained of, in almost every section. There are comparatively few children not attending school, and the only reason assigned for such non-attendance, is indifference on the part of parents. The new reading books are being introduced into most of our schools, and appear to give much satisfaction. With perhaps, one or two exceptions, the regulations relative to religious instruction are faithfully followed by the teachers. There is no defect, I observe more marked than the want of instruction in vocal music, which I think should be taught if possible in every school.

GOOD EFFECTS OF PRIZES—LIBRARY SADLY NEGLECTED.

60. *The Reverend James Little, Nassagaueya.*—The supply of teachers has not been so plentiful this year as formerly.

Good Effects of Prizes.—Prizes are distributed in some of the schools, and that too with good effect, as the teachers make it a rule to give all the pupils a prize of some sort, and to test them by making every recitation an examination for months previous to the distribution. The Township Council voted \$20 for prizes last year, to be competed for at a general examination of representative pupils from each school; and so great was the satisfaction, that I have a few days ago been notified by our Reeve and Warden, Mr.

Archibald Campbell, that another \$20 has been put at my disposal, to be invested in a similar way for the present year. You will observe that all our schools are free. In some instances where parents have not intelligence enough to value an education as provided in our Common Schools for their children, I think the School Act so amended as to render attendance compulsory, would be a wholesome experiment.

Library Sully Neglected.—Formerly, there was in Nassagaweya a Township library, and it was distributed amongst the School Sections. The books are under lock and key in most places, and neither numbered, labelled nor read. This is very sad.

MARKS OF PROGRESS—LIBRARIES WANTED—HAPPY EFFECTS OF PRIZES.

61. *Daniel McLeod, Esquire, Nelson.*—Out of a school population of 1,295 (between the ages of 5 and 16), I find 168 reported as not attending any school; of these, ill-health, distance from school-house, and want of proper clothing, may have prevented some; yet, in the majority of cases, negligence of the parents and guardians must be considered as the chief cause. It is worthy of remark, that those sections which contain villages, report the largest number of absentees. Six schools report the observance of the general regulations in regard to religious instruction; the actual number doing so, is perhaps rather above than below this.

Marks of Progress.—The Bible is used in all the schools but one, in some way or other, and only two have no prayer. The revised programme is used by the County Board in the examination of teachers, the questions are printed, and a much higher standard of qualification is required now, than was a few years ago.

Libraries Wanted.—It is to be regretted, that there is no Common School library either in the Municipality or the fourteen schools which it contains; the Sabbath School libraries that are established in a considerable number, perhaps a majority of the school sections, may be assigned in part as the cause *where they exist*. Yet the literature of the Sabbath school, however much it may exert a healthful moral influence, as it no doubt does in a high degree, wherever it reaches, does not supply the entire wants of the reading community. It would be a source of gratification to see a free library in every school Section in the Township, and in every neighbourhood in the Province. Much, very much, has been done already in this matter, still, there is a great deal yet to be done. It may seem strange, that there are so many Sabbath Schools and Sabbath School Libraries in this place, and yet but one reported—why this is so, I cannot tell, as my attention was not directed to it till it was too late to get it remedied for this year. The attendance, with the teachers and libraries, say of five other Sabbath Schools not reported, will perhaps be one-fourth less than that which is returned.

Happy effects of Prizes.—Eleven schools report the distribution of prizes, yet only four of them give the amount they cost. The happiest effects have resulted from the giving of such rewards or prizes; they have stimulated a noble ardour to excel, a noble emulation to obtain the prize. The schools in the old survey, or south-eastern half of this township, were opened from 1812 to 1814-1815: those in the new survey, or north-western half from about 1823 to 1826. I have found most of the schools in a prosperous state, the teachers faithfully and earnestly endeavouring to improve the minds of those committed to their charge; in their various branches of education, they are pretty generally well qualified for their work, and not a few an honour to their profession, yet some are inadequately paid for their services. The last log school-house (the relic of bygone days) was during the past year abandoned, and an elegantly designed, commodious and substantial frame-building substituted in its stead. We have five brick, one stone, and seven frame school-houses, valued, with their sites, at \$9,210. All but one have maps, with other school requisites, and that one had its maps, windows, &c., destroyed by incendiaries. Our present admirable school system is doing a *great work* in preparing our youth for entering upon the coming duties of life with efficiency and credit, and with qualifications to occupy positions of usefulness and distinction on the stage of action, or in the drama of life. When looked at comprehensively with all its arrangements for support and oversight, and for the supply of duly qualified teachers, together with that of all its varied school requisites and apparatus, we doubt if it is surpassed by the school system of any

other country. We have attended the schools in Scotland, but this certainly far surpasses the Scottish system, however justly celebrated it may be.

GOOD SCHOOL-HOUSES WANTED—GOOD EFFECTS OF PRIZES—RELIGIOUS INSTRUCTION NEGLECTED.

62. *John Askin, Esquire, Trafalgar.*—We are making progress by degrees. Our 17 schools are now pretty fairly supplied with maps.

Good School-houses Wanted.—Some of our school-houses are not what they ought to be: in small sections, the people are unable to build comfortable school-houses, and the Township Council will not equalize the sections. I think you will be obliged to settle the question yourself.

Good Effects of Prizes.—Prizes were distributed in many of the schools, producing good results.

Religious Instruction Neglected.—Religious instruction is too much neglected, and I find many children that are well up in their school lessons, unable to repeat the Ten Commandments. In this respect we are not advancing. I cannot boast of much benefit being derived from my lectures. I prepared one on the necessity of moral training, and on mutual forbearance, but I had very few to hear me, so that latterly I have turned my attention entirely to reasoning with the pupils, and I think the results are beneficial.

XXII. COUNTY OF WENTWORTH.

PLEASING ILLUSTRATION OF PROGRESS—DISTRIBUTION OF PRIZES BENEFICIAL.

63. *The Reverend George A. Bull, M. A., Barton.*—*Pleasing Illustration of Progress.*—The duties of both Trustees and teachers have been fulfilled with more than usual attention, and I beg to mention, in particular, the Trustees and teacher of the new school section No. 7. The advantages of a well-built and comfortable school house with suitable grounds and sheds are to be seen here. Both the teacher and children, numbering sometimes 100, quite enjoy the comfortable and convenient arrangements made for them. Already the example of this new section is being followed by some of the older sections, and I have no doubt that they too will soon reap the best results. The attendance of school children is very good throughout the township, and slightly exceeds that of former years. The two sections 3 and 7, lately added are found to have been very much required. The reading of Scriptures and saying of prayers are observed here with but one exception, and that, I believe, arises from no feeling of distaste, but from want of duly considering their vital importance. The Ten Commandments and the Lord's Prayer are frequently recited. No further religious instruction is afforded to the pupils of our schools. I have nothing new to report in respect of Common School libraries, but am aware of a few new Sunday School libraries. The County Board examinations continue to be strictly conducted according to the prescribed regulations.

Distribution of Prizes Beneficial.—Prizes were given in five schools at the Christmas examination, and I believe that the effect was altogether good; they, at least, tended to enliven the minds of the children at that happy season.

CHURCH AND FAMILY THE PLACE OF RELIGIOUS INSTRUCTION—SIGNS OF PROGRESS AND NEGLECT.

64. *The Reverend John Porteous, Beverley.*—You will observe that in twelve of the fifteen schools the Bible is read, and, I am able to add, not as a class-book but as the daily opening exercise. I do not think that any minister of religion in this township imparts Christian Instruction to any of its schools. I am pleased that this is not attempted, for I believe it to be an attempt not likely to lead to any good result.

The Church and Family the Place of Religious Instruction.—The church and the family, not the Common School-house, are the proper spheres in which children are to be taught the religion of the Bible: but as everything should be done religiously, it is most becoming and right that God should be acknowledged by prayer and by reading His word at

the commencement and close of every school day. From the little that has come under my own observation, I am free to confess, that there is as much deference paid to religion in our Common Schools as in some that I have seen in other lands where the law compels its teaching.

Signs of Progress and Neglect.—The indifference of parents, coupled in many cases with the difficulty of procuring help outside of the family must be mentioned as one more of the principal reasons why so many do not attend school. The feeling is becoming more common, if we may conclude from the remarks often heard, that the schools should all be declared free by the Legislature, and that a compulsory attendance for a portion of the year should be provided for. It seems unreasonable that the compulsion should be only on the side of the freeholders, and not also on the side of the children for whose benefit, nevertheless, the land is taxed. Our free schools, you observe, are eleven out of the fifteen. As noticed in my reports of previous years, our County Board and our two public school libraries are managed according to the requirements of the law. Prizes have been given in eight of the schools. No inferences can be drawn regarding the state of Sabbath Schools in this township from the report. Indeed, I have reported the two cases from my own knowledge. We have a good number of such schools in the township, but I have no details. We have a superabundance of religious machinery. I am struck with the disproportion in attendance between the boys and the girls. It is very nearly as four is to three throughout the township. In one of the two schools taught by females, the boys are exactly three to two girls—I refer to section No. 13. While in No. 12 alone the girls outnumber the boys, but only by one. One must infer from this fact that the opinion seems yet to prevail that girls need less Common School education than boys. The natural disparity between the sexes does not justify the above disproportion. It is gratifying to see that Trustees are becoming much more business-like in making up their accounts. It is also pleasant to see nine blanks in the columns which are devoted to their debts. And the reports themselves shew that these might have been increased, and that the debts, with the funds reported as in hand, should have been much less. In conclusion, we have in the township 1768 school children reported, only 1458 of them were at school at all, and then only 156 of these attended more than 200 days, that is one person in every eleven whom the law reckons of school age.

REASONS FOR NON-ATTENDANCE—GOOD INFLUENCE OF LIBRARIES—EXCELLENT EFFECTS OF COMPETITIVE EXAMINATIONS AND PRIZES—HONOUR TO EXAMINERS—DRAWBACKS.

65. *The Reverend Alexander McLean, Flamboro' West.*—*Reasons for Non-Attendance.*—The real reasons of the large number of non-attendants at the Common Schools are—1st, the degradation attending drinking habits, and 2nd, the lack of the Free School system. Although there is religious instruction imparted in the schools of this township generally, yet the pastors of the various religious denominations do not embrace the opportunity allowed by law, from the fact, that generally they are non-residents themselves. The examination questions are printed and changed by the Board of Instruction each half year.

Good Influence of Libraries.—I am sorry to see so few libraries in the township. Their influence, where they are, marks the sections *excelsior* in every thing—there we find the *experts*. The books are covered and labelled. The distribution of prizes has given a healthful stimulus to many of the schools, indeed, the atmosphere of many of the schools is changed from *dull* to *bracing* by the prize books.

Excellent Effects of Competitive Examinations and Prizes.—The township competition and award of prizes gave an impetus to education, especially in the sections which embraced the opportunity. I am sorry that more did not enter the lists, but as it was, it was an honour to the township, and reflected great credit on the teachers and the pupils, and laid the township under a debt of gratitude to the teachers who superintended the arrangements, and also, particularly, to the talented and generous gentlemen from other places, who examined the pupils and awarded the prizes. When all were excellent examiners, the facetious, witty and loving-hearted Mr. McGann, drew his little contestants to him as by magic, and inspired them with courage to do their best.

Honour to Examiners.—The self-denying efforts of those gentlemen who acted as

examiners, deserves to find its fruit and reward in an extension to other townships of the competitive system. I am happy to report a *resurrection* of three of the schools of the township, and the marked progress of all the schools in reading, writing and arithmetic. In some of the schools the latter named study is taught with the greatest success in speed of calculation and in accuracy of operation.

Drawbacks.—I have to deplore the too general absence of the parents and Trustees from the examinations and the lectures. Some few of the sections are honourable exceptions in this respect. Another drawback is the irregularity of pupils in attendance, but there is an improvement in many of the schools. A few are models in this respect. I find a growing tendency to the Free School system. Two or three have come into that system this year.

NEW SCHOOL HOUSES—ALL THE SCHOOLS IN BINBROOKE FREE, AND NO CHANGE OF TEACHERS—MAJORITY OF SCHOOLS IN SALTFLREET FREE—GOOD EFFECTS OF PRIZES AND LIBRARIES.

66. *The Reverend George Cheyne, A. M., Binbrooke and Saltfleet.*—The schools are maintaining their character for efficiency and success.

New School-houses.—Two, new, commodious, neat and substantial school-houses, have been erected during the year. One in Saltfleet, in School Section No. 8, of stone, at an expense of \$1,000. The other in School Section No. 5, Binbrooke, a frame building. They have been arranged and furnished according to the approved method, greatly facilitating the business of teaching, and the proper government of the school, which is a matter of paramount importance. Whatever may be the other qualifications of a teacher, if he is deficient in the art of governing, he will never be successful. The erection of these school-houses affords a proof of the interest which the Trustess and people are taking in the cause of education, while it conduces to the health of the scholars.

All the Schools in Binbrooke Free and no Change of Teachers.—All the schools in Binbrooke, have been kept open during the whole year, and no change of teachers has taken place, which is highly creditable, both to teachers and people. Some of the teachers have entered not merely on the second, but fourth and sixth year, with the same section. It will be seen from the report that the average attendance has also been considerably higher. The average time during which the schools in Saltfleet have been kept open is somewhat shorter, arising chiefly from the fact, that School Section No. 8, was without a school-house till the autumn—the school being in operation only about two and a half months. Notwithstanding it is gratifying to notice that the average attendance over the whole Township is a little higher. It is a question worthy of consideration, whether a vacation of four weeks, instead of two, from the middle of July to the middle of August, would not be an advantage. The attendance at schools is generally small during the latter half of July,*at any rate. Prayer and reading the word of God, has been generally adopted in these townships, (there being few exceptions). May the blessing of God, who alone can bless, render the instructions imparted, beneficial, fit the rising generation for the duties of future life, and thus promote the peace and prosperity of the Dominion of Canada. The revised programme for examination of teachers, is followed by the County Board of Public Instruction. New questions are prepared for each examination and answers in writing are required. The frequented, and repeated examination of teachers, instead of being an injury, is a real benefit. It provides a stimulus to teachers to improve, and come up to the first class; so that they may not have to come up every year to the Board for examination. We find that in this county, this result is produced. If teachers have not energy and ability to rise, in course of time, to the first class, the sooner they give up teaching the better. Free schools are increasing.

Majority of Schools in Saltfleet Free.—All the schools in Binbrooke, and a majority in Saltfleet were free.

Good Effects of Prizes and Libraries.—Prizes were given in many schools, and I think with advantage. They are valued by the scholars, and serve as an encouragement to diligence in study. I am not aware that any evil results have arisen from their distribution. It is evident from the reports that libraries are not valued as they ought to be. Few of them to read them where they are, and where there are none, there appears no desire to

obtain them. There are, however, so many Sabbath School Libraries, that abundance of excellent reading may be obtained in every section, from that source. Information in regard to these was not given in the reports, except in a few cases. I have added what I could from my own knowledge, yet still the information respecting them is very imperfect. On the whole, I am satisfied the cause of education is prospering. The people seem to realize more its importance and appreciate its advantages.

XXIII. COUNTY OF BRANT.

GOOD STATE OF MOST OF THE SCHOOL HOUSES AND SCHOOLS—OBJECTIONS TO THE DISTRIBUTION OF PRIZES, WHICH HAVE NOT AFFECTED THEIR USEFULNESS IN OTHER TOWNSHIPS.

67. *The Reverend William Beattie, Brantford.*—Situated as the township of Brantford is among the older settlements, one would naturally expect a considerable similarity in every annual report, for the Trustees of the different School Sections have become familiar with the requirements of the school law, and are generally anxious to possess a good school house well furnished with maps.

Good State of Most of the School Houses and Schools.—This object has been gained in the majority of sections, while in the others there is something like a settled conviction that every means should be used to gain it. The Schools are under the charge of efficient teachers, and the prosperous condition in which I found them is evidence of the energy of the teachers and their fitness to communicate instruction. It would scarcely be fair to compare one school with another, for some are far more favourably situated than others. One great hindrance to the prosperity of some schools is the irregularity of attendance at certain seasons of the year, which, I am afraid, must in many cases be attributed to the insensibility of the parents to the value of education, and the proper time when an opportunity should be given to acquire it. There is a great anxiety on the part of teachers and trustees to conform to the general regulations, and to use only authorized books, and I am persuaded that a distinct statement is all that is necessary to secure the immediate adoption of any book authorized. There are few, if any, public libraries connected with the School Sections, but there are numerous Sunday School libraries. It would be difficult to estimate the influence of such, but if they raise the tone of morality and keep the mind from coming into contact with those pernicious publications which are the bane of this age, they are worthy of all encouragement.

Objections to the Distribution of Prizes which have not affected their Usefulness in other Townships.—The distribution of prizes is not general in the schools. In many cases, this arises from a conviction that there is very great difficulty in giving prizes, without giving offence to some of the scholars, which, in too many cases, is only another name for giving offence to their parents. When such a feeling exists, the comfort of the teacher is affected and his success hindered. Were there some system adopted, by which the different schools might be examined by neutral parties, and the prizes distributed according to the results arrived at, the partiality of the teacher might not be blamed; though even with such a system, the necessary reference which in some cases would require to be made to the teacher, such as in the matter of regular attendance, good conduct, &c., he would not get off without blame. It is very difficult to get a parent to admit that his child is not as clever as any other; and when the parent is a witness to the examination on subjects on which he himself may be imperfectly informed, perhaps the difficulty is somewhat increased. As a matter of course, the revised programme of County Board Examinations is observed, and the examination questions printed.

CRIMINAL NEGLECT OF PARENTS—TEACHING ELEMENTS OF AGRICULTURE RECOMMENDED—FIVE LIBRARIES AND THEIR USEFULNESS.

68. *The Reverend John Armour, Burford.*—Children not attending any school, I must confess myself at a loss to satisfactorily account for in this Township. Here there are five-sixths of our schools "free."

Criminal Neglect of Parents.—It cannot be accounted for on any other ground than that

children and parents are culpably negligent, or they put no value whatever on education. Nothing shows man's heedlessness and depravity more than indifference to Gospel grace, to the generous, unbounded and unmerited invitations of the Gospel; and surely nothing exhibits the derangement of the human heart and intellect more than when a good, sound and useful education is within the reach of every child, and yet such is the apathy of parents' hearts, that they will not send them to obtain it. I cannot comprehend such indifference, it is altogether inexcusable, and upon their heads must rest the blame forever. Are the general regulations in regard to religion followed, and with what results? I believe there is no systematic effort put forth in this Township, in regard to the young being taught religious truth by clergymen. There are a few visits made by professional men, but nothing systematic and of an efficient character. Sabbath Schools are common, and libraries attached to them; but during the winter four months, they are generally closed. And this is the reason our reports of Sabbath Schools are so meagre and incomplete. I would beg leave to suggest a fresh revision of the programme of teachers' examinations and I would recommend the study of agriculture for males. This Township with a great many others in the Province, is purely agricultural.

Teaching Elements of Agriculture Recommended.—Nine-tenths of our population are dependent on the soil for a living, and I believe that were our young men taught the science of farming—taught the properties of different soils, manures, &c., it would be of incalculable advantage to the rural districts of our magnificent country. A year or two ago, I put forth some effort to get this study introduced into some of our schools, but the teachers objected, as it was not in the programme. And though I wrote to the Education Office, receiving a very encouraging reply, which I read at some examinations, yet, no teacher would introduce the subject into his school, because it was not in the programme. There are other studies which might, with much benefit, be taught in our schools.

Five Libraries and their Usefulness.—I find an increasing desire to have more libraries. The time is not far distant, when we had no libraries of a sectional character in this Township; but now there are five, and I believe other sections are preparing to have them also. I believe they exert a permanent and beneficial influence for good.

XXIV. COUNTY OF LINCOLN.

GOOD EFFECTS OF PRIZES—LIBRARIES—NON-ATTENDANCE.

69. *Eli Gregory, Esquire, Louth.*—*Good Effects of Prizes.*—Where prizes have been distributed they have had a good effect. They have caused a friendly rivalry amongst the scholars, which is very desirable amongst the different schools. I had an examination of all the schools in this township, on the 7th inst. when there were 115 prize-books distributed, with very gratifying results. The only thing that could be said against the whole examination was the want of room, there being over five hundred persons present, and about three hundred competitors.

The religious instructions are not generally carried out, and appear to be of little importance to any in the way they are conducted. The revised programme for County Board examinations is observed, and the questions printed.

Libraries.—The library books are numbered, but not covered, and the regulations are not as strictly observed as formerly. The books are old and considerably worn out, and it seems there is not the interest in them there was some time ago. There should be new books obtained of the proper kind and then there would be an increased demand for them from the different librarians.

Non-Attendance.—The cause of non-attendance is purely negligence of parents. There are a very large number reported as not attending any schools. That, I think, is not correct. For instance, in school section No. 1, they have 80 children of school age, of whom 70 are entered on the register, and the other ten, from some cause, attend another school, and are reported as non-residents by that section, and are finally reported as not attending any school.

MISCELLANEOUS FACTS AND OPINIONS.

70. *Charles B. Millner, Esquire, Grantham.*—I consider the past year as very favourable

to the interests of education in this township. A new school-house was built in Section 3, besides payment made of the arrears due for one erected in Section 2, in the year 1866. A remarkable feature of the past year as regards teachers, is the preponderance of females employed, the number being six, and of males, only four. Whether this is for the benefit of the pupils remains to be proved, but no failure has been apparent at the examinations. I scarcely think the Trustees have any object in view, other than the lower salary at which young women can be hired; but the progress of the children is equal under their management to past years, when more men were engaged. Of course fifty or a hundred dollars, saved per annum, is of some consequence to rate-payers. The number of children attending schools is over former years, but this may, perhaps, be attributed to an increase of population. There are still many who never enter a school-house, which can only be from the carelessness of their parents; free schools making no difference, as the rate-bill is collected in only half of our schools, whilst the absentees are equally numerous from both kinds. When stating that most of our school-houses have globes, it must not be presumed that they are used, for few teachers understand their use; and if they do the children are usually withdrawn, before making enough progress in Geography or Astronomy for them to be of benefit. Prizes have been distributed in some schools, and I think the effect must be good, as the children gaining them are so proud of carrying them home. Of private schools, I can give no satisfactory information. Of Sunday schools there are certainly two or three of which no mention is made in the Trustees annual report. The returns of population are very dubious, and some other columns are not quite filled up as I should wish; but on the whole, the Trustees deserve credit for their endeavours to make up the reports in a satisfactory manner. I am sorry to say the township library is a failure, although costing nine hundred dollars, inclusive of the grant from the Education Office. In two sections, the Trustees positively refuse to have charge of the case of one hundred volumes, to which they are entitled, with the privilege of exchange when read! Our Circuit Board of Public Instruction is very thinly attended. The questions should be sent from the Education Office, with those answers thought necessary for each grade of certificate. We should then have a uniformity with other circuits of the country, which at present we have not.

71. *James Wynn, Esquire, Niagara.*—I beg to inform you that the schools under my jurisdiction are in a first class condition, in regard to numbers, moral government, and educational attainments, and are steadily advancing.

XXV. COUNTY OF WELLAND.

LOW STATE OF THE SCHOOLS—CAUSES—ONE GOOD SCHOOL IN PORT COLBORNE.

72. *The Reverend W. E. Cooper, M. A., Humberstone.*—Having been appointed Local Superintendent of the township of Humberstone, in June last, I am not able to speak as fully and correctly upon the state of the schools in the township as I hope to be able to do, should I remain in office to make a future report.

Low State of the Schools.—Causes.—I have visited the greater number of the schools, and find them, on the whole, doing as well as one could reasonably expect. The township is decidedly behind any other of its age with which I am acquainted. Not only are the people to a very great extent poorly educated themselves, but they seem unwilling to spend more than they can help in having their schools kept open.

You will observe that all our teachers (with one exception) have first-class certificates—but they are from the County Board—except Mr. Langdon's, (of the Port Colborne school), whose certificate is a first-class of the Normal School. I cannot say much for the value of our County Board certificates; the examination was conducted in an unsatisfactory manner in two respects, first—the candidates, were obliged to sit close together, so that copying and mutual help were the rule rather than the exception; and, secondly—the papers were too short, most of them containing but five or six questions, and, I think, too much time was allowed for each one. The examination in Euclid and Algebra was a mere pretence; but very few did anything worth mentioning, although the papers were absurdly easy. The examination was altogether a written one, and lasted one day. At our last meeting the Board passed a resolution modifying the scheme, making the exami-

nation oral in all but mathematical subjects, and extending the time to two days. As regards the papers, I, for one, would far rather have papers sent from the Normal School than prepare them here. In none of the schools is there any religious instruction. Some of them—under some of the teachers—open and close, or open merely, with a prayer; sometimes the Lord's Prayer alone is used, but in none that I am aware of is the authorized form made made use of in its integrity. There is a very large German population in the township; they are somewhat adverse to the Common Schools; the reason given me by some of the Trustees is that their ministers (Lutheran) set them against our irreligious system. I have begun a course of lectures in the sections, and always take occasion to show them that they should blame protestant divisions in religion, and not the school system; that it is owing to religious discord, that it is impossible to have a school system for the whole country, where religious teaching could be systematically given during school hours. I also mentioned the legal provision for religious teaching *after* school hours. There are two German Schools in the township; the people as a general rule, sending their children to these schools, until they are about 14, and then to the Common School. There is also a sort of jealousy felt by the old people at the evident preference of their children for the English language and ways, which has a good deal to do with their opposition to the schools. It will take some years to have things made much better. An ill-informed and consequently narrow-minded generation, will always have it in its power to hinder real progress. The greatest obstacle to overcome, is the parsimonious spirit which makes people unwilling to pay enough for a good teacher, or keep him when they have engaged him. Moreover, considering the teacher to be "hired," and his "wages" a matter of the keenest calculation, the result is, they have no respect for him, and the feeling passes to the children. They get a "cheap teacher" generally, what they call a "school-marm" at from 12 to 14 dollars a month during the summer, employing a better teacher during the winter. The consequence of this, I find to be that the standard of all the rural schools is immeasurably below what it ought to be.

Good School in Port Colborne.—We have a most admirable school in Port Colborne, the standard of which is very satisfactory. In it two teachers are employed, and have not been, and are not likely to be changed. In this (Port Colborne School) alone, I believe, have prizes of any kind been given. I hope to see a change in this respect during the present year. I regret to say that we have no school libraries used in any of the sections. One or two have reported libraries, but on enquiry, I find no one knows very clearly, where they can be got at; they certainly are never used. The great trouble is, that one cannot get at those who are the great drawbacks to the efficient working of the schools. They will not come to lectures or examinations, so that one might be able to suggest a few ideas to them, which might modify their notions to some extent. On the whole the only remedy that can be suggested, as at all likely to meet the case, is to go on patiently working to the best of our power, and as unitedly as possible, trusting that time will bring improvement.

EXAMINATIONS—LIBRARIES—STATE OF THE SCHOOLS.

73. *The Reverend George Bell, Stamford*—I think that religious denominations, do not, in any case, use the school-house for religious instruction

Examinations.—The revised programme is observed by the County Board, (Welland); the questions are printed, and the examination is in writing, but oral questioning is added, at the discretion of the examiners.

Libraries.—The amount, \$660, is the estimated value of *Common School Libraries*; it does not include the value of any other libraries. The other libraries are as follows:

No. 6, Village of Drummondville	
1 Mechanics' Institute—850 vols.	
4 Sabbath School, in the following schools:	
Wesleyan Methodist.	} 1,100 vols.
Canada Presbyterian.	
Church of England.	
Regular Baptist.	
No. 9—1 Sabbath School, Union—100 vols.	

No. 10—Stamford Village.

1 Congregational Library, Church of England—50 vols.

3 Sabbath School, in the following schools :

Wesleyan Methodist

United Presbyterian of N. A. } 400 vols.

Church of England.

Union No. 2. 1 Sab. School Library, Wesleyan Methodist.

State of the Schools.—While the state of the schools in the township may be generally regarded as satisfactory, they differ so much in their standing, that a more particular notice of them should be given. No. 6 and 9 are *superior schools*, conducted with great energy, zeal and hard work, and giving the highest class of Common School training. Nos. 1, 2, 4, 5, 7, 10, and the Roman Catholic Separate School, in No. 7, though differing considerably, may all be said to be *good efficient schools*. Union No. 2, which is very small, and the R. C. Separate School, in No. 1, are *inferior schools*. The school-houses call for the following remarks :—No. 6, a very good and suitable building, well planned and furnished, but not large enough for its very large attendance. Its junior department is excessively crowded. No. 5, a miserable old building, which should not be tolerated as “a seat of learning.” R. C. Sep. No. 1, is in an old dwelling house, which was purchased for this school. It is unsuitable in form and appearance, but is sufficiently roomy, and appears comfortable. No. 10 was burned last week. The school has been re-opened in rented premises, until a new school-house can be erected. The other school-houses are all tolerably convenient, comfortable, and respectable in appearance.”

PROGRESS MADE IN SCHOOL-HOUSES AND SCHOOLS.

74. *S. S. Hagar, Esq. Wainfleet.*—After several years of anxious toil and trouble, I have succeeded in getting the schools under my charge, with one exception, into a favourable condition. The peculiar situation of the Township rendered it very difficult, and I may add, impossible to form it into School Sections, and give general satisfaction to all concerned. It required the work of years, to bring about our present favourable condition, and this we had to accomplish before we could do much in the way of erecting school-houses. Ten years ago, there was not one school-house in this Township worthy of the name, and now we have had erected within five or six years, five first-class brick, and two frame school-houses, and there will be two or three more built during the coming summer. The opinion that has prevailed in many rural districts like this, among the parents, that they have got along well in the world without an education, and their children could do the same, is fast passing away, and those parents begin to feel that it is positively *criminal* in them to allow their children to grow up in ignorance, under our present very favourable school law.”

EXAMINATIONS—GOOD EFFECTS OF PRIZES.

75. *The Reverend D. J. F. MacLeod, M. A., Willoughby.*—“The state of the schools in the township is, on the whole, satisfactory ; five out of the six teachers hold first class certificates.

Examinations.—The examinations by the County Board are conducted with greater care and strictness at each succeeding session, though it is my humble opinion, that the County Boards, as at present constituted, will always be unsatisfactory. The number of members is unnecessarily large, too large to do the work efficiently, and as it is made up of Grammar School Trustees, as well as Local Superintendents, it must contain many who have not the vaguest idea of what an examination, to be worth anything, should be, to say nothing of their ability, or rather inability to conduct one. I earnestly hope that some of the excellent changes proposed at the County Convention, may soon be carried out.

Good Effects of Prizes.—Prizes were distributed at two of the schools in the township—at one of them by myself; there was a good deal of interest manifested, and far from any evil consequences resulting from the distribution, the effects were most beneficial—a marked improvement in the attendance of the pupils, and increased interest in their studies, being the most noticeable.

XXVI. COUNTY OF HALDIMAND.

NON-ATTENDANCE—NO LIBRARIES—PEOPLE ANXIOUS FOR SCHOOLS.

76. *Thomas C. Pinkett, Esq., Camborough.*—*Non-Attendance.*—The cause of non-attendance is generally "indifference of parents," but I am glad to see by the reports, that there are not so many children not attending school as there used to be. The general regulations in regard to religious instruction are not attended to. The revised programme for County Board examinations is observed, and the questions are printed.

No Libraries.—*There are no Libraries.* I see by the reports, that prizes have been distributed, but with what effect, I am not at present prepared to give an opinion. I rather think they have been given to every scholar, which of course, is not as we understand the giving of prizes.

People Anxious for Schools.—I am happy to state that, hard as the times have been, the people generally were for keeping the schools open, and each one has been kept open 9 months.

SLOW PROGRESS—ENCOURAGING REVIEW—ADVANTAGE OF NICE MANNERS IN SCHOOL.

77. *The Reverend John Flood, Dunn and Moulton.*—Distance from the school-house, is the chief cause of non-attendance. The regulations in regard to religious instruction are not followed, except where I observe them myself.

Slow Progress.—When we compare the state of education in any township with that in which it was during the preceding year, we very often fail to perceive, even a little improvement. This arises from the greatness of the cause or work, and the numerous hindrances, against which we have to struggle.

Encouraging Review.—But if we think of the schools, scholars and teachers, fifteen or ten years ago, and consider what they are now, we are delighted with the change which at once bursts upon our minds. They have risen to such a superiority as commands respect in the estimation of any person who was acquainted with them at that time. This is cause for thankfulness, and it ought to encourage us to be patient and persevering in striving to elevate our Common Schools,

Advantage of Nice Manners in School.—Let not those who have been brought up in genteel society, and who are out of employment, feel as if it were degrading to be instructors in good manners, but rather let them regard it as a duty and an honourable calling, to be imparting to the youth of their country some of the refinement in manner to which they have been accustomed. I have been led to give more consideration to this point than I formerly did by what I saw at the beginning of this winter, in one of the schools, of which I am Superintendent. The teacher had a certificate from the Normal School, but it was easy to perceive that, besides this, her previous habits and education had been those of a lady. And I observed that her pupils were quickly being influenced by her example, to be more pleasing in their way of acting and speaking. She was soon called to a school which was nearer home, and more remunerative. I am convinced that as a teacher, she will be a treasure and blessing, wherever she may be employed.

XXVII. COUNTY OF NORFOLK.

STATE OF THE SCHOOLS—GOOD SUGGESTIONS AS TO COMPULSORY EDUCATION AND THE MINIMUM OF TEACHERS' SALARIES.

78. *James Covernton, Esquire, Charlottetown.*—*State of the Schools.*—All the schools were free, with but one exception, where 12½ cents per month were charged (that school has since become free). Although the free school system is this year universal, its results do not in one respect, completely satisfy its ardent supporters, inasmuch as it has not secured larger attendance during the the past year than previously, as my report shows the averages in 1867 were 407—318, whereas they were in 1866, 441—355, being a decline of nearly 9 per cent.

Good Suggestions as to Compulsory Education, and the Minimum of Teachers' Salaries.—It is to be hoped that in the forthcoming School Law Amendment Act, some stringent clauses will be introduced that will compel all parents to send their children to school, for a short period at least, every year. The winter season is the only period that many boys can be spared, and some are so useful through the sleighing, that they are kept steadily on the road, driving teams. If the general interests of society have required that property shall assume the entire expense of the Common Schools, it was, I presume, supposed that universal instruction would be the result. Now the school reports show that has not yet been effected, nor is it likely to be, as this last year contrasts unfavourably with the former, and I venture to assert an opinion, that this grand desideratum can only be secured by insisting upon an annual attendance of some duration, under pain of forfeiture to the School Section, (in which the affront to the humane scope of the school-law is offered), of a sum more than equivalent to the value of the time that ought to be devoted to the business of learning, but given to the every day pursuits of life. The means of dispelling the blighting mists of ignorance are now effectually provided and these means must be brought to bear upon the *entire juvenile* population, even if coercive measures require to be used for the accomplishment of so great a blessing. The revised programme for County examinations has long been enforced in this County. Great care has been taken to raise the standard of qualification of teachers, but no corresponding means exist to secure to the teachers an adequate remuneration—that being left to competition, a mode, that when the supply exceeds the demand, leads to great practical hardships, which is illustrated by certain returns of salaries in my report, where one female of tried ability discharged the duties of a large and onerous department of an important school for \$10 per month, by the year; while in another section \$20 a month were paid to a first-class teacher. If it is requisite to define the minimum of remuneration to Local Superintendents, I think it may be considered equally as important to state what shall be the minimum salaries of first, second and third-class teachers. I cannot help thinking the moral of the Lancashire motto, “A fair day’s wage for a fair day’s work,” will better meet the justice of the case and the *ultimate benefit* of the schools than a short-sighted economy, which, in effect, in some cases, places schools at the disposal of that teacher who will discharge its duties for the smallest recompense. It is generally felt that it is desirable the business of tuition should be a permanent one. To render it a vocation by which its members may live in modest comfort, a standard of remuneration should be fixed, but without some legislative effort of this kind we may be sure that employment in schools will only be temporarily sought as a means to accomplish some more desirable ends and aims of life. I trust the amended School Law will soon be in operation, and that the advantages some of its changes are calculated to secure will soon be experienced. *Necessity* has imposed upon many of us obligations that we have felt but *imperfectly qualified* for; and, I think, many old Local Superintendents will, like myself, be exceedingly pleased to give way to a system better adapted to the advancement of the times and the wants of the schools.

NON-ATTENDANCE—PERSONAL KNOWLEDGE IMPERFECT

79. *The Reverend D. Deacon, Walsingham.*—*Non-Attendance.*—The only reason for non-attendance of children of school age I find given in the reports is “indifference of parents.” And, if I may express my opinion, I think there are many whose parents are too poor to clothe them properly. This, I have no doubt, is a reason for their non-attendance in many places.

Personal Knowledge Imperfect.—Concerning the religious instruction, I find that in some sections the regulations are observed, but with what result I cannot say. There is only one section that is reported as having the books of the library covered. As to what influence these libraries have through the township I am not able to tell. I am aware that in many of the sections, prizes were distributed, but with what effect I have not been able to learn, nor have I had any opportunity of enquiring.

COMPULSORY ATTENDANCE ADVOCATED—EXAMPLE OF SCOTLAND—GOOD EFFECT OF PRIZES.

80. *The Reverend William Craigie, Woodhouse.*—*Compulsory Attendance Advocated.*—

The cause of non-attendance of pupils is, in most cases, the carelessness of parents, and might be remedied with much advantage to the country were power vested in some local authority to compel attendance as you some time ago proposed.

Example of Scotland.—To obtain that and some other improvements which we possess in our national system, there is a movement going on in Scotland, where the interests of education have long been carefully attended to. At a public meeting held in Glasgow, on the 22nd January, on the subject of national education, the Lord Provost in the chair, resolutions were adopted declaring "that any system of national education must be defective which does not enforce the attendance of children at school; that religious teaching should be given at a distinct hour, and that any child be withheld from such teaching if his or her parents objected to it; also that there should be local rating and local management with a Central Board in Scotland." The revised programme for County Board examinations is strictly observed and the questions are printed.

Good Effects of Prizes.—Where prizes are distributed they have a good effect in aiding the teacher and encouraging the pupils.

XXVIII. COUNTY OF OXFORD.

INCREASED INTEREST DISPLAYED IN THE SCHOOLS.

81. *The Reverend S. Belcher, Nissouri East.*—I am happy to be able to state that I believe, in every section of the township, the people are becoming more convinced of the importance of education, and are displaying increased interest in the matter.

CARELESS CHOICE OF TRUSTEES—NIGGARDLINESS IN PROVIDING APPARATUS AND MAPS—VALUE OF PRIZES—MISFORTUNE OF AN IGNORANT COMMUNITY.

82. *The Reverend John Wilkinson, Norwich South.*—*Careless Choice of Trustees.*—I think I see the ground on which a part of our trouble rests, viz.:—The want of care in the choice, respecting qualification for office, when changing Trustees. Still there is unquestionably a manifest improvement on the whole, and no doubt will be in the future.

Niggardliness in Providing Apparatus and Maps.—It is very desirable that there should be a greater amount of ambition and liberality respecting the furnishing of the schools with all manner of apparatus, maps, &c.

Value of Prizes.—The distribution of prizes, in some cases I have witnessed at the close of the examinations, contributed to confirm me in the belief that the practice should be more frequent and more universal. It is an encouragement to faithfulness and punctuality on the part of the children, and might be one great inducement to better attendance. As far as religious instructions are concerned, viz., on the part of the teachers, I find of necessity a diversity must exist. One is a professor of religion, another is not, one reads and prays both, another reads only, and some are too bashful to do either. Should there not be a rule? I invariably enforce religious sentiments on all visitings of the schools, and liberality in their support. The best material may cost the most, but it wears the best.

Misfortune of an Ignorant Community.—An ignorant community is credulous, covetous, selfish, difficult to manage; hence disputations and differences. The scale of scientific and moral training must be raised, and more crime will be prevented at less expense than can be cured at a greater; thus advance costs less than retrograde movements, virtue than crime, church and school than houses and officials of correction, with nameless expenses. It is well for the community at large that the present school system contains so much of the compulsory power to impel to the discharge of duty on the part of officials, and better would it be if something could be done to compel attendance on the part of pupils, inasmuch as schools are almost universally free.

RELIGIOUS INSTRUCTION—INFLUENCE OF PRIZES—CHANGING TEACHERS DEPRECATED—THIRD-CLASS CERTIFICATES RESTRICTED.

83. *The Reverend John Hunt, Oxford East.*—*Religious Instruction.*—With one or two exceptions the Bible is read and religious exercises attended to as directed by

authority. All are free schools but one, and I am of opinion that it would be much better for the section if that were so as well.

Influence of Prizes.—Prizes have been awarded in at least two schools, and I think I have observed their good effects in producing a greater degree of diligence on the part of the pupils, as it was made known several months beforehand that the distribution would take place according to standing in the various classes.

Changing Teachers Deprecated.—Several changes have been made in teachers the past year. When a good teacher has been engaged for several years, and is doing his work well, changing is very much to be deprecated, merely for the sake of procuring one at a lower salary. In many cases, what is gained in this way, is lost by the decrease in the average attendance at the school, and as a consequence the amount granted from the Government Fund, is proportionately less. The teachers of this county are generally well qualified for their profession. The examinations of the County Board of Public Instruction are very thorough, and it is, I think, a rare instance when any unworthy candidate obtains a teacher's certificate.

Third-Class Certificates Restricted.—In no case will the Board grant a *third-class* certificate, except to a person already engaged in teaching, (and who has probably before obtained a second class) and then only for the term of six months, so as not to put trustees to unnecessary inconvenience. On the whole, looking at the reports from different parts of the country, I cannot but regard this county as being far in advance of many other places as to educational interests, and yet, there is room for much improvement. I hope that an arrangement will be made at the next meeting of the Board to grant no one a third-class certificate a second time.

READING IN THE SCHOOLS DEFECTIVE.

84. *Joseph B. Piper, Esquire, Oxford West.*—I do not find proper attention paid to reading, punctuation and inflection of the voice. I think that our readers should have several pages devoted to lessons on this subject.

GRATIFYING IMPROVEMENT—STANDARD FOR CERTIFICATES RAISED—WANT OF LIBRARY DEPRECATED—GOOD SCHOOL HOUSES.

85. *The Reverend William Graham, Zorra West.*—*Gratifying Improvement.*—It affords me the greatest pleasure to announce great improvements in the schools in this township, not only in the credit that teachers reflect on themselves, but also in the efficiency and qualifications of the teachers employed.

Standard for Certificates Raised.—Our Board of Public Instruction has wisely raised the standard, and we are witnessing a marked change for the better, in this respect. The Revised Programme of the County Board is duly observed. The daily proceedings of the schools under my charge are opened and closed by prayer or reading the Scriptures.

Want of Library Deprecated.—The deficiency in school libraries is severely felt in some Sections of our Township.

Good School Houses.—I am very much pleased with the condition of most of our school houses in the Township. Those of the primitive kind are replaced, or being replaced by new, suitable, and substantial brick buildings. In regard to religious instruction, there is considerable improvement, and facilities are increasing. But a very small proportion of the children in the Township, are not favoured with tuition, and some of these in consequence of unfavourable circumstances. In taking a retrospective view of the year's work I find a decided improvement, and it is pleasing and delightful to look at the state of our teachers and pupils now, compared with years gone by, giving a sufficient cause of thanksgiving to the author of all good.

XXIX. COUNTY OF WELLINGTON.

STEADY PROGRESS—CHANGE OF BOUNDARIES TROUBLESOME—SCHOOL HOUSE IMPROVEMENTS—TEACHERS' SALARIES INCREASED—EXPENDITURE FOR MAPS AND PRIZES—A SCHOOL 17 YEARS WITHOUT MAPS, &C.—MISCELLANEOUS INFORMATION.

86. *A Dingwall Fordyce, Esquire, North Riding.*—*Steady Progress.*—Taking them as a

whole, the schools have been going on satisfactorily during the past year, some most particularly so, while some few have been in a languid enough state. Most of the schools reported were open the whole year, the exceptions being mostly in the township of Luther, where the shorter period is not at present to be wondered at or greatly complained of. There are ten schools in the township, half of them are kept open all the year round. The whole number of schools more or less in operation during the year has been 97—ten of which are Roman Catholic separate schools—with a solitary exception all free. The number of schools open is the same as in the former year, but embraces two new schools in Luther.

Change of Boundaries Troublesome.—Various alterations in territorial limits besides that now alluded to, have likewise been made—whether altogether wisely or not I am scarcely prepared to say. Changes of the character I have mentioned are the most serious ones which have affected the schools under my supervision for the past year. They have occasioned a vast amount of trouble in their respective neighbourhoods, and occupied much of the time of the other Township Councils. If the arrangement that has now been made is found to work at all well it will be great relief to all concerned, and I shall heartily rejoice at it. In some cases, I fear, it will not make a final or altogether satisfactory settlement of the matter. In some of the Union Sections, too, where there has been no proposition of dissolution emanating from either Township Council, much difficulty has been felt from the great difference of the valuation of the property in adjoining Townships. Something has been done in the way of building.

School House Improvements.—A good brick school-house has been erected in Section 6, Garafraxa, while a substantial and handsome stone dwelling has been built as a teacher's residence in Section 4, Nichol, and steps have been taken for building in Section 13, Peel, a brick school-house, to be finished with the latest improvements in the way of seating. The school-house in the village of Salem has been greatly altered for the better. The ground round the school-house has also been nicely enclosed, levelled and much improved. Comparatively few of the schools get any benefit from the Clergy Reserve Fund. Those in the Township of Nichol, however, do. In this way \$275 were distributed among the Common and Separate Schools there last September.

Teachers' Salaries Increased.—I am glad to say that, except in the Townships of Peel and Maryborough, the average of salaries given to the teachers has been slightly on the increase. The register number of pupils shows an increase of 4 per cent. over the former year. The aggregate attendance, however, shews a diminution of one-half per cent, comparing the first half of 1867 with the same half of 1866; but in the last half of 1867, making a like comparison, there is an increase of 22 per cent. Several of the larger schools have come to feel the need of having a regular assistant to the teacher.

Expenditure for Maps and Prizes.—The sum of \$244 has been laid out on prizes; the former year there were nearly \$100 less; but, after all, no more than 32 schools have availed themselves of this useful method of stimulating and encouraging deserving pupils. The amount expended for maps, on the other hand, is less than the former year's outlay,—being only \$129—representing the action, in this particular, of 14 schools. More than half of these have not been long in existence.

A School 17 Years without Maps.—One of the others has at last been aroused to do what was needful, after having dispensed with anything of the kind for no less a time than 17 years.

Miscellaneous Information.—As regards text books, the approximation to uniformity is being made perhaps as speedily as, under the circumstances, could well be expected; there being but one or two of the works, not strictly speaking, authorized. Perhaps there may be scarcely an authorized work in all respects answering the end of what is in use. Having explained fully last year the mode I had taken of circulating School Lectures in all the schools under my care, I prepared a school lecture, on purpose, and printed it. I shall only say here that the same plan was followed in 1867. In a few cases I gave the lecture orally, which was of a practical character; but in reporting the statistics I have followed exactly what I find in the Trustees' reports, and it may possibly be that the short address always given, as a matter of course and duty on visiting a school, is acknowledged in some cases as a lecture by the teacher; in other cases the printed lecture is particularized, of which nearly 2000 copies were circulated as I have said.

The County Board during the past year, has made trial of a plan for the greater convenience of teachers, which promises well. It is to have three different places for examination, at points which are centres, and yet distant from each other. Fergus, Orangeville and Mount Forest. The teachers enter more freshly on their work, from being saved a fatiguing journey in the extreme heat of summer or depth of winter, and are saved considerable expenditure, both of time and money. The examination proceeds simultaneously in all three localities, under the charge of a committee, composed of at least two members of the Board, (one of whom is resident where the examination is held,) who see that the examination proceeds properly—review the papers and transmit them for examination by the whole Board on an early day thereafter. The statistical reports shew that out of the 97 schools which have been open, the Bible or Testament, or both are read in 81. Of the other 16, there are nine Roman Catholic Separate Schools, and one a mixed school under Roman Catholic trustees and teachers; two are mixed schools, but many have a pretty large number of Roman Catholic scholars. In some cases, where this is so, a certain delicacy is felt about introducing the reading of the Scriptures—a delicacy which the law does not require, which Protestant parents might take exception to, but which, nevertheless, under all circumstances, it might not be best to question the propriety of.

HIGH STANDING OF TEACHERS—VALUE OF THE MERIT CARDS—GOOD SCHOOL HOUSES SUPERSEDING THE OLD ONES.

87. *The Reverend James Kilgour, South Riding.*—The schools under my charge continue to make a considerable improvement. The average attendance for the past year, is larger than it was at any time past.

High Standing of Teachers.—Out of nearly fifty persons employed as teachers, it is not to be wondered at, should one or two be inefficient, and perhaps a similar number unfaithful and trifling. These, we trust, especially the latter class, will soon find their proper place, and that is outside of the profession. More than three-fourths of the teachers employed in this Riding are faithful, energetic and efficient. All hold first-class certificates except two, and these have grade A of the second-class. A considerable number of the schools have had prizes distributed in a promiscuous manner among the scholars—that is every child getting some sort of a book.

Value of the Merit Cards.—In only a few have the merit cards been adopted, and prizes awarded accordingly. The teachers who have introduced the merit cards, consider them as producing a healthy stimulus among the pupils. In fully one-half of the schools, there are no libraries. This is much to be regretted, seeing that books can be obtained at half-price from the Educational Department. A school library, I trust, will soon be placed in each section.

Good School Houses Superseding the Old Ones.—The old-fashioned, incommodious, and in many instances, uncouth school houses, are giving place to more substantial and elegant buildings. In three of the sections, tenders have been accepted to build stone school houses, to be completed in 1868. The County Board for this Riding has for years past had its examination papers printed. No third-class certificates have been granted for several years, neither do I know the School Section in my jurisdiction that would submit to have such a class of teachers imposed upon them.

XXX. COUNTY OF GREY.

FREE SCHOOLS UNIVERSAL—TEACHERS' EXAMINATIONS RIGID—LIBRARIES—PRIZES—READERS, ETC.

88. *William Ferguson, Esquire, Artemesia, Melancthon, Osprey and Proton.*—*Free Schools Universal.*—The schools are all conducted on the free principle. I regret, however, that notwithstanding the facilities afforded, there are many of the school population in each township who do not attend any school. The causes of non-attendance are various, indifference in a few cases, in others poverty, distance from the Section School, badness of the roads in the newer sections, and the value of rural labour, all act as detaining causes. In reference to the general regulations as to weekly religious instruction by the ministers of the different persuasions, as far as I am aware, none of the resident

clergymen appear to have leisure to avail themselves of the recommendation or permission of the school law in that respect; yet, on the whole, through the many excellent Sunday Schools now successfully sustained by the various denominations, the religious instruction of the youth is considerably attended to.

Teachers Examinations Rigid.—The revised programme for the examination of teachers is strictly observed, the questions are printed, and for a number of years past it has been the aim of this County Board to elevate and render more efficient the teachers' profession. With this view the examinations have been somewhat rigid in fundamental and essential studies, especially in reference to first-class applicants, while the duration of certificates to qualified teachers has been proportionably extended.

Libraries.—As to libraries I should state that there still exist the remains of the several hundred volumes obtained many years ago for the township of Artemesia, and of smaller supplies for the township of Osprey and one School Section of Melancthon, but as yet there are none in the township of Proton. The books more adapted to juvenile reading have been so often read as to be now a good deal worn out, and with the several Sunday School libraries have interested and fostered a taste for reading in most of the young people, but many of the larger and standard works are uncalled for, and are covered, numbered and labelled, but to a large extent unread. I do not think the library regulations are strictly observed. The Trustees of the school at Priceville intend to procure a library for their section during the present year.

Prizes.—In several schools prizes have been distributed, and in a few cases temporary jealousies* were created, but, on the whole, I think that the distribution of prizes, has been beneficial. Some schools have obtained from the Department during the past year, from \$12 to \$20 worth of prize books. In many school sections, the *Journal of Education* is justly prized and carefully read by Trustees and Teachers.

Readers, &c.—The new series of Readers authorized by the Council of Public Instruction, is rapidly superseding the former National series; but a great want is still felt in the total absence of authorized manuals on the "Art of Reading"† "Mental Arithmetic," "School Organization" and "Drill for boys at school." I have received numerous applications from teachers, and others, as to how such manuals can be procured, and it is to be regretted that none appear to have been published. The issue of such manuals would be hailed with delight by the friends of Common Schools in this county. I may just add that but one case of arbitration has devolved on me for the past six or seven years.

ESTABLISHMENT OF TOWNSHIP BOARDS ADVOCATED—REASONS GIVEN—ANALYSIS OF SCHOOLS—RELIGIOUS EXERCISES—VALUE OF PRIZES.

§9. *Charles Gordon, Esquire, Townships of Derby, Holland, Keppel, Sarawak, Sullivan, and Sydenham.*—The majority of the Trustees' reports agree in attributing non-attendance to the indifference of parents. It is also certain that in many cases sickness, long distance and the almost impassable state of the roads, are fruitful causes of the children being numbered in the non-attendance list.

Establishment of Township Boards Advocated—Reasons Given.—There is also, in my opinion, another cause to be found in the succession of indifferent to good teachers, which would in a measure at least, be counteracted by the substitution of Township Boards for the present system of School Section Trustees; in too many cases, the Trustees for the sake of a few dollars, inflicting the injustice of engaging indifferent teachers.

Analysis of Schools.—There were in operation during the year 1867,—54 schools,—51 Common, and 3 Roman Catholic separate schools—taught by 29 male and 24 female teachers—one not reported. There were 16 first, 36 second, 1 third-class teachers in Roman Catholic separate schools in the Township of Holland, and one not reported. There were 51 reported free, 2 not free, and one not reported. The free system may in these Townships be said to be universal. The private School reported in the Township of Holland has, I think, been closed.

Religious Exercises.—The regular use of prayer is always more or less beneficial, and

* The use of the Departmental Merit Cards would prevent these jealousies.

† The "Art of Reading" published by the Irish National Board, can be obtained at the Depository, Toronto.

when the teacher's example comports with the duty, it is no doubt decidedly advantageous to the moral training of the pupils. The Board of Public Instruction for the County of Grey observes the programme, and the examination questions are printed—a new programme at each sitting of the Board. The libraries do not appear to be used as much as they ought to be, but where established, there is no doubt of their exercising a beneficial influence, frequently in an indirect manner.

Value of Prizes.—In sections where prizes are distributed, their influence both with regard to attendance and diligence, is decidedly favourable, the teacher finding their distribution a great auxiliary in stimulating the pupils both in their studies and punctuality in attendance.

XXXI. COUNTY OF PERTH.

RELIGIOUS INSTRUCTION GIVEN—PRIZES BENEFICIAL—TOWNSHIPS COMPARED—SMALL SALARIES OF LOCAL SUPERINTENDENTS.

90. *William Ruth, Esquire, Blanchard, Ellice, Fullarton, Hibbert, and Logan.*—*Religious Instruction Given.*—The regulations with regard to religious instruction are generally observed. As to the result, I am of opinion that it satisfies the desire generally entertained by parents, that the education of their children should not be wholly unaccompanied by religious instruction. I should also hope, though I have no facts to prove it, that it is not without its effect on the morals of the children. The revised programme for County Board examinations is observed, and the examination questions are printed. An entirely new set of questions is generally prepared each half year. The Board is efficient, and in good working order. I can give no further information respecting libraries, than that given in the reports, which is meagre and unsatisfactory. It is evident that these Townships are behind, if not indifferent, on the subject of libraries.

Prizes Beneficial.—As far as I have observed, the distribution of prizes has been attended with beneficial results; but such distribution requires judicious management, otherwise it will do more harm than good.

Townships compared.—Comparing these Townships with each other, Fullarton stands first in the character of its schools, while Logan and Ellice are furthest behind. In these latter Townships, the circumstances of many of the settlers—the broken and swampy character of the land, and the want of homogeneity of the population—tend to isolation and lack of unity of purpose; while a feeling of indifference, partly the result of the two former causes, but too generally prevails. It will be observed by my reports, that the schools were all free, and nearly all kept open the whole year—so far well. I have noticed that teachers who have attended the Normal School, are most efficient, and shew the benefit of their training; but the poor salaries paid teachers must be noted as one of the drawbacks here. On the whole, comparing the schools now with what they were fourteen years ago—when I held the office of Local Superintendent for this county—their progress is gratifying, though not quite up to the material progress of these Townships during the same period. I have strong hopes that the future will develop an increasing interest in the cause of education. One thing that operates against the progress of the schools, is a want of efficient and uniform supervision.

Small Salaries of Local Superintendents.—This is attributable in a great degree to the School Act, which suggests the miserable pittance of four dollars a school as the pay of Local Superintendents*. The result is, constant change in the office, and in many cases a merely nominal performance of duty. This subject should not be lost sight of in any future changes of the school laws.

XXXII. COUNTY OF HURON.

GRATIFYING CONDITION OF THE SCHOOLS—NO THIRD-CLASS TEACHERS—CHANGE OF TEACHERS DEPRECATED—PRIZE GIVING ADVANCING—RESULTS VERY SATISFACTORY.

91. *Thomas Stokes, Esquire, Goderich.*—*Gratifying Condition of the Schools.*—My

* Before this law was passed, the "pittance" to Local Superintendents was often only one or two dollars a school—now the minimum is four dollars per school.

My visitation in September last, was upon the whole, very satisfactory. I found, with one or two exceptions, the schools well attended—the pupils generally intelligent, well clad, orderly and clean—the majority of them possessing a laudable spirit of emulation.

No Third-Class Teachers.—There are no third-class teachers in the Township, and most of the teachers now employed, will compare favourably with any.

Change of Teachers Deprecated.—There has been a change of four teachers this year,—two have retired in consequence of ill-health, one to pursue a new line of life, and the remaining one has removed to a school in another Township, where he receives a much larger salary. A change of teachers where they are all that can be desired, is much to be deplored, it proving very prejudicial to the educational interests of the respective sections. The revised programme for County Board examinations is observed, and the questions are printed. The regulations with regard to religious instruction are not so fully observed as I could desire.

Prize Giving Advancing.—In some of the schools, prizes have been awarded during the year, and with very satisfactory results; the prize-giving system seems to be advancing. I am sorry to find so few libraries, but hope in the future to be able to report more favourably.

Results Very Satisfactory.—The books seem to be in general use, and if they be of the right kind, cannot fail to be productive of very beneficial results—morally and intellectually—both to parent and child.

ALL THE SCHOOLS OPEN—WELL SUSTAINED—WELL MANAGED LIBRARIES IN ALL THE SCHOOLS—EXCELLENT EFFECT OF GOOD SCHOOL HOUSES ON THE ATTENDANCE OF PUPILS—PRIZES A POWERFUL LEVER—THE READERS—SUGGESTIONS.

92. *R. D. Bonis, Esquire, Hay, Stephen and Usborne.*—*All the Schools open—Well Sustained.*—All the Sections were in constant operation during the past year, and the interests of education are well sustained in these Townships.

Well Managed Libraries in all the Schools.—Every School Section is supplied with a well selected library, furnished through the enlightened liberality of the respective Township Councils, and changed from section to section annually, by Township librarians, who report on the condition and due return of the books. I have made no return of children not attending any school, because I am aware that it is seldom anything better than a rough estimate made from the school population. There are to be found boys and girls approaching the limit of sixteen years who have already acquired a tolerable Common School education, and a great number of children over five years who have not yet commenced school, and as far as I can learn, the non-attendants are almost wholly composed of these two classes. Distance from the school house on the part of the younger children, and a dislike of the teacher on the part of the older ones, are the apologies offered by the parents for non-attendance; and I think it but fair to state, that I think something ought to be done to enable children to attend the most convenient school. The distribution of the Legislative and local school grants, according to attendance—irrespective of section boundaries—would be a measure of simple justice.

Excellent effect of good school houses on the attendance of pupils.—The erection of good well-finished school houses has the effect of increasing the school attendance in a marked degree, and the restrictions placed on Trustees not allowing them to borrow money for building purposes at a greater than the legal rate of interest ought to be removed. A good school house is an essential to a good school, and every facility ought to be afforded Trustees who desire to build. It is absolutely discreditable to know that Trustees who build large expensive school houses in this part of the country are obliged to have recourse to an evasion of the school law in order to procure the means, as money cannot be procured for such a purpose at a legal rate of interest. Very few prizes have been distributed during the past year and there seems to be a general feeling that prize books are not as much valued by the pupils now as they were formerly, which is no doubt owing in some degree to the fact that Sunday School prizes are so frequently distributed, and that the pupils have free access to the school section libraries.

Prizes a powerful lever.—I am of opinion, however, that the prize system is a powerful lever in the hands of the judicious teacher, and that when books are so common as not to excite emulation, other articles might be introduced with advantage.

The Readers—Suggestions.—I cannot conclude without expressing my approbation of the revised school books. The matter of the lessons is all that could be desired, and now that a change is being made I would respectfully suggest that foreign names be marked with the accent, and that ten or a dozen words, the most difficult in the lesson, be placed before each lesson accented and defined, to assist as a spelling exercise. From an experience of nearly twenty years employed as a teacher and Local Superintendent in Canada, I am convinced that such an arrangement would enhance the value of the books.

SCHOOL HOUSES TOO SMALL—CAREFUL EXAMINATION OF TEACHERS—FREE SCHOOLS—
UNIVERSAL PRIZES—NON-ATTENDANCE.

93. *The Reverend Stephen Young, Hullett—School Houses too Small.*—There are several substantial and commodious school-houses in the township, but the majority of them are too small to accommodate the number of children that attend them. The revised programme for County Board examinations is exclusively observed, and the questions are all printed.

Careful Examination of Teachers.—There is also an increasing carefulness in the examination of candidates for certificates.

Free Schools.—The free school system is adopted in all the sections, and seems to meet with general approval. By the returns you will see that the Bible is used in eight of the schools, and six are reported as being opened and closed with prayer.

Universal Prizes.—Prizes were distributed in eight schools, and, so far as can be ascertained, with beneficial results.

Non-Attendance.—As to non-attendance, the chief causes seem to be distance from school; need of assistance at home as soon as the children could be of service, and the general feeling of "indifference of parents" so often mentioned.

SCHOOLS OPEN—PROGRESS—NON-ATTENDANCE—LIBRARY AND PRIZES BENEFICIAL.

94. *The Reverend Mathew Barr, McKillop and Tuckersmith—Schools Open—Progress.*—In the township of Tuckersmith there were eight, and in that of McKillop nine schools in operation throughout the whole year. A new section was set apart in which an elegant and substantial brick school-house has been erected, at a cost of \$3,500.

Non-Attendance.—In Tuckersmith the number of children between the ages of five and sixteen years not attending any school is nine, being eighteen less than last year. I regret that in five of the sections of McKillop, one hundred and thirty-six children between these ages have not attended any school, being an increase of seventeen above that reported last year. Indifference of parents is the assigned cause and I think is the real one, as no indigent persons are reported, and the roads are not worse than in sections in which all, or nearly all, attend. The regulations in regard to religious instruction are not much observed in either township. In both townships the schools are opened and closed by prayer. In Tuckersmith in seven out of the eight the Bible or Testament is used. In McKillop, in only four out of the nine. The revised programme for County Board Examinations is observed and the questions are printed.

Library and Prizes Beneficial.—In the libraries of both townships the books are covered, numbered and labelled, and the regulations are observed. They are open to the public, and exert a beneficial influence. In McKillop there were four hundred and thirty-two separate applications for books during the year. Prizes were distributed in a majority of the schools and with beneficial effects.

NO THIRD, AND BUT ONE SECOND-CLASS TEACHER—LIBRARIES—PRIZES INCREASING
—MERIT CARDS ADMIRABLE.

95. *The Reverend H. Gibson, Stanley.*—Eleven schools have been in operation in this Township during the year 1867. Ten of the teachers hold first-class certificates, several of whom have taught in this Township for a number of years, with distinguished ability and success, while all, I may say, have discharged their duties in a faithful and efficient manner.

No Third, and but one Second-Class Teacher.—There are no third-class teachers employ-

ed in any of the sections, and only one holding a second-class certificate. The revised programme for County Board Examinations is observed, and the examination questions are printed. At one time, I believe the examinations before the Board were conducted orally, but the present mode is preferable in testing the qualifications of teachers. I have to report that the general regulations respecting religious instruction, are in no instance attended to by the Clergy; so far, however, as teachers are concerned, the rules regarding religious instruction are pretty generally observed.

Libraries.—We have six libraries connected with our schools in the Township—the beneficial influences of which must depend very much upon the teachers themselves, who are generally the librarians—and I regret to say that, so far as I can learn, very few, comparatively, of the books are read.

Prizes Increasing.—In several schools, prizes have been distributed during the past year, and with very beneficial results; and, so far as my knowledge goes, the prize-giving system is gradually gaining ground in the schools.

Merit Cards Admirable.—I am glad to see the system of merit cards established in several of our schools. The system, I think, is admirable. The prospect of receiving these cards at the close of every day, or every week, keeps the school, as it were, alive; besides, I think it is the best way of testing the proficiency of the schools, and preparing for the distribution of prizes according to the merit of the pupil. It has always been my endeavour to encourage the distribution of prizes, believing that a wholesome stimulus cannot fail to have a beneficial effect.

STEADY PROGRESS—CAREFUL EXAMINATION OF TEACHERS—PRIZES AND MERIT CARDS MOST BENEFICIAL—TEXT BOOKS UNIFORM.

96. *The Reverend William Daunt, Wawanosh West—Steady Progress.*—The schools under my superintendence, with only one exception, have during the past year, manifested a degree of vitality and progress, that are truly commendable. It is indeed deserving of notice, that considering the number of pupils of school age, in the respective sections, so few are debarred from the advantages which our excellent system of instruction affords. The schools, as a general rule, command the respect and confidence, and in several instances, the earnest co-operation of the parents and guardians. The tendency seems to be to employ well qualified and efficient teachers, with an adequate remuneration, which is the only plan that can give real satisfaction. As the circumstances of the people have improved, we find a corresponding change in the aspect and tone of all our schools.

Careful Examination of Teachers.—I am glad to be in a position to state that our County Board of Instruction, have adopted a strict and rigorous method in conducting the examinations, which are all on printed Papers; the questions are carefully prepared and thoroughly criticised by all the members before they are approved of—the standard nearly approximating to that adopted in the Normal School examinations. Hence the importance of these examinations is being sensibly and practically felt by the teachers who find it a very difficult matter to obtain a first class certificate. Third class teachers will ere long be in very little requisition.

Prizes and Merit Cards most Beneficial.—I find that the distribution of prizes and merit cards, where adopted in some of the schools, has a most desirable and beneficial effect, tending to keep alive a healthy stimulus and active emulation among the pupils; also in a very marked degree improving the daily attendance. I hope to see the practice fully carried out in all the schools under my charge. School libraries are a great desideratum which I hope the conditions of the sections will soon be able to meet. The taste for good general reading, I regret to say, is much below what it ought to be. The township library seems to be in a very languishing condition. In these respects there is great room for decided improvement. But as the schools assume a more elevated character, the literary taste will be better cultivated, and a more enlightened spirit will prevail.

Text Books Uniform.—The text books recommended by the Council of Public Instruction are most strictly adhered to in the schools, and the uniformity thus presented is attended with most happy results. The teacher has not to contend with that embarrassment which arises from a set of books of a heterogeneous character. Much valuable time and labour are saved by the uniform system, and greater facilities afforded for the faithful

discharge of the teacher's duties. The schools are tolerably well furnished with maps and will soon be able to aspire to regular sets of apparatus as the higher studies become introduced.

XXXIII. COUNTY OF BRUCE.

SCHOOLS PROGRESSING—NON-ATTENDANCE ACCOUNTED FOR—SCHOOLS ALL FREE—
FEWER "CHEAP" TEACHERS—GOOD SCHOOL HOUSES—SUNDAY SCHOOLS.

97. *John Eckford, Esquire, Brant, Carrick, Culross, Greenock, Elderslie, and Saugeen.*—*Schools Progressing.*—It is one proof of the improvement of our schools, that year after year, I have less difficulty in furnishing from the reports, reliable returns to the Department.

Non-Attendance Accounted For.—The returns of children of school age, not attending any school whatever, are correct, so far as they go; but very many of the Trustees' reports leave the question unanswered. It should be remembered that many of our best educated juveniles are included. These are, say from 13 to 16 years of age, and now engaged in the business of life. In these six Townships, 5,372 children's names were on the Registers in the first six months, when we have usually the best attendance—equalling the regular attendance of 2,145. This shows some improvement, but in addition to the ordinary hinderances, Measles, Hooping Cough and also Scarlet Fever were unusually prevalent. The last mentioned disease was so virulent and fatal that one school was closed for a considerable time. It is creditable to the teachers, that in a large district and during thirteen years, I have only got two forged returns of attendance. I have had no reason to suspect any others.

Schools all Free.—The schools are all free. Few of them are now closed during any part of the year.

Fewer "Cheap" Teachers.—There is also less to complain of in regard to inferior and cheap teachers. The Board of Examination is fast remedying this evil. Numbers are rejected every season, and to such an extent at our last meeting, that in my district there was difficulty in obtaining the needful supply. With better times, salaries are improving.

Good School Houses.—In seven sections, new school houses, all stone, brick or frame, have been erected, and excellent ones they are. Some have been enlarged. I examined the whole very carefully last year, and though the furniture is in many defective, the accommodation in others too small, yet, I cannot say, that in any one the health of either teachers or scholars is seriously endangered. In nearly all the schools, there is prayer morning and evening. In a few only the Scriptures are not read. It is a rare case in which it can be said there is any further religious instruction.

Sunday Schools.—But not a little is done elsewhere by Bible Classes and Sunday Schools superintended and taught by Clergymen and earnest Christian men and women. Their libraries also are more numerous and better supported than those of the common schools. There is also a very extensive circulation of illustrated papers, so well adapted for the religious instruction and improvement of the young. To dwell more particularly on the progress of education in this district would only be to repeat in substance my more recent reports. We have many well-taught, well-attended schools, and many expressions of satisfaction on the part of the people. We are labouring with an encouraging measure of success, to bring up all to a condition in which we could speak of their prosperity without any hesitancy. Able, zealous teachers, who can win the esteem and affection of the youth, are above all others the men to do it.

SCHOOLS PROSPEROUS THOUGH THE COUNTRY IS NEW—CAUSES OF CONGRATULATION
IN CANADA COMPARED WITH OLDER COUNTRIES—EXCEPTIONS.

98. *The Reverend William Fraser, Bruce, Huron.*—*Schools Prosperous, though the Country is New.*—I am happy to state that the schools under my superintendency are in a prosperous condition, and rapidly advancing. The schools of four townships are free. Teachers are fast advancing in qualifications. The children in attendance and the people are far more willing to supply the means, and help onwards the needful training of their children, determined that the future shall be far in advance of the past. This, in a new country like

ours 17 years ago the wild hunting field of the red man, is highly honourable and very hopeful for all concerned. Principles of policy are in our country just now on their trial, but to you, Sir, it is no small pleasure after the painful labour of many years, that the system of Common School education for our common country has been pretty fairly tested—the battle is fought and won.

Causes of Congratulation in Canada, Compared with Older Countries.—A people in our condition with the small means employed, compared with other lands, should find much more cause for gratitude than complaint. Yea, our Common Schools apart from language, are in advance of the best Common Schools in England, Ireland and Scotland. I state solely what I know. The Parochial Schools of Scotland are allowed to be the best in fatherland. Fifty years ago, I passed a share of my time in three of them, and last June I examined the same schools without finding any improvement. The teacher was a master of Arts, but as a whole, the school was not superior nor even equal to some of our own schools. In one point, certainly, they are three times in advance of us, and that is in the expense. I admired much the fine house and garden of the teacher, with the neat walks and trees around, as well as the substantial character of the school house; but with the inside as above, we could compare work. Moreover, in rooms and furniture, many of our houses are far more adapted to the work, and in a few years all our school houses, I trust, will be so. From the "Elgin Courant," of January 3rd, I find there in a great parade, the building of a new school house for the parish of Elie, Scotland, and for a nephew of mine as a teacher; cost \$2,500, all paid by two great proprietors. Still, we are vain enough to suppose that many of our houses at one-fifth the cost, answer the end far better.

Exceptions.—Where is the common sense of occupying a school room for 250 scholars, and 58 feet long, but only 22 feet wide. It needs ventilation indeed at 12 feet high. Our Board uses the programme of examination required by law, the papers are printed, and we keep the standard of qualifications as high as the law and circumstances of the case will admit.

XXXIV. COUNTY OF MIDDLESEX.

OLD SCHOOL HOUSES AND INFERIOR TEACHERS A GREAT DRAWBACK—NON ATTENDANCE—MISCELLANEOUS REMARKS—VALUE OF PRIZES—COMPETITIVE EXAMINATIONS NOT ENCOURAGED BY THE TOWNSHIP COUNCIL.

99. *The Reverend T. E. Sanders, Biddulph.*—*Old School Houses and Inferior Teachers a Great Drawback.*—I feel pleased in being able to report a decided improvement in our schools. Still, there is room for further improvement; but that state of improvement which, I fear, will not be realized, until the old log school houses are replaced with brick ones. The teachers in this Township do not possess the proper requirements to develop their own powers, and this is the cause why we are in the rear of Townships surrounding us. I hope the time is not far distant when this Township will be able to boast of twelve good healthy school houses, instead of at present only one.

Non-Attendance.—In the Trustees' reports, the answer given as to cause of non-attendance, is "negligence on the part of parents and guardians," and for this negligence 86 children are deprived of school privileges.

Miscellaneous Remarks.—The general regulations respecting religious instruction are reported by the Trustees as not followed. The revised programme for our County Board examination is observed, and additional subjects added, but the questions are not printed. I find in five schools the Library books are covered, &c., but what influence they exert in the neighbourhood I really cannot say, but I should say the people are more interested in the rise and fall of the markets.

Value of Prizes.—In the three schools where prizes were distributed, they certainly had a beneficial influence, and I wish I could prevail on the Trustees to distribute prizes annually.

Competitive Examinations not Encouraged by the Township Council.—It was my endeavour to establish competitive examinations, and for this purpose I wrote officially to our Council for a grant of money for prizes. They refused my petition, and for the present, I hold the matter in abeyance, trusting that my intention or rather my desire may be carried out.

100. *The Reverend J. F. A. S. Fayette, Lobo.*—The Teachers in this Township are very worthy persons, sober and industrious, and take great interest in their schools.

XXXV. COUNTY OF LAMETON.

DISCOURAGEMENT TO TEACHERS—TOWNSHIP BOARDS ADVOCATED—TOWNSHIP COMPETITIVE EXAMINATIONS BENEFICIAL.

101. *The Reverend Peter McDermid, B. A., Moore.*—The schools in this Township are upon the whole, efficiently conducted—quite as efficiently, indeed as could be expected under existing circumstances.

Discouragement to Teachers.—Teachers have many difficulties to contend with, and they do not receive that encouragement which they deserve, and of which they often stand much in need, while sometimes the lowest possible salaries are paid. The school houses are wretched buildings, without any of the modern conveniences or appliances, the attendance is irregular, and yet great fault is found with the teacher, if the children do not make as rapid progress as could be expected under the most favourable circumstances.

Township Boards Advocated.—I am convinced that Township Boards would be a great improvement upon the present system, and that this would, in a measure, at least, remedy some of the existing evils.

Township Competitive Examinations Beneficial.—For the last two years, we have had Township examinations, at which prizes to the amount of \$50 each year were distributed, and I believe that the result of the examinations was decidedly beneficial. The very fact of so many good books being distributed in the Township, I regard as no small benefit; and I regret that the Council did not last year, as on the previous years, apportion a sum for this very laudable purpose.

TOWNSHIP OF PLYMPTON.

NOTE.—Remarks under head of Township of Plympton, published in report for 1866, are stated by the Local Superintendent to have been a forgery, and he states that the letter is not in his handwriting.

XXXVI. COUNTY OF ESSEX.

EVIDENCES OF IMPROVEMENT—PRIZES PRODUCTIVE OF EMULATION.

102. *Denis Downing, Esquire, Sandwich East.*—*Evidences of Improvement.*—The large average attendance compared with last year, in the schools of this township, shews the interest taken by Trustees and parents in educating their children. Our school houses are all getting too small, notwithstanding large additions made to several of them last year. There are some sections in which all the children do not attend. My own opinion is, that distance from the school house and want of proper clothing at this season of the year, is the reason. There is no school in Section No. 9, nor are they disposed to have any. They would not avail themselves of your kind offer to help them from the poor school fund, if they on their part shewed zeal in the education of their children. They complain it was unjust to divide them from the whites in No. 8. That section which was formerly a part of No. 9, is now a flourishing school, and the new school house they built last year is hardly sufficient to accommodate the number attending it.

Prizes Productive of Emulation.—Prizes were distributed in some of the schools, and produced a most healthy spirit of emulation among the children.

SCHOOLS WELL SUPPORTED, BUT PARENTS INDIFFERENT—COMPULSORY LAW ADVOCATED—MISCELLANEOUS REMARKS.

103. *T. Girardot, Esquire, Sandwich West.*—*Schools well Supported, but Parents Indifferent.*—I am happy to say that all the schools of this Township, are liberally supported by taxes on all the properties; but, I am sorry to see the indifference of some parents, in sending their children to school, while others send them irregularly.

Compulsory Law Advocated.—I think there ought to be something in the law to compel attendance at school.

Miscellaneous Remarks.—The Schools Nos. 1, 2 and 3 are well provided with maps, but the others—probably by the negligence of some of their Trustees—have none. The revised programme for the County Board examination is observed and the examination questions printed. There is only one parish library in the township, it belongs to a Roman Catholic congregation, the influence of which is very good. I distributed prizes in all the schools of the township, and the Trustees of five sections distributed some too. We have eight schools in this township, in two of them English only is taught. The six others being among a French population, French is taught with the English. All the English books used are authorized: the French books are by the Christian Brothers.

EFFORTS OF ENTERPRISING TRUSTEES—CAUSES OF NON-ATTENDANCE ANALYSED—INFLUENCE OF PRIZES—STANDARD FOR TEACHERS RAISED.

104. *Alexander Craig, Esquire, Tilbury West.*—The schools in this township are in a healthy and progressive state, all in operation, and all free as usual. The people generally are anxious to have efficient teachers, as they have had experience enough of the evil of poor ones.

Efforts of Enterprising Trustees.—The Trustees are doing their duty (as far as their finances will permit with respect to apparatus, &c.,) to their schools, they have increased their teachers' salaries, and are fully determined to have efficient teachers. The Trustees of Section No. 1 are building a new (frame) school house. The Trustees of Section No. 4 intend to erect another during the ensuing summer. They have a very good frame school house, but owing to the increase of pupils it is now too small. The teachers have given ample proof of their ability, as evinced by the proficiency of their pupils.

Causes of Non-Attendance Analysed.—The only way that I can make known to you, one general cause of non-attendance is to lay a statement of part of the School Sections before you. The children generally attend school, but where the sections are so very large and thinly settled, bad roads, &c., it is almost impossible for the young, tender children to attend school either summer or winter. School Section No. 1 has on the register 73 children, and not attending any school 87. Section No. 4 has on the register 95, and not attending any school 5. Section No. 5 has on the register 102, and not attending any school 63. It is my humble opinion that if Sections Nos. 1 and 5 were divided, it would apparently be a remedy for non-attendance. I say that 100 children are too many for one teacher, to do justice both to the teacher and pupils. These two Sections, Nos. 1 and 5, are each nine miles in length. The people are taking more interest in the examinations than formerly.

Influence of Prizes.—Prizes have been distributed in four School Sections during the past year, they are thankfully received, produce good results, and stimulate to exertion both parents and pupils. The schools are all opened and closed with prayer, and in some sections a chapter in the Bible or Testament is read. The general regulations in regard to religious instruction are not followed to any great extent, as we have no resident clergy who have charges in this township. In some of the sections the Trustees are purposing to have a School Section library. We have Sabbath School libraries (but no other as yet), which do much good.

Standard for Teachers Raised.—The Board of Public Instruction have raised the standard of education, and pass none but efficient teachers.

XXXVII. THE CITIES.

THOROUGHNESS OF TEACHING—BOOK-KEEPING LEARNED BY YOUNG WOMEN—STUDY OF CANADIAN GEOGRAPHY AND HISTORY ENCOURAGED—VALUE OF SCHOOL INSPECTION—CAUSE OF NON-ATTENDANCE—DUTCH SYSTEM RECOMMENDED—RELIGIOUS INSTRUCTION—THE COUNTY BOARD—VIVA VOCE VS. WRITTEN EXAMINATIONS—INTEREST IN THE DEPARTMENTAL LIBRARY—MERIT CARDS WORK ADMIRABLY.

105. *Samuel Woods, Esq., M. A., Kingston.*—The Schools in this city continue in their usual state of efficiency.

Thoroughness of Teaching.—During the past year, I have carefully examined all the classes myself at the usual half yearly examinations, and have found the work done in a most admirable manner. As I observed, in my last report, this removes any suspicion of cramming, and enables the Trustees to form an accurate estimate of the quality and quantity of the education conveyed by the teachers. There is one item to which I wish to draw your attention, and that is the large number engaged in the study of Book-keeping, amounting, as per report, to 149.

Book-Keeping Learned by Young Women.—The majority of these are young women. I find they are making great progress, and I consider it but just that they should do so. Many of them in future years may apply the knowledge of accounts they are now acquiring to most useful purposes.

Study of Canadian Geography and History Encouraged.—There is also another study which I have encouraged in all legitimate ways, that of Canadian History and Geography, here included in one list and having 1,592 pupils. We formerly found great fault with Morse's Geography for giving undue prominence to the United States; but if you wish a people to be patriotic, teach them the noble actions of their ancestors, and thus invite emulation. Morse's Geography inculcated in the minds of the American youth the great lesson of fidelity to American Institutions. Just in the same way must we work if we ever expect to build up a Canadian nationality. We must educate the minds of our young men, and women too, to look upon Canadian history as a unit, and no inconsiderable one in the world's history; to regard Queenston Heights and Lundy's Lane on a par with Saratoga and Yorktown, and to respect the old battered Windmill at Prescott as deeply as the Americans revere the monument of Bunker Hill. Coming now to the remarks rendered necessary by the other items of my report, it will be seen that the average attendance this year in proportion to the number on the roll is over eight per cent. larger than last year.

Value of School Inspection.—This I attribute to the constant repetition on all my visits, and at the examinations, of the necessity of regularity, and also causing the teachers to exact a written note from the parent for every absent day. When parents know that this will be insisted upon, they will be more anxious to make the children attend, and will not allow every whim to necessitate an absence of a day or even a half day. The plan works admirably, and is doing good. Something too may be allowed for the increased desire on the part of most parents for the education of their children.

Cause of Non-Attendance.—The number of children reported not in attendance at any school is not large, nor can I assign any cause for such neglect. But from a careful consideration of the matter I am inclined to think that the whole case may be summed up in one word—poverty. And that not alone in worldly means, but chiefly in intelligence. I find the class mostly addicted to this failing to be the very lowest dregs of the community. Out at the elbows and knees morally and physically, they have yet a portion of humanity left and that portion is shame. It may be true in regard to their best apparel that a hole wears longer than a patch, but of this fact I am satisfied, that if these attended the schools others would stay away.

Dutch System recommended.—What we want is the principle of the *armen scholen* of Holland. Let the Teacher's certificate of a month's regular attendance be good to the child for some article of useful clothing, and I venture to predict regular attendance and good results. In Holland a week's attendance entitles the child to a small amount of money from the public treasury, and the plan works admirably there.

Religious Instruction.—Portions of Scripture are read every day in all the rooms, and the authorized forms of prayer are used. In several of the schools, but more particularly in the Orphans' Home, there are daily recitations of texts from the Bible, and hymns are committed to memory by the little ones. I have still to report no religious instruction in any of the schools by the ministers of the various denominations, and few visits paid by them. The matter is between God and their own consciences, and they are answerable alone for the neglect of improving so good an opportunity of impressing the more salient points of our common Christianity upon the susceptible minds of our youth.

The County Board.—Our County Board examinations are still conducted with the utmost strictness; the questions are printed, and no candidate is allowed a certificate unless

the Board is fully satisfied with the answering. No third-class certificates are granted unless for our back townships, and even in them they are restricted to one section.

Viva Voce vs. Written Examinations.—It seems to me from rather an intimate knowledge of the working of the Boards that the machinery of examination is too cumbrous, and that too little of the examination is done *viva voce*. A good examiner can test the knowledge of a candidate in five minutes *viva voce*, in Euclid, grammar, history and geography better than a written examination of an hour.

Interest in the Departmental Library.—The library still continues to exert a beneficial influence on the general knowledge of our pupils. The books are well cared for, and the regulations are carried out strictly. It is contemplated to make large additions to the stock during the present year. No prizes are given. This is to be attributed chiefly to the difficulty of deciding them in such a way as to give satisfaction.

Merit Cards Work Admirably.—But from my experience of the merit cards issued by the Department, I am sure no better method could be found. They obviate the necessity of spasmodic examination, inasmuch as the effect is not confined to a week at the end of the year, when from sickness or other causes, the best pupils may fail to do themselves justice; the estimate by means of these cards is distributed equally over all the year, and the boy of less mental ability may by *diligence and punctuality*, obtain the prize, which another more gifted might carry off, after a year's partial indifference, and a week's hard work. These cards have been used in the Grammar School during the past year, and I shall endeavour to have them introduced into our Common Schools at the earliest possible opportunity.

UNION OF BOARDS—GRAMMAR SCHOOL INCOME—SCHOOL BUILDING AND GYMNASIUM—RELIGIOUS INSTRUCTION GIVEN—STATISTICAL RETURN.

The Joint Board of School Trustees, London.—*Union of Boards.*—The condition of the fund for the support of the Grammar School department, when compared with the expenditure of that department, will, we feel confident, completely dispel any doubts that may have hitherto existed in the minds of some persons as to the beneficial results of the union of the two Boards, more especially if they would only consider the benefits arising to society from the higher standard of education incidental thereto.

Grammar School Income.—The whole of the real estate belonging to the Grammar School, and situated in the heart of our rising city, now produces a fair income, (next year the rents will amount to about \$683.54), and many handsome brick residences have been erected thereon, thereby not only contributing to ornament our city, but also assisting in the payment of our local taxes. Many improvements in the school buildings of the city have been effected during the year. The last few years the library has been replenished by the addition of many useful and instructive works, but the merit card system had to be suspended for the last six months in consequence of insufficient funds to procure prizes to redeem them.

School Building and Gymnasium.—In a very few weeks we expect that a substantial and spacious gymnasium will be erected on the Central School grounds for the benefit of the scholars; dimensions, 70 feet in length and 30 feet in width, with all the necessary fixtures and furniture belonging thereto, at a cost of over \$700. The want of such an appendage to our schools has been for a long time felt; besides the law requires us to provide such an establishment, and our shortcoming in this respect has often been alluded to by the Grammar School Inspectors. Had it not been for the liberality of our citizens, (who generously contributed by private subscription more than half the above amount, the sum of \$300, being only appropriated by the Board,) the physical training of the children, which all will admit greatly assists their intellectual progress, would have been postponed to some future and indefinite period.

Religious Instruction Given.—The schools are as usual both opened and closed by reading certain portions or lessons from the Bible. These lessons have been selected with great care by our local superintendent (the Bishop of Huron) and a committee chosen from our clerical members; and, in addition to this, the Board have recently set apart one hour every Friday afternoon to enable the pastors of all Protestant denominations in the city to give religious instruction to the several members of their respective congregations

attending the Central School, each denomination having a separate room set apart for itself. It has always been the desire of the Trustees to fulfil the trusts conferred on them in such a manner as in their judgment would best promote the moral, physical and intellectual training of the children; and they hope that the benefits to be derived from so sound and liberal an education as the laws of the country have provided, will be fully appreciated by the rising generation.

STATISTICAL RETURN.

The principal submits the following statistical tables:—

TABLE showing the Number of Pupils Registered in each Department of the London Central and Ward Schools per Quarter, with the Daily and Monthly Averages in each, during 1867.

The classical master reports an improvement in the attendance at the Grammar School.

SCHOOL ATTENDANCE—NEW SCHOOL HOUSES.

106. *W. Cousins, Esquire, Ottawa.*—*School Attendance.*—The average daily attendance is not as good as it should be. The average daily attendance was:—

For the first half year.....	716
For the second half year.....	655

Half of 1,371

Or an average for the whole year of 685½, equal to an attendance of 46 per cent. That for the year 1866 was equal to 44 per cent. The new Central School house, for the eastern portion of the city, is now drawing near to completion. The Trustees are furnishing the several rooms with chairs and desks of the most improved pattern. We expect to move the pupils of the several Ward Schools in Lower Town into that building in the course of next month. A primary school house is now in course of erection in the same section of the city.

New School Houses.—The Board has purchased a beautiful site in Upper Town on which to erect a building similar to that in Lower Town, to serve as a Central School house for the west end of the city. When this shall have been completed, we shall, in point of school accommodation, compare favourably with the other cities of this Province.

PROSPEROUS YEAR—RELIGIOUS INSTRUCTION—DRILL DISCONTINUED—MR. KETCHUM'S
BENEFACTION—EXAMINATIONS—GRAMMAR SCHOOL BENEFICIARIES—STATISTICS.

107. *The Reverend James Porter, Toronto.*—*Prosperous year.*—The year now under review has been the most prosperous in the history of the schools, as respects both the number of pupils in attendance, and (since the erection of the large school houses in 1854) the cost, per pupil, of their instruction, whether calculated on the basis of monthly registration or on that of daily average attendance. In every month of 1867, the number of pupils on the School Registers has been larger than in 1866, as has also the daily average attendance. Notwithstanding the inferior accommodation afforded by the two temporary school rooms on Centre Street, and the consequently low attendance of late at those schools, the average daily attendance throughout the city has increased, as compared with that of last year, to the extent of 215 pupils. The new and commodious School House on Elizabeth Street, which it is expected will be opened at the beginning of the year 1868, will accommodate from 250 to 300 pupils.

Religious Instruction.—During the year 1867, the Rev. Mr. Boddy has continued to give religious instruction to the children of parents of his own communion, at the Park School; and the Rev. Mr. Baldwin has performed a similar good office at the Victoria Street School.

Respecting Religious Instruction, the following resolution was passed by the Board of Trustees in April:—

“That this Board views with regret, that so few of the Clergymen in this City have availed themselves of the opportunity by law afforded them to visit the Public Schools, and administer religious instruction to the children.”

Drill Discontinued.—In the early Spring, Brigade-Major Denison informed me with regret, that it was no longer in his power to furnish instruction in military drill to the senior male pupils of the City Schools, as recent military arrangements had not left a sufficient number of suitable men under his command available for that purpose.

Mr. Ketchum's Benefaction.—The venerable benefactor to our City Schools, and to many others, Jesse Ketchum, Esq., was removed by death shortly before the period at which the pupils of the Schools were accustomed to look for the distribution of his annual bounty from his own hands, or from those of his respected agent, the Rev. Dr. Richardson. That gentleman, however, acted as he has frequently before, on Mr. Ketchum's behalf, and left at the several schools mementos of Mr. Ketchum's kindness, to the pecuniary value of \$131.14. It may not be generally known that Mr. Ketchum provided, several years ago, that his bounty to our City Schools shall be annually dispensed in perpetuity. The sense of his generosity and worth entertained by the Board, will appear from its unanimous resolution adopted on the 17th of November.

The three usual Examinations were held in the course of the year, namely, the Combined Examination of Pupils selected from each Division of each Department of the several Schools, and the Summer and Winter Examinations of all the Schools.

Examinations.—The Combined Examination took place, by order of the Board (on the recommendation of the Committee on School Management,) at the Victoria Street School House, on Monday, the 22nd of July. The examiners were the Rev. A. Wickson, LL.D., Head Master of the Toronto Grammar School, and the Rev. John M. King, M. A. As on former similar occasions, the pupils examined were three individuals from each Division of each Department, male and female, of the several Schools, selected by their respective teachers for their general proficiency, combined with uniformly good conduct, and approved by the Local Superintendent. The Examination was partly oral, and in part was conducted by means of questions.

Grammar School Beneficiaries.—As the County Grammar School is now, under the operation of the new Grammar School Law, the Grammar School of the City of Toronto; the affairs of which are administered by the City Council through Trustees whom the Council appoints; the Mayor, on behalf of the Council, was pleased to accept as beneficiaries of the City, seven of the Senior Pupils of the City Common Schools who were recommended by the Examiners to receive the special distinction of Grammar School Scholarships, and were nominated accordingly by the Board of Common School Trustees. A public meeting was held in the St. Lawrence Hall, for the purpose of presenting the scholar-

ships and prizes, awarded at the late examinations in the City Common Schools, to the successful competitors. The meeting was largely attended by the scholars, their parents and friends: all of whom evinced a lively interest in the proceedings.

Statistics.

COMPARATIVE STATEMENT of the City Schools, under specific headings, from 1844 to 1867, both inclusive.

XXXVIII. THE TOWNS.

MISCELLANEOUS OBSERVATIONS.

108. *The Reverend George Bell, Clifton.*—The general regulations as to religious instruction are not followed by any denomination. The revised programme is observed by the County Board, and most of the questions are printed. The library belongs to the municipality. There are Sunday Schools in the Presbyterian Church opened in 1857, and one in the Episcopal Church opened in 1866. The number of scholars given (237), includes all who have attended during any part of the year 1867; but as many of them are very irregular, and some very young children attend a part of the time in summer, the average for the whole year will not be more than 125 or 130. The public school is in a very efficient state of organization and working.

MISCELLANEOUS OBSERVATIONS.

109. *William Mackay, Esquire, Goderich.*—The schools are prospering and in good condition. The teachers being, I believe, zealous and painstaking, the pupils are making good progress, and the attendance is very large. The library, although not large, is well kept, and the regulations strictly observed; it is largely patronized and cannot fail to have a good influence. In my opinion, the judicious distribution of prizes exercises a very good influence in schools.

PROGRESS—GOOD TEACHERS—ENTERPRISING TRUSTEES—NO CHEAP TEACHERS EMPLOYED—GLIMPSES AT THE PAST—CO-OPERATION OF THE COUNTY BOARD—POWERS OF TRUSTEES—EVILS OF UNION OF SCHOOLS GUARDED AGAINST—CHANGE OF TEACHERS DISCOURAGED—EXCELLENT ORGANIZATION OF SCHOOLS—MISCELLANEOUS REMARKS.

110. *The Reverend John Thompson, Sarnia—Progress.*—It affords me very great pleasure in bearing testimony to the efficiency and success of the Common Schools of the Town of Sarnia. Much of my last year's report is equally applicable this year, and no material changes have occurred but such as are gratifying, and show decided progress. We have an admirable staff of teachers doing noble work in their several departments, and everything connected with the schools is very encouraging.

Good Teachers.—This gratifying state of things is to be attributed in no small degree to the laudable ambition of the School Board to employ well qualified Teachers, and our schools are now reaping the benefit of their wisdom.

Enterprising Trustees.—It has never been the desire of the Board to employ a teacher simply because he was *cheap*, and as is usual in such cases, having no other recommendation, but to get the man who could do his own appropriate work most efficiently, and recognizing in our present teachers their merit, the Board raised their salaries at the beginning of last year, in some cases without any applications having been made.

No "Cheap Teachers" Employed.—Though there are many cases to the contrary, *cheap teachers* are passing from the market, and the sooner the better. I know that more and more every year Trustees are beginning to feel the evil so forcibly pointed out in your able Report.

Glimpses at the past.—As our country grows in intelligence and wealth, this evil will be known only as a relic of the past. Time was when the chief qualification of a teacher was to become disabled or unfit for anything else, but this *dark age* has gone, and men are now alive to the fact that the grandeur of our Common School system, due to your life-long labours, can only appear by having a well qualified staff of teachers filling our schools.

Co-operation of the County Board.—Our County Board of Public Instruction are fully alive to the necessity of raising the standard, in order to procure a better class of instructors to meet the growing wants of this country, and to prevent our schools, of which we are justly proud, from being overrun with Goth and Vandal bondage.

Powers of Trustees.—The more I become acquainted with the working of schools, the more am I convinced of the power lodged in the hands of Trustees, who, if they be men of prudence, may do much to make the schools under their charge very efficient, and I have the honour of testifying to the efficiency of our Trustees, with whom it is a pleasure to be connected.

Evils of Union of Schools guarded against.—Ours is a *Union School*, but owing to the judgment and better sense of the Board, as well as the qualifications of our teachers, it has never suffered in the slightest degree from the Union; no compulsory or unlawful measures have been used to *draw off* pupils from the Common Schools; it is therefore free from the *evil tendencies* referred to by the Inspector of Grammar Schools, in his able and exhaustive report, who uses very strong but necessary language, relative to the evils of such *Unions*. I perfectly agree with him when he says, "I have such a sense of the importance of maintaining a high standard of education in the Common Schools, that, rather than see them degraded, rather than see the goal, beyond which their most advanced pupils are not to pass, fixed at the point where an easy English sentence can be parsed, I would be willing that all the Grammar Schools in the country should perish. I protest against making the Common Schools, in all above the most primary classes, mere hot beds to force forward seedlings for the classical field." While it would appear that many Union Schools have fallen into this deplorable condition, ours have not been so degraded, nor suspended from the full performance of their true functions. There has never been any inclination to hurt the Common for the sake of the Grammar School, though we have suffered pecuniarily in consequence. The principal of the Union School, is the Head Teacher of the Common School, having the control of everything except the internal arrangement of the Grammar School Department. Had the Trustees been actuated by the mere motive of getting money, they could easily have filled up the Grammar School with 30 or 40 pupils, for the entire class

under the principal's care are qualified to enter, for if not in advance, they have all along been abreast of scholars in the Grammar School, with the exception of their own special subjects. Changing teachers is a great evil to which many schools are subjected, but it has always been our purpose never to change if possible, for though there may be the same scheme of lessons, &c., every teacher has his own peculiar method, and it requires sometime before the pupils can fall in with his system, and this is the least of the evil.

Change of Teachers Discouraged.—During the past year only one unavoidable change has been made by a teacher leaving to follow another profession. Owing also to the increased attendance, a new teacher was employed in addition to the previous staff.

Excellent Organization of Schools.—The Union School buildings are very superior, but the juvenile department is taught in another place, under the same principal, which is an unavoidable disadvantage to him, who arranges the classes and provides each teacher with a limit table, so that all the divisions fit into each other, and no ground is gone twice over by different teachers, neither any omitted: all the classes being arranged with respect to the one uniform plan that runs through the whole.

Miscellaneous Remarks.—The Roman Catholics have opened a Separate School during the year, the first they have had in this place. It embraces a boys and a girls department, attended by over 100 pupils. At my recent visit very little proficiency was manifested, especially by the girls, but this is owing partly to the fact that many of them had not been long at school, and it will require sometime before we can rightly judge of it. Most of the Roman Catholic children have withdrawn from the Common Schools in consequence of their own, but instead of making any blank, their places have been filled up by others, as is evident from the fact that the Board employed an additional teacher during the past year. In regard to the other points which our reports are expected to embrace, I may state shortly:—1. We use the authorized books only, which is an immense advantage in securing uniformity through all the schools. 2. As yet there is no public library, but hope we shall obtain one ere long. This is very desirable, furnishing as it does an opportunity for reading and forming in the young people a taste for it in after life. 3. Prizes are always given at the annual examinations with good results, as I have reason to believe this is not only a stimulant to study and a reward for diligence, but as furnishing a great deal of reading matter to the successful scholar, tends to lead him on in his education; also the circulating of books in this way supplies in some measure the defect of the want of a library. If there are any objections to prizes on such occasions, they can only rest upon abuses where they have not been judiciously administered. 4. No religious instruction is given in the schools except reading the Scriptures and prayer at the opening and closing, but this is regularly observed by all the teachers, who, from their own Christian character, carry a happy influence into all the other exercises also; but now, since the establishment of the Separate School, there are no obstacles in the way, and it is highly desirable that some more definite instructions should be given. 5. There are five or six private schools in town, but mostly all for young children, as the more advanced go to the Common School. 6. The number who are not going to any school is smaller now than at any previous period, and there is an earnest desire to compass all by making the most ample provision and offering every legitimate inducement, and this is attended with encouraging success. I close my report by expressing my very great satisfaction with the proficiency and successful working of our Common Schools, which may God bless and prosper to the great good of our land.

CONDITION OF SCHOOL—ENCOURAGEMENTS TO STUDY.

111. *C. S. Murray, Esquire, Local Superintendent of Roman Catholic Separate Schools, Oakville.*—*Condition of School.*—On my visit to Oakville Separate School in December last, I was much pleased to find it in a flourishing condition. The number in attendance during the year was 116. The School House is a large substantial building, a basement and two floors 36x24 and well furnished, a good supply of maps, &c., and also a very competent teacher. It requires most active exertions on the part of the Pastor to obtain means to educate such a number of children whose parents are for the greater part obliged to earn a living by their daily labour, and the Government allowance being so small.

Encouragements to Study.—But that which mostly attracted my attention was that

I saw nearly all the Catholic children of school age in the town, encouraged by little prizes and other means, attend school when possible. I hope to see encouragement given to the education of the poor for the general good of society, and our own future welfare.

EXCELLENT SCHOOL HOUSE—PROGRESS—PRIZES—INTEREST CREATED BY THEM.

112. *The United Board of Grammar and Common School Trustees, Prescott—Excellent School House.*—Last year the Trustees, after much labour and trouble, were enabled to erect one of the finest and most commodious School buildings in the Province of Ontario, at an expense of over eight thousand dollars.

Progress.—The state of education in this section of the country has made marked progress during the past two years.

Prizes.—The Board of Trustees have wisely adopted the system of giving prizes, which has been productive of the very best results, and has created an increased interest in the cause of education throughout the community.

Interest Created by them.—Several gentlemen have also established special prizes in the Grammar School, for the encouragement of various branches of study, and the interest manifested is evident by the large audiences present during the examinations and on other public occasions.

WANT OF SCHOOL ACCOMMODATION—COUNTY BOARD—RIGID EXAMINATIONS.

113. *Alexander Bartlet, Esquire, Secretary, Board of School Trustees, Windsor—Want of School Accommodation.*—Our Schools for the past year have on the whole been pretty successful, although we are sadly hampered for want of room; we need new schools and that in a more central position in the town than our present buildings are located. We have in some measure graded our schools, but in that respect they are still incomplete for want of the necessary accommodation.

County Board.—Our Board I think will soon do something by way of the erection of new buildings. The Board of Public Instruction for the County, has been doing excellent service in the cause of education in their semi-annual examinations of Teachers.

Rigid Examinations.—On the 1st July last year, all second class certificates were cancelled, and the candidates for the office of teacher were subjected to a rigid examination in all the branches necessary to a Common School education. The examination was entirely conducted in writing, and twelve questions were given in each subject, half of which they were required to answer to get grade C, three quarters for grade B, and seven-eighths for grade A. At the midsummer examination, not one candidate received grade A. At the December examination when all first-class certificates heretofore granted by the Board, were cancelled, two received grade A, one male and one female. The certificate of A is perpetual, B five years, and C two years. A good many incapable teachers were thus prevented from occupying the places of those who were thoroughly capable, and by this stand that the Board of Public Instruction has taken, the standard of teachers for the county will be much superior to what it has been ever since the school law came into force. Too much praise cannot be awarded to the labours of James Bell, Esquire, Local Superintendent for Colchester, and A. McSween, Esquire, Grammar School Teacher for this Town, on whom almost the entire labours of examination fell. It is due to the Board of Grammar School Trustees in Windsor, to say, that as a body they seconded the efforts of those gentlemen in the good work of weeding out the incapables. I wish a similar process could be adopted with the Local Superintendents. I hold that no person should be appointed to this important office, who is not fit to pass an examination equal to a first class teacher, and in any future amendment to the School Act I hope such a provision will be inserted.

XXXIX. THE VILLAGES.

CONTINUED PROGRESS—NO CHANGE OF TEACHERS—FREE SCHOOL AGITATION—COMPULSORY ATTENDANCE—ROMAN CATHOLIC SEPARATE SCHOOL.

114. *A. Dingwall Fordyce, Esquire, Fergus.—Continued Progress.*—During the year

1867 the schools in Fergus, I may say, have been in a decidedly encouraging state. For part of the year there was much sickness, otherwise the attendance would have been still larger.

No Change of Teachers.—The teachers, I am happy to say, are all re-engaged for 1868. The school house, which was first occupied at the close of 1866, is found to be very suitable. Besides accommodating the senior, junior and primary schools, when required, another large class room can be fitted up in it. The large number in attendance at the primary school makes the charge particularly trying. The Trustees have shewn a deserved estimation of the services of the young lady employed as teacher by an increase of salary. The Grammar School Trustees have got the use of the old school house, standing in the same enclosure. The only drawback is the limited space for the amusements of all the scholars. There has been the customary application for books from the library. So far as it extends, the influence can scarcely be other than good.

Free School Agitation.—Previous to the annual school meeting there was some agitation of the free school question, but I am glad to say the schools remain free.

Compulsory Attendance.—Probably there would be scarcely a voice against it if there were some legal provision for compelling attendance, but not taking this into consideration, I am of opinion that it has been a blessing to many, who, without it, would in all likelihood have been growing up in utter ignorance, and becoming a serious burden to the community.

Roman Catholic Separate School.—Without any regular appointment I have semi-officially, as Superintendent, visited the Roman Catholic Separate School, which I think has been in a better state than during any previous year since it was established. Female teachers were formerly chiefly employed, who, however well fitted in other respects, cannot readily in a village secure the requisite order in a school composed of pupils of all ages. Prizes were given this season, a novel feature, I believe, in the school.

FREE vs. RATE-BILL SCHOOLS.

115. *T. Ruston, Esquire, Secretary, Board of School Trustees, Georgetown.*—Since the first of February we have had Free Schools, with an average increase of about thirty over rate-bill.

MISCELLANEOUS REMARKS—EVENING SCHOOLS.

116. *James P. Phin, Esquire, Hespeler—Miscellaneous Remarks.*—There are two factories in Hespeler, in which the most of those children reported as not attending any school are engaged. There is neither Bible nor Testament used in the school, as a formidable minority are opposed to it. There is a library in the village, but it has not been properly cared for of late, owing to the want of some one to agitate and bring its interests before the public, many of whom have not resided long in Hespeler. The distribution of prizes causes some excitement, which is generally followed by a reaction, (as is the case with most stimulants), and is frequently attended by dissatisfaction among the recipients themselves at the prize which falls to them.

Evening Schools.—There is an Evening School reported. This school is conducted by the head teacher of the Common School, and composed of boys and girls who are unable to attend the day school, as they are employed in the factories. The class meets at 7.30, and is dismissed at 9 o'clock—three evenings in the week. It is very well attended.

MISCELLANEOUS REMARKS.

117. *R. M. Hammond, Esquire, Kemptville.*—The regulations with regard to religious instruction in the Common Schools in this village are, to some extent, followed. The revised programme for County Board Examinations is not printed, but a committee has lately been appointed to attend to that matter. The examinations are conducted on paper. The non-attendance of children may, to a great extent, be attributed to the indifference of parents. Trustee Boards have it in their power greatly to increase the attendance, in almost any locality, by making the school rooms attractive as well as comfortable, and by the employment of efficient teachers. A poor teacher is dear at any

price. The regulations respecting Common School Libraries are observed, and the prize system, recommended by the Department, has been introduced, and with good results.

THE SCHOOL LIBRARY.

118. *Ross Robertson, Esquire, Kincardine.*—The library is supposed to have a beneficial influence, as the books are well read and eagerly sought for. There never have been any prizes distributed.

NEW SCHOOL HOUSE AND NEW TEACHER.

119. *James Bowie, Esquire, M.D., Mitchell.*—The school continues in all respects to improve steadily. For some years past an inconvenience has been felt in the want of sufficient room. This is about to be remedied.

New School House and new Teacher.—The Trustees have secured a convenient lot of three and a half acres, on which to erect a new school house. It is intended to have it finished during the ensuing summer. This—as it will be both large and commodious—will obviate inconvenience for a number of years to come. Hitherto everything connected with the school has gone on smoothly and harmoniously, and from the satisfactory testimonials of character and ability, furnished by the newly engaged teachers, we have good grounds for believing that the successful career of the school will not be impeded.

STATISTICS—CHANGE OF TEACHERS—NON-ATTENDANCE AND IRREGULAR ATTENDANCE DEPRECATED—RELIGIOUS INSTRUCTION—PRIZES—DRILL—GENERAL REMARKS AND PROGRESS.

120. *The Reverend John McMillan, Mount Forest.*—*Statistics.*—The entire population of the Village is 1,617. The school population, including the Roman Catholics, from the age of five to twenty-one, is 474. And the number of children between the ages of five and sixteen is 376. I am glad to be able to give these Statistics, which are of so much consequence, on the most reliable authority. A special school census has been taken up for the express purpose of securing certainty on this point. The Trustees take deep interest in the schools, and occasionally visit them. Their aim is to apply the law faithfully, and make them as efficient as possible. Education is progressing favourably, solidly and steadily. The Trustees have wisely re-engaged their Teachers for this year, and increased progress in the schools is expected, both on account of their continuance and proficiency.

Change of Teachers.—Frequent changes in regard to teachers are felt to be adverse to the interests of education.

Non-Attendance and Irregular Attendance Deprecated.—But the great drawback here, as in many places, is the non-attendance and irregularity of children at school. This is supposed in many cases at least to be the result of the indifference of parents towards the education of their children. And yet, on comparison, I believe our schools are better attended in these respects than many others.

Religious Instruction.—The Bible is not read, nor any religious instruction imparted in any of our schools, except that one is opened and closed with prayer. Nor have we any libraries yet.

Prizes.—But the Trustees secured about forty dollars worth of prizes, which were distributed according to merit among the pupils, and had a good effect in stimulating a spirit of emulation.

Drill.—The boys have been drilled once a week for the greater part of the year by a competent military officer, Captain Pearce, who heartily gave his services gratuitously. Great care is taken that no books are used in the schools but such as are either recommended or authorized by the Department; and I am happy to say, that the new series is already fully introduced.

General Remarks and Progress.—The school system seems to be highly approved of, and the desire of all concerned is, so far as I can see and judge, that no reasonable labour or expense be spared in making the schools what they ought to be, thorough and efficient. I have visited them myself often during the year, and observed that the teachers study to know and apply the most approved methods of imparting instruction. The annual

lecture has also been attended to. The Circuit Board of the North Riding of the County of Wellington is doing much to advance the proficiency of teachers, and the recommended programme of the Department is the basis of their examination. The examinations are conducted by means of printed questions and written answers, except in reading. I may also add, that I have visited many of the schools in the neighbourhood, besides those in the village, and my impression is that education has made more than usual progress during the last two years, and that nothing is needed to secure a good school but a faithful application of our School Law.

NEW SCHOOL HOUSE—MISCELLANEOUS REMARKS.

121. *W. Cousens, Esquire, New Edinburgh*.—*New School House*.—The Board of Trustees of this new village have begun their work in a praiseworthy manner, having built a school house that does credit to their public spirit. It is a neat and commodious frame building, which, with the site on which it is built, cost \$1,239. The teacher in charge of this school is a man of good abilities, and well suited to his work. There is also an assistant teacher, a young lady, who is zealously given to her calling.

Miscellaneous Remarks.—An examination of the pupils was held last December. Two teachers (assistants in the Grammar School at Ottawa) assisted at the same. The result proved very creditable to both teachers and pupils. The number of pupils attending school at some period of the year, bears a fair proportion to the number of inhabitants, but the average of daily attendance is not so good. The reason assigned for this is that the greater portion of the children belong to a class of inhabitants who cannot conveniently spare them from daily labour for a certain portion of the year. A library has been provided by the Board, but so recently that much cannot be said in regard to its working. Prizes were distributed to the pupils, and I believe the effect on the minds of children is good.

MISCELLANEOUS REMARKS.

122. *The Reverend E. W. Frazee, Petrolia*.—In this new municipality we have much to gratify and encourage. There are two schools. The unusual tact and assiduity of the teacher of No. 1 merit special attention. I cannot speak too highly of his usefulness. No. 2 school has been established during the year, and is doing well. A very judicious distribution of prizes has been the means of creating more interest among the scholars. We have no library. The causes of non-attendance I believe to be in some few cases the want of sufficient room accommodation, and perhaps in some others the need the parents have of their children's help in obtaining a livelihood; but, as in most other sections, the chief cause is the parents want of interest in their children's education. I need hardly say that, as in every well regulated community, our schools are *free*. The opening and closing exercises of each day are observed according to the prescribed form.

GRATIFYING PROGRESS—NEW SCHOOL HOUSES.

123. *The Reverend Francis W. Dobbs, Portsmouth*.—*Gratifying Progress*.—Our schools this year have given general satisfaction. Prizes were distributed, and there has been a marked improvement in the attendance of parents at the examinations, calculated to encourage both children and teachers. The general rules of the Board are observed.

New School Houses.—The Trustees contemplate the erection of new school houses, and the Treasurer has a considerable balance in hand for that purpose.

EFFICIENT SCHOOLS—GOOD TEACHERS—ENTERPRISING TRUSTEES—NIGHT SCHOOL—LARGE LIBRARY.

124. *The Reverend Canon Dixon, Port Dalhousie*.—*Efficient Schools*.—The schools in this village were never before in so thoroughly efficient and well organized a condition as they are at present.

Good Teachers.—This is to be attributed chiefly to the fact that the Trustees have succeeded in securing the services of a head master who is possessed of great force and energy of character, as well as high scholastic attainments. This gentleman has the rare

but happy talent of attaching the boys to himself personally, so that his word of commendation is highly valued, while at the same time he is able to preserve a strict discipline. He works in perfect accord with the other efficient teachers, and the effects of this harmony and unity of purpose are manifested in the marked progress made by the three schools.

Enterprising Trustees.—The Trustees also appear to take a greater interest in the well being of the schools, and are always willing to give due attention to any representations concerning their requirements. The pupils examinations are usually well attended by both parents and Trustees, and much interest is evinced in the progress of the children.

Night School.—Through the winter a considerable number of young lads, who are engaged on the Lakes through the summer months, attend the principal school; and for the benefit of others the head master has established a night school, which is well attended.

Large Library.—There is a large library in the village, containing 2,500 volumes of miscellaneous works, comprising history, biography, travels and works of poetry and fiction, but as is usually the case in cities and towns as well as villages, the works of fiction are especially in demand. A few of the leading periodicals are taken. The charge for subscription to the library is only \$1 per annum. About 200 children attend in the 3 Sunday Schools of the village—Church of England, Presbyterian and Roman Catholic.

NEW SCHOOL HOUSE—PROSPERITY.

125. *R. Fitch, Esquire, Secretary, Board School Trustees, Stirling.*—*New School House.*—The Board of this village has purchased a new school property, for the sum of \$675, which was very cheap: it is a two story building, and was formerly a residence: the upper story has been fitted up for a Grammar School, and the lower story for a Common School, and when complete will be valued at about \$1,700.

Prosperity.—Our schools are in a prosperous condition. The Common School has an average daily attendance of 110 pupils, and we are about to engage an assistant teacher.

XL. COUNTY OF ELGIN.

(*This Report not having been received in time is not in its proper place.*)

PRIZE DISTRIBUTION—MERIT SYSTEM—LARGE NON-ATTENDANCE—EVILS OF IRREGULAR ATTENDANCE—COMPULSORY SYSTEM URGED.

126. *Samuel Muccoll, Esquire, West Riding, County of Elgin.*—All the schools in the West Riding of the County of Elgin are in operation with one exception. The new series of Readers is being introduced rapidly.

Prize Distribution.—Prizes were distributed in several of the Schools with as much satisfaction as could be expected.

Merit System.—The system that appears to give the most satisfaction, is where the teacher keeps a daily account of each pupil's standing in classes, and awards the prizes according to merit, as shown by the record at the close of the term.

Large Non-Attendance.—The non-attendance of pupils of school age is considerably large. The cause assigned is neglect of parents.

Evils of Irregular Attendance.—Another evil that exists is irregular attendance. In comparing the total names entered on the teachers' registers with the average attendance, I find the latter to be only forty per cent. of the former. A remedy for the above evils would be, that wherever a free school is established, to have a provision in the School Act, demanding the regular attendance of every child between the ages of eight and fourteen, and impose a rate-bill on every child within said age kept at home.

Compulsory System urged.—The present free school system is good in itself, but undue advantage is taken of it. Children, whose attendance at school is paid for, are kept at home to work, thus doing great injustice to the party paying. If, for instance, taxes are collected of the landowners in a school section for educating the children in that section, of whom only eighty per cent. are sent to school at all, and of that eighty per cent. the average attendance is only forty per cent., the result is, that for the money thus appropriated, value is received for about only thirty-four per cent.

APPENDIX B.

THE NORMAL SCHOOL FOR ONTARIO.

PROVINCIAL CERTIFICATES GRANTED BY THE CHIEF SUPERINTENDENT OF EDUCATION.

The Chief Superintendent of Education, on the recommendation of the Masters of the Normal School, and under the authority of the following section of the Upper Canada Consolidated Common School Act, 22 Vic., chap. 64, sec. 107, has granted to the under-mentioned students of the Normal School, Provincial Certificates of Qualification as Common School Teachers in any part of Ontario:—

“107. The Chief Superintendent of Education, on the recommendation of the teachers in the Normal School, may give to any teacher of Common Schools a Certificate of Qualification, which shall be valid in any part of Upper Canada until revoked; but no such Certificate shall be given to any person who has not been a student in the Normal School.”

The Certificates are divided into classes, in harmony with the general programme, according to which all teachers in Ontario are required to be examined and classified, and are valid until revoked, or until the expiration of the time mentioned in the Certificate, according to the following form:—

GRADE A, (B OR C,) OF THE FIRST (OR SECOND) CLASS.

Certificate of Qualification—Normal School, for Ontario.

THIS IS TO CERTIFY, that _____ having attended the Normal School during the _____ Session, 18—, and having been carefully examined in the several branches named in the margin, is hereby recommended to the Chief Superintendent of Education, as eligible to receive a First (or Second) Class Certificate of Qualification, as a Common School Teacher in Ontario, according to the “Programme of the Examination and Classification of Common School Teachers,” revised by the Council of Public Instruction, on the 17th day of December, 1858.

Head Master.

Second Master.

IN ACCORDANCE with the foregoing recommendation, and under the authority vested in the Chief Superintendent of Education by the 107th section of the Upper Canada Consolidated Common School Act (22nd Victoria, chapter 64),

[LS.]

I do hereby grant to _____ a First (or Second) Class Certificate of Qualification, as a Common School Teacher, of the grade and standing above indicated, which Certificate shall be valid in any part of Ontario, until revoked by this Department (or for one year, as in the case of Second Class Certificates, Grade C).

Dated at the Education Office, Toronto, this (fifteenth day of _____)
one thousand eight hundred and sixty _____).

Chief Superintendent of Education for Ontario.

Recorded in Certificate Register A of
the Department, Number _____

Registrar.

Prior to the Ninth Session, no Provincial Certificates were issued. The Head Master certified to the attendance and conduct of the pupils, but such Certificates do not qualify the holders to become teachers in the Common Schools.

During the Ninth and Tenth Sessions, three classes of Certificates were granted, the First, Second and Third; but the Third-Class Certificates of the Ninth Session expired on 1st July, 1854, and those of the Tenth Session on 1st November, 1854.

From the Eleventh to the Fourteenth Session, inclusive, only First and Second-Class Certificates were granted, and were not divided into Grades.

From the Fifteenth Session to the present time the Certificates granted have been of the First and Second-Class, but each Class has been further divided into three Grades, A, B and C. These Certificates are all valid until revoked, but since the Nineteenth Session, inclusive, all Certificates of the Second-Class, Grade C, have been granted for one year only, so that the only valid Certificates of that grade are those granted from the Fifteenth to the Eighteenth Sessions, and those dated June and December, 1867, which expire in June and December, 1868.

In the following list all Certificates appear which have not been revoked by expiration, by the granting of a subsequent Certificate to the same person, or for cause. Those which have become invalid by death are retained in the list, as the Department does not receive full information on that point.

The Session and date of any Certificate in the following list can be ascertained by reference to the number and the subjoined table:—

Numbers.	Sessions.	Dates.
1 to 72.....	Ninth.....	18th June, 1853.
73 to 150.....	Tenth.....	18th October, 1853.
151 to 221.....	Eleventh.....	20th April, 1854.
222 to 261.....	Twelfth.....	16th October, 1854.
262 to 306.....	Thirteenth.....	18th April, 1855.
307 to 351.....	Fourteenth.....	15th October, 1855.
352 to 425.....	Fifteenth.....	15th April, 1856.
426 to 498.....	Sixteenth.....	15th October, 1856.

APPENDIX C.

APPORTIONMENT OF THE LEGISLATIVE SCHOOL GRANT, FOR
 COMMON SCHOOLS, IN ONTARIO, FOR 1868.

CIRCULAR TO THE CLERK OF EACH COUNTY, CITY, TOWN AND VILLAGE MUNICIPALITY
 IN THE PROVINCE OF ONTARIO.

SIR,—I have the honour to transmit herewith a certified copy of the apportionment for the current year, of the Legislative School Grant to each City, Town, Village and Township in Ontario.

The basis of apportionment to the several Counties, Cities, Towns, Villages and Townships for this year is the School population, as reported by the Local Superintendents for 1867, and I have no more generally accurate statistics of a late date. From 1862 to 1865, the census of 1861 was the basis; but the large increase of population in some localities necessitated another standard for the last two years.

Where Roman Catholic Separate Schools exist, the sum apportioned to the Municipality has been divided between the Common and Separate Schools therein, according to

the average attendance of pupils at both classes of Schools during last year, as reported and certified by the Trustees.

The gross sum apportioned to all the Schools this year is the same as that of last year; and as many Townships have rapidly increased in population, the apportionment in such cases has been proportionably augmented, which of course necessitates a reduction where the population has not been increased.

I shall endeavour to have the apportionment paid at this office, to the agent of the Treasurer of your Municipality, about the 2nd of July, provided that the School Accounts have been duly audited, and that they, together with the Auditors' and Local Superintendents' Reports, have been duly transmitted to this Department.

It is particularly desirable that the amounts should be applied for not later than the third week in July, as it is inconvenient to delay the payment. There are, however, some Municipalities which have not yet sent in their accounts of School Moneys, now several months overdue, and in these cases the payment must necessarily be deferred until the law has been complied with.

I trust that the liberality of your Council will be increased in proportion to the growing necessity and importance of providing for the sound and thorough education of all the youth of the land.

I am, Sir, your obedient Servant,

E. RYERSON.

EDUCATION OFFICE,

Toronto, 16th June, 1868.

APPENDIX D.

DEPARTMENT OF PUBLIC INSTRUCTION FOR ONTARIO.

No. 1. DUTIES OF THE DEPARTMENT.

When the present school system was first established, the duties of the Education Office were light, as the municipalities and school officers and schools were less than half the number that they now are ; there was no auditing of school accounts from them, no payment of moneys to them through this office, no *Journal of Education*, no Provincial Normal and Model Schools, no provision for supplying municipalities and school sections with text-books, maps, apparatus, prize books and libraries ; no Superannuated Teachers' Fund ; no Educational Museum ; the Grammar Schools did not report, or receive inspection through the Department, and the Separate Schools were not individually dealt with by it. The correspondence of the office at first amounted to less than 500 letters per annum. Since that time its duties have so increased, that it has been found necessary to divide the Department into several branches,—in each of which more labour is required

than in the whole office before 1850. The School Act of 1850 more than doubled the duties of the Department; and those duties have been much increased by the amended Grammar, Common, and Separate School Acts, as well as by the progress of the school system and the growing interest of the country in the advancement of education and knowledge. The last Grammar School Act necessitated a close examination of Grammar School Returns and Meteorological Reports, involving much additional time and labour. Some idea may be formed of this increase from the fact, that in 1850 the number of letters received amounted to 1,180, and in 1867, to 8,242. In 1850, the number of letters sent out from the Department was 720, and in 1867 it amounted to 5,581. Since 1850, there has therefore been an increase of nearly 700 per cent. (300 per cent. increase since 1852) in the number of letters received, and of nearly 800 per cent. (400 per cent. increase since 1852) in the number of letters sent out by the Department; and this increase in the correspondence is but a fair indication of the increased labour in the other branches. The several branches into which the Department has been divided, are as follows:—

1. *Council of Public Instruction*:—This branch includes the general duties of the Council, as defined by statute; its meetings; all matters connected with the Normal and Model Schools, such as their supervision, the appointments of masters and teachers, and servants; the auditing and payments of salaries and accounts; the admission of students and pupils; the care, furnishing and repairs to the buildings, (which have been planned, erected and completed since 1850); the care and culture of the grounds—a square of nearly 8 acres. The books, stationery, etc., for the students in the Normal School, (varying from 100 to 150), and for the 300 pupils in the Model Schools, are supplied upon written requisitions from the Head Master of the Normal School, and approved in writing by the Chief Superintendent. The requisitions are numbered and filed, as the authority for anything done or procured, under the general or special orders of the Council, by whom also all the regulations respecting the establishment and government of the Common and Grammar Schools, and Public Libraries throughout Ontario, are sanctioned, and the text-books used in the Schools, and the books for the Public Libraries, are authorized. The law requires the Chief Superintendent to prepare these regulations, and all other matters for the consideration of the Council, to conduct all its correspondence and execute its orders. The Chief Clerk in the Education Office is also the Recording Clerk of the Council, and keeps the minutes, and the accounts of all moneys received and expended by it.

2. *Map and School Apparatus Depository*:—This branch includes the providing of the Normal and Model Schools with text-books and stationery; the purchase of maps, globes and all descriptions of school apparatus for the schools throughout Ontario, and the correspondence relating thereto. These articles had been furnished to the schools to the amount (including also books for Public Libraries and Prizes) of \$419,475, up to 31st December, 1867. The collection of school apparatus in this Depository is the most extensive in America, if not in Europe: so much so, that a partner of a large Scotch publishing house procured specimens of school requisites to the amount of about \$40, in order to reproduce them in Edinburgh; and the Secretary of the Board of Education for the State of Massachusetts purchased articles to the amount of nearly \$200, for the Education Office in Boston, as specimens for the schools in the State of Massachusetts. Charts and object lessons, of about the same value, have also been obtained at our depository, for the purpose of introducing object teaching in the Normal and other schools at Oswego and other American towns. During the year 1854, at the suggestion and under the revision of this department, three large maps of British North America were undertaken—one in New York; one in Edinburgh, by Messrs. W. & A. Keith Johnston, Geographers to the Queen; and one in London, by the Messrs. Smith, publishers of the Irish National School Maps. These British maps of Canada and the Eastern Provinces were of the same size and style with the Johnston and National series of large maps of Europe, Asia, etc., and included our latest county and Township divisions, lines of railroad, etc. The proofs of those beautiful maps were corrected in this office; and they were published and largely circulated—thus presenting for the first time to the British public (besides providing them for the schools both in England and in Canada) maps of the present Dominion of Canada on a large scale, and also complete and comprehensive in detail. But it has always been an object kept in view to encourage the home manufac-

ture of school apparatus of all kinds; and now by far the greater portion of these articles is the production of the Canadian maker, the maps being drawn and the patterns furnished by this office.*

This Depository includes about 1,000 different kinds of maps, charts, cheap and beautiful apparatus, (to illustrate elementary instruction in different branches of Natural History, Chemistry, Natural Philosophy, Geometry, etc.) which have been obtained from London, Edinburgh, Glasgow, Paris, Boston, New York, Philadelphia, and other places, and the collection of which has cost much time and labor. But, as in the case of the maps, as well as school seats and desks, these articles are now principally manufactured in this country.

3. *Public Library and Prize Depository*.—This branch includes the procuring and providing of books for the Public Libraries and school prizes, with catalogues, regulations and correspondence relating to them. Nearly 4,000 *different works* are contained in the catalogue, the selection and examination of which, for the sanction of the Council of Public Instruction, and arrangements for procuring which, from more than sixty publishers in Great Britain and the United States, have involved a great amount of time and labour during many years. Upwards of 61,000 volumes of prize books were supplied to municipalities and school sections, during the twelve months ending December, 1867, and 5,426 for Public Libraries—total, nearly 79,000. And from the commencement of the operation of the Depository, 333,422 volumes have been sent for prizes, and 224,647 for libraries—total, nearly 600,000. To obtain and keep up the necessary supply of books, orders for them must be made up and sent off from month to month, the payments made, and the books, when received, must be examined by the invoices, and deposited in their respective places. When an application is received from a municipal or school corporation, with a list of the books desired, or request that books to a certain amount be selected for them, the books desired or selected are marked on the margin of the printed general Catalogue, one copy of which is used and retained in the department for each library; on the outside of this catalogue are entered—the name of the municipal corporation, the number of the library, the amount of the local appropriation and government apportionment, the value of the selection made by the local authorities, together with such other entries as may be required, such as the address of the party to whom the library is to be sent, dates and numbers of letters, relating to the library, etc. After having been examined by the Deputy Superintendent, and such additions made to the selection of books, as will cover the amount of the library desired, the books are selected, checked and packed in boxes, together with the necessary quantity of labels

*The following is a list of these articles of home manufacture now being made in this Province, chiefly in Toronto:—*Departmental Maps*:—(1). British North America, including Ontario, Quebec, Nova Scotia, New Brunswick, Prince Edward Island, Newfoundland, B. Columbia, etc.—size, 3 feet 10½ in. × 5 feet 4 in. (2). The World; (3). Europe; (4). Asia; (5). Africa; (6). America; (7). British Isles; (8). United States; (9). Palestine; each 5 feet 5 in. × 4 feet 4 in.; (10). Canada; (11). Europe; (12). Asia; (13). Africa; (14). America—each 4 feet 2 in. × 3 feet 5 in. *Globes*:—(1). Three inch Hemisphere globe (lined); (2). Six inch Semi-frame, large stand; (3). Six inch globe, walnut stand; (4). Twelve inch globe, low stand, with quadrant and compass; Twelve inch globe, with high stand; (5). Eighteen inch globe, with high stand; Eighteen inch globe, with low stand; (6). Thirty inch globe, low stand, with quadrant; (7). Solar Telluric globe, with metal stand and frame. *Apparatus*:—Canadian School Planchette (Solar System, high stand; Ditto, low stand; The Tellurian, for illustrating the various phenomena resulting from the relations of the Sun, Moon, and Earth to each other, on wood stand and sun coloured; Air Pump, barrel 7½ by 2 inches, plate 8 inches; basement walnut, well finished; Air Pump barrel, 7 by 1½ inches, ditto plate, 6 inches; Hemispherical Cups, with stop-cock, handles and stand; Electrical Machine, plate 12 inches, prime conductor 12 by 3 inches, insulated crank, and in every respect well finished; Electrical Discharger, large glass handle; Mechanical Powers, cherry frame, with four sets brass pulleys, with silk cord, two sets brass weights, simple and compound levers, wheel and axle, screw and lever with nut, screw as an inclined plane, wedge in sections, inclined plane with arc and binding screw, carriage, ship's capstan, etc., complete; Ditto, ditto, smaller set. Set of twenty Geometrical Forms and Arithmetical Solids, containing blocks to demonstrate the carpenter's theorem, that the square of the hypotenuse equals the sum of the squares of the other two sides; Flat black-board Brush, of lamb's wool, with handle on the top; Archimedes Screw Pump, with stand and cistern; Centrifugal Machine, mahogany frame, with brass geared wheels, also eight illustrations of centrifugal forces: of the cause of bodies revolving on their smallest diameter, of the flattening of the poles, etc.; Pointers (long and short) for (Globe and Black-board Teaching; Dissected Cube Root Block, in box, for illustrating square and cube roots, but especially the latter; Cone, with sections, in boxwood, pinned; Insulating Stool, polished wooden top, 13 inches by 11 inches, four massive glass legs; Numeral Frame (Abacus), various sizes; Non-Evaporating Ink Wells (metal); Common Ink Wells, with iron covers; Over and Under-shot Water Wheels; Canadian Rotary Map Stand, mounted on castors; Map Case, for hanging on a wall. *Charts*:—Macallum's Chart of Natural History; Robertson's Chronological Chart; Browne's Geometrical Diagrams; Merritt's Historic Chart of British North America.

and wrapping paper for covers for the books sent. From this checked catalogue, the invoice is made out and sent to the corporation for whom the library is intended, together with the shipper's, or carrier's receipt for the boxes delivered. Under the system adopted in the Depositories, the person making a purchase attests the record of the transaction by his signature, so that vouchers are kept for receipts as well as for payments, and this has been the practice of the Department since 1851. The Cashier gives his receipt for all moneys daily paid over to him, and he deposits the cash in the Bank to the credit of the Province.

The pecuniary advantage of this system of libraries to the country may be conceived, when it is considered not only how great a variety of useful books are introduced and made accessible to all parts of the Province, which were never before brought into the country, but that these books have been purchased on most favorable terms, and are so supplied, and that the entire expense of management, including transportation, packing, printing, fuel, salaries, insurance, and all contingencies, has not exceeded twenty per cent. on the sums paid for the books and apparatus.

4. *Educational Museum and Library.*—The collection and arrangement of specimens of painting, statuary, engravings, photographs, and other objects of art, and of school apparatus for public exhibition is an important feature of the operations of the Department for some years past, and with results now of great value. The formation of a Library, in which special attention is devoted to works on Education, Educational Reports from various parts of the world, Educational Text Books, Parliamentary Records and original works bearing on the history of the British North American Provinces, has been steadily progressing.

5. *Education Office.*—This is, of course, the Executive of the whole department, not only embracing the management of each of the others, but including the general administration of the Common and Grammar School Laws; explanations to Councils, Superintendents, Trustees, Teachers and others, on doubtful points of law and modes of proceeding; decisions on appeals and complaints; auditing School Accounts; oversight of Normal and Model Schools, and Provincial Certificates for Teachers; paying and accounting for all Legislative Grants for Common and Grammar Schools, Separate Schools and Superannuated Teachers; furnishing annotated editions of the School Laws, Teacher's Registers, blank Reports and Returns for Trustees, local Superintendents, Clerks and Treasurers of Municipalities, and the *Journal of Education*, (besides editing it), to each local Superintendent and School Corporation in Ontario; examination of applications from poor School Sections in new Townships, the apportionment and payment of Special Grant to them; the same in regard to Superannuated Teachers; the preparation of the General Annual Report, the printing and sending out upwards of 4,000 copies of it to Municipal Councils, Superintendents and School Corporations; general correspondence relating to the promotion of education; giving proper attention and explanations to many visitors from all parts of Canada and from other countries, who wish to ascertain and witness the departmental management, and the arrangements which have been made for supplying the educational wants of the country by means of the Depositories, as well as the methods of instruction in the Normal and Model Schools.

Some portions of the work of this branch of the Department, thus summarily stated, require much discrimination and work. Such, for example, as the apportionment and payment of the various grants, after a careful scrutiny of the returns of attendance, &c., compiling the Annual Report from the returns of nearly 700 School Reports, and a comparison of these with the accounts of 500 School Municipalities and Corporations, each of which requires examination and revision in order to compile the Chief Superintendent's Annual Report. Where errors are apparent, the local report is returned, or a letter written requesting explanations. In auditing the School Accounts, the receipts and expenditures of each Municipality must be checked, compared with the County and other Municipal Auditor's reports, and with the apportionment book, and a minute of the balance made. Where discrepancies are found, explanations are asked; where misapplications of the School Fund are detected, and where the whole of the sum required by law to be raised in a municipality is not raised, or is not accounted for, the parties concerned are duly notified, and a corresponding sum is withheld in paying the next apportionment of the grant, until the deficiencies are made up, and the expenditure of all the moneys raised

duly accounted for according to law. This auditing of school accounts, though a serious task, and involving much correspondence, secures considerable sums to the School Fund, and introduces into each Municipality and School Corporation the practice of faithfully accounting for the receipt and expenditure of public moneys—an important element of public instruction, as well as of good government. To this may be added the examination and publication monthly (in abstract), of returns from the meteorological stations, established at ten selected Grammar Schools.

In regard to *Letters*, each letter received is attached to a blank endorsement, having printed on it the name of the *branch* of the department to which the letter belongs, lines for the number, title or name of the writer, post-office, date of receipt, and references. It is also entered in the *Register of Letters Received*, with the summary of its contents, and numbered; and if it refers to former letters, they are obtained, and their number noted, with such memoranda as may be necessary; should it belong to the Depositories, the request is complied with, and the order is supplied immediately on receipt of the money. A copy from each draft of reply, or letter sent from the office must be made, addressed to the party concerned, and a press copy retained. The date of the reply is also entered on the back of the letter received.

The books are kept by double entry, and are balanced monthly, and detailed accounts transmitted to the Provincial Treasurer. All cash receipts (as above stated) are deposited to the credit of the Province, and all payments are made by cheques, to meet which detailed warrants are issued by His Excellency for the amounts voted by the Legislature, as they may be required from month to month. With respect to the mode of accounting, the following is an extract from the evidence of Mr. Langton, the Auditor, before the Departmental Commission [Sessional Papers, No. 11, Vol. XXI, Session 1863]:—"The Superintendents of Education send me vouchers for all their expenditure. The accounts of the Upper Canada Superintendent are very regular, and are amongst the most correct in form that come to my office."

The following books are kept:—1. Cash Book; 2. Cheque Book; 3. Journal; 4. Ledger; 5. Bank Account Book; 6. Common School Apportionment Book; 7. Separate School Apportionment Book; 8. Grammar School Apportionment Book; 9. Superannuated Teachers' Register; 10. Superannuation Fund Subscription Book; 11. Pensioners' Apportionment Book; 12. Letters Received Book; 13. Letters Sent Book; 14, 15, 16. Depository and Library Sales Books (three); 17. Depository Invoice Book; 18. Depository Abstract Book; 19. Museum Invoice Book; 20. Normal School Admission Register; 21. Provincial Certificate Register; and 22, the Minute Book of the Council of Public Instruction.

It is only by this strict attention to details, and this separate and methodical arrangement of each branch of the Department that it has been practicable to avoid confusion and embarrassment, to get through with the work undertaken, and to render the Department an approved and efficient agency for advancing the educational and social interests of the country. Each branch in the office has a head, who is responsible for the working of his branch. The whole passes under the review of the Deputy Superintendent, who refers special cases to the Chief Superintendent as they arise.

As the County, Township, Town and Village Councils, Trustees and others, have thought proper, voluntarily and almost unanimously, to make this Department a sort of Court of Equity, and to apply to it for information and advice on all doubtful matters, and matters of difficulty or difference, the Chief Superintendent has deemed it his duty not to limit the replies of his Department to the dry technicalities of law, but to do all in his power to reconcile differences, and settle difficulties, and aid and encourage by counsel, suggestions and persuasions, the parties addressed, to avail themselves of the facilities afforded for promoting education and knowledge among the youth of the country.

The Report for 1867, which is about to be given to the public, exhibits the progress the system has already made, and with further improvements in the law which experience has shown to be necessary, it may reasonably be expected, if nothing untoward occurs, that the progress of the system from 1868 will even exceed the progress which it has made from 1850. No power has been employed but that of persuasion; and no attempt has been made to advance faster than the felt necessities and convictions of the country would justify. To educate the people through themselves, is the fundamental principle of the

School system; and to assist them to advance their own best interests and manage their own affairs, has been the spirit and sole object of its administration.

There is no such thing as a *State School Tax* in Ontario, the Legislature imposing no school tax, as in the neighbouring States. All the taxes levied and collected for school purposes are the voluntary acts of the local Municipalities. Yet the progress of the school system in its financial aspects is no less gratifying than in those particulars referred to in the foregoing remarks.

No. 2. DOCUMENTS FURNISHED ANNUALLY TO THE SCHOOL OFFICERS OF ONTARIO.

The following are furnished gratuitously by the Educational Department of Ontario to the various school officers, viz.:—

1. *The Journal of Education for Ontario* is sent monthly to each of the Trustee Corporations in the rural School Sections, to the Boards of Grammar and Common School Trustees, to the Local Superintendents, to the Trustees of each of the Separate Schools, and to each County Clerk and Treasurer, Exchanges, &c.—Total, 5,000 copies.

The *Journal* has been constituted the official medium of communicating all departmental intelligence. It is regularly sent by the publisher, about the first of each month, to the official address of the parties above enumerated. Should they fail in any case to receive it, immediate notification of the fact should be sent to the Education Office. Missing numbers can generally be supplied. To the public, the price is \$1.00 per annum, payable in advance. Back volumes since 1848 (the first year of its existence), can be furnished on the same terms.

2. *The School Registers*, for recording the attendance, recitations and deportment of pupils, are furnished to each of the Grammar and Common Schools, and to the separate Schools in Ontario.—Total, about 5,000 copies. The *Registers* are sent annually to the County Clerks for gratuitous distribution, through the Local Superintendents.

3. *The Trustees' Half-yearly Reports* are sent every six months—through the Local Superintendents—to the Trustees of each School Section. Those for the Grammar Schools and Roman Catholic Separate Schools are sent direct from this Department.—Total sent out annually, 10,000 copies.

4. *The Trustees' Blank Annual Reports* are annually sent through the Local Superintendents, to each of the Trustee Corporations in the rural School Sections.—Total, about 4,500.

5. *The Blank Annual Reports*, from which the General Annual Report of the Department is compiled, are sent to the Local Superintendents and Boards of Common School Trustees and Boards of Grammar School Trustees.—Total number sent out annually, 600 copies.

6. *Auditors', Treasurers' and Sub-Treasurers' Returns* are sent to about 500 of those officers, to be filled up and returned.

6. *The Chief Superintendent's Annual Report* to His Excellency the Lieutenant Governor printed by order of the Legislative Assembly, is also sent to each of the rural Trustee Corporations; to the Boards of Common School Trustees in cities, towns and villages; to Boards of Grammar School Trustees; to Boards of Public Instruction; to Local Superintendents, and to Separate School Trustees, besides copies to other parties.—Total number sent out annually, about 4,500.

8. *Various Forms*.—Forms are also sent from time to time to Superannuated Teachers, Trustees (for maps), Normal School Students, &c.—About 800 copies.

Letters received and sent out by the Department:—

5. Local Superintendents' Blank Annual Reports	600		
6. Auditors' and Treasurers' Blank Returns	500	Grand Total per year	45,500

No. 3. COMMUNICATIONS TO THE DEPARTMENT.

THE POSTAGE LAW AND THE DEPARTMENT.

As many parties, in correspondence with the Educational Department, do not comply with the new postage law, in pre-payment of their letters (thereby increasing the postage charge by nearly 50 per cent.), the effect has been to swell, unduly, this item of the contingent expenses. It may be that this omission arises from the impression that the official correspondence of the Educational branch of the public service, like that of the Dominion Departments, goes free. But this is an entire mistake, as it is necessary to pre-pay all letters to the *Provincial* Departments. It will be necessary, therefore, that all correspondence be pre-paid, and that thinner paper be used in all cases. Several letters that might occupy but one page have been received, written on large, thick paper, and embracing four pages. Foolscap paper should be used where practicable, and only such portions of it sent as may be written on; all other portions have to be cut off when the letter is filed.

PRE-PAYMENT OF POSTAGE ON BOOKS AND PARCELS.

According to the postage law, the postage on all books, parcels, printed circulars &c., sent through the post, must be pre-paid by the sender, at the rate of one cent per ounce. Local Superintendents and teachers ordering books from the Educational depository will, therefore, please send such an additional sum for the payment of this postage—at the rate specified—as may be necessary.

REGULATION IN REGARD TO GRAMMAR, COMMON AND SEPARATE SCHOOL RETURNS.

All official returns to the Chief Superintendent or a Local Superintendent, which are made upon the printed blank forms furnished by the Educational Department, *should be pre-paid one cent, and open at each end*, so as to entitle them to pass through the post as printed papers. No letters should be enclosed with such returns.

APPEALS AND MISCELLANEOUS COMMUNICATIONS.

1. *Appeals to the Chief Superintendent of Education.*—All parties concerned in the operations of the Grammar and Common School Laws have the right of appeal to the Chief Superintendent of Education, and he is authorized to decide such questions as are not otherwise provided for by law. But, for the ends of justice, to prevent delay and save expense, it will be necessary for any party thus appealing: 1st. To furnish the party against whom the appeal may be made with a correct copy of his communication to the Chief Superintendent, in order that such party may have an opportunity of transmitting any explanation or answer deemed expedient. 2nd. To state expressly in the appeal that the opposite party has been thus notified, as it must not be supposed that the Chief Superintendent will decide, or form an opinion, on any point affecting different parties, without hearing both sides—whatever delay may at any time be occasioned in order to secure such a hearing. Application for advice in Township Common School matters should, in all cases, be *first* made to the Local Superintendent having jurisdiction in the Municipality.

2. *The Journal of Education* having been constituted by the Governor in Council, the official medium of communicating all Departmental intelligence and information, parties should refer to its pages on matters relating to the apportionment, regulations, blank reports, Depository, Normal School, &c.

3. *Communications generally.*—The parties concerned are left to their own discretion

as to the forms of all communications relating to schools, for which specific instructions are not furnished by the Department, but they are requested to use large-sized or foolscap paper, and to keep copies of their letters. In *all* communications, however, the NUMBER of the School Section and the NAME of the Township and Post Office, with the official title of the writer, should be given; and also the NUMBER and DATES of any previous correspondence on the same subject.

4. *Communications with the Government relating to Schools* should be made through the Educational Department, Toronto, as all such communications not so made are referred to the Chief Superintendent of Education, to be brought before the Lieutenant Governor through the proper Department, which occasions unnecessary delay and expense.

5. *Communications relating to the Journal of Education; to the Educational Depository; to Public Libraries; or to the Superannuated Teachers' Fund, School Accounts, Poor Schools, &c.,* should be written on *separate* sheets from letters of appeal, or on legal questions, in order that they may be separated and classified in the Department.

APPENDIX E.*

I. LIST OF ARTICLES PURCHASED AT THE PARIS EXHIBITION OF 1867, FOR THE EDUCATIONAL MUSEUM OF ONTARIO. (See Pages 26,7.)

1. Models of School Furniture and School Requisites.

The Osborne School Table Desk and Seat	-	-	-	-	} Made in London.
Quadrant School Desk and Seat on four standards	-	-	-	-	
Boys' do do two do	-	-	-	-	
Girls' do do two do	-	-	-	-	
A School Mistress' Pedestal Work Table	-	-	-	-	
A Set of Mechanical Powers	-	-	-	-	} Made in Paris.
Do Geometrical Forms and Solids	-	-	-	-	
A large Abacus	-	-	-	-	
A Sphere, in relief, representing Ptolemaic theory	-	-	-	-	
do do Copernican do	-	-	-	-	
A Globe, in relief, with frame	-	-	-	-	} Made in Berlin and other parts of Germany.
A Sphere, in relief	-	-	-	-	
A Map, in relief, of Mont Blanc	-	-	-	-	
do do Jerusalem, large	-	-	-	-	
do do Jerusalem, small	-	-	-	-	
do do Golgotha	-	-	-	-	} Made in Austria.
One Observatorium	-	-	-	-	
One Astrogosticon	-	-	-	-	
One Laurenusque Geographie, &c.	-	-	-	-	
One Topographical Atlas of Wurtemberg (photograph)	-	-	-	-	
do do Savoy do	-	-	-	-	

2. Scientific and other Models, Photographs, &c.

Various Models for the Blind	-	-	-	-	} Made in Paris.
Model of an oblique Railway Bridge	-	-	-	-	
Enlarged Model of a Flower, (hinged specimen)	-	-	-	-	
Model for small Gymnasium	-	-	-	-	
do large do	-	-	-	-	
Set of Models illustrating the Metric System	-	-	-	-	}
do do French System	-	-	-	-	
Photographs of places in Switzerland and France—Portraits of Celebrities (French and Swiss)					

* In continuation of list of articles purchased in Italy, Holland, Germany, France, and England, in Appendix to the Chief Superintendent's Report for 1856.

3. *Specimens of Natural History.*

A Set illustrative of Entomology	-	-	-	-	-	} Prepared at
do of Coleopterice Insects	-	-	-	-	-	
Specimens of Natural History (Coleopterice Insects)	-	-	-	-	-	} Prepared at
						Altona.

II. LIST OF PLASTER CASTS OF ASSYRIAN AND EGYPTIAN SCULPTURES, PURCHASED FROM THE FORMATORE TO THE BRITISH MUSEUM, LONDON.

1. *Assyrian.*

One Human-headed winged Bull.
 A Four-winged Figure with Mace.
 Slab: Sardanapalus I. with winged figure and offering.
 do do with Eagle-headed deity and mystic offerings beside a sacred tree.
 Slab: (two) Sardanapalus besieging a city.
 do
 do A King hunting the Lion.
 do Sardanapalus III. and his Queen feasting in a garden - - - }
 Wounded Lioness, from Slab of Sardanapalus III. hunting Lions - - } Bas relief
 Slab: Sardanapalus III. at an altar pouring a libation over dead Lions } from the
 Man-headed-lion, from Slab of Mythological or Sacerdotal figures - - } Konyunik
 Two horses and two Lions, one rider—from Slab - - - } Collection.
 Obelisk from the great mound set up by Shalmaneser, King of Assyria, (about 850 B. C.)
 Stone from Hadji Abad containing inscription of Addon, King of Assyria.
 Stone from ditto with cuneiform characters.
 Babylonian Stone containing record of the sale of a field, in the reign of Merodach-Adan-Akhi, King of Babylon, (about 1120 B.C.)
 Ditto, with the figure of a King in relief, and the record of the sale of a field, do, do.
 Various Sculptures and Inscriptions from Persepolis.

2. *Egyptian.*

Statue of Amenophis III., called by the Greeks Memnon, (XVIII Dynasty), from Thebes.
 Statue of Banofre, a Scribe, dedicated to Osiris (XVIII Dynasty), from Thebes.
 Ditto (of the upper part) of an officer.
 Ditto do do of rank, inscribed with the name of Psammetichus I. (XXV Dynasty).
 Ditto (of the upper part) of an Egyptian Monarch.
 Ditto of Amen-em-ha, a functionary (XII Dynasty).
 Ditto of Betmes, a high functionary.
 Bust of Amenophis III.
 Head of Pasht (Goddess of Fire), and part of figure.
 Ditto (Bubastis) with the name of Amenophis III. (Memnon) XVIII Dynasty, from Karnak.
 Head of Sphinx (Roman period).
 Lid of Sarcophagus of Sebaksi, Priest of Ptah (period uncertain).
 South and east sides of Obelisk (facing entrance) erected by Nekhtherhebi before the Temple of Thoth, (XXX Dynasty) from Cairo.
 Intercolumnar Slab from a Temple, with inscription and figure of Nectanebo (XXX Dynasty), from Alexandria.
 Rosetta Stone, with inscription in honour of Ptolemy V., Hieroglyphic, Enchorial and Greek characters (Ptolemaic period), from Rosetta.
 Upper part of Basin (for offerings) of Seti-Menephthah I.
 Upper part of Amen-ra.

3. *Greek and Roman.*

Slab: Apotheosis of Homer.
 " Bacchus and attendants visiting Icarus.

Head of Mausolus from Halicarnassus.

" Apollo (Pourtales collection)

" Æsculapius (Blacas collection).

Group of Grecian Boxers (life size).

Ditto Diana and Dog, by Benzoni.

Ditto Ciparissus and Faun.

Statuette of Infant Bacchus in Basket.

Bust of Achilles, (large).

Two circular Medallion antique heads from marble in South Kensington Museum.

III. MODERN BUSTS, PURCHASED IN LONDON AND DUBLIN.

Empress Eugenie, Emperor Napoleon III., Queen of Edward IV., Prince and Princess of Wales, Lords Castlereagh, Clive, Raglan, Dundonald, George Gordon, and Palmerston. Marquis of Worcester, (Medallion), Airey, Blucher, Canning, Eliza Cook, Cruickshank, Curran, Cuvier, Cervantes, Goldsmith, Garibaldi, Hume, Hood, Horne Tooke, Linnæus, Mendelssohn, Moore, Robespierre, Capt. Ross, Hannah More, Percival, Thorwaldsen, Savonarola, Lady Stanhope, Doctor Valpy, Sterne, Swift, Watt, Wordsworth, Genl. Wolfe.

Ancient Busts..

Achilles, Æsculapius, Pompey, Mausolus, Themistocles, and two circular Medallion antique heads from marble in the South Kensington Museum.

IV. FINE PLASTER CASTS OF WORKS OF ART, GEMS, MEDALS, &C., PURCHASED IN LONDON.

Set 2 Achilles and Minerva.

" 48 Elgin Marbles.

" 3 Triumph of Alexander the Great.

" 470 of the Poniatowski Gems (classical subjects).

" 50 Medals Roman Emperors.

" 120 " illustrative of Roman History.

" 256 " Popes of Rome.

Analysis of Water.
 " Oats.
 " Buckwheat.
 " Coffee.

Wheat, Bread, Potato.
 Beet Root Sugar, Sugar.

- XII. ROGERS AMERICAN GROUPS IN PLASTER. PURCHASED IN NEW YORK, 1868.
- Taking the Oath.*—A Southern lady with her little boy, compelled by hunger is reluctantly taking the oath of allegiance from a Union officer, in order to draw rations. The young negro is watching the proceedings while he waits to have the basket filled for his mistress.
- One more Shot.*—Two wounded soldiers have been ordered to the rear during a battle, but one of them is taking out a cartridge to load up again, determined to have one more shot before leaving.
- The Wounded Scout.*—A Union scout has been shot through the arm, around which he has twisted a tourniquet. He is weak and faint from loss of blood, but an escaped slave is conducting him to his home in the swamp. A copperhead snake is raising its head to strike the negro while he is doing this friendly act.
- Union Refugees.*—A Union family have been driven from their home in the South. The father carries all the property they have saved in a bundle slung on his gun. The little boy is trying to console his mother by giving her flowers.
- The Country Post Office.*—An old shoemaker, who is post-master also, has just opened the mail-bag from the army. He is taking a provokingly long time to study out the address of a letter which a young lady by his side recognizes at once as for her.
- The Home Guard.*—Two females living on the border, and the only ones left to guard their home, as the men are all in one army or the other, are suddenly called up by an alarm at midnight. The older one is in the act of cocking a revolver while the other clings to her for protection.
- The School Examination.*—One of the School Committee has come to examine the school, and is pointing out, good-naturedly, on the slate, the mistake the little girl has made in her sum, while the teacher stands by to encourage her.
- The Charity Patient.*—An old doctor is stopped in his employment of mixing drugs by a poor woman, who comes in to ask him what the trouble is with her baby. She is anxiously watching the doctor's face to learn the result of his investigation.
- Uncle Ned's School.*—An old negro boot-black is keeping school, but one of his scholars, a mulatto girl, has asked him a puzzling question, while a lazy little boy is mischievously tickling his foot, which he feels, but is too much occupied to attend to.
- The Returned Volunteer.*—A soldier has built a fortification with some of the blacksmith's tools, and also an opposing battery with a horseshoe and nails, and he is showing the blacksmith how they took the fort.

APPENDIX F.

LOCAL SUPERINTENDENTS (1868) OF SCHOOLS IN THE SEVERAL MUNICIPALITIES OF ONTARIO.

NAMES.	MUNICIPALITIES.	POST OFFICE ADDRESS.
I. COUNTY OF GLENGARRY.		
Hector McRae.....	Charlottenburgh	Martintown.
Rev. A. McQueen	Kenyon	Dunvegan.
Rev. T. McPherson	Lancaster	Lancaster.
Rev. W. K. Anderson	Lochiel	Dalkeith.
II. COUNTY OF STORMONT.		
N. Eastman	Cornwall	Cornwall.
Rev. H. Lamont.....	Finch and Cambridge.....	Newington.
William Millar	Osnabruck	Dickinson's Landing.
Rev. D. Gordon	Roxborough	Athol.

LOCAL SUPERINTENDENTS (1868) OF SCHOOLS, &c.—(Continued.)

NAMES.	MUNICIPALITIES.	POST OFFICE ADDRESS.
III. COUNTY OF DUNDAS.		
W. Johnston	Matilda	Dixon's Corners.
A. Broder	Mountain	Inkerman.
Rev. J. Davidson	Williamsburgh	North Williamsburgh.
Rev. W. Ferguson	Winchester	Chesterville.
IV. COUNTY OF PRESCOTT.		
H. Hughes	Alfred	Treadwell.
Rev. J. G. Armstrong, M.A.	Caledonia and Hawkesbury, West	Hawkesbury.
Colin Dewar	Hawkesbury, East	St. Eugene.
R. Hamilton	Laureuil	L'Orignal.
Rev. Thos. Scott	Plantagenet, North	Curran.
A. McLean	Plantagenet, South	Riceville.
V. COUNTY OF RUSSELL.		
J. McCaul	Clarence	Clarence.
Rev. J. C. Smith	Cumberland	Cumberland.
W. Z. Helmer	Russell	Duncanville.
VI. COUNTY OF CARLETON.		
Rev. C. P. Emery	Fitzroy	Pakenham.
Rev. Richard Gavin	Gloucester	Ottawa.
Rev. Wm. Fleming	Osgoode	Osgoode.
Rev. C. B. Pettit	Goulbourn and Nepean	Richmond.
Rev. Chas. Taggart	Gower, North	North Gower.
Rev. J. Godfrey	Huntley	Carp.
Rev. John May	March and Torbolton	South March.
Rev. D. P. Merritt	Marlborough	North Gower.
VII. COUNTY OF GRENVILLE.		
R. E. Brown	Augusta	Prescott.
Rev. J. B. Mullan	Edwardsburgh	Spencerville.
Rev. John Howes	Gower, South	Heckston.
Rev. W. T. Canning	Oxford, Rideau	Oxford Mills.
W. S. Ralph	Wolford	Jasper.
VIII. COUNTY OF LEEDS.		
Samuel Rabb	Bastard and Burgess, South	New Boyne.
James Bilton	Crosby, North	Newboro.
Henry Laishley	Crosby, South	Elgin.

FIRST REPORT

OF THE

INSPECTOR

OF

ASYLUMS, PRISONS, &c.,
FOR ONTARIO.

OFFICE OF INSPECTOR OF ASYLUMS, PRISONS, &c., ONTARIO,
TORONTO, *October, 1868.*

*To His Excellency the Honorable WILLIAM PEARCE HOWLAND, C.B.,
Lieutenant Governor Province of Ontario:—*

MAY IT PLEASE YOUR EXCELLENCY,—

The undersigned has the honor to submit, for the information of Your Excellency, in accordance with the 14th section of the "Prison and Asylum Inspection Act, 1868," his first Report on the several institutions, placed by the provisions of that Act, under his inspection, which are as follows:

Thirty-seven Common Gaols.
Four Lunatic Asylums.
One Juvenile Reformatory.
Six General Hospitals.
One Deaf and Dumb Asylum.

This class of public institutions came under the control of the Local Legislatures on the 1st July, 1867, in conformity with the 92nd section of "The British North American Act, 1867," but, as the appointment of the undersigned to the supervision of the same within the Province of Ontario, only dates from the 26th June, 1868, it cannot be expected that he will give as full information in regard to the present state and management of the different institutions, as could be desired, or that their importance demands. For the same reason, he will defer offering suggestions, with a view to the better administration of their affairs, except for the purpose of correcting defects and irregularities which must be apparent to any one at all conversant with their management.

As the usual annual reports, in connection with the inspection of these institutions, have not been furnished (with the exception of Dr. Workman's) since the confederation of the Provinces, the present one, with the accompanying statistical and financial information will cover a period of fifteen months, being from the 1st July, 1867, to the 1st October, 1868.

The several institutions subject to inspection will be referred to in the order in which they are placed in the prefixed list, and the usual appendices are herewith annexed.

COMMON GAOLS.

While it may fairly be claimed for the Province of Ontario, that Gaol construction and administration, as well as the observance of Prison discipline, have in many respects kept pace with the rapid strides that have been made in this important branch in the science of government, in nearly every part of the civilized world, during the past quarter of a century ; still it must be admitted that there are many painful defects and imperfections in our system, and its practical working, which have a tendency to counteract and destroy the benefits that society has a right to expect from the establishment and maintenance of penal institutions. 1st, as regards

GAOL CONSTRUCTION.

The Prison and Asylum inspection Act of 1859 provided, that all Gaols erected after the passing of that Act should be constructed in conformity with plans to be approved of by the Board of Inspectors, and sanctioned by the government. It also required that all Gaols built previous to that date should be altered and repaired, under the supervision of the inspectors, so as to comply with the requirements of the law. In addition to this, it authorized the payment of certain sums to the several counties, to aid in such constructions or alterations.

This statute—the provisions of which (with the exception of authority to assist pecuniarily) have been adopted by the Legislature of Ontario, and embodied in the Inspection Act of 1868—has been in existence for nine years, and although framed to meet the peculiar circumstances and financial ability of the different counties, has been utterly disregarded and ignored by the following corporations:

Hamilton Gaol,—County of Wentworth.

Cornwall do United Counties of Stormont, Dundas and Glengarry.

Sandwich do County of Essex.

Stratford do County of Perth.

St. Thomas do County of Elgin.

The undersigned finds on record repeated remonstrances, addressed by the late Board of Inspectors, to the authorities representing these counties, urging them to proceed with the new buildings, or the necessary repairs and alterations required by the statute. In addition to this, Grand Juries have been constantly reminding them of their duty, but all without effect.

So long as the Gaols referred to remain in their present state (which is particularly described in the separate Reports on each) it is quite impossible to enforce the observance of Prison discipline, or the prescribed rules and regulations for the government of Gaols. Apart from the almost entire absence of sanitary measures, the most serious evil to contend against, arising out of defective Gaol construction, is the inability to effect anything like a proper

CLASSIFICATION OF PRISONERS.

It must be admitted, that under the most favourable circumstances, with well planned and properly constructed Prisons, this is a most difficult matter to accomplish, and at best can only be of a partial character, but the *indiscriminate* mixing together, of the inmates of a Gaol without the slightest regard to classification, which is so painfully apparent in the Gaols before enumerated, is an evil that no civilized community should tolerate, and if the county councils, who are responsible for the existence of the evil, persistently refuse to apply the remedy, by furnishing proper and adequate accommodation, then, the Government cannot too soon apply the law. A visit to many of the Gaols in question, will convince the most unbelieving of the necessity that exists for even a partial separation, and of the positive crime of bringing the thoughtless juvenile offender into contact with the hardened criminal ; the untried, and possibly innocent man, with the sentenced felon ; the unfortunate female convicted of her first offence, with the shameless and debauched prostitute.

HARD LABOR.

This most important branch of Prison discipline, is almost, if not altogether, a *dead letter* in the Common Gaols of this Province; with the exception of what may be termed "occasional jobs" there is no recognized or defined system of hard or penal labor. Notwithstanding this, in our Recorder's and Police Courts is daily witnessed the solemn farce of sentencing criminals to confinement for a certain period in the Common Gaol with hard labor. That this unfortunate state of things in our prison administration is productive of the very worst results, does not admit of a doubt. It is only necessary to pass through the over-crowded Gaols of our cities, large towns and populous localities, in order to witness the lamentable spectacle of able-bodied, healthy men, who have been convicted of crime, lounging about in *utter idleness*, with plenty of time on their hands to devise and concoct other ways of breaking the laws of their country, when released.

It is very evident that the municipal authorities, who, to a certain extent, have been charged with the duty of providing labor for prisoners, have looked too much for a means of profitable employment, and failing that, have furnished none at all. While it is very desirable that the labor of prisoners should be of a profitable and industrial character, it should never be lost sight of that the *primary object* of their incarceration is *punishment for crime*, and that all prison regulations, government, and discipline should be made subservient to this end, no branch of which would have a more wholesome or deterrent effect than the establishment of a proper system of "hard or penal labor," not only as a means of punishment, in accordance with the actual sentence of the court, but with a view to the reformation of the prisoner, by inculcating the observance of duty and obedience, as well as habits of industry.

Taking into consideration the paramount importance of this part of Gaol management, and the fact that the county authorities have signally failed in organizing a system, it becomes a question for the serious consideration of the Legislature, whether it is not time to entertain the advisability of establishing three

PROVINCIAL PRISONS.

to be located respectively in the *West*, *Centre* and *East* of the Province, to be under the control of the Government, and for the reception of all prisoners sentenced by the several Courts for periods exceeding sixty days, and up to two years; special provision to be made for that class of prisoners who are continually before our Police Courts on charges of drunkenness, disorderly conduct, &c., in order that after the third conviction they may be sent to one of the Provincial Prisons, in place of a Common Gaol.

These Prisons should be eminently "hard labor" institutions, every prisoner being employed in some mechanical or industrial employment, the religious and secular instruction of the prisoners being also properly provided for.

With a view to making these institutions as self-sustaining as possible, and for the purpose of finding a ready market for the products of the labor of the prisoners, it is desirable that they should be placed in the vicinity of cities.

The undersigned is strongly of opinion that, with efficient management, the maintenance of this class of Prisons, would entail little, if any, extra expenditure of public funds, and would effectually remedy the very serious and increasing evil now in existence.

DIETARY.

By referring to the annexed table of statistical information, under the heading of "cost of daily rations per head," it will be observed that the figures vary very much, in some instances as low as six cents, and from that up to 25 cents. This arises from the fact that some County councils will persist in continuing the objectionable system of giving the gaoler the contract of dieting the prisoners, at rates far in advance of what it can be done for, in compliance with the regulations in that respect; in some instances, the plea is offered that no one can be found who is willing to enter into a contract for the Gaol supplies, which is no excuse whatever, inasmuch as all that is required in cases of that kind is, that the Council may instruct the keeper of the Gaol to purchase what is

required, and charge the same to the County at *cost price*. Municipal authorities, as a general thing, are very zealous in keeping down county expenditure, but why some of them should appropriate money to keep so gross an evil in existence, when the dieting can be *properly* done for *half the money*, it is difficult to understand.

Leaving the matter of extra expenditure out of the question, it is very desirable that the keeper of the Gaol should have no pecuniary interest in the prisoners' rations, and that a uniform system should be adopted and carried into effect in every Gaol in the Province.

Besides this, there are still many irregularities in the working of the dieting system in many of our Gaols, the most serious of which is the indiscriminate serving out of the same quantity and quality of food to all classes of male and female prisoners.

Believing that this part of Prison administration should be utilized for the punishment of prisoners, not so much for the offence for which they were convicted, as for refractory conduct while in Gaol, the mode referred to cannot be too strongly condemned.

The evils arising out of this indiscriminate feeding are very observable in Gaols situated in cities and large towns, where a large proportion of the inmates are of the vagrant and disorderly class, who are too apt to look upon the Gaol as a *municipal boarding house* where they can be fed and lodged at the public expense.

FEMALE PRISONERS.

The undersigned cannot close his remarks on the Common Gaols, without placing on record his views in regard to the utter inadequacy of our present Prison organization, either as a means of punishment, or with a view to the reformation of this large and increasing portion of the inmates of our gaols. The statistical tables herewith furnished, shew that of the 8,015 commitments for the fifteen months ending 1st Oct. 2,530 were females; of this number it is quite safe to say that three-fourths were prostitutes of all ages, and representing every stage of prostitution, infamy and shame. By far the most painful fact revealed by these statistics being, that 340 of them were girls under sixteen years of age.

It is, beyond dispute, that the incarceration in our common Gaols of this class of unfortunates, for short periods, without any proper means of employment or instruction is attended with little or no good to the offender, and very often, through contamination, the evil sought to be remedied is aggravated and increased. That it is no manner of punishment, is very evident from a perusal of the gaol records, by which we find that a large proportion of females of this class are committed to Gaol from twenty to twenty-five times before they attain the age of twenty-five.

All experience proves that this is a difficult question to deal with, and that the duty of providing means to keep the evil in check must necessarily devolve, to a great extent, upon society; but it is clearly the province of Government to assist society by the administration of appropriate and well devised laws, as well as by providing suitable institutions for the reception of the younger portion of this unfortunate class. In this respect there appears to be great necessity for the establishment of a

REFORMATORY FOR GIRLS,

to partake somewhat of the character of a Magdalen Asylum. To this Institution should be sent all girls under sixteen years of age, who have been convicted of crime, or of that class of offences, for which they are now sent to the Common Gaol. Through this means many of them may be saved from a life of crime and shame, and become useful and good members of society.

For this class of people, more advanced in years, the alteration of the law so as to admit of their being sent to the common Gaol for long periods, with proper means of employment, would be a great improvement. In this way they would not only acquire habits of industry—which would enable them to obtain an honest living when they left the Gaol—but they would also be severed from evil associations and vice, which are a continual hindrance and bar to a better life.

SEPARATE REPORTS

ON THE

STATE AND MANAGEMENT

OF THE

COMMON GAOLS.

BELLEVILLE GAOL,

County of Hastings.

I visited this Gaol on the 3rd of July. Found 12 prisoners, eight males and four females. Of the latter one was insane.

I found the Gaol and all its surroundings in a very filthy condition: the floors and wood-work covered with dirt, the yards over grown with weeds, and covered with wood chips and loose stones. The water-closet in the north yard,—which is immediately under the windows of the male day room, and in close proximity to the windows of the county offices in the Court House was in a state of filth that would warrant a health officer in bringing the gaol officials before the Police Magistrate. In fact the whole domestic management of the Gaol was disgraceful.

I was the more surprised at this state of things on discovering, by an examination of the Gaol Registrar, that six of the eight male prisoners were sentenced with hard labor. In the absence of labor of a profitable character, one would naturally expect to find the Gaol and yards kept thoroughly clean and orderly, and by this means assist in carrying out the actual sentence of the Court, and at the same time accomplish the observance of Prison rules in respect to cleanliness.

In addition to this state of things, there were other irregularities of a serious character. Although there is plenty of room in the new Gaol for the reception and classification of prisoners, I found six confined in the old Gaol, the cells of which are partly underground and very damp. The only reason that I could discover for putting them there, being that it was more convenient for the Gaol officials, for the same reason the male prisoners in the new Gaol were all put in one corridor—tried and untried, boys and men, without the slightest attempt at separation, although three corridors of the new Gaol, containing twenty-four cells, were unoccupied.

Under this kind of administration, I was not surprised to find that escapes were the order of the day, four having taken place within a month, all through gross carelessness. I called the attention of the county council to the necessity of raising the yard wall at the point where it connects with the Court House, windows being placed near the angle, which very much endangers the safe-keeping of prisoners.

BRAMPTON GAOL.

County of Peel.

This is a new Gaol, built during 1865 and 1866. The building is strong and substantial, and well arranged.

At the date of my visit the 7th July, there were only three prisoners under confinement.

Every part of it was very clean and orderly, and Gaol rules and regulations very well attended to.

BERLIN GAOL.

County of Waterloo.

I visited this Gaol on the 9th July, there were then thirteen prisoners, eleven males and two females in prison. One of the males was a dangerous lunatic. This number of prisoners is somewhat above the average. The gaol was clean and orderly throughout. I called the attention of the county council to the necessity of furnishing a strong bathing tub for the use of the prisoners, it being impossible to have personal cleanliness without it.

Two of the prisoners were engaged in making baskets, this, with other kinds of light work, and cutting wood is the only means of employing prisoners

BRANTFORD GAOL.

County of Brant.

I visited this Gaol on the 18th July—found twenty-eight prisoners (28) under confinement, twenty-three males and five females, of the former one was a very dangerous and noisy lunatic whose care was attended with a great deal of trouble.

The interior of the gaol was very clean and orderly.

The yards were in a very untidy state, and one of them (the working yard,) used for other than prison purposes, having stables, barns and sheds erected in it, the wall surrounding this yard is much too low, and is rendered quite insecure and worthless by these buildings being placed against it.

I called the attention of the county authorities to this matter, as well as to the bad condition of the water-pipes and pumps in the Gaol.

No means of employing prisoners is provided, except cutting the wood and keeping the Gaol clean.

BROCKVILLE GAOL.

County of Leeds and Grenville.

Accompanied by the Grand Jury I visited this Gaol on the 2nd October. The prison and yards were found to be in a fair state of cleanliness and order.

There were ten prisoners under confinement. Eight males and two females.

I called the attention of the county council to the following defects in construction, with a view to having them remedied.

1st. The very imperfect ventilation of the cells, on account of the cell windows being very small, and placed so high up from the floor.

2nd. The necessity of replacing the Common pad-locks, now in use by the fixed mortise lock.

3rd. The very objectionable kind of stoves in use, which are long enough to take a stick of cordwood without sawing, which not only leads to a greater expenditure for fuel, but does away with a means of labour, which it is very desirable the prisoners should be employed at, particularly as no other means of labor is provided.

BARRIE GAOL.

County of Simcoe.

I visited this Gaol on the 10th August. There were eighteen prisoners under confinement. Fourteen males and four females—of this number no less than four were insane.

The Gaol was very clean and orderly throughout.

Although the position of this prison, from the nature of the ground, easily admits of cheap and thorough drainage—it has not been taken advantage of. I brought this matter under the notice of the county authorities; also the insufficient supply of water for Gaol purposes.

No hard labor provided for prisoners sentenced in this manner.

COBOURG GAOL.

United Counties of Northumberland and Durham.

I inspected this Gaol on the 27th August, on which occasion there were twenty-five prisoners under confinement. Eighteen males and seven females. Three of the females committed as insane.

The untried prisoners are kept separate from the sentenced, which is the only classification the accommodation of the Gaol will admit of.

The cell floors in the south male ward were in a very dilapidated state, and required to be renewed.

The very objectionable practice of having the water-closets within the prison is still in existence in this Gaol, some of which are in a bad state. I strongly recommended their immediate removal to the yards.

There is no dark or punishment cell for females. I reminded the authorities that the very existence of a cell of this kind in a prison has a wholesome effect in keeping refractory females in order. From the Gaoler's statement it would appear that there are a good many of this troublesome class of prisoners here.

I also called the attention of the county authorities to the necessity of providing accommodation for the Turnkey within the prison, and in close proximity to the prisoners; that officer having now to lodge outside the prison walls.

The Gaoler informs me that he has great trouble in preventing the male and female prisoners from communicating with each other. In my memorandum I advised the authorities to erect a new building for females, and use the present Gaol entirely for the confinement of male prisoners, by this means a better and more thorough classification could be effected. That more accommodation is required there can be no doubt, and this mode of obtaining it would be the best.

A case of typhoid fever made its appearance a few days before my visit to the Gaol, the patient being a female. She was at once removed to another part of the building, which had the effect of confining the fever to that case, and from which she recovered.

CHATHAM.

County of Kent.

I visited this Gaol on the 15th of July. It was then being whitewashed, and was somewhat in disorder.

There were eighteen prisoners under confinement. Like many of the prisons in this province, there are too many sharp angles in the walls surrounding the Gaol yards, which very often is taken advantage of by prisoners to effect their escape.

No prison clothing is furnished for the use of prisoners. I reminded the municipal authorities of this infraction of gaol rules.

I also brought under their notice the desirability of complying with the dietary regulations, inasmuch as the mode in existence is not only contrary to the wishes of the Government, but is attended with greater expense.

CORNWALL GAOL.

United Counties of Stormont, Dundas and Glengarry.

I visited this gaol on the 8th October, and found it as clean as it is possible to make it, in its present dilapidated condition.

The defects of construction and arrangement in this prison, are *so numerous* that it is quite impossible to particularize them; *So apparent* that any one and every one can see them *except* the county authorities, and *so serious* that it would, in my opinion, be an utter waste of money to attempt to remedy the existing defects by alterations and repairs to the present building.

I urgently requested the county authorities to take steps at once for the erection of a new Gaol.

From the very defective interior arrangements of this Gaol it is out of the question to expect the observance of the prescribed rules and regulations, or any attempt at a clas-

sification of prisoners. Under these circumstances I was not surprised to find an unfortunate woman, who had been sent to Gaol by the Court of Chancery for contempt, in the same room with an insane woman.

It is quite unnecessary to say that the Gaol is utterly unsafe and worthless, for the safe keeping of prisoners. If an important prisoner is under confinement, it becomes necessary to have a constant guard over him.

In accordance with the provisions of the Prison and Asylum Inspectors Act, I forwarded a copy of my report on the state of the gaol to the Warden of the United Counties—stating that I would be glad to meet a committee from the Council at any time, with a view to coming to some decision in regard to the plans and specifications for a new gaol.

At the time of my visit there were seven prisoners under confinement. Four males and three females. Four of this number having been committed as insane.

GODERICH GAOL.

County of Huron.

This Jail was inspected on the 8th July. It was in excellent order and contained ten prisoners eight males and two females.

The safe-keeping of prisoners is considerably endangered by the sharp angles inside the prison yards, as well as by having cell windows near the wall, affording an excellent means of escape, which the Gaoler informs me has been taken advantage of. These defects can only be remedied by closing up the windows, and rounding the angles.

I called the attention of the county council to the miserable kind of locks in use in this gaol, and requested them to have them replaced by locks mortised into the stone work

GUELPH GAOL.

County of Wellington.

The interior construction and arrangements of this Gaol are somewhat sacrificed to its outside appearance, and the excellent impression formed from a view of the exterior is not sustained by a close inspection of the interior; its great defect being the irregular and disconnected style, which renders a proper watch on the prisoners a very difficult matter, and which is certainly not improved by having the Turnkeys' quarters so far removed from the male prisoners—there being really no guard upon them during night.

The partitions of this prison are constructed of square oak timber, the seams of which have opened a great deal from the settling of the building. However safe this style of partition may be, it is very objectionable on account of its being filled with vermin.

There are no division walls in the yards to enable a classification of prisoners to be made. The cell windows overlook the yard walls, which leads to communications with the prisoners from outside; and very much endangers their safe keeping.

At the date of my visit there were twenty-two prisoners under confinement. Seventeen males and five females.

No means of hard labour provided by the authorities.

HAMILTON GAOL.

County of Wentworth.

I visited this Gaol on the 20th August, on which occasion there were fifty-nine (59) prisoners under confinement. This number, entirely exceeds the capacity of the gaol, and over-crowds it so much, that it is a matter of surprise to me, how the prison officials succeed in finding accommodation for thirty more, as they frequently have to do.

In the female corridor, I found *thirty* (30) female prisoners occupying ten cells. The dimensions of each cell being seven feet by nine feet. This state of things would be bad enough in a well constructed and properly ventilated prison; but in this case, the grievance is greatly increased by the most defective construction, and the entire absence of any means of ventilation; the cell doors being made of wood, and the windows, which are

placed about eight feet from the floors, besides being very small, are barred with flat iron, so that little space is left for air to enter. and this space, contracted enough in all conscience, is still farther obstructed by the fixture of iron plates in front of the windows, so as to prevent the prisoners having communication with parties outside the prison walls.

The existence of this state of things, is surely enough to condemn the Hamilton Gaol, but if any further evidence is required, it is only necessary to add that every one of these confined and badly ventilated cells, contains a water-closet in constant use.

The surroundings of the gaol are quite as bad as the interior, a yard quite insufficient for the wants of so many prisoners, without proper divisions for separation, and surrounded by a plank-fence, which is utterly inadequate for the safe-keeping of prisoners, and the whole in close proximity to houses outside the prison walls, which overlook the Gaol premises.

Under all these adverse circumstances, I was gratified to find that the prison officials did all in their power to keep the gaol as clean and orderly as possible, and that by keeping up a course of white-washing every week, and a liberal use of chloride of lime, the prison was as sweet as could be expected, with the thermometer at 95°.

The evils of improper classification, or rather of no classification at all, are very apparent in this gaol, and too much credit cannot be awarded to the excellent matron for keeping the female prisoners constantly employed in knitting, sewing, and keeping the place clean—which, to a certain extent, counteracts the evils of contamination.

In the case of the male prisoners it is very different, no means of employment being furnished, and the yard so confined and insecure, all classes of prisoners are indiscriminately brought, and constantly kept together without any attempt at classification.

In accordance with the Prison and Asylum Inspectors Act, I forwarded a copy of my Report on the gaol to the warden of the county.

KINGSTON.

County of Frontenac.

I visited this gaol on the 1st October, and found the interior thoroughly clean and orderly. The yards were not as tidy as could be desired.

There were nineteen (19) prisoners under confinement, of this number no less than fifteen were females, most of whom were prostitutes and vagrants.

No employment is provided for this class of prisoners, except keeping the gaol clean, in fact, it is no means of punishment to send these people to the common Gaol, for short periods without providing employment for them.

I called the attention of the authorities to the necessity of furnishing prison clothing.

The yard walls have been completed, and this gaol is now a safe and substantial one. No "hard labor" is provided for the male prisoners.

L'ORIGNAL.

United Counties of Prescott and Russell.

I visited this gaol on the 7th October, and found it very clean and orderly.

I was gratified to find no prisoners in it.

I brought under the notice of the county council the infraction of the dietary regulations, by which the gaoler furnishes the rations to the prisoners, at a greater expense than there is any necessity for, also the necessity of furnishing the prescribed prison furniture for the cells.

LONDON GAOL.

County of Middlesex.

I visited this gaol on the 16th July, and found every part of it thoroughly clean and in excellent order.

There were forty-nine (49) prisoners in the gaol, which on examination I found to be about the average, this number very much over-crowds the gaol, and hinders to a very

serious extent that due regard to prison discipline, as well as a proper attention to rules and regulations, the strict observance of which is of paramount importance in prisons located in cities and populous localities, where a great number of the prisoners are of that vagrant class who are too apt to look upon prison life in the light of a public boarding house.

The very limited accommodation of the Gaol was still further curtailed by the occupation of a whole ward, composed of six cells, by a single lunatic.

It is very desirable that some place within the Gaol should be fitted up for the reception of this unfortunate class, pending their removal to the Asylum.

I found that a contract was being entered into (subject to approval) for a supply of water for general purposes, and which was to be brought from the River Thames.

After a careful examination of the source from which it was proposed to take it from, I strongly recommended the county authorities to exhaust every other means in endeavouring to obtain a supply of pure water before entering upon the proposed plan, and called their attention to the fact that a large quantity of excellent soft water might be obtained from the roof which is now completely lost for the want of pipes and tanks.

During my stay in the city a person called (who, I have since learned is quite responsible) upon me to say that he was prepared to furnish a full supply of spring water at the same rate as the council proposed to give for Thames water, which offer I asked the Sheriff to bring under the notice of the Council.

The County Authorities should begin to consider the best mode of making additions to this Gaol, so as to give the necessary accommodation required, the want of which is beginning to be felt very much.

No means of hard labor is provided so that the male prisoners are utterly idle.

NAPANEE GAOL.

United Counties of Lennox and Addington.

I visited this gaol on the 6th July, every part of it was extremely clean and well ordered.

There were five prisoners under confinement, four males and one female.

No prison clothing or bathing tub is provided for the use of prisoners. I reminded the county authorities, that without these important auxiliaries it is quite impossible to observe personal cleanliness.

Some of the prisoners were engaged in picking oakum.

I called the attention of the county council to the damage that was being done to the yard walls, from want of pointing.

OTTAWA GAOL.

County of Carleton.

I visited this gaol on the 9th October, and found it in a fair state of cleanliness with a general desire on the part of the Gaol officials to observe prison rules and regulations.

Owing to the incarceration of ten state prisoners in this gaol, nine of whom are waiting trial, and one (P. J. Whelan) under sentence of death for the murder of Thomas D'Arcy McGee, extreme precautionary measures have been inaugurated, by the employment of night and day watches, to guard against any attempt at escape, as well as to prevent all communication with the prisoners from without, that would have a tendency, in any way to imperil their safe keeping.

In addition to these measures on the part of the Gaol authorities, the Commandant of the Ottawa garrison, has provided a military guard, which constantly patrol the streets surrounding the gaol, and its immediate vicinity.

I carefully examined into the organization and mode of conducting these precautionary measures on the part of the prison officials, and I have no doubt that, with the assistance of the military authorities, and a daily inspection of every part of the prison by the keeper of the Gaol (which I instructed him to make) that the safe keeping of the prisoners will be ensured.

I was informed that the officer in command of the garrison contemplated removing the military guard ; if this unfortunately should be carried into effect, I cannot too strongly press upon the Government the urgency of having it replaced by one of a similar character.

I brought under the notice of the county authorities the necessity of removing the steam boiler from its present position in the basement of the building, which, not only from its position, but from the fact that it is attended by the prisoners, who know little or nothing in regard to its management, is attended with great danger and risk.

I also reminded them of the infraction of the dietary rules, although the prisoners rations are not in the hands of the Gaolers, a course equally objectionable is in existence.

PICTON GAOL.

County of Prince Edward.

I visited this Gaol on the 4th July. At that time the building was not completed, although far advanced. The work was well done, and of a very substantial character.

I called the attention of the county authorities to the following points :—

- 1st. The delay in having the Gaol completed.
- 2nd. The necessity of providing a bathing tub for the use of the prisoners, which, from the proximity of the cistern, could be done with very little expense.
- 3rd. Compliance with Rule 16, in regard to providing prison clothing.

PERTH GAOL.

County of Lanark.

I visited this Gaol on the 30th October, and found every part of it in a thorough state of cleanliness. There were then nine prisoners in Gaol. Eight males and one female. The female being insane.

The diet for the prisoners is furnished by the Gaoler. The Sheriff informed me that no one is willing to contract for the supplies.

I reminded the County council that all that is necessary, in a case of that kind, is to instruct the Gaoler to purchase the food, and charge the same to the county at cost price, which would result in a considerable saving.

PEMBROKE GAOL.

County of Renfrew.

I visited this Gaol on the 5th October. The whole in excellent order, and particularly clean.

Found six prisoners confined—five males and one female. The female and one male prisoner committed as insane.

The dietary rules are not carried into effect in this Gaol, and the same reason is assigned for the infraction as given at Perth.

I reminded the authorities of the proper way of overcoming the difficulty.

ST. CATHARINES GAOL.

County of Lincoln.

This is an excellent Gaol in all respects. The construction is substantial, secure and complete. The observance of Gaol discipline and the prescribed rules is all that could be desired, and reflects great credit on the prison officials.

At the date of my visit, the 1st August, there were seventeen prisoners under confinement. Of this number no less than seven were insane people—some of them fit subjects for Rockwood Asylum. In fact the Gaol had as much the appearance of a Lunatic Asylum as a prison, and entailed a great deal of extra trouble and anxiety on the Gaoler and matron.

SARNIA.

County of Lambton.

This Gaol was visited by me on the 10th July. There were then eight prisoners under confinement—six males and two females.

This is a very strong Gaol and well managed, but it is very much to be regretted that the county authorities did not build on a larger scale, as the old Gaol has still to be used for females.

The prison rations are supplied by the keeper of the gaol at a higher rate than there is any necessity for.

The Gaol was very clean and orderly.

SIMCOE GAOL.

County of Norfolk.

I visited this Gaol on the 17th July. Number of prisoners thirteen, eleven males and two females. One of the females being insane.

The Gaol was in a thoroughly clean state. The dieting in conformity with the regulations in that respect.

Two prisoners made their escape on the 4th July, the facts connected with which were duly reported to the Government.

STRATFORD GAOL.

County of Perth.

This is one of the most insecure Gaols in the Province. So much so, that it is a matter of surprise that the county authorities have so long delayed taking steps that are actually necessary for the safe-keeping of prisoners.

The attention of the county authorities have been called time after time, both by the late Board of Prison Inspectors, and by nearly every Grand Jury who have visited the Gaol, to the utter insecurity and worthlessness of the present building for prison purposes.

After a thorough examination of it, both as regards construction and interior arrangements, I can come to no other conclusion than that it would be utterly useless, either on the grounds of economy, or with a view to remedying its many defects, to attempt making alterations or additions to the present building.

Under these circumstances, I urgently requested the county authorities to take immediate steps for the erection of a new Gaol.

At the time of my visit—the 9th July—there were nine prisoners, four males and five females. Two of this number being idiots.

The Gaol was thoroughly clean and orderly.

ST. THOMAS GAOL.

County of Elgin.

I visited this Gaol on the 16th July, and found it in a fair state of cleanliness and order. There were then only three prisoners (males) under confinement.

This is one of the unimproved Gaols of the Province. I called the attention of the county authorities to the following defects of construction and management, which in fact, constitutes nearly the whole organization of a Gaol.

1st. The absence of a wall surrounding the yards and building.

2nd. Its defective interior construction, and the inferior description of Lock in use.

3rd. The want of accommodation for the turnkey, that officer having to lodge away from the gaol.

4th. The objectionable mode of having the water closets within the prison—in this case—from the want of yard walls.

5th. The infraction of the dietary regulations, by which the gaoler gets twenty-five

(25c) per day for rations for each prisoner, when the same could be done as well or better for half the money.

6th. The irregularities in keeping the gaol register.

SANDWICH GAOL.

County of Essex.

This gaol was visited by me on two occasions, the 15th July and 29th July.

From its position on the frontier, and the liability at all times to have prisoners within its walls, of a desperate character, this gaol should be one of the most substantial and secure in the Province, but unfortunately it is the most worthless and defective.

I did not find it as clean and orderly as could be desired, although it must be admitted there is a reasonable excuse for this state of things, in the present delapidated condition of the floors, water closets, drains, &c.

The Gaol simply consists of two corridors—part of the north ward being portioned off for females—into which prisoners are indiscriminately huddled, without the slightest regard to separation.

This kind of Gaol management, consequent upon defective construction, and insufficient accommodation is most detrimental to the observance of rules and regulations, and prison discipline, although the officials, who thoroughly understand their duties, do all in their power to discharge them properly.

The cell doors are secured with common padlocks which can be picked with the greatest ease. Prisoners locked up in the cells at night have frequently been found in the corridors in the morning. The corridor locks are of the same description and within reach of the prisoners, so that they can be easily tampered with.

The corridor windows are very large and much exposed, and a continual temptation to prisoners to try and effect their escape. In fact the safe-keeping of prisoners, in this miserable substitute for a gaol, is a constant source of anxiety and risk to the Gaol officials.

There is really no yard for hard labor or for airing the prisoners, the space outside the prison walls being only enclosed by a common board fence.

On the occasion of my last visit I met the Warden of the county; accompanied by the Sheriff, and that gentleman, a thorough inspection of every part of the Gaol was made, and all its defects pointed out. I suggested several modes of alterations and additions, which he promised to bring under the notice of the council at its first meeting.

The Sheriff reported, at this time, an attempt having been made, on the night previous, on the part of eight prisoners to break Gaol, by cutting the bars on the corridor window, which would have been successful but for the vigilance of the Gaoler.

At the date of my first visit there were twenty-four prisoners under confinement—four of the male prisoners being boys under sixteen years of age. This number entirely exceeds the accommodation of the Gaol, there being only sixteen cells.

SAULT STE. MARIE.

District of Algoma.

I visited the temporary Gaol, or Lock-up, for this District, on the 13th September, on which occasion there was only one prisoner confined in it.

It is quite unnecessary to point out the insecure state of the two small buildings at present used for the purposes of a Gaol, as they are soon to be abandoned.

I made an inspection of the new Gaol, which (together with the Court House and County Offices) is nearly ready for occupation, but which the contractor refuses to deliver to the authorities until a settlement is effected for extra work, said to have been performed.

It is very desirable that this difficulty should be arranged in some way or another as soon as possible, as the District is now virtually without a Gaol.

I brought under the notice of the Government the following defects in this Prison, which will require to be remedied before it can be made safe or healthy:—

1st. The construction of proper drains, the present mode of drainage being quite in-

sufficient to carry off the water, on account of the Gaol being built near a swamp. A deep open drain in the rear, connecting with the main drain in the front, would answer the purpose, provided the latter drain was deepened and extended to the river. The floors and walls in the basement are already being injured with water.

2nd. The cell doors and locks are very insecure, the former can be lifted off the fastening in the wall on account of their extension beyond the fixed grating above, and the latter are quite exposed and liable to be tampered with by the prisoners, and should be covered with a plate.

3rd. The fence surrounding the yards must be strengthened at the base, as it is now, prisoners could effect their escape by burrowing under it. The cross timbers of the division fences are also exposed, which could be used as a ladder. With these exceptions, this is a good substantial Gaol.

WELLAND GAOL.

County of Welland.

This gaol was visited on the 1st August. It was not as clean and orderly as could be desired, caused to a great extent by faulty construction, bad ventilation, and the defective state of the water closets. No bathing tub or prison clothing furnished for the use of prisoners, in consequence of which personal cleanliness is very much neglected.

It is necessary that this Gaol should be thoroughly altered and repaired, the west wing being in an utter state of delapidation, so much so, that it is not only unsafe to put prisoners in it, but very dangerous, on account of the foundations of the interior walls having been undermined with a view to ventilation.

A contract was entered into last season for the necessary repairs and alterations, but for reasons unknown to me it was cancelled.

Believing that it is the intention of the County authorities to proceed with the work at an early day, a detailed review of the numerous defects need not be entered into.

WOODSTOCK GAOL.

County of Oxford.

I visited this prison 17th July, found it thoroughly clean and in excellent order. There were at that time twelve prisoners under confinement—seven males and five females.

With a view to making this Gaol safe in all respects, I recommended the closing up of the door leading from the main entrance into the main yard, as it is not required; also the strengthening of the cell windows, on the east side, in the same manner as has already been done in the west.

I reminded the authorities of the risk attending the use of the present Gaol kitchen, it being placed at a considerable distance from the Gaol proper, and the use of it attended with inconvenience.

WHITBY.

County of Ontario.

I visited this Gaol on the 26th August, and found every part of it in a perfect state of cleanliness and good order. There were then twelve prisoners under confinement—nine males and three females. Of this number three were lunatics.

The prescribed rules and regulations are strictly complied with.

TORONTO GAOL.

County of York.

I visited this gaol on the 19th August, and again on the 15th October. On both of these occasions every part of it was thoroughly clean, and in good order.

On the 19th August there were one hundred and twenty prisoners under confine-

ment. Sixty-one males, and sixty females, ten of this number having been committed as insane.

A number of the male prisoners were engaged in filling in the marsh on the banks of the Don, within the limits of Gaol property. The Governor informed me that as this work progresses, the health of the prison improves, and that fever and ague, which was very prevalent some time ago, has now quite disappeared.

The female prisoners are kept partially employed in sewing, knitting, and keeping their portion of the Gaol clean.

The dietary regulations are not strictly carried out.

Taking into consideration that this is the most important prison in the Province and subject at all times to have prisoners within its walls charged with the most serious offences, it is very essential that it should be of a most substantial and secure character, not only for the safe-keeping of prisoners from within—but also to prevent any tampering with its inmate from without, under these circumstances, it is very desirable that the whole building should be surrounded by a strong wall. At present a considerable portion of the prison is completely exposed for the want of this.

I called the attention of the municipal authorities to the great danger attending the present position of the steam-boiler in the basement of the building and recommended that immediate steps be taken to remove it to a place entirely separate from the main building.

LUNATIC ASYLUMS.

PROVINCIAL LUNATIC ASYLUM, TORONTO,

And University Branch.

The undersigned made a thorough inspection of this Institution on the 29th July, and since that date frequent visits have been paid to it.

He has great pleasure in confirming the many expressions of approval placed on record by the late Board of Inspectors, as to the excellent management of this large and important institution, under the able administration of Dr. Workman, whose name is so intimately identified with its history and progress, and who has contributed so much to the comfort and cure of the unfortunate class of people placed under his care,

It is difficult to form an adequate conception of the volume of work, devolving upon the superintendent of an institution of this character and magnitude, the most of which is attended with a great deal of anxiety. The present satisfactory state of this asylum is conclusive evidence of the honest and conscientious manner in which Dr. Workman has discharged his duties.

The capacity of the institution has been strained to the utmost for the reception of patients, but the space is utterly inadequate to accommodate more than a fraction of the overcrowding applications for admission—there being at the present time 364 names on the application book, and as Dr. Workman says, "There are hundreds more on whose behalf, for various reasons, application has never been made."

Under these painful circumstances it is gratifying to know that the extensive additions now in progress to the institution are being pushed forward as rapidly as possible. The ground and first stories of the east wing were completed in June; the third and fourth stories are now nearly completed and roofed, and will be entirely under cover early in November.

It is intended to proceed with the carpenter work during the winter, so that the plastering may be finished early in the season, and the whole of the east wing will be ready for occupation by the end of November, 1869.

The foundations and brick work of the ground story to the window sills, of the west wing, were constructed in June, and the contractors are now building the remaining portion of the brick work of the first story, which it is intended will be completed this season.

It is expected that the brick work of the west wing will be completed and roofed in by September, 1869, and as much of the plastering as possible proceeded with during that year, the carpenter work and the remaining portion of the plastering will be finished early in 1870, so that the whole may be ready for occupation in 1870.

There will be 72 separate apartments in each wing, 12 feet by 6 feet each, and one associated dormitory, which will hold about 18 for each wing.

When completed it is estimated that the two wings and the hospitals, will give accommodation for 230 to 240 patients, there being now 64 patients in the hospitals—which will give a total lodgment for 650 to 700 patients in this institution.

The several points in connection with insanity, discussed in the Medical Superintendants report herewith annexed, are of deep interest, particularly at the present time, when the question of more extended asylum accommodation should engage the attention of every one.

MALDEN ASYLUM.

Amherstburgh.

This Asylum was visited by the undersigned, on the 20th July, for the purpose of installing Dr. Landor as Medical Superintendent in place of Dr. Fisher resigned.

Owing to the existence of many irregularities in the management of this Institution, a thorough examination into the mode of conducting its affairs became necessary, with a view to correcting them.

Although the late Superintendent and his subordinates laboured under the serious difficulty of having most defective and ill-arranged buildings for the purposes of a Lunatic Asylum, the interior construction of which prevents to a great degree the observance of many wholesome regulations, necessary for the good government of an Institution of this kind. Still, this cannot be accepted in excuse for the serious mismanagement and disorder that prevailed in nearly every department of the Asylum.

Part of the buildings, and nearly all the fixtures, were in a very dilapidated state, and allowed in many instances to get out of repair through utter neglect. The engine was so infirm and ricketty as to be barely able to pump a sufficient quantity of water for the daily requirements of the Asylum, and would have been totally useless in providing a sufficient volume for the fire engine, in the event of a fire breaking out on the premises, on which source dependence was placed.

The water pipes leading to the different wards were choked up and completely useless. In consequence of this carelessness the urinals and water closets were in a very offensive state, and a stench pervaded the day rooms which was quite insufferable during warm weather.

The bakery and laundry, which should be the most tidy domestic departments in the Asylum, were as filthy and disorderly as they well could be, and gave evidence not only of mismanagement, but of great waste. Only two bathing-tubs were furnished for the use of 240 patients, in fact this important auxilliary to cleanliness was almost entirely ignored in the female department; the bathing of 125 patients only occupying two hours once a week, or not quite a minute to each. The attendants in many instances paid little or no attention to the personal cleanliness of the patients, or to the condition of the day rooms and dormitories.

In addition to these defects and irregularities in the domestic arrangements, there was a great lack of discipline, and an utter disregard on the part of some of the servants of the ordinary regulations in force in well regulated Asylums. The time for attendance on duty, as well as the hour to be in the Asylum at night seemed to be left to their own discretion. In fact there was an entire want of system in the whole management of the Institution.

As this state of things required a prompt remedy, the attendants and servants were called together, and informed by Dr. Landor, in regard to their duty, what would be expected of them in the future, and the consequences of disobedience.

Steps were at once taken, not only with a view to economy in domestic administration, but for the proper observance of ordinary sanitary regulations, so necessary in an institution of this kind, to put the engine, bake-house, water pipes, &c., in a good state of repair, and instructions were given, as to the responsibility that rested on the head of each department, for the proper care of the property intrusted to them.

Rules for the guidance of servants and attendants were sanctioned, printed, and posted in different parts of the institution.

In marked contrast to the management of the Asylum proper, the farm was in excellent order, with good prospects for a large and profitable crop.

The mode of obtaining the most of the supplies for the asylum was very objectionable, a great many of the purchases being made at the highest retail prices, and in many instances the articles furnished being of poor quality—particularly in the class of goods bought for patients' wearing apparel, which had the appearance of having been purchased for the purpose of assisting merchants to get rid of a lot of worthless and antiquated dry goods, at a high price.

A case of this trash having just come into store, was ordered to be returned.

On the occasion of a more recent visit, a very apparent improvement was observable in the administration of the affairs of this institution, and great credit is due to Dr. Landor, for having accomplished so many reforms in so short a period.

On account of the want of space and consequent over-crowding, anything at all approaching a proper classification of the inmates cannot be effected, but the great evil of putting noisy and disorderly patients in the same wards and dormitories with the quiet and peaceable portion of the Asylum, was attended with such bad results, that a room in the outbuildings had to be fitted up for the reception of a few of the most refractory—since this has

been done, a great improvement has taken place; but it is clearly impossible to give proper attention and treatment to these unfortunate people, so long as they remain in the present defective, and ill-arranged building, which is totally unfit for the purposes for which it is used. The undersigned cannot close his remarks without expressing his conviction in regard to the great danger and risk incurred in confining 240 lunatics (some of whom quite helpless) in a frame building liable at any time to be destroyed by fire. The accounts were audited, and found correct.

ORILLIA ASYLUM.

Visited this asylum on the 5th August, and found every part of it in excellent order and in a thorough state of cleanliness.

The management of this institution is all that could be desired, the patients, as a general thing, are very quiet, orderly and *clean*, and have every appearance of being properly cared for.

The accounts were audited up to the above date and found to be correct.

The following repairs were ordered to be done.

1st. The plastering of several portions of the walls and ceiling.

2nd. Part of the dining-room floor and other places to be relaid.

The eave trough should be attached to the roof in some manner so as not to dam the water back, considerable damage having already been done to the walls and ceiling, which can be remedied at a moderate cost, if at once attended to.

4th. The extension of the main drain farther into the lake, it being now somewhat defective.

GENERAL REMARKS.

Under the heading in Gaol statistics of "Number of Insane now in Gaol," it will be observed that no less than 73 Lunatics were confined in the common Gaols of the Province on the 1st October. Doubtless, on examination, a few of this number will be found to be idiots and imbeciles of a harmless character who, however unsuitable a Gaol may be for their reception, are not proper subjects for a Lunatic Asylum.

The delay in proceeding with the wings of the Provincial Asylum, and the gradual, but *very apparent*, increase of insanity within the Province of Ontario, made it necessary to send this large number of insane people to the Common Gaols for safe keeping; but the moment the magnitude of the evil was reported to the Government, prompt steps were taken to provide a remedy for it.

Negotiations were opened with the Dominion Government, and arrangements concluded for the reception of 100 to 150 Lunatics in Rockwood Asylum, Kingston, it being distinctly understood with the authorities of that Institution, that all insane persons thus sent forward from the Province, would be kept entirely separate from the criminal portion of that Asylum.

Circulars were at once issued to the Sheriffs, enclosing the usual forms, which are required to be filled up before admission to the Asylum can be effected.

Under this arrangement a considerable number have already been forwarded to Rockwood Asylum, and it is expected that the whole number confined in the Gaols will be removed by the 10th of November.

The relief thus gained, although it cannot be overrated, must necessarily, be only of a temporary character, and will only afford a *breathing spell* to enable the Legislature to make permanent provision for this unfortunate portion of our population. With a view to this, the undersigned would most respectfully recommend:—

1st. The acquirement of Rockwood Asylum by the Province of Ontario, for the reception of all Lunatics from the Eastern section of the Province, with a capacity for the accommodation (as required) of 500 patients.

2nd. The establishment of an Asylum for the reception of the same number of patients in the most central and accessible part of the Western section of the Province.

3rd. The pushing forward without any delay of the additions to the Provincial Asylum which, when completed, will be capable of receiving from 650 to 700 patients.

REFORMATORY PRISON.

Penetanguishene.

The undersigned visited this institution on the 6th August, and remained until the 10th, during which time he made a thorough inspection of the buildings and premises, connected with the Reformatory, as well as a general examination into the mode of conducting its affairs.

The new buildings lately erected are of a most substantial character, and comprise what are known as the main building, dormitory and work shop.

The dormitory, is 110 feet long, 47 feet wide and 30 feet high, and contains three stories, or ranges of cells, 40 in each range, in all 120 cells. this building has been occupied since 1865. Every part of it was in excellent order. On passing through it at night when the boys were locked up, there was evidence of defective ventilation. The warden was recommended to depend more on window ventilation during the hot summer months.

The new work shop in the rear is built of wood, and was not quite completed.

The main building is not only very substantial in construction, but really elegant in appearance, the front of it being built of "faced boulders" taken from the farm; its dimensions are 143 feet long and 50 wide, and contains the chapels, school-rooms, offices, with the kitchen, dining room, and storerooms in the basement. This building in many respects is too large—with considerable waste of room. Taking into consideration that these buildings cost \$100,000, exclusive of the boys' labor valued at \$20,000, a much greater

portion of that amount should have been expended on workshop and dormitory accommodation, the want of which is a very serious drawback to the completeness of the establishment, and a great hindrance to discipline, and proper classification as well as the profitable employment of the youths confined in the institution.

As soon as the fence surrounding this building is completed it will be ready for occupation. With a view to this, the Warden was desired to push forward the work as fast as possible, as the present apartments in the old buildings, now used for school rooms and chapels, are quite unfit for these purposes, and a very great hindrance to the education of the inmates.

In addition to the old buildings, now in use for the purposes of this Reformatory, there are thirteen (13) tenements on the premises inhabited by the officers of the institution. Nine of which are old buildings, and four, erected since it came into the possession of the Reformatory.

In an institution of this character, established with a view to the reformation of juvenile criminals, it is of paramount importance that industrial education should go hand in hand with religious and secular training, so that when the lad leaves the Reformatory—it is to be hoped morally reformed—he may commence the world with a knowledge of some trade, and with habits of industry. Should this important point be neglected, the chances are that his moral reformation will only be of a transitory character, and that the juvenile offender will, in the course of time, come back upon the hands of the Government a hardened criminal, and a fit subject for the Penitentiary; for it must always be remembered that the inmates of a Reformatory are principally drawn from the most depraved haunts of vice, and who have been exposed from their infancy to every possible temptation, not only without the restraint of parents, but very often with their encouragement to commit crime. It is, therefore, *imperative* that they should be severed entirely from the associations and guilt of their childhood, in order that they may become useful and honest members of society in their manhood; and there can be no greater incentive to the accomplishment of this, than honest labour, and the acquirement of industrial habits.

For this purpose, trades have been established, but from the very confined accommodation the number of boys engaged in them have been somewhat limited. The labour of the carpenter and blacksmith shop, which are the best and most important trades, have been principally used in the erection of the new buildings.

The cooper shop has been conducted very successfully and with considerable profit to the institution, its manufactures meeting with a ready sale. This trade is capable of being extended very much, and might profitably employ about 40 boys.

The boot and shoe and tailor shops are restricted to the requirements of the institution.

One of the most serious drawbacks in the establishment of an institution of this kind so far from the trade centres, is the difficulty of finding a ready market for the product of the boys' labour. During the past this has been utilized in the erection of new buildings and in clearing the land, but now that this work is so far advanced it will become necessary, on taking possession of the new premises, to inaugurate some kind of industry that may be carried on with profit to the Institution and benefit to its inmates.

The employment of a limited number on the farm will always be required, and it may become necessary to increase the number, by a judicious choice on the part of the Warden; of those who are suited for this kind of employment, so that when they are discharged from the Institution they may be absorbed into the farming community. Certainly no life could be better suited for them, and through which, they would be farther removed from many temptations which must necessarily beset a mechanic living in cities or towns.

Heretofore, the greatest evil to contend against in the management of this institution in carrying out the purpose for which it is established was the inability to effect a proper

CLASSIFICATION OF THE INMATES.

That this is of the utmost importance will be admitted by every one, at all conversant with the workings of these institutions. For it cannot be denied that some youths who enter the gates of a Reformatory, although young in years, are too hardened in crime and iniquity, to ever hope for their reformation, and who are a constant source of contamination to others, this class of criminals, must necessarily be kept separate from

those for whom there is hope—and should, in fact, be removed altogether from the Reformatory.

Now that ample room is provided to enable the Warden to effect this classification, more happy results may be looked for.

The accounts of the institution were audited and found correct:

Statistical and Financial information, in connection with the Penetanguishene Reformatory, from the 1st July, 1867, to 1st October, 1868, being for a period of 15 months.

The undersigned will have to defer his report on General Hospitals, and the Deaf and Dumb Asylum in Hamilton ; as the time fixed by the statute for transmitting his report would not admit of an inspection of these institutions.

All of which is respectfully submitted.

JOHN W. LANGMUIR,
Inspector of Asylums, Prisons, &c.

APPENDIX TO REPORT

OF THE

INSPECTOR OF ASYLUMS, PRISONS, &c.,

FOR THE FIFTEEN MONTHS ENDING 1ST OCTOBER, 1868.

J. W. LANGMUIR, ESQ.,

Inspector of Asylums, &c., Ontario.

SIR,—In conformity with the instructions conveyed in your circular of 27th August I submit the following report of the Provincial Lunatic Asylum, for the last fifteen months, being the period extending from 1st July, 1867, to 1st October, 1868. It is, however, proper to state for the information of those who may have in hand my report for the year 1867, which was, in accordance with instructions from the Hon. Provincial Secretary, addressed to His Excellency the Lieutenant-Governor, that the statistics given in the present report involve a repetition of the figures for the latter half of 1867; but as the numbers for that portion of 1867, and those for the elapsed nine months of 1868, are given separately, misapprehension cannot arise.

The operations of the Asylum for the above fifteen months have been as follow.—

	Men.	Women.	Total.	TOTAL.
Number of patients in Asylum and University branch on 1st July, 1867.....	215	262	477
Admitted in second six months of 1867.....	32	39	71

Total reduction.....	54	51	105	
Total remaining first Oct., 1868.....	233	285	518

From the preceding figures it will be observed that in the fifteen months which have elapsed since 1st July, 1867, the admissions have been 146, of which 72 were of male and 74 of female patients. Those who look no further for conclusions than the figures of Asylum Statistics, would infer from the closeness of the above numbers that insanity is equally incident in the two sexes; and should it appear that over a long period the numbers of men and women admitted have been alike, or nearly so, they might regard their belief as sufficiently established.

This belief might chance to be correct, although based on defective premises. The admissions into any asylum are but the measure of its capacity of reception, and this may be very far short of the public requirements. When this capacity is equal in the male and female divisions, as is generally the case, the admissions of each sex may be equal, though the occurring cases may be widely unequal.

The applications recorded in the fifteen months, embraced in this report, have been 327. About 20 of this number may be deducted in equal proportions as to sex, for duplicate and relinquished applications; thus leaving 307 as the total. Of this number 161 were for women and 146 for men. Whether these figures fairly express the proportional incidence of insanity in the sexes in this Province, I am unable to say; but if they do they would indicate 10 cases in women to 9 in men. In the period elapsed since the opening of the Toronto Asylum, in 1841, the total admissions of men have been 1861, and of women only 1657, which would indicate about 10 cases of men to 9 of women. I have, however, in former reports drawn attention to the fact that in the first years of the institution, disparity between the numbers of male and female admissions arose, which I ascribed to the greater reluctance to send women to the asylum, and to their more easy control at home. At the end of the year 1848 the admissions of men had been 460, but of women only 276. Had these figures been held (as perhaps by some persons addicted to statistical philosophy they were) to indicate the proportional incidence of insanity in the sexes, it would have been shown that there were only 6 female lunatics to every 10 male lunatics. In the 16 years from the end of 1848 to the end of 1858 the admissions were 628 of males and 685 of females: figures shewing almost an equality of incidence.

From the end of 1858 to the present date, 1st October, 1868, the admissions of men have been 643 and of women 696. These last figures would shew that women are more liable to insanity than men; but here an important fact is to be noted. This asylum, with its present two branches, has, for a number of years past, had about 70 more beds for females than for males, and surely this circumstance, rather than larger incidence of insanity, may account for their larger admissions.

If the incidence of insanity in the sexes be equal, or nearly so, as for various reasons I am inclined to believe it is, should we not regard a predominance of applications in this Province for females as a very natural fact, for if this incidence has been equal since 1841 and the male admissions have exceeded the female to the extent of 144, this arrearage, on the part of women, should go to swell the present occurring applications on their behalf.

The fair conclusion, so far as can be inferred from asylum figures, appears to me to be that there is no sufficient evidence of inequality. A careful consideration of the *assigned* and of the *probably real* causes of insanity has drawn me to this belief.

CAUSES OF INSANITY.

It is beyond doubt that these are very imperfectly understood, and that both in this country and elsewhere, a great deal of valuable time has been wasted in the tabulation of these and other things—supposed to be of much importance in the study of insanity.

It was once believed and in some places it seems still to be an article of alienistic creed, that intemperance is the most prolific source of insanity. In Upper Canada this agency appears quite inadequate to the results once ascribed to it. The whole number of cases ascribed to intemperance among those admitted here in the past 15 months (146) has been 6; and even in these I doubt whether in all, the insanity has been justly ascribed to the apparent intemperance.

In one, the intemperance is stated to have been associated with "predisposition." In a second, I am strongly inclined to believe in the same co-agency. In a third the patient is a man of 74 years and of fair constitution. His insanity presents the form of religious

despondency. He accuses himself of having taken "too much wine at the sacrament", and when asked how much? he says, "half a mouthful." Intemperance, if of early commencement, would have done its work sooner. The fourth is a female case, and may be a true one; yet when one considers the multitude of other disturbing agencies, both bodily and mental, to which women are subjected, we should perhaps lean towards the side of charity and rather seek for the cause of her intemperance in the insanity than the reverse.

The fifth case is perhaps not doubtful. The man has been intemperate when he could manage to be so, and his insanity is recurrent. His present admission is the third. He is constantly complaining of bodily pains, for which he thinks wine and beer would be good, but he is fat and healthy looking. The sixth has been certified by the medical examiners to have been intemperate; yet his brother, a very respectable and intelligent person, assures us, he has not been intemperate. I am inclined to believe the statement, for the patient appears to be labouring under *general paresis*, and I have so often known this disease to be mistaken for drunkenness, that I believe the examiners have in this case been led into error.

It is very difficult, with the statistics of the Excise Department before us, to believe that the manufacture and consumption of alcohol in this country have fallen off of late years, and knowing as all do, the fearful extent to which intemperance obtains in the population, we certainly, if believing in the efficiency of intemperance as a *direct* cause of insanity, should expect to find more than six cases out of 146 attributed to it.

I have on former occasions expressed the belief which I am aware is entertained by almost all Asylum Superintendents, that intemperance operates as a factor of insanity indirectly much more than directly. In the devolvement of insanity, predisposition seems to be almost everything, and other agencies very little. There is abundant evidence that the *children* of intemperate parents are predisposed to insanity, and to many other diseases of the brain, and the nervous system at large. Excessive drunkards kill themselves before reaching insanity, but the unfortunate children procreated during the term of parental intemperance, certainly have a worse chance of immunity. Epilepsy, chorea, hysteria, convulsions, insanity, idiocy, and many other evils await them.

A very important fact in the etiology of insanity is that asserted by *Baillarger* could we only feel satisfied of its reality. He states that insanity is more largely inherited from the mother than from the father. He says the sons inherit the disease as often from the mother as from the father, but the daughters twice as often from the mother. *Baillarger* made this assertion from the statistics (such as they were) of 453 cases, certainly a rather small number on which to base so important a doctrine. Those who know how figures have been sometimes made to sustain even palpable absurdities, or in the hands of antagonist theorists, directly opposite conclusions, will receive *Baillarger's* statement with due caution. French writers are peculiarly prone to hasty generalization, and it is astonishing how keen their power of scent is in pursuit of facts which support their preconceptions, and how dim-sighted they are in perception of those of an opposite tendency. Besides we know how very difficult it is to obtain anything, even approximating to correct information on the matter of hereditary transmission of insanity.

I believe it would not be difficult to glean from other writers the doctrine that the character and talents of boys are more largely derived from the mother than from the father, and those of girls the reverse; and if this be true, why should not mental disease follow the like courses? It would perhaps be as easy, and yet withal as difficult, to establish by statistics the one doctrine as the other.

In preceding annual reports I have expressed my opinion on the efficient causes of insanity at sufficient length to warrant the passing over of this subject without further notice on the present occasion. I may, however, be permitted again to urge on the consideration of those upon whom devolves the duty of ascertaining and certifying these causes, the great necessity of a scrupulous exploration of the actual habits and mental tendencies of persons submitted to their examination. Great care should always be taken that mental manifestations, which in reality are but constituent elements or results of the present insanity, are not assigned as its causes. Jealousy, religious excitement, religious despair, terror, suspicion of evil intentions, and many other mental states which in reality have had nothing to do with the causation, are frequently given as the exciting causes.

They are results, and important ones, but not causes; and it is necessary that we should, in quest of the real cause, go farther back in the history of cases than the first manifestation of these *symptoms*, for such they merely are.

PROGNOSIS OF INSANITY.

In intimate relation with the causation of insanity stands the prognosis. If we could accurately ascertain the former, our views as to the latter would often be much clearer and more decided. The question as to the "prospect of recovery" is one of the most embarrassing of the many which by the friends of patients are pressed upon Asylum physicians. Seldom do those putting this question give long time to us for ascertaining the true character of the case, and for maturing our opinion as to its probable course. They too often have waited, as they think, and we likewise, long enough already. I have frequently on the very first interview, within five minutes after first sight of the patients, been solicited to state my expectations as to recovery. Often indeed, not to say merely whether recovery will take place, but to specify the period of Asylum treatment which will (not *may*) be required to effect it; and whether the case has been of three weeks, or of three years duration, seems to be a matter of little consideration by the anxious friends. It is not to be expected that they should duly weigh the numerous and important complications of the disease by which the issue must be influenced or determined, or that they should attach due weight to aggravating agencies which they have not before recognized, or which having known they have endeavoured to persuade themselves are of trivial value.

Among the various adverse facts to be considered in forming a prudent anticipation of the issue of any case, that of its duration is certainly in the first rank. How can we expect that a condition of mind which has long since become the settled mental constitution of the patient will be changed speedily, if, indeed, at all, by submitting it to treatment at this late period? The time of recuperative activities, both physical and psychical, has passed away, and we now have but the crumbling ruin which their ill-directed operation has left behind. It is a most painful communication to have to make to the surviving friends, that their ill-considered repugnance to Asylum residence has deprived the object of their love of all chance of recovery; yet such in all cases thus trifled with is the almost universal fact.

Let it not however be believed that recovery must invariably be secured by early admission into an Asylum. There are cases, and the number is considerable, in which recovery is impossible, or at least up to the present time has not been found to occur, at whatever period they may be subjected to treatment. Among these may be reckoned all patients labouring under that peculiar disease called *General Paresis*, to which I have frequently alluded in previous reports. I have never seen a case of *General Paresis* cured; nor do I believe a single instance of real recovery is on record. Temporary suspension or intermission of the mental alienation or even of the prominent bodily symptoms no doubt is occasionally met with; but whoever recognises in this truce a total withdrawal of the entrenched enemy will certainly be disappointed. I have witnessed several of these deceptive lulls in the battle strife, some of which have been of considerable duration; but they are totally unreliable whether they be of a few months or even of a couple of years duration. Another outburst is in the future, and not unfrequently it is found to be of formidable intensity. In my report of 1867, it was shewn that two-thirds of the deaths of that year were caused by *General Paresis* and *Pulmonary Consumption*. The presence of the latter disease in its advanced stages is no less unpromising of mental restoration than the former, but in its early period before dense tuberculization of the lungs or the formation of cavities, restoration may occur, though certainly not very frequently.

It is my belief, that hereditary tendency to consumption is present in at least one half the families of the insane; and therefore in our circulars of preliminary inquiry, information on this head is asked for. It is not uncommon to learn that whilst only one of a family has become insane, two, three or more, have died of consumption. In all such cases the prognosis is highly unfavorable; almost the whole of this class of patients remain incurable, and even of the few who may recover and be discharged, a large proportion will have further attacks. Epilepsy is another complication of insanity of the most dire-

ful character. When insanity supervenes, after a long run of epilepsy, the brain, spinal cord and the lungs, and often the heart and large blood vessels, have generally undergone injurious changes which render both the epilepsy and its resulting insanity utterly incurable.

It would be easy to extend these observations, by instancing various other bodily diseases of incurable or very obstinate character, the presence of which in insanity excludes hope of recovery. It may suffice to say that any disease which overturns the functional integrity of any important organ or structure in the system must, if not removed, prevent restoration to reason.

The evil habit, to which I have frequently before adverted, as so largely obtaining among the insane, is not less forbidding of hope than the actual diseases I have mentioned; so long as it is persisted in, recovery will not take place. Almost the whole of these cases terminate in latent phthisis. The unhappy creatures wither out of life, as if sinking under some invisible blight, which has desolated their entire existence and transformed them into human wrecks, distressing to contemplate beyond all other forms of mental dethronement. Whoever would most certainly and most largely benefit his fellow beings in this Province, may find his work in this sphere of moral reform. In the department of insanity, at least, whether we regard the evil here treated of as a direct cause, or only as a concomitant of the malady, certain it is that in extent, as well as in intensity, it eclipses all others put together. No other agency is now contributing so much to the peopling of our Asylums with hopeless inmates.

During the fifteen months embraced in this report, 146 patients have been admitted. These as to civil state, have been divided thus :

Married Men	35
Single do.	37
Married Women	47
Single do.	27
Total	146

The discharges during the same period have been

Of Married Men, 17, or 48 per cent. on admissions.	
“ Single do 14 “ 38 “ “	
“ Married Women, 18 “ 38½ “ “	
“ Single do 19 “ 70½ “ “	

As however, a period of only 15 months is too short for reliable comparisons, I give the corresponding numbers for the last 45 months

	ADMITTED.	DISCHARGED.	PER CENT. ON ADMISSIONS.
Married Men	78	44	56½
Single do	77	34	44½
Married Women.....	123	66	53½
Single do	66	45	68½
	344	189	

Why is it that single men in the above table show the lowest per centage of recovery? The figures are deeply and deplorably instructive. Why should insanity in single men, who, as met with in asylums, are much younger than the married men, present so much lower a proportion of recoveries than the latter? Why also do they compare so unfavorably with single women?

WANTS OF THE INSANE IN ONTARIO.

At the present time there are in Asylum lodgment in this Province three times the number which I found in the Toronto Asylum in July, 1853, and, perhaps, there are more than three times as many in our Gaols now as were in them then.

The Toronto Asylum was the only one then in Upper Canada. We have now besides the Rockwood Asylum at Kingston, the Malden Asylum, the Orillia Asylum and the Toronto University Branch. The entire number of lunatics thus provided for, is over 1,000. Supposing our population now to be 1,500,000, this would equal one lunatic in

every 1,500. The population in Upper Canada in 1853 was about 1,000,000. It would, therefore, judging from Asylum figures, appear that whilst our general population increased by 50 per cent, the insane increased by 200 per cent. These are frightful figures, and it behooves us to enquire whether they are true exponents of existing facts.

I fear it is true that insanity is on the increase, yet I cannot believe it has in the last 15 years increased four times as much as our population. It is my belief that the more ample the provisions made for this class of our afflicted fellow-beings in any country, the larger will appear the number requiring it. This fact has been amply demonstrated both in America and in Europe. It is invariably observed that towns and counties lying near Asylums send in a much larger proportion than those more distant. For example, the city of Toronto, in the last fifteen months, sent in 25 of the 146 patients admitted here, or 17 $\frac{1}{2}$ per cent. of the whole. This I believe is under its former proportion, and no pleasant duty has it been to keep it thus down, and to battle for a fair share of our beds to other places.

In this Asylum, and the others of the Province, peopled from it, there are now about 120 lunatics, belonging to Toronto, for whose maintenance, should the city ever have to pay, our corporation would *begin* to understand the past benefits bestowed on it, and our City Fathers, might, perhaps, think that to have rented to the Asylum, at a moderate rate, a portion of the common, on which they now raise such magnificent thistles for the public benefit, would not have been any over-stretch of civic philanthropy.

I am convinced that all we require to do to ascertain that insanity is more prevalent than at present it appears to be, is to build more asylums for its victims. No reliable census of the insane in Canada has ever been made. It is very easy to understand why this is the fact. There is nothing connected with any household, which the head of it wishes to keep more secret than insanity or idiocy.

Massachusetts is the only country known to me in which a full census of the insane has been taken, and in this State, in 1854 the insane or lunatics were one in every 427 and idiots one in every 1034; the two classes joined were equal to one in every 302 of the whole population. This rate on our population would give about 5,000 lunatics and idiots for the Province.

The latest calculation in France gives one insane in every 795; in Belgium, one in every 819; in Holland, one in every 800.

In Scotland, in 1853, the proportion was one in every 390; in Ireland, one in every 569; in England and Wales, one in every 500; but according to Tuke's calculations in 1858, one in every 300 in England. These figures no doubt are unreliable, yet they are entitled to an approximative credence.

In the whole United Kingdom, so far back as 1847, there were lodged in Asylums (including as I suppose work-houses) 41,810 insane persons. The number must since have increased much.

Our present population is about one fourteenth of that of the United Kingdom in 1847; therefore the same proportion of Asylums in this Province at this time would give us about 3,000, or three times our present number.*

Assuredly visitors from the old country to our asylums, who declare that insanity must be more common here than in Britain, manifest profound ignorance of the subject on which they would enlighten us. We have, however, in this Province a large number of insane yet to be provided for.

* NOTE.—Since this Report went to press, I have received the Annual Report of the Commissioners in Lunacy for Scotland, from which I find that the whole number of lunatics under inspection of the Board on 1st January, 1867, was 6807, distributed thus:—

In Royal and District Asylums.....	3519
In Private Asylums.....	672
In Parochial Asylums and Poor-Houses.....	998
In Central Prison, Lunatic Department.....	45
In Private Dwellings under official cognizance.....	1573
Total.....	6807

The total population of Scotland was, at same date, 3,062,294—say about double the present population of Ontario; therefore an equal proportion of provided-for lunatics in the latter would give 3403.

I have at this moment, 364 circulars of application before me, for admission of insane persons, which I have been obliged to pass over without award. Of this number 200 have been made on behalf of women, and 164 on behalf of men. Perhaps one-third of the whole number were idiots, and about the same proportion were chronic lunatics, whose insanity had been of very long duration; a considerable proportion were epileptics and paralytics. They were, however, perhaps, all objects of charity, and I fear very much in want of that lodgment and sustenance which was sought for them, but which could not be given to them. How many of the 364 may now be in life, I cannot say, neither can I depict the sufferings and distress undergone by the families to which they belonged; but no person who has seen the insane, only in asylums, where they are comfortably clothed and lodged, and liberally dieted, and where their management has become an established science, can form even the shadow of a conception of the trouble, distress, and danger undergone by their friends in taking care of them at home. They alone, who have had the sad experience understand this.

I am very sure the 364 names now before me, of persons who have needed and not obtained asylum lodgement are but a fraction of the whole number to be provided for. There are hundreds more on whose behalf from various reasons application has never been made; but once let it be seen that asylums are ready to receive them, and if they do not present in overwhelming numbers, I am much mistaken.

To bring this Province with its million and half of population up to the figure of the Asylum provision which at the present time obtains in the old country, would augment our Asylum inmates, perhaps, to 4,000. This would require more than four-fold our present Asylum space, for the Commissioners in Lunacy in England demand 1,000 cubic feet of sleeping space for each patient, whilst ours have not an average of 700; indeed in our branch Asylums, not 600.

In my report for 1865, I recommended that a system of provision for the chronic insane, distinct from that for recent cases be introduced, by means of unions of counties, so arranged that each union might represent about 250,000 inhabitants, thus establishing for the whole Province, six secondary asylums, each to be capable of lodging comfortably at first, 200 patients, and of enlargement to the extent of lodging 400.

Besides these secondary asylums, I recommended the establishment of three primary ones, as strictly curative hospitals; one now existing in Toronto, one almost complete at Kingston, and one to be erected in the Western part of the Province. These primary Asylums would contain 1,200 to 1,300 patients, and the secondary ones at first 1,200.

Comparing this proposed provision, with that actually now existing in the mother country (and there found still insufficient) was my plan unduly liberal? Surely not. It may require ten or fifteen years for discussion of this, or some other, perhaps better plan, and by that time, the requirement for its adoption will certainly be much more pressing than it now is, *sic iter ad astra*, so we go to the stars, but alas, our insane, meantime to the stripes.

Mortality.

The mortality of this Asylum for the past fifteen months has been 30 deaths in a total of 623, equal $4\frac{8}{10}$ per cent., or $3\frac{8}{10}$ per cent. a year.

From the latest reports in my hands, I find the following death rates per year, shewn by the several institutions named.

Year.	Asylums.	Total healed in year.	Deaths.	Per cent. on total.
1866.	Royal Edinburgh.....	1615	63	$6\frac{2}{10}$
1867.	Aberdeen.....	530	22	4
1867.	Dundee.....	243	14	$5\frac{7}{10}$
1867.	Belfast.....	492	18	$3\frac{6}{10}$
1867.	Wilts.....	532	49	$9\frac{2}{10}$
1865.	Worcester.....	643	47	$7\frac{3}{10}$
1866.	Halifax, N.S.....	192	4	2
1867.	Dayton, Ohio.....	282	11	4
1866.	Harrisburg, Penn.....	493	33	$6\frac{7}{10}$
1867.	Butler, Rhode Island.....	196	14	7
1867.	Longview, Ohio.....	589	43	$7\frac{4}{10}$
1867.	Utica, New York.....	1042	51	5

The preceding figures, taken from reports of insane Asylums of high merit, exhibit much diversity in the rates of mortality. Nothing could be more silly and unjust than to appeal to these rates as a test of the comparative merits of the several institutions mentioned. The incident mortality of any Asylum depends on causes so various and often so difficult of exposition, that no intelligent or candid medical superintendent will adduce such tabular statements as the preceding, for the purpose of exhibiting his own low rate. A high rate of mortality may denote superior efficiency, for it is one of the surest concomitants of numerous admissions. It is from these the majority of deaths are furnished in Asylums rapidly receiving patients. It is known, too, that certain forms of fatal disease in the insane are much commoner in some Asylums than in others. These and many other facts, ignored or not understood by hasty figure-gatherers, will always be taken into consideration by persons of common sense and honest intention.

CAUSES OF DEATH.

The causes of death, so far as these can be expressed in short terms, have been the following:—

General Paresis.....	10
Latent Phthisis.....	7
Manifest do	2
General Dropsy.....	3
Maniacal Exhaustion.....	2
General Disease.....	1
Spinal Disease.....	1
Cerebral Effusions (serous).....	1
Traumatic Bronchitis.....	1
Old Age.....	1
General Brain Softening without Paralysis.....	1
Total.....	30

It will be observed that one-third of the above deaths have resulted from that fatal disease of the insane, *General Paresis*, and nearly a like proportion from Phthisis. Seven of the nine cases of the latter were of the *latent* form. Only in Asylums in which *post mortem* examination is the general rule, can the full extent of latent phthisis be appreciated.

The case of death from "Traumatic Bronchitis" resulted from a wound in the throat self-inflicted, before admission.

The case from "old age" was that of a woman of 76 years, as shewn by the admission Register, but, in all probability, much older; she was, from her amiability, gentleness and polite deportment always regarded as our model patient, and had long held, as she well deserved, the respected name of "Lady Dawe." Her Asylum residence amounted to twenty-six years, less thirteen days.

Seven patients longer resident than Lady Dawe still survive, five of whom are in the Malden Asylum, and two here.

Post mortem examinations were made in 15 of the cases of death.

In the cases of *General Paresis* and Pulmonary Phthisis, the condition of parts was of the usual character in these diseases.

The case of cerebral serous effusion occurred in a robust man who had been resident ten years and a half, and who always presented the appearance of good health, but during all his residence was the victim of "enchancements and the black art." He said the enchanters, mostly in the night, shot darts through his temples, which caused excruciating pains in the jaws. He showed no appearance of illness until a week before his death, when after breakfast he complained of weakness in his legs, and on attempting to walk, he whirled round in a circle. The left pupil was dilated. I had observed two days before this illness that his speech was thickened, and he seemed to be at a loss for words (a most unusual fact with him, and of which he was himself conscious.) His intelligence was not much impaired, but a semi-comatose condition supervened about forty-eight hours before death. On examining the brain, the *Dura mater* was found firmly adherent to the

skull. The vessels of the arachnoid were much congested. The brain was slightly congested. On its upper surface it was firm, but soft on the base. The choroid plexuses were much congested. The quantity of serum effused into the arachnoid cavity and the lateral ventricles was not great.

The case of "general brain, softening without paralysis," occurred in a man who was addicted to self abuse. He had never complained of pain in the head, but was very dull and apathetic. He was much emaciated before death. He showed none of the indicating symptoms of *general paresis*. His condition was that of general cachexia, and he had two invasions of purpura.

The brain was found universally softened. When cut into, it ran like cream. The right middle lobe was deeply congested. The membranes were firmly adherent on the upper surface of the whole brain. The lungs had no tubercles, but showed marks of recent inflammation.

The peritoneum was of a dark bluish colour, and showed numerous adhesions. The intestines were firmly glued together, and numerous tubercles were found in the peritoneal folds. The liver was larger, but not changed in texture.

GENERAL OBSERVATIONS.

Of the general course of administration of the affairs of this Institution, so far as under my control, I have little to note. Every department has been conducted to my entire satisfaction, and the efficiency and fidelity of all the officers and servants have been such as to merit high commendation.

Since the issue of my last report three additional newspapers, the *Stratford Beacon*, *London Daily Prototype*, and *Ottawa Daily Citizen*, have by the kind liberality of the publishers, in response to my appeal, been sent to us gratuitously. All are read with gratification by the inmates, and contribute much to their amusement and improvement. The *Globe* is much asked for, but is supplied at my own expense.

The improvement of our grounds has this season received much attention and labour, but until the place is vacated by the builders, which I apprehend will not be before a couple of years more, it will be impossible to carry out the general plan in view.

It would be no vain gratification to see this Asylum surrounded by grounds more beautiful than those of any other house in Canada. Even now in their incomplete, and in some parts deformed, state, they are admired by many. I do not believe that any labour about an insane Asylum is more profitably applied than that bestowed on its flower beds, shrubberies, lawns, walks, and shade trees, nor can we inside have too many pretty pictures, statues, and other attractive objects.

(Signed)

JOSEPH WORKMAN, M.D.,

Medical Superintendent.

REPORT

ON THE

MALDEN LUNATIC ASYLUM.

J. W. LANGMUIR, ESQ.,

October 1st, 1868.

Inspector of Asylums, &c.

SIR.—My report of this Asylum must, necessarily be brief, as I only took charge of it on the first of July, this current year. The statistics for the previous year are, at your request, enclosed, and the balance sheets of the various items of account.

BUILDINGS, &c.

I do not enter into any detailed account of the state of the Asylum, when I took charge of it. I would rather defer any remarks it may be necessary to make until my next annual report, because the time has been too short for me to analyze statistics or compare the condition of patients in the past reports. It will be sufficient now to say that much repair was found requisite. That the state of the water-closets, and urinals, and water supply, called for immediate attention, from their very offensive condition, and the very large number of pipes injured by frost. An approximate estimate of repairs was obtained, and the repairs have been most satisfactorily completed, at some addition to the estimate. We have now in each landing two effective water-closets, entirely without smell, and ten wash-basins, in addition to the baths, where there were none before.

The interior of the buildings were much injured from destruction of plaster; they have been thoroughly repaired. The whole interior has been white-washed, and the wood-work painted. The windows have been put into good order. Five ladders have been placed on the roof of the buildings. The buildings, called the officers-quarters have been shingled, in accordance with repeated entries in the memorandum book of the late inspectors, and by the direction of the present. A donkey double-action pumping engine has been put in the place of the old, useless engine. We require a few hundred feet of hose to complete this part of the necessary repairs. The building formerly used as a store for useless articles, has been plastered and floored; and is used for the noisy and destructive patients, whose presence in the sitting rooms, with quiet patients, destroyed all the comfort of the latter. It is now ready for occupation. The rooms used heretofore as store-rooms, are being added to the laundry, for a receiving-room for the dirty clothes, and a store for the clean, which were kept on shelves in the laundry, ironing, and washing room, and were exposed to the steam, arising from the washing troughs. The building formerly used for pumping water from the river, is being converted into a store-room. The yards at the back of the female wards, and the kitchen, have been paved with the old bricks, which long remained in the garden of the Asylum. They have been grouted in with liquid of lime, and make a firm, cleanly yard. The old wood-shed has been converted into a barn, and is now used for thrashing our oats, grown on the farm, which enables us to obtain our straw for the beds, as we require it, without waste. All these alterations have been made with the labor of the patients, and attendants; and many of them with materials already on the premises.

INTERNAL ECONOMY.

The difficulties in the way of strict discipline and order in the Asylum have been overcome, and are not worth mentioning, except as an introduction to an account of the system I have established, which will, I think, prevent waste in the future. I have made every person responsible for the things put into his or her charge. The necessity of this may be proved by two statements:—First, 567 shirts were consumed by 125 male patient last year, and are not accounted for; 100 blankets are altogether missing, unaccounted for. These things were issued by order, but no account kept of the disposal of them from the absence of system. I have had books prepared which will show the issue of every article from the Steward's stores, their reception and disposal by the Matron and chief attendants on each side, who must pay for all they cannot account for. I enclose the heading of the books.

SHIRTS.

DATE.		TO WHOM ISSUED.	Amount.	RETURNED.		In Use.	Initials of Issuer and Receiver.
Issued.	Returned.			Worn Out.	Sound.		
Sept. 1st..	Mr. Mullen.....	200	200	J. Milligan.
.....	Sept. 30...	Mr. Milligan.....	60	30	30	140	J. Milligan.

This plan will show where the articles are. Already there has been saving, although the system is as yet imperfectly carried out. In articles not returnable as food, no plan but that of vigilance and honesty amongst those employed can be efficient. Accounts are kept of all issues. We have now able and honest servants, who strive their best for their employers' interest, and who have made a saving in one article, that of flour, during the last month at the rate of \$600 a year. I hope and believe it will last. There is nearly as much flour baked as before, but still nearly ten barrels less are consumed monthly. I do not pretend to explain how, or where, it was consumed. I merely state the fact. 26 patients slept on the floor, I have had beds made for them. It is needless to pursue this subject farther.

FARM, &c.

The farm has given us a large crop of oats and straw, and a very fair crop of potatoes, which would have been much larger with a wetter summer. I have added to the number of milch cows, which were too few for the wants of the Asylum. We shall not, owing to a short root crop, be able to stall-feed any cattle this winter. Instead, I purpose to buy pork and barrel it ourselves when it is cheap. All supplies for the ensuing winter have been obtained by tender, thrown open to the chief towns in the Province. We obtain our meat at an average of 5½ cents. The farm has been very well managed and cultivated.

REPAIRS.

The repairs, which have been unavoidable will consume the amount of money granted for this year by Parliament, but the whole of the buildings will be in such a condition as to require no outlay for the next year, and with that in view, together with such saving as can be effected by careful management, I think we shall carry on the affairs of this Asylum (with \$5,000 less than the last grant) during the year 1869.

RULES, &c.

I enclose the rules, and the diet table of the establishment. I add the returns of admissions, and deaths, and cures without comment. I shall reserve all remarks on them for another year.

REMARKS.

I cannot conclude, however, without calling your attention to the number of applications for admission of patients. The number applying for admission since December last exceeds 44, and 14 only could be admitted. These have been admitted to an already overcrowded Asylum. Our bed-rooms contain in the most crowded rooms one patient to 400 cubic feet in the least, one to 600. Now 800 feet ought to be the least space allotted to each sleeping patient, therefore, instead of admitting fresh patients, we ought to refuse all, until the space reaches that amount for each patient. It is, however, impossible to refuse admission to patients determinedly suicidal and dangerous to those amongst whom they live, or to those filling over crowded Gaols; whilst admitting such troublesome patients as these we are obliged to exclude too frequently. Those who present much better prospects of cure, if they would be put under immediate treatment, but who are often rendered incurable by the delay and obstacles in the way of admission. Those most difficult to manage by friends or authorities are admitted, those most curable are, of necessity, excluded. This reduces our average cures far below what it would be if there were room for all, and it adds to the cost of maintaining insane by the Province most materially, for those curable patients left uncared for, become incurable, are, for the rest of their lives, chargeable to the public funds. There are in all Asylums, and therefore in this, some patients well enough for such place as the houses of Refuge, which exist in many States in the Union. Patients not quite sound in mind, or quite capable of taking care of themselves, but who require very little management, and who are very slightly deranged. They are like Rob Roy, "ower good for banning, and ower bad for blessing," but they would be, in all respects, better in such houses of Refuge, far better than in an Asylum, which lacks almost all the essentials of an Asylum, such as separate rooms and means of comfort separate from they noisy, the offensive, or the dirty and violent.

STATISTICS.

I have endeavoured to obtain from the Sheriffs of counties, or Wardens, or county Clerks some statistics shewing how many insane requiring care, there are in each county entitled to send patients to this Asylum. But I have failed to inspire county authorities with any interest in the subject. They almost all refer me to the Reeves of townships and direct me to obtain the information myself. I was under the impression, mistaken it seems, that counties were more interested in sending patients here than we in receiving them.

OCCUPATIONS, AMUSEMENTS, &C.

As regards amusements, I have supplied cricket, which they have played with much enjoyment; and I wish to obtain stones for curling during the winter, which, I am sure, many will not only enjoy but but derive benefit from the exercise. Drafts or chequers, cribbage cards have been supplied. I have to thank the proprietors of the *Essex Record*, the *London Free Press*, and *Prototype*, and the *Woodstock Times*, and the *Sarnia Observer* for the papers they send weekly to the Asylum. There are many other papers in the seven counties which have made no response to the circular I sent to them, requesting them to send their free papers here rather than to Toronto, as they send their insane here. I should be grateful to any one for old books, old newspapers, old prints, and for every other means of interesting the unfortunate people under my care, who would themselves express their thanks if they could, for everything that can add to their enjoyment.

CONCLUSION.

It would be an easy task, but I think a needless one, to point out the deficiencies of the buildings of this institution for an asylum. They are as well known to the authorities as they can be to me, but the present condition of the buildings, with all the advantages of the repairs just completed, is not calculated to last very long. As much, if not greater cost, will have to be incurred in two years more to make the buildings then as good as they are now, for all the repairs are done on old worn-out substructure, and cannot endure. It is urging willing people, I think, to dwell upon the necessity of erecting a new

asylum; and it is no part of my duty to dwell on this point, further than to call attention to our inability to accommodate one third of the applications for admission from seven counties only, and the still greater difficulty of proper treatment in an asylum not at all adapted to the purpose for which it is used. Judging from the applications and the opinions of the goalers and others who deliver county patients here, there are many times the number of applicants insane in the seven counties whose friends, knowing the inability of applying, never make their necessities known. An asylum of 600 beds would be filled at once, and if built on a sufficient scale and plan, would be a curative institution such as the Province does not now possess.

I have the honour to be,

Your obedient servant,

HENRY LANDOR, *Superintendent.*

REPORT

ON THE

BRANCH LUNATIC ASYLUM,

FROM 1ST JULY, 1867, TO 1ST OCTOBER, 1868.

J. W. LANGMUIR, ESQ.,

Inspector of Asylums, &c.

SIR,—As required by your circular, dated 27th August, 1868, I send the Report of this Asylum for 15 months I beg leave to observe, that I transmitted the Annual Report for 1867—that is—from 1st January, 1867, to 1st January, 1868, to E. A. Meredith, Esq., Chairman of the then Board of Inspectors of Asylums. I also furnished the Board with Quarterly Reports up to June, 1868. The details in the present Report are necessarily curtailed.

There were only 4 admissions during the 15 months, July to October 4 discharges, 5 deaths and one eloped—leaving 118 patients on 1st October, 1868.

	Men.	Women.	Total.
Remaining 30th June, 1867.....	50	73	124

NOTE.—P.L.A., * Provincial Lunatic Asylum.
O.B.A., † Orillia Branch Asylum.

None of the patients who died during the period, were likely cases of recovery, *chronic*, *organic*, and *functional* degeneration of the brain; with their usual factors, *Phthisis* and *exhaustion*.

Brief history of those admitted, 30th June, 1867, to 1st, October, 1868, 15 months.

- 1.—A. P.—27th September, 1867. Female ætat, 33. Married—8 children—native of Ireland, temperate—insanity paroxysmal—1st attack, nine years ago—after her confinement—puerpal.
- 2.—B. H. 2nd January, 1868. Female ætat 23, single—Acute Mania—has had Epileptic fits since she was 12 years old—the fits still persistent—usually two in the week.
- 3.—I. H.—27th March, 1868. Male ætat, 18. Acute Mania—destructive to his clothing—served as hostler, at a tavern in Barrie—exposed to all sorts of temptation.—Hereditary taint.
- 4.—B. M.—20th April, '68. Female ætat, 54. Melancholia—loss of children—no improvement—taciturn—repulses all kindnesses.

DISCHARGES.

A. P.—Female, removed by her husband—improved—her insanity recurrent—it is probable she will soon again be an inmate of a Lunatic Asylum.

No. 2.—C. C., Transfer from Provincial Asylum, October 22nd, 1861—discharged, 20th March, 1868—by order of Governor General and Council, on representation of his sanity by medical superintendent, and Asylum inspectors. C. C's Asylum residence, 6 years, 9 months, and 11 days. His expenses were paid to Kingston, his former residence.

No. 3.—W. C, Transfer from Provincial Asylum—Asylum resident, 6 years—Dementia. Had chronic diarrhæa, during the spring and summer months, with glandular disease. He was so low and feeble in July last—sent a statement of his case to his father—his brother removed him home, 3rd August. 1868. Improved physically, but not mentally.

No. 4.—I. H.—his history given on admission—he was quite well when discharged, 25th Sept., 1868.

I have the honour to remain

Sir,

Yours respectfully,

J. ARDAGH,

Medical Supt.

REFORMATORY PRISON.

REFORMATORY, ONTARIO,

Penetanguishene, 15th October, 1868.

SIR.—I have the honour to submit the following report, commencing 1st July, 1867, and ending 1st October, 1868, of the Juvenile Reformatory, at Penetanguishene, under my charge, and as this is the first report of this institution for the information of the Government of Ontario, I have attempted to describe the locality more minutely, than will for the future be necessary.

GROUNDS AND BUILDINGS.

The grounds consist of about 200 acres of land, situated within the Penetanguishene Bay, the land gradually rises from the bay, until it attains an altitude therefrom of about 200 feet, and is throughout, of a light sandy soil, and was, when I assumed possession, covered with large boulders and stone on the surface, the greater portion of which are, however, now removed out of sight, by the boys, and put into drains, thereby largely benefitting the land.

The new Reformatory is situated on a plateau, about 120 feet above the lake, commanding a view of the bay, it is bounded on two sides by water, and has many recommendations, for the purpose for which it is intended. It is removed from communication with towns, the nearest, being the small village of Penetanguishene, at the head of the bay, 3 miles distant. The only drawback is the want of railroad communication, Barrie being the nearest point, 36 miles, there is, however, a very good road, mostly gravelled, and the expense of sending a boy here, is not greater than the same distance by rail.

The new Reformatory is a stone building, roofed with tin. On the ground floor is a dining-room, kitchen, store-room, bakery, and bath-room. 1st floor, Catholic and Protestant school-room, store-room, warden, and clerk's offices, and guards' room. 2nd floor, Catholic and Protestant chapels. 3rd floor, hospital.

Connected with this building is a wing complete, containing 120 cells, which has been for some time occupied, the foundations of the other two wings have been laid, and when completed is calculated to accommodate 360 boys.

SANITARY.

The health of the juveniles has been generally good, indeed I think, so far as health is concerned, the situation cannot be excelled. Since its opening in 1859 up to the present, only 4 deaths have occurred. Of those 4, one was received from the Penitentiary, in a very delicate state of health, on 24th August, 1860, never rallied, and died exactly one month after, 24th September. 2 died of hereditary consumption, one on 24th Dec, 1863, and the other on 2nd Feb. 1867 the fourth died of congestion of the brain, with fever, 20th Feb., 1868.

DIET.

The diet is as follows :—Breakfast, $\frac{1}{4}$ lb meat, 1 lb bread, and pea-coffee, sweetened with molasses. Dinner, $\frac{1}{2}$ lb meat, 1 lb bread, potatoes, soup with vegetables. Supper, porridge of oatmeal or Indian meal, sweetened with molasses, in winter, $\frac{1}{2}$ lb bread and milk in summer.

The food is sufficient, as to quantity, and of the very best description.

•
DISMISSAL FROM REFORMATORY.

The practice is, in dismissing the boy, whose time of confinement has expired, to give him a suit of clothes, and as much money as will enable him to reach that part of the Province, from whence, in the first instance, he was brought, and with that arrangement the Government surveillance ceases.

GENERAL REMARKS.

Many and serious are the difficulties I labour under for the want of room, the temporary berths first erected for the boys being still in use, and are unavoidably crowded into two rooms 34 feet long by 24 feet wide. It is unnecessary for me to dwell on this subject, having been recently honoured with a visit from the Honourable Mr. Carling, the Honourable Mr. Richards, and a number of other distinguished gentlemen, all of whom were eye-witnesses to the crowded state of the old buildings; it is, however, to be hoped that those difficulties will be of short duration, and that the two wings (the foundations of which are laid) may be soon completed. In all my former reports, I have urged the necessity of having buildings suitable for the use intended; unfortunately my representations were not so successful as those of my confrere in Lower Canada. In the supplementary estimates brought in at the close of the last session of the Province of Canada, fifty thousand dollars were added to complete the Lower Canada Reformatory, while there was not one farthing appropriated for this Institution; it may, however, be accounted for by the fact of the Lower Reformatory being placed under the Board of Works, while I had to depend on the annual amount recommended by the Board of Prison Inspectors. Notwithstanding all those drawbacks, I am proud and happy to say that so far, I think this Institution a great success. From many quarters, I have the most pleasing accounts of the discharged boys. Even so far north as Byng Inlet, you might, on your recent trip to that locality, have seen two young men, carpenters, working at \$2.50 per day, who learned their trade in this Institution.

I find it very difficult to ascertain the residence and avocation of all the boys who have been discharged. If, however, any have violated the laws of the country since their dismissal, they must, as a matter of course, be committed to the Provincial Penitentiary, or sent back here. With the view of ascertaining the number sentenced to the Penitentiary, I addressed the following letter to the Warden of that Institution:—

REFORMATORY, ONTARIO,

28th September, 1868.

SIR,—I received a few days ago a letter from Mr. Langmuir, Inspector of Prisons for Ontario, requesting me to send him my annual report, and as I am most desirous of giving all the information in my power respecting the results of the training in this Institution, since its opening in 1859, up to the present, you will do me a favour by informing me, at your earliest convenience, the number and names of the boys who may, since their discharge, have been sentenced to the Provincial Penitentiary.

I herewith transmit a list of the names, numbering in all 270.

I have the honour to be, &c.,

(Signed)

WM. MOORE KELLY,

Warden, Reformatory, Ontario.

D. Æ. MACDONNELL, Esq.,

Warden, Provincial Penitentiary.

To which I received the following reply:—

PENITENTIARY, KINGSTON,

12th October, 1868.

SIR,—I have the honour to acknowledge receipt of your letter, dated 28th ultimo, transmitting a list of names of convicts, who have been in the Penetanguishene Re

formatory, and desiring to be informed if any of them are now in this Institution, in answer I would say that the list was called over, and twenty-five answered their names, which are transmitted herewith.

I have the honour to be,
 &c., &c., &c.,

(Signed)

D. Æ. MACDONNELL,

Warden, Kingston Penitentiary.

WM. M. KELLY, Esq.,

Warden, Reformatory, Ontario.

It will thus appear that 25, or about 9½ per cent. of the grown boys have fallen victims to their old vices, while 12 youths have been recommitted to the Reformatory, 8 of whom are from Toronto and Hamilton, whose ages vary from 10 to 14. Of the 270 discharged, it appears that 37 have relapsed. It is, therefore, reasonable to conclude that two hundred and thirty-three must be following an improved course of conduct, and be earning an honest livelihood.

I would respectfully urge upon the consideration of the authorities the great benefit that would arise to the boys, if the duration of their sentences were so timed that their release would expire in the spring in all cases. I think it must be self-evident that having the summer before them, they will be much more likely to obtain employment than if their release should take place in the winter, or even in the autumn.

I take the liberty of suggesting that the 8th Section of the Act, "respecting Prisons for young offenders," should be so amended as to empower the Judges to send young vagrants for seven instead of two years. No greater boon could be conferred on those poor and abandoned youths.

As the Institution suffers much for the want of sufficient room and accommodation, I cannot close my remarks without again respectfully urging the completion of the two wings (the foundations of which are already laid) with as little delay as possible.

I have the honour to be,

Sir,

Your most obedient, humble servant,

WILLIAM MOORE KELLY,

Warden, Reformatory, Ontario.

J. W. LANGMUIR, Esq.,

Inspector of Asylums, Prisons, &c., &c., Toronto.

REFORMATORY, PENETANGUISHENE,

9th October, 1868.

SIR,—In the reports which the Rev. Mr. Hallen sent into your predecessors he found it necessary to draw their attention to the fact, that the room set apart as school-room and chapel for the boys under his charge was totally inadequate to the requirements of those to be accommodated. The evil instead of being diminished, is constantly increasing, as the number of boys become larger, and if something be not speedily done to afford relief, teaching will become impossible. The average number of boys in attendance in the morning is about ninety-five, while frequently more than one hundred are crowded into the room which could not well accommodate more than forty. An improvement has been effected in the evening by dividing the boys, and only bringing part of them in at a time; but still the room is not sufficiently large to accommodate them. Owing to the fact that

there are not proper desks, nor room sufficient to allow each boy a particular seat, the books, slates, &c., have to be kept in cupboards which causes much confusion that might be avoided in a well ordered school-room.

The same room in which school is held during the week is used as a chapel on Sundays, a fact much to be deplored, as the ideas thus presented to their minds are calculated to produce anything but devotional thoughts, and at the same time may produce in them feelings contrary to reverence for places of public worship or even the service itself.

The conduct of the boys is as good as can be expected from persons of their class especially taking into consideration the disadvantages under which they labour. I have noticed visible signs of improvement even in the short time I have been here. The greater number of the larger boys seem to feel the importance of study, and appear anxious to improve their time and make the best use of the advantages which a kind government has provided for them; many of them shew great aptitude and have made no little progress. The smaller boys have not the same feeling, yet many of them shew considerable ability and are far advanced for their age.

During Divine Service they all appear very attentive, and the manner in which they make the responses is very gratifying, and encouraging and gives grounds for the hope that they are reaping some benefit from the service which they are engaged in.

I have the honor to be, Sir,

Your obedient and humble servant,

JOSEPH FLETCHER,

Assistant Protestant Chaplain.

REFORMATORY, ONTARIO,

Penetanguishene, 12th October, 1868.

J. W. LANGMUIR, ESQ.,

Inspector of Asylums, Prisons, &c.

SIR,—In compliance with your request, I hereby transmit to you such information as my position, in connection with the Reformatory, enables me to furnish: and in so doing, I will take the occasion to bear testimony to the flourishing condition the Institution in general continues to exhibit.

With regard to the religious and secular instruction of the boys with which I am specially charged, I beg leave to state that the daily instruction is regularly attended to, and notwithstanding the want of proper accommodation, the majority exhibit an application and proficiency quite satisfactory.

As to the general conduct of the boys, it is with much pleasure I state that I am continually edified by their obedience to rule, and their reverential demeanour during the religious services; and were I to judge by their behaviour whilst under my supervision, I should certainly predict a career of future usefulness to society. When, therefore, some few relapse into their old bad habits, I think it will not be on account of their not having profited by their sojourn in the Reformatory, as some may thoughtlessly conclude, but because they are sent there for too short a period, and whilst still very young, are allowed to return to their old associates in large towns and cities, where by degrees they lose the good impressions they may have received, and fall again into that state of degradation from which they had been so mercifully raised.

To bear me out in the above conclusion, I may say that all those, who, after their discharge, remained in country places, have earned for themselves the respect and confidence of their employers. I may also state that I have within the last two years, married two of the boys to respectable girls, in this neighborhood, and with much satisfaction do

I add, that they are steady and industrious in their habits—polite in demeanor, and respectable in appearance.

From these few remarks, you will please see the necessity of taking into consideration what I have more than once before urged, namely :—That boys too old, and hardened in vice, to be reformed by the ordinary treatment, should not be sent to this institution, lest they should contaminate others who are well inclined ; and that those who are sent here should remain long enough to profit by the instructions they may receive, and have time to acquire a solidity of character, sufficient to resist the shocks of temptation, to which they may afterwards be exposed

In conclusion, I will express the hope that a suitable chapel and school-room will soon be provided for the sixty boys now under my direction.

I have the honour to be, Sir,

Your obedient servant,

J. P. KENNEDY,

Catholic Chaplain.

To J. W. LANGMUIR, ESQ.

Inspector of Prisons, &c., Ontario, &c. &c.

ACCORDANCE WITH THE PROVISIONS OF THE MUNICIPAL
ACT.

*[In accordance with the recommendation of the Committee on Printing, the above
Returns are not printed.]*

RETURN

To an Address voted to His Excellency the Lieutenant Governor, praying for a Return shewing the number of licenses granted since 1860, to cut timber in the wild lands of this Province, the persons to whom the same have been granted, the extent of territory embraced in each of the said licenses, the price agreed to be paid for the same, the amount at present due to the Government, the conditions of said licenses, and the names of all persons at present recognized by the Government as holding any timber licenses. Also, as far as practicable, what portions of said lands are fit for agricultural purposes.

By command.

M. C. CAMERON,
Secretary.

PROVINCIAL SECRETARY'S OFFICE,
TORONTO, Nov. 8th, 1868.

DEPARTMENT OF CROWN LANDS,
WOODS AND FORESTS,
TORONTO, 6th November, 1868.

SIR,—As requested in your letter of 10th of January last, covering a Resolution of the Honorable the Legislative Assembly, dated 9th January, 1858. I have the honor to transmit to you herewith, “a Return showing the number of Licenses granted since 1860, “to cut timber on the wild lands of this Province.”

The documents connected with the Return are as follows:—

Nine Statements from Upper Ottawa Territory.

Eight do from Ontario Territory.

Eight do from Huron and Superior and Peninsula of Canada West Territory.

One do from Lower Ottawa Territory.

There are no moneys due to the Government on account of Timber Licenses issued.

I have the honor to be,

Sir,

Your most obedient servant,

A. RUSSELL,

Asst. Comr. Crown Lands.

The Honorable the Provincial Secretary, Toronto.

For “Conditions of Licenses,” see Form of License at the end of Registration.

DEPARTMENT OF CROWN LANDS,

Ottawa, 13th June 1866.

CROWN TIMBER REGULATIONS.

Notice is hereby given that the Regulations for granting Licenses to cut Timber on Public Lands, dated 8th August, 1851, are superseded, and that, from and after the date

hereof, Timber Licenses and the renewals thereof shall be granted in the manner and under the conditions prescribed in the following Regulations, sanctioned by HIS EXCELLENCY THE GOVERNOR GENERAL in Council, by Order dated the 12th instant; in addition to the requirements of the Act, Consolidated Statutes of Canada, Cap. 23.

1. Licenses for such vacant berth as the Commissioner of Crown Lands may see fit, together with all vacant forfeited Timber Licenses, shall be offered for sale at Public Auctions, to be held half yearly in each Timber Agency, on the 10th of July and the 10th of January (or on such other dates as the Commissioner of Crown Lands may fix by Public Notice,) at an upset price of Four dollars a square mile or such other rate as he may fix by such notice, and shall be awarded to the highest bidder making immediate payment at the time of sale; and if not then sold shall be granted to the first applicant thereafter making immediate payment of the upset price and ground rent. But in case of two or more applications for any such berth being received at the same time, it shall be immediately again offered for sale by Public Auction. Unissued Licenses already awarded however, and such as may be awarded by the Commissioner of Crown Lands on existing grantable applications, under Regulations of 8th August, 1851, shall be granted on the terms upon which they have been or may be awarded. In the intervals between sales, licenses for new Timber Berths for which applications may be made to the Commissioner of Crown Lands or Crown Timber Agent for the territory in which they lie, may be granted to the first applicants paying in with their applications the upset price and ground rent above mentioned. Not more than one berth to each applicant, the bonus to be returned should the berth be relinquished as valueless within six months without cutting timber on it.

2. Applications must be in writing and the spaces asked in them must be distinctly described in connexion with known points established by survey or boundaries already defined, or, if in surveyed townships, the lots and ranges must be stated.

3. No Timber Berth shall be licensed in unsurveyed lands exceeding ten miles in length by five miles in breadth, or fifty superficial miles in area, and half that size in surveyed townships, the area to be estimated by the Crown Timber Agent, or other authorized officer.

4. All Timber Licenses are to expire on the 30th April following the date thereof.

5. Newly granted licenses, and renewals of licenses that have been duly occupied, shall be subject to a yearly Ground Rent of fifty cents each superficial mile of area included within their limits, estimated as before mentioned; but in computing the ground rent no license shall be charged at less than eight miles of area.

6. The Ground Rent to be exacted on the renewal of any license shall be double that of the preceding year if the berth licensed has not been duly occupied, increasing annually in that proportion while the berth continues unoccupied (excepting the year succeeding that in which the license has been first granted, if not in a surveyed township); but the so increasing ground rent shall not exceed the rate of twenty-three shillings and fourpence a mile (being equal to the lowest amount of duties on square timber the ground would yield if duly occupied, added to the rate of fifty cents first mentioned) —reverting to the original rate on the berth being duly occupied. The making of an average of five hundred feet of square timber or 20 saw logs to the mile, to be considered as due occupation. No claim for reimbursement of ground rent overcalculated to be entertained after the issue of license.

7. No Timber Berth shall be forfeited for the non-occupation of it, provided the increased ground rent on that account be duly paid; but any berth on which increased ground rent is evaded by false statements as to occupation, shall (after the holder of it has had an opportunity of being heard in opposition,) be granted to the first applicant pleading such evasion before the first day of November, and proving the same by the affidavit of a commissioned Surveyor before the first day of December following the date of the false statement made. If half occupation only be proved, the holder of the license may retain one-half of the berth after it has been equitably divided by the Crown Timber Agent.

8. License holders who shall have duly complied with all existing Regulations shall be entitled to renewals of their licenses, provided they shall have made and delivered to

the Crown Timber Agent of the locality, before the thirtieth day of September, or such prior date in any locality as the Commissioner may fix, sworn statements of the number and description of pieces of timber and saw logs cut by themselves or by others to their knowledge upon each of the berths held by them, during the previous season; and shall have paid to the Crown, on or before the fifth day of December following, the ground rent payable for renewal of their licenses for the ensuing season; but should they fail to comply with these conditions in respect to any berths held by them, such berths shall thereby become vacant and the right to license therefore forfeited, and they shall be sold at public auction or be otherwise disposed of as before mentioned, excepting that if double the ground rent otherwise chargeable be paid for omitting to furnish the statement above mentioned, and payment be made before the day of sale with ten per cent. in addition for each month of the delay in payment, the berth may be re-licensed to the former holder.

9. License holders desirous of obtaining renewal of license must make application for such renewal to the Crown Timber Agent of the locality before the 1st July in each year, stating what berths have been duly occupied, failing which such berths shall be charged with the rate of ground rent payable on non-occupation.

10. Crown Timber Agents shall keep registers of all licenses granted or renewed by them and transfers thereof, which, together with their plans of licensed berths and vacant ground, shall be open for public inspection.

11. Transfers of Timber Berths to be in writing, and if not found objectionable by the Crown Land Department or Agent for the granting of Licenses, to be valid from the date on which they may be deposited in the hands of the latter; but no transfer to be accepted while the party transferring is in default for non-payment of dues on timber to the Crown.

12. Timber Berths are to be described in new licenses as "not to interfere with prior licenses existing or to be renewed in virtue of Regulations" on the date of their first being issued. Where licenses clash, the one of more recent origin is to give way to that of prior date, computing back to the season it was last acquired at auction or by grant from the Crown. And should any license by error or defect in its description be found evidently incompatible with the intention or regulations under which it was granted, the Commissioner of Crown Lands may cause it to be cancelled or amended.

13. The Inspector of Crown Timber Agencies at Ottawa, and any officer thereunto authorized elsewhere, shall, at the written request of any party interested, issue instructions stating how the boundaries of Timber Berths should be run to be in conformity with existing licenses. The surveys are to be performed at the expense of the parties requiring them, who must cause copies of the plans and field notes of the surveys to be delivered to the officer giving the instructions, subject to his examination and approval, to be paid for by him and kept of record by the Crown Timber Agent of the locality.

14. In cases of contestation as to the right to berths or the position of bounds, the decision of the Crown Timber Agent of the locality or the Inspector of Crown Timber Agencies or other officer authorized by the Commissioner of Crown Lands, shall, on notification thereof being given to the parties or their representatives on their premises or sent to their address, be binding upon the parties, unless reversed by arbitration commenced within three months of such notification.

15. To prevent delay or disputes as to arbitrators it shall only be necessary for the party thinking himself aggrieved by such decision, to notify in writing to the officer who has given it, his dissent, and the arbitrator he has appointed. It shall then be the duty of the officer who has given the decision to take the place of arbitrator on the other part, and in case of their not agreeing as to an umpire, should one be required, the Commissioner of Crown Lands shall appoint one, on the request of either of the parties or either of the arbitrators; such arbitrators may receive evidence obtained subsequent to the decision, and each of them and the umpire are to be paid five dollars for each day they are engaged on such arbitration, by the parties jointly.

16. Timber cut under license shall be paid for at the following rates, viz. :—

	s.	d.
Oak and Walnut per cubic foot.....	0	1½
Elm, Ash, and Tamarac.....	0	1

	s.	d.
Red and White Pine, Birch, Basswood, Cedar, Spruce, etc.....	0	0½
Pine Saw Logs, each 13½ feet long.....	0	6
Or ten cents per standard log of 13½ feet 20 inches in least diameter		
Unmeasured culls to be charged at average of the lot they are in.		
Spruce Saw Logs, each 13½ feet long.....	0	2½
Staves, Pipe, per mille.....	32	6
Do W. Indian.....	10	0
Cord Wood (hard) per cord.....	0	8
Soft do do	0	4
Railway timber, knees, &c., 10 per cent. <i>ad valorem</i> .		

To be charged upon the quantities shewn by measurement under direction of the Supervisor of Cullers or Deputy Supervisor at Quebec or Montreal or other place of sale or shipment, or by other reliable measurement, where that cannot be obtained, otherwise each stick of White Pine may be estimated as containing 70 cubic feet.

Red Pine as containing 38 cubic feet.

Other kinds of wood 34 do

And when any license holder is in default for, or has evaded the payment of, dues to the Crown on any part of his timber, they may be levied on any other timber of his, cut under license, together with the dues thereon.

17. All square timber, logs, deals, boards or other stuff leaving the Agency in which it has been cut, in any form, must be submitted to counting or actual measurement, and statements under oath must be furnished as to the quantities of timber and logs cut under license whenever required. Owners or lessees of Saw Mills cutting under license must shew by such sworn statements the total number of each kind and length of logs cut or acquired by them and taken to their mills, or where left each season, giving the number in standards also, and must prove by satisfactory affidavits on what lots and how many on each lot, such as are from private lands, have been cut; clearances to be refused in case of non compliance.

18. Before moving any raft or parcel of timber, lumber or Saw Logs from the Agency in which it has been cut, the owner or person in charge thereof shall make report thereof to the Crown Timber Agent, making, if required, declaration upon oath as to the number of pieces of each kind of wood contained therein, and the number of cribs; and to exempt timber from private land, if any, from dues as Crown timber, must furnish satisfactory affidavit, stating what lots it was cut upon and how much on each lot, whereupon he shall obtain a clearance from the Crown Timber Agent, stating the number of pieces in the raft or parcel, how many, if any, have been satisfactorily proved to be from private lands, and on how many, if any, the dues have been previously or then paid. On the arrival of any such raft or parcel at Quebec, or any intermediate place, or other port, for sale or shipment, the owner or holder of it shall make report thereof to the Collector of Crown Timber Dues or Deputy Supervisor of Cullers, or other appointed officer, within forty-eight hours, and in addition to the quantity shewn by the clearance as subject to dues any surplus timber beyond the number of pieces stated therein, on being ascertained by the Collector of Crown Timber Dues, Deputy Supervisor of Cullers or other authorized officer, if not satisfactorily accounted for, shall be held as having been cut upon Crown Lands and be subject to the payment of dues accordingly.

19. Parties omitting to report the departure of their rafts or other timber from the Agency in which they held license, or the arrival thereof at Quebec or Montreal or other port or place, for sale or shipment, within the Province, as before mentioned, may be refused further license, and be subject to forfeiture of the timber for evasion of Regulations, as provided in section 3rd of Cap. 23 of the Consolidated Statutes of Canada.

20. Occupants, grantees or purchasers of Public Lands who have not completed all conditions of sale or grant, cutting timber without license (except for clearing, building or fencing thereon), or others doing so by their permission, shall be subjected to the penalties established by law for cutting timber without authority.

21. Persons evading or refusing the payment of timber or slide dues, or the final settlement of bonds or promissory notes, given for the same, or in default with the Crown

Timber Office or Agent; also persons taking violent possession of disputed ground before obtaining decision in their favor, and persons refusing to comply with the decision of arbitrators or with Regulations established by Orders in Council, or who forcibly interrupt Surveyors, shall be refused further licenses, and their berths become disposable to others on the expiration of their licenses.

22. Licenses are to be granted on the annexed form in duplicate; the clause at the foot thereof must in the duplicates be signed by two securities; and the description of each berth is to be written on the back thereof. The duplicates to be kept of record by the Crown Timber Agent.

23. Dues of all kinds on timber cut under license, remaining unpaid on 30th November following the season in which it was cut, to be subject to interest from that date, but without prejudice to the power of the Crown to enforce payment of such outstanding dues.

FORM OF LICENSE.

By authority of the Consolidated Statutes of Canada, Cap. 23, and Regulations dated 13th of June, 1866, and for and in consideration of the payments made, and to be made to Her Majesty :—

I do hereby give unto _____ and unto _____ Agents and Workmen full power and License to cut _____ upon the Location described on the back hereof by _____ and to hold and occupy the said Location to the exclusion of all others, except as hereinafter mentioned:—from _____ to Thirtieth April, 18 _____, and no longer; with the right of conveying away the said Timber _____ through any ungranted or waste lands of the Crown:—

And by virtue of this License the said Licentiate has right by the said Provincial Statute to all Timber cut by others during the term of this license in trespass on the ground hereby assigned, with full power to seize and recover the same anywhere within this Province aforesaid.

But this License is subject to the following conditions, viz. :—

That any person or persons may at all times make and use Roads upon, and travel over the ground hereby licensed, and cut and take therefrom any trees under ten inches in the largest part in thickness, necessary to make Floats, Traverses, Oars and Withes for his or their use in rafting Timber or Saw Logs being rafted in the immediate vicinity thereof.

That nothing herein shall prevent any person or persons from taking Standing Timber of any kind to be used for the making of Roads or Bridges, or for Public Works.

And that persons settling under lawful authority or title within the location hereby licensed, shall not in any way be interrupted in clearing and cultivation by the said Licentiate, or any one acting for _____ or by _____ permission.

And further, under condition that the said Licentiate or representatives shall comply with all regulations that are or may be established by Order in Council, and shall submit all the Timber cut under this License to be counted or measured, and settle for the Duties chargeable thereon, when required by me or any officer thereunto authorized, otherwise the said Timber will be forfeited to the Crown, and the said Licentiate be subject to such other penalty or penalties as the Act provides.

Given under my hand at _____ the _____ day of _____
in the year of our Lord one thousand eight hundred and sixty _____, in duplicate.

Ground Rent payable on giving this License, fifty cents per square mile. Single Ground Rent; rate increased when unoccupied, as per Regulations.

We have read and comprehend the nature of the obligations contained in this License, and we bind ourselves jointly and severally, and each of Our Heirs, Executors, Curators, and Administrators, to pay all duties that may become due and payable to Her Majesty, Her Heirs, or Successors on any Timber cut or acquired by virtue of this License, in the event of the above named Licentiate failing or refusing to pay the same, or to give satisfactory Bonds for the payment thereof.

PROVINCE OF ONTARIO.—

RETURN OF TIMBER LICENSES granted during the period commencing the 1st of
Agent for the Upper Ottawa Territory. To include all New Licenses granted.

S. Sherbrooke and Oso		Sept. 14.	
Amable du Fond. To commence on the Amable du Fond River, three miles from the mouth, and extend up six miles, to be measured on the general bearing of the river, and back six miles on the east side, to be measured at a right angle to the general bearing. Not to interfere with the limit licensed to James S. Johnston, on the Ottawa River. Not to interfere with prior licenses existing or to be renewed in virtue of regulations on the 12th day of Sept., 1860			
River Matawin. To commence at the lower boundary of Benj. McConnell's limit, three and a half miles below the mouth of the River Amable du Fond, and extend down the south side of the Matawin and the Ottawa five miles, measuring on the general bearing of the Matawin to its head, and back on the south side to a line to be run north 69°, west from a point four miles from the Ottawa, on the upper side line of Johnston's limit, opposite Godin's farm. Not to interfere with prior licenses existing or to be renewed in virtue of regulations on the 12th day of September, 1860			Bought at public auction, 12th September.
Ottawa and Matawin. To commence at the mouth of the River Matawin and extend up the River Ottawa five miles more or less to the limit licensed to Richard McConnell at Jackson's Point, and up the Matawin seven miles more or less, to a point one mile below Pin Rapids, and back to R. McConnell's limit above mentioned. The western boundary to be on the course north, 6°45' east. Not to interfere with prior licenses existing or to be renewed in virtue of regulations on the 12th day of September, 1860			Bought at public auction, 12th September.
			Bought at public auction, 12th September.

DEPARTMENT OF CROWN LANDS.
Ottawa, 13th June 1866.

CROWN TIMBER REGULATIONS.

Notice is hereby given that the Regulations for granting Licenses to cut Timber on Public Lands, dated 8th August, 1851, are superseded, and that, from and after the date hereof, Timber Licenses and the renewals thereof shall be granted in the manner and under the conditions prescribed in the following Regulations, sanctioned by HIS EXCELLENCY THE GOVERNOR GENERAL in Council, by Order dated the 12th instant; in addition to the requirements of the Act, Consolidated Statutes of Canada, Cap. 23.

1. Licenses for such vacant berth as the Commissioner of Crown Lands may see fit, together with all vacant forfeited Timber Licenses, shall be offered for sale at Public Auctions, to be held half yearly in each Timber Agency, on the 10th of July and the 10th of January (or on such other dates as the Commissioner of Crown Lands may fix by Public Notice,) at an upset price of Four dollars a square mile or such other rate as he may fix by such notice, and shall be awarded to the highest bidder making immediate payment at the time of sale; and if not then sold shall be granted to the first applicant thereafter making immediate payment of the upset price and ground rent. But in case of two or more applications for any such berth being received at the same time, it shall be immediately again offered for sale by Public Auction. Unissued Licenses already awarded however, and such as may be awarded by the Commissioner of Crown Lands on existing grantable applications, under Regulations of 8th August, 1851, shall be granted on the terms upon which they have been or may be awarded. In the intervals between sales, licenses for new Timber Berths for which applications may be made to the Commissioner of Crown Lands or Crown Timber Agent for the territory in which they lie, may be granted to the first applicants paying in with their applications the upset price and ground rent above mentioned. Not more than one berth to each applicant, the bonus to be returned should the berth be relinquished as valueless within six months without cutting timber on it.

2. Applications must be in writing and the spaces asked in them must be distinctly described in connexion with known points established by survey or boundaries already defined, or, if in surveyed townships, the lots and ranges must be stated.

3. No Timber Berth shall be licensed in unsurveyed lands exceeding ten miles in length by five miles in breadth, or fifty superficial miles in area, and half that size in surveyed townships, the area to be estimated by the Crown Timber Agent, or other authorized officer.

4. All Timber Licenses are to expire on the 30th April following the date thereof.

5. Newly granted licenses, and renewals of licenses that have been duly occupied, shall be subject to a yearly Ground Rent of fifty cents each superficial mile of area included within their limits, estimated as before mentioned; but in computing the ground rent no license shall be charged at less than eight miles of area.

6. The Ground Rent to be exacted on the renewal of any license shall be double that of the preceding year if the berth licensed has not been duly occupied, increasing annually in that proportion while the berth continues unoccupied (excepting the year succeeding that in which the license has been first granted, if not in a surveyed township); but the so increasing ground rent shall not exceed the rate of twenty-three shillings and fourpence a mile (being equal to the lowest amount of duties on square timber the ground would yield if duly occupied, added to the rate of fifty cents first mentioned)—reverting to the original rate on the berth being duly occupied. The making of an average of five hundred feet of square timber or 20 saw logs to the mile, to be considered as due occupation. No claim for reimbursement of ground rent overcalculated to be entertained after the issue of license.

7. No Timber Berth shall be forfeited for the non-occupation of it, provided the increased ground rent on that account be duly paid; but any berth on which increased ground rent is evaded by false statements as to occupation, shall (after the holder of it has had an opportunity of being heard in opposition,) be granted to the first applicant

pleading such evasion before the first day of November, and proving the same by the affidavit of a commissioned Surveyor before the first day of December following the date of the false statement made. If half occupation only be proved, the holder of the license may retain one-half of the berth after it has been equitably divided by the Crown Timber Agent.

8. License holders who shall have duly complied with all existing Regulations shall be entitled to renewals of their licenses, provided they shall have made and delivered to the Crown Timber Agent of the locality, before the thirtieth day of September, or such prior date in any locality as the Commissioner may fix, sworn statements of the number and description of pieces of timber and saw logs cut by themselves or by others to their knowledge upon each of the berths held by them, during the previous season; and shall have paid to the Crown, on or before the fifth day of December following, the ground rent payable for renewal of their licenses for the ensuing season; but should they fail to comply with these conditions in respect to any berths held by them, such berths shall thereby become vacant and the right to license therefore forfeited, and they shall be sold at public auction or be otherwise disposed of as before mentioned, excepting that if double the ground rent otherwise chargeable be paid for omitting to furnish the statement above mentioned, and payment be made before the day of sale with ten per cent. in addition for each month of the delay in payment, the berth may be re-licensed to the former holder.

9. License holders desirous of obtaining renewal of license must make application for such renewal to the Crown Timber Agent of the locality before the 1st July in each year, stating what berths have been duly occupied, failing which such berths shall be charged with the rate of ground rent payable on non-occupation.

10. Crown Timber Agents shall keep registers of all licenses granted or renewed by them and transfers thereof, which, together with their plans of licensed berths and vacant ground, shall be open for public inspection.

11. Transfers of Timber Berths to be in writing, and if not found objectionable by the Crown Land Department or Agent for the granting of Licenses, to be valid from the date on which they may be deposited in the hands of the latter; but no transfer to be accepted while the party transferring is in default for non-payment of dues on timber to the Crown.

12. Timber Berths are to be described in new licenses as "not to interfere with prior licenses existing or to be renewed in virtue of Regulations" on the date of their first being issued. Where licenses clash, the one of more recent origin is to give way to that of prior date, computing back to the season it was last acquired at auction or by grant from the Crown. And should any license by error or defect in its description be found evidently incompatible with the intention or regulations under which it was granted, the Commissioner of Crown Lands may cause it to be cancelled or amended.

13. The Inspector of Crown Timber Agencies at Ottawa, and any officer thereunto authorized elsewhere, shall, at the written request of any party interested, issue instructions stating how the boundaries of Timber Berths should be run to be in conformity with existing licenses. The surveys are to be performed at the expense of the parties requiring them, who must cause copies of the plans and field notes of the surveys to be delivered to the officer giving the instructions, subject to his examination and approval, to be paid for by him and kept of record by the Crown Timber Agent of the locality.

14. In cases of contestation as to the right to berths or the position of bounds, the decision of the Crown Timber Agent of the locality or the Inspector of Crown Timber Agencies or other officer authorized by the Commissioner of Crown Lands, shall, on notification thereof being given to the parties or their representatives on their premises or sent to their address, be binding upon the parties, unless reversed by arbitration commenced within three months of such notification.

15. To prevent delay or disputes as to arbitrators it shall only be necessary for the party thinking himself aggrieved by such decision, to notify in writing to the officer who has given it, his dissent, and the arbitrator he has appointed. It shall then be the duty of the officer who has given the decision to take the place of arbitrator on the other part, and in case of their not agreeing as to an umpire, should one be required, the Commissioner of Crown Lands shall appoint one, on the request of either of the parties or either

of the arbitrators; such arbitrators may receive evidence obtained subsequent to the decision, and each of them and the umpire are to be paid five dollars for each day they are engaged on such arbitration, by the parties jointly.

16. Timber cut under license shall be paid for at the following rates, viz. :—

	s.	d.
Oak and Walnut per cubic foot.....	0	1½
Elm, Ash, and Tamarac.....	0	1
Red and White Pine, Birch, Basswood, Cedar, Spruce, etc.....	0	0½
Pine Saw Logs, each 13½ feet long.....	0	6
Or ten cents per standard log of 13½ feet 20 inches in least diameter		
Unmeasured culls to be charged at average of the lot they are in.		
Spruce Saw Logs, each 13½ feet long.....	0	2½
Staves, Pipe, per mille.....	32	6
Do W. Indian.....	10	0
Cord Wood (hard) per cord.....	0	8
Soft do do	0	4
Railway timber, knees, &c., 10 per cent. <i>ad valorem</i> .		

To be charged upon the quantities shewn by measurement under direction of the Supervisor of Cullers or Deputy Supervisor at Quebec or Montreal or other place of sale or shipment, or by other reliable measurement, where that cannot be obtained, otherwise each stick of White Pine may be estimated as containing 70 cubic feet.

Red Pine as containing 38 cubic feet.

Other kinds of wood 34 do

And when any license holder is in default for, or has evaded the payment of, dues to the Crown on any part of his timber, they may be levied on any other timber of his, cut under license, together with the dues thereon.

17. All square timber, logs, deals, boards or other stuff leaving the Agency in which it has been cut, in any form, must be submitted to counting or actual measurement, and statements under oath must be furnished as to the quantities of timber and logs cut under license whenever required. Owners or lessees of Saw Mills cutting under license must shew by such sworn statements the total number of each kind and length of logs cut or acquired by them and taken to their mills, or where left each season, giving the number in standards also, and must prove by satisfactory affidavits on what lots and how many on each lot, such as are from private lands, have been cut; clearances to be refused in case of non compliance.

18. Before moving any raft or parcel of timber, lumber or Saw Logs from the Agency in which it has been cut, the owner or person in charge thereof shall make report thereof to the Crown Timber Agent, making, if required, declaration upon oath as to the number of pieces of each kind of wood contained therein, and the number of cribs; and to exempt timber from private land, if any, from dues as Crown timber, must furnish satisfactory affidavit, stating what lots it was cut upon and how much on each lot, whereupon he shall obtain a clearance from the Crown Timber Agent, stating the number of pieces in the raft or parcel, how many, if any, have been satisfactorily proved to be from private lands, and on how many, if any, the dues have been previously or then paid. On the arrival of any such raft or parcel at Quebec, or any intermediate place, or other port, for sale or shipment, the owner or holder of it shall make report thereof to the Collector of Crown Timber Dues or Deputy Supervisor of Cullers, or other appointed officer, within forty-eight hours, and in addition to the quantity shewn by the clearance as subject to dues any surplus timber beyond the number of pieces stated therein, on being ascertained by the Collector of Crown Timber Dues, Deputy Supervisor of Cullers or other authorized officer, if not satisfactorily accounted for, shall be held as having been cut upon Crown Lands and be subject to the payment of dues accordingly.

19. Parties omitting to report the departure of their rafts or other timber from the Agency in which they held license, or the arrival thereof at Quebec or Montreal or other port or place, for sale or shipment, within the Province, as before mentioned, may be refused further license, and be subject to forfeiture of the timber for evasion of Regulations, as provided in section 3rd of Cap. 23 of the Consolidated Statutes of Canada.

20. Occupants, grantees or purchasers of Public Lands who have not completed all

JOS. F. WAY,
Crown Timber Agent.

CROWN TIMBER OFFICE,
Belleville, 20th January, 1868.

For "Conditions of Licenses," see Form of License at the end of Regulations.

DEPARTMENT OF CROWN LANDS,
Ottawa, 13th June 1866.

CROWN TIMBER REGULATIONS.

Notice is hereby given that the Regulations for granting Licenses to cut Timber on Public Lands, dated 8th August, 1851, are superseded, and that, from and after the date hereof, Timber Licenses and the renewals thereof shall be granted in the manner and under the conditions prescribed in the following Regulations, sanctioned by HIS EXCELLENCY THE GOVERNOR GENERAL in Council, by Order dated the 12th instant; in addition to the requirements of the Act, Consolidated Statutes of Canada, Cap. 23.

1. Licenses for such vacant berth as the Commissioner of Crown Lands may see fit, together with all vacant forfeited Timber Licenses, shall be offered for sale at Public Auctions, to be held half yearly in each Timber Agency, on the 10th of July and the 10th of January (or on such other dates as the Commissioner of Crown Lands may fix by Public Notice,) at an upset price of Four dollars a square mile or such other rate as he may fix by such notice, and shall be awarded to the highest bidder making immediate payment at the time of sale; and if not then sold shall be granted to the first applicant thereafter making immediate payment of the upset price and ground rent. But in case of two or more applications for any such berth being received at the same time, it shall be immediately again offered for sale by Public Auction. Unissued Licenses already awarded however, and such as may be awarded by the Commissioner of Crown Lands on existing grantable applications, under Regulations of 8th August, 1851, shall be granted on the terms upon which they have been or may be awarded. In the intervals between sales, licenses for new Timber Berths for which applications may be made to the Commissioner of Crown Lands or Crown Timber Agent for the territory in which they lie, may be granted to the first applicants paying in with their applications the upset price and ground rent above mentioned. Not more than one berth to each applicant, the bonus to be returned should the berth be relinquished as valueless within six months without cutting timber on it.

2. Applications must be in writing and the spaces asked in them must be distinctly described in connexion with known points established by survey or boundaries already defined, or, if in surveyed townships, the lots and ranges must be stated.

3. No Timber Berth shall be licensed in unsurveyed lands exceeding ten miles in length by five miles in breadth, or fifty superficial miles in area, and half that size in surveyed townships, the area to be estimated by the Crown Timber Agent, or other authorized officer.

4. All Timber Licenses are to expire on the 30th April following the date thereof.

5. Newly granted licenses, and renewals of licenses that have been duly occupied, shall be subject to a yearly Ground Rent of fifty cents each superficial mile of area included within their limits, estimated as before mentioned; but in computing the ground rent no license shall be charged at less than eight miles of area.

6. The Ground Rent to be exacted on the renewal of any license shall be double that of the preceding year if the berth licensed has not been duly occupied, increasing annually in that proportion while the berth continues unoccupied (excepting the year succeeding that in which the license has been first granted, if not in a surveyed town-

ship); but the so increasing ground rent shall not exceed the rate of twenty-three shillings and fourpence a mile (being equal to the lowest amount of duties on square timber the ground would yield if duly occupied, added to the rate of fifty cents first mentioned)—reverting to the original rate on the berth being duly occupied. The making of an average of five hundred feet of square timber or 20 saw logs to the mile, to be considered as due occupation. No claim for reimbursement of ground rent overcalculated to be entertained after the issue of license.

7. No Timber Berth shall be forfeited for the non-occupation of it, provided the increased ground rent on that account be duly paid; but any berth on which increased ground rent is evaded by false statements as to occupation, shall (after the holder of it has had an opportunity of being heard in opposition,) be granted to the first applicant pleading such evasion before the first day of November, and proving the same by the affidavit of a commissioned Surveyor before the first day of December following the date of the false statement made. If half occupation only be proved, the holder of the license may retain one-half of the berth after it has been equitably divided by the Crown Timber Agent.

8. License holders who shall have duly complied with all existing Regulations shall be entitled to renewals of their licenses, provided they shall have made and delivered to the Crown Timber Agent of the locality, before the thirtieth day of September, or such prior date in any locality as the Commissioner may fix, sworn statements of the number and description of pieces of timber and saw logs cut by themselves or by others to their knowledge upon each of the berths held by them, during the previous season; and shall have paid to the Crown, on or before the fifth day of December following, the ground rent payable for renewal of their licenses for the ensuing season; but should they fail to comply with these conditions in respect to any berths held by them, such berths shall thereby become vacant and the right to license therefore forfeited, and they shall be sold at public auction or be otherwise disposed of as before mentioned, excepting that if double the ground rent otherwise chargeable be paid for omitting to furnish the statement above mentioned, and payment be made before the day of sale with ten per cent. in addition for each month of the delay in payment, the berth may be re-licensed to the former holder.

9. License holders desirous of obtaining renewal of license must make application for such renewal to the Crown Timber Agent of the locality before the 1st July in each year, stating what berths have been duly occupied, failing which such berths shall be charged with the rate of ground rent payable on non-occupation.

10. Crown Timber Agents shall keep registers of all licenses granted or renewed by them and transfers thereof, which, together with their plans of licensed berths and vacant ground, shall be open for public inspection.

11. Transfers of Timber Berths to be in writing, and if not found objectionable by the Crown Land Department or Agent for the granting of Licenses, to be valid from the date on which they may be deposited in the hands of the latter; but no transfer to be accepted while the party transferring is in default for non-payment of dues on timber to the Crown.

12. Timber Berths are to be described in new licenses as “not to interfere with prior licenses existing or to be renewed in virtue of Regulations” on the date of their first being issued. Where licenses clash, the one of more recent origin is to give way to that of prior date, computing back to the season it was last acquired at auction or by grant from the Crown. And should any license by error or defect in its description be found evidently incompatible with the intention or regulations under which it was granted, the Commissioner of Crown Lands may cause it to be cancelled or amended.

13. The Inspector of Crown Timber Agencies at Ottawa, and any officer thereunto authorized elsewhere, shall, at the written request of any party interested, issue instructions stating how the boundaries of Timber Berths should be run to be in conformity with existing licenses. The surveys are to be performed at the expense of the parties requiring them, who must cause copies of the plans and field notes of the surveys to be delivered to the officer giving the instructions, subject to his examination and approval, to be paid for by him and kept of record by the Crown Timber Agent of the locality.

14. In cases of contestation as to the right to berths or the position of bounds, the

decision of the Crown Timber Agent of the locality or the Inspector of Crown Timber Agencies or other officer authorized by the Commissioner of Crown Lands, shall, on notification thereof being given to the parties or their representatives on their premises or sent to their address, be binding upon the parties, unless reversed by arbitration commenced within three months of such notification.

15. To prevent delay or disputes as to arbitrators it shall only be necessary for the party thinking himself aggrieved by such decision, to notify in writing to the officer who has given it, his dissent, and the arbitrator he has appointed. It shall then be the duty of the officer who has given the decision to take the place of arbitrator on the other part, and in case of their not agreeing as to an umpire, should one be required, the Commissioner of Crown Lands shall appoint one, on the request of either of the parties or either of the arbitrators; such arbitrators may receive evidence obtained subsequent to the decision, and each of them and the umpire are to be paid five dollars for each day they are engaged on such arbitration, by the parties jointly.

16. Timber cut under license shall be paid for at the following rates, viz:—

	s.	d.
Oak and Walnut per cubic foot.....	0	1½
Elm, Ash, and Tamarac.....	0	1
Red and White Pine, Birch, Basswood, Cedar, Spruce, etc.....	0	0½
Pine Saw Logs, each 13½ feet long.....	0	6
Or ten cents per standard log of 13½ feet 20 inches in least diameter		
Unmeasured culls to be charged at average of the lot they are in.		
Spruce Saw Logs, each 13½ feet long.....	0	2½
Staves, Pipe, per mille.....	32	6
Do W. Indian.....	10	0
Cord Wood (hard) per cord.....	0	8
Soft do do	0	4
Railway timber, knees, &c., 10 per cent. <i>ad valorem</i> .		

To be charged upon the quantities shewn by measurement under direction of the Supervisor of Cullers or Deputy Supervisor at Quebec or Montreal or other place of sale or shipment, or by other reliable measurement, where that cannot be obtained, otherwise each stick of White Pine may be estimated as containing 70 cubic feet.

Red Pine as containing 38 cubic feet.

Other kinds of wood 34 do

And when any license holder is in default for, or has evaded the payment of, dues to the Crown on any part of his timber, they may be levied on any other timber of his, cut under license, together with the dues thereon.

17. All square timber, logs, deals, boards or other stuff leaving the Agency in which it has been cut, in any form, must be submitted to counting or actual measurement, and statements under oath must be furnished as to the quantities of timber and logs cut under license whenever required. Owners or lessees of Saw Mills cutting under license must shew by such sworn statements the total number of each kind and length of logs cut or acquired by them and taken to their mills, or where left each season, giving the number in standards also, and must prove by satisfactory affidavits on what lots and how many on each lot, such as are from private lands, have been cut; clearances to be refused in case of non compliance.

18. Before moving any raft or parcel of timber, lumber or Saw Logs from the Agency in which it has been cut, the owner or person in charge thereof shall make report thereof to the Crown Timber Agent, making, if required, declaration upon oath as to the number of pieces of each kind of wood contained therein, and the number of cribs; and to exempt timber from private land, if any, from dues as Crown timber, must furnish satisfactory affidavit, stating what lots it was cut upon and how much on each lot, whereupon he shall obtain a clearance from the Crown Timber Agent, stating the number of pieces in the raft or parcel, how many, if any, have been satisfactorily proved to be from private lands, and on how many, if any, the dues have been previously or then paid. On the arrival of any such raft or parcel at Quebec, or any intermediate place, or other port, for

sale or shipment, the owner or holder of it shall make report thereof to the Collector of Crown Timber Dues or Deputy Supervisor of Cullers, or other appointed officer, within forty-eight hours, and in addition to the quantity shewn by the clearance as subject to dues any surplus timber beyond the number of pieces stated therein, on being ascertained by the Collector of Crown Timber Dues, Deputy Supervisor of Cullers or other authorized officer, if not satisfactorily accounted for, shall be held as having been cut upon Crown Lands and be subject to the payment of dues accordingly.

19. Parties omitting to report the departure of their rafts or other timber from the Agency in which they held license, or the arrival thereof at Quebec or Montreal or other port or place, for sale or shipment, within the Province, as before mentioned, may be refused further license, and be subject to forfeiture of the timber for evasion of Regulations, as provided in section 3rd of Cap. 23 of the Consolidated Statutes of Canada.

20. Occupants, grantees or purchasers of Public Lands who have not completed all conditions of sale or grant, cutting timber without license (except for clearing, building or fencing thereon), or others doing so by their permission, shall be subjected to the penalties established by law for cutting timber without authority.

21. Persons evading or refusing the payment of timber or slide dues, or the final settlement of bonds or promissory notes, given for the same, or in default with the Crown Timber Office or Agent; also persons taking violent possession of disputed ground before obtaining decision in their favor, and persons refusing to comply with the decision of arbitrators or with Regulations established by Orders in Council, or who forcibly interrupt Surveyors, shall be refused further licenses, and their berths become disposable to others on the expiration of their licenses.

22. Licenses are to be granted on the annexed form in duplicate; the clause at the foot thereof must in the duplicates be signed by two securities; and the description of each berth is to be written on the back thereof. The duplicates to be kept of record by the Crown Timber Agent.

23. Dues of all kinds on timber cut under license, remaining unpaid on 30th November following the season in which it was cut, to be subject to interest from that date, but without prejudice to the power of the Crown to enforce payment of such outstanding dues.

FORM OF LICENSE.

By authority of the Consolidated Statutes of Canada, Cap. 23, and Regulations dated 13th of June, 1866, and for and in consideration of the payments made, and to be made to Her Majesty:—

I do hereby give unto _____ and unto _____
 Agents and Workmen full power and License to cut _____ upon the Location
 described on the back hereof by _____ and to hold and occupy the said Loca-
 tion to the exclusion of all others, except as hereinafter mentioned:—from
 to Thirtieth April, 18____, and no longer; with the right of conveying away the said
 Timber _____ through any ungranted or waste lands of the Crown:—

And by virtue of this License the said Licentiate has right by the said Provincial
 Statute to all Timber cut by others during the term of this license in trespass on the
 ground hereby assigned, with full power to seize and recover the same anywhere within
 this Province aforesaid.

But this License is subject to the following conditions, viz:—

That any person or persons may at all times make and use Roads upon, and travel
 over the ground hereby licensed, and cut and take therefrom any trees under ten inches
 in the largest part in thickness, necessary to make Floats, Traverses, Oars and Withes for
 his or their use in rafting Timber or Saw Logs being rafted in the immediate vicinity
 thereof.

That nothing herein shall prevent any person or persons from taking Standing
 Timber of any kind to be used for the making of Roads or Bridges, or for Public Works.

And that persons settling under lawful authority or title within the location hereby
 licensed, shall not in any way be interrupted in clearing and cultivation by the said

Licentiate, or any one acting for _____ or by _____ permission.
 And further, under condition that the said Licentiate or _____ representa-
 tives shall comply with all regulations that are or may be established by Order in Council,
 and shall submit all the Timber cut under this License to be counted or measured, and
 settle for the Duties chargeable thereon, when required by me or any officer thereunto
 authorized, otherwise the said Timber will be forfeited to the Crown, and the said
 Licentiate be subject to such other penalty or penalties as the Act provides.

Given under my hand at _____ the _____ day of _____
 in the year of our Lord one thousand eight hundred and sixty _____, in duplicate.

Ground Rent payable on giving this License, fifty cents per square mile, Single
 Ground Rent; rate increased when unoccupied, as per Regulations.

 *We have read and comprehend the nature of the obligations contained in this License, and we bind ourselves jointly and severally, and each of Our Heirs, Executors, Curators, and Administrators, to pay all duties that may become due and payable to Her Majesty, Her Heirs, or Successors, on any Timber cut or acquired by virtue of this License, in the event of the above named Licentiate failing or refusing to pay the same, or to give satisfactory Bonds for the payment thereof.*

LOCALITY.	REMARKS. (When new license, full description to be given.) All changes in the description of licenses, and all transfers, and the date thereof, to be noted.	Date of reception of application for renewal.
River Muskoka	To commence on the north bank of the River Muskoka, 20 miles from the mouth of said River, and thence to extend up the said bank a distance of ten and a half miles in depth thereof, to be measured according to the general bearings of said river.	
do	To commence at the mouth of the south bank of the River Muskoka, and extend up said south bank ten and a half miles in depth thereof, to be measured according to the general bearings of said river.	
do	To commence at a point on the south bank of the River Muskoka, ten miles from the mouth of said river, and thence to extend up said south bank a distance of ten and a half miles in depth thereof, to be measured according to the general bearings of said river.	
do	To commence at a point on the south bank of the River Muskoka, twenty miles from the mouth of said river, and thence to extend up said bank a distance of ten and a half miles in depth thereof, to be measured according to the general bearings of said river.	
Black River	To commence at the termination of Mr. Joseph Smith's limit on the Black River, thence extending up on the north side of the said river a distance of ten miles, and back on said north side of said river two miles, following the general bearings of said river and at right angles thereto, &c.	
do	To commence at the upper boundary of license No. 21 of 1859-60, on the north side of Black River; thence extending up the said north side a distance of five miles, with a depth on said north side of two miles, following the general bearing of the river and at right angles thereto.	
do	To commence at the termination of Mr. Joseph Smith's limit on the Black River, thence extending up on the south side of said Black River a distance of ten miles and back one mile and one-half mile on the said south side thereof, following the general course of the said river, and at right angles thereto.	
Islands on River Severn	To embrace all the islands on the River Severn and on the bays and lakes thereof, opposite to the limits granted to Andrew Heron, Esq., with the exception of those islands situated at the mouth of said River Severn, leased by Government for milling purposes. Not to interfere with prior licenses existing or to be renewed in virtue of Regulations of Crown Land Department.	
River Severn	To commence about five miles from the mouth of the Severn, at the upper boundary of the limit licensed to Andrew Heron, and to run up ten miles and five miles back on the north side of said river and at right angles thereto.	
do	To commence about fifteen miles from the mouth of the River Severn, at the upper boundary of limit licensed to W. F. Powell, and to run up ten miles and to run five miles back on the north side of said river and at right angles thereto.

JOHN R. NASH,

Crown Timber Agent.

For "Conditions of Licenses," see Form of License at the end of Regulations.

DEPARTMENT OF CROWN LANDS,
Ottawa, 13th June 1866.

CROWN TIMBER REGULATIONS.

Notice is hereby given that the Regulations for granting Licenses to cut Timber on Public Lands, dated 8th August, 1851, are superseded, and that, from and after the date hereof, Timber Licenses and the renewals thereof shall be granted in the manner and under the conditions prescribed in the following Regulations, sanctioned by HIS EXCELLENCY THE GOVERNOR GENERAL in Council, by Order dated the 12th instant; in addition to the requirements of the Act, Consolidated Statutes of Canada, Cap. 23.

1. Licenses for such vacant berth as the Commissioner of Crown Lands may see fit, together with all vacant forfeited Timber Licenses, shall be offered for sale at Public Auctions, to be held half yearly in each Timber Agency, on the 10th of July and the 10th of January (or on such other dates as the Commissioner of Crown Lands may fix by Public Notice,) at an upset price of Four dollars a square mile or such other rate as he may fix by such notice, and shall be awarded to the highest bidder making immediate payment at the time of sale; and if not then sold shall be granted to the first applicant thereafter making immediate payment of the upset price and ground rent. But in case of two or more applications for any such berth being received at the same time, it shall be immediately again offered for sale by Public Auction. Unissued Licenses already awarded however, and such as may be awarded by the Commissioner of Crown Lands on existing grantable applications, under Regulations of 8th August, 1851, shall be granted on the terms upon which they have been or may be awarded. In the intervals between sales, licenses for new Timber Berths for which applications may be made to the Commissioner of Crown Lands or Crown Timber Agent for the territory in which they lie, may be granted to the first applicants paying in with their applications the upset price and ground rent above mentioned. Not more than one berth to each applicant, the bonus to be returned should the berth be relinquished as valueless within six months without cutting timber on it.

2. Applications must be in writing and the spaces asked in them must be distinctly described in connexion with known points established by survey or boundaries already defined, or, if in surveyed townships, the lots and ranges must be stated.

3. No Timber Berth shall be licensed in unsurveyed lands exceeding ten miles in length by five miles in breadth, or fifty superficial miles in area, and half that size in surveyed townships, the area to be estimated by the Crown Timber Agent, or other authorized officer.

4. All Timber Licenses are to expire on the 30th April following the date thereof.

5. Newly granted licenses, and renewals of licenses that have been duly occupied, shall be subject to a yearly Ground Rent of fifty cents each superficial mile of area included within their limits, estimated as before mentioned; but in computing the ground rent no license shall be charged at less than eight miles of area.

6. The Ground Rent to be exacted on the renewal of any license shall be double that of the preceding year if the berth licensed has not been duly occupied, increasing annually in that proportion while the berth continues unoccupied (excepting the year succeeding that in which the license has been first granted, if not in a surveyed township); but the so increasing ground rent shall not exceed the rate of twenty-three shillings and fourpence a mile (being equal to the lowest amount of duties on square timber the ground would yield if duly occupied, added to the rate of fifty cents first mentioned) — reverting to the original rate on the berth being duly occupied. The making of an average of five hundred feet of square timber or 20 saw logs to the mile, to be considered as due occupation. No claim for reimbursement of ground rent overcalculated to be entertained after the issue of license.

7. No Timber Berth shall be forfeited for the non-occupation of it, provided the increased ground rent on that account be duly paid; but any berth on which increased ground rent is evaded by false statements as to occupation, shall (after the holder of it has had an opportunity of being heard in opposition,) be granted to the first applicant pleading such evasion before the first day of November, and proving the same by the

affidavit of a commissioned Surveyor before the first day of December following the date of the false statement made. If half occupation only be proved, the holder of the license may retain one-half of the berth after it has been equitably divided by the Crown Timber Agent.

8. License holders who shall have duly complied with all existing Regulations shall be entitled to renewals of their licenses, provided they shall have made and delivered to the Crown Timber Agent of the locality, before the thirtieth day of September, or such prior date in any locality as the Commissioner may fix, sworn statements of the number and description of pieces of timber and saw logs cut by themselves or by others to their knowledge upon each of the berths held by them, during the previous season; and shall have paid to the Crown, on or before the fifth day of December following, the ground rent payable for renewal of their licenses for the ensuing season; but should they fail to comply with these conditions in respect to any berths held by them, such berths shall thereby become vacant and the right to license therefore forfeited, and they shall be sold at public auction or be otherwise disposed of as before mentioned, excepting that if double the ground rent otherwise chargeable be paid for omitting to furnish the statement above mentioned, and payment be made before the day of sale with ten per cent. in addition for each month of the delay in payment, the berth may be re-licensed to the former holder.

9. License holders desirous of obtaining renewal of license must make application for such renewal to the Crown Timber Agent of the locality before the 1st July in each year, stating what berths have been duly occupied, failing which such berths shall be charged with the rate of ground rent payable on non-occupation.

10. Crown Timber Agents shall keep registers of all licenses granted or renewed by them and transfers thereof, which, together with their plans of licensed berths and vacant ground, shall be open for public inspection.

11. Transfers of Timber Berths to be in writing, and if not found objectionable by the Crown Land Department or Agent for the granting of Licenses, to be valid from the date on which they may be deposited in the hands of the latter; but no transfer to be accepted while the party transferring is in default for non-payment of dues on timber to the Crown.

12. Timber Berths are to be described in new licenses as "not to interfere with prior licenses existing or to be renewed in virtue of Regulations" on the date of their first being issued. Where licenses clash, the one of more recent origin is to give way to that of prior date, computing back to the season it was last acquired at auction or by grant from the Crown. And should any license by error or defect in its description be found evidently incompatible with the intention or regulations under which it was granted, the Commissioner of Crown Lands may cause it to be cancelled or amended.

13. The Inspector of Crown Timber Agencies at Ottawa, and any officer thereunto authorized elsewhere, shall, at the written request of any party interested, issue instructions stating how the boundaries of Timber Berths should be run to be in conformity with existing licenses. The surveys are to be performed at the expense of the parties requiring them, who must cause copies of the plans and field notes of the surveys to be delivered to the officer giving the instructions, subject to his examination and approval, to be paid for by him and kept of record by the Crown Timber Agent of the locality.

14. In cases of contestation as to the right to berths or the position of bounds, the decision of the Crown Timber Agent of the locality or the Inspector of Crown Timber Agencies or other officer authorized by the Commissioner of Crown Lands, shall, on notification thereof being given to the parties or their representatives on their premises or sent to their address, be binding upon the parties, unless reversed by arbitration commenced within three months of such notification.

15. To prevent delay or disputes as to arbitrators it shall only be necessary for the party thinking himself aggrieved by such decision, to notify in writing to the officer who has given it, his dissent, and the arbitrator he has appointed. It shall then be the duty of the officer who has given the decision to take the place of arbitrator on the other part, and in case of their not agreeing as to an umpire, should one be required, the Commissioner of Crown Lands shall appoint one, on the request of either of the parties or either of the arbitrators; such arbitrators may receive evidence obtained subsequent to the de-

cision, and each of them and the umpire are to be paid five dollars for each day they are engaged on such arbitration, by the parties jointly.

16. Timber cut under license shall be paid for at the following rates, viz. :—

	s.	d.
Oak and Walnut per cubic foot.....	0	1½
Elm, Ash, and Tamarac.....	0	1
Red and White Pine, Birch, Basswood, Cedar, Spruce, etc.....	0	0½
Pine Saw Logs, each 13½ feet long.....	0	6
Or ten cents per standard log of 13½ feet 20 inches in least diameter		
Unmeasured culls to be charged at average of the lot they are in.		
Spruce Saw Logs, each 13½ feet long.....	0	2½
Staves, Pipe, per mille.....	32	6
Do W. Indian.....	10	0
Cord Wood (hard) per cord.....	0	8
Soft do do.....	0	4
Railway timber, knees, &c., 10 per cent. <i>ad valorem</i> .		

To be charged upon the quantities shewn by measurement under direction of the Supervisor of Cullers or Deputy Supervisor at Quebec or Montreal or other place of sale or shipment, or by other reliable measurement, where that cannot be obtained, otherwise each stick of White Pine may be estimated as containing 70 cubic feet.

Red Pine as containing 38 cubic feet.

Other kinds of wood 34 do

And when any license holder is in default for, or has evaded the payment of, dues to the Crown on any part of his timber, they may be levied on any other timber of his, cut under license, together with the dues thereon.

17. All square timber, logs, deals, boards or other stuff leaving the Agency in which it has been cut, in any form, must be submitted to counting or actual measurement, and statements under oath must be furnished as to the quantities of timber and logs cut under license whenever required. Owners or lessees of Saw Mills cutting under license must shew by such sworn statements the total number of each kind and length of logs cut or acquired by them and taken to their mills, or where left each season, giving the number in standards also, and must prove by satisfactory affidavits on what lots and how many on each lot, such as are from private lands, have been cut; clearances to be refused in case of non compliance.

18. Before moving any raft or parcel of timber, lumber or Saw Logs from the Agency in which it has been cut, the owner or person in charge thereof shall make report thereof to the Crown Timber Agent, making, if required, declaration upon oath as to the number of pieces of each kind of wood contained therein, and the number of cribs; and to exempt timber from private land, if any, from dues as Crown timber, must furnish satisfactory affidavit, stating what lots it was cut upon and how much on each lot, whereupon he shall obtain a clearance from the Crown Timber Agent, stating the number of pieces in the raft or parcel, how many, if any, have been satisfactorily proved to be from private lands, and on how many, if any, the dues have been previously or then paid. On the arrival of any such raft or parcel at Quebec, or any intermediate place, or other port, for sale or shipment, the owner or holder of it shall make report thereof to the Collector of Crown Timber Dues or Deputy Supervisor of Cullers, or other appointed officer, within forty-eight hours, and in addition to the quantity shewn by the clearance as subject to dues any surplus timber beyond the number of pieces stated therein, on being ascertained by the Collector of Crown Timber Dues, Deputy Supervisor of Cullers or other authorized officer, if not satisfactorily accounted for, shall be held as having been cut upon Crown Lands and be subject to the payment of dues accordingly.

19. Parties omitting to report the departure of their rafts or other timber from the Agency in which they held license, or the arrival thereof at Quebec or Montreal or other port or place, for sale or shipment, within the Province, as before mentioned, may be refused further license, and be subject to forfeiture of the timber for evasion of Regulations, as provided in section 3rd of Cap. 23 of the Consolidated Statutes of Canada.

20. Occupants, grantees or purchasers of Public Lands who have not completed all conditions of sale or grant, cutting timber without license (except for clearing, building
